Planographic plates. Multigraph Company, 321,757, Feb. 12, 1935. Republished July 20.
Rug pads. Dunlop Tire and Rubber Corporation. 430,577, June 17, 1947. Republished July 20.

LIST OF DESIGN PATENTEES

Ackerman, Seymour, Bell Harbor, assignor to Parker Watch Company, New York, N. Y. Watch box. 150,283, July 20.

Arpels, Claude, New York, N. Y. Wrist watch or similar article. 150,284, July 20.

Arpels, Claude, New York, N. Y. Wrist watch or similar article. 150,285, July 20.

Asch, Howard, New York, N. Y. Musical lamp or similar article. 150,286, July 20.

Bossard, Gisbert L., Cleveland, Ohio. Electric signalling device. 150,287, July 20.

Boyd, Francis O.: *See*—
Johanson, John E., and Boyd.

Chapman, David, Chicago, Ill., and W. Ramsay, assignors to Hankscraft Company, Madison, Wis. Baby dish. 150,288, July 20.

Conklin Pen Company Inc., The, assignee: *See*—
Starr, Joseph.

Coro, Inc., assignee: *See*—
Katz, Adolph.

Cory Corporation, assignee: *See*—
Richards, Harper.

Crapsey, Arthur H., Jr., assignor to Eastman Kodak Company, Rochester, N. Y. Box camera. 150,289, July 20.

Eastman Kodak Company, assignee: *See*—
Crapsey, Arthur H., Jr.

Frankel, Leo, Chicago, Ill. Photographic viewer. 150,290, July 20.

Friese, Kurt P., Norwalk, Conn. Work holder. 150,291, July 20.

Giannillo, Matteo, Brooklyn, N. Y. Combined cigarette and jewelry container. 150,292, July 20.

Grant, Robert Y., Jr., Townsend, Mass. Toy whistle. 150,293, July 20.

Hale, George E., assignee: *See*—
Ruskin, Henry.

Hankscraft Company, assignee: *See*—
Chapman, David, and Ramsay.

Harper, Philip S., assignor to Harper-Wyman Company, Chicago, Ill. Combined ash tray and pipe smoker's accessory. 150,294, July 20.

Harper-Wyman Company, assignee: *See*—
Harper, Philip S.

Hickok, Ward, assignee: *See*—
Roysher, Hudson B.

Hoskins, Herschel R., and F. M. Small, Los Angeles, Calif. Game board. 150,295, July 20.

Hubbard, Francis C., Minneapolis, Minn. Lawn sprinkler. 150,296, July 20.

Hutchinson, Roy A., Columbus, Ohio. Scribing tool. 150,297, July 20.

Johanson, John E., and F. O. Boyd, Boonton, N. J. Sun watch. 150,298, July 20.

Johnson, Wallace G., Baldwin Park, Calif. Instrument key guard or similar article. 150,299, July 20.

Katz, Adolph, Providence, R. I., assignor to Coro, Inc., New York, N. Y. Earring or similar article. 150,300, July 20.

Katz, Adolph, Providence, R. I., assignor to Coro, Inc., New York, N. Y. Necklace or similar article. 150,301, July 20.

Katz, Adolph, Providence, R. I., assignor to Coro, Inc., New York, N. Y. Brooch or similar article. 150,302, July 20.

Katz, Adolph, Providence, R. I., assignor to Coro, Inc., New York, N. Y. Necklace or similar article. 150,303, July 20.

Katz, Adolph, Providence, R. I., assignor to Coro, Inc., New York, N. Y. Earring or similar article. 150,304, July 20.

Kelm, Melville, Chicago, Ill. Combined hunter's belt, shell pocket and game carrier. 150,305, July 20.

Laufenberg, Inc., assignee: *See*—
Laufenberg, Virgil E.

Laufenberg, Virgil E., assignor to Laufenberg, Inc., Milwaukee, Wis. Drip pan for water closet tanks. 150,306, July 20.

Lee, Everett B., Meriden, Conn. Drawer pull. 150,307, July 20.

Mabs, Inc., assignee: *See*—
Minger, Robert E.

Mariani, Frank N., Washington Heights, N. Y. Fruit juice squeezer. 150,308, July 20.

McHugh, James S., Garden City, N. Y. Combined comb and nail file container or the like. 150,309, July 20.

Minger, Robert E., Manhattan Beach, assignor to Mabs, Inc., Los Angeles, Calif. Textile fabric or similar article. 150,310, July 20.

Moholy-Nagy, Laszlo, Chicago, Ill., assignor to The Parker Pen Company, Janesville, Wis. Fountain pen receptacle unit. 150,311, July 20.

Moholy-Nagy, Laszlo, Chicago, Ill., assignor to The Parker Pen Company, Janesville, Wis. Fountain pen receptacle unit. 150,312, July 20.

Moholy-Nagy, Laszlo, Chicago, Ill., assignor to The Parker Pen Company, Janesville, Wis. Fountain pen receptacle unit. 150,313, July 20.

Nettleton, Fred E., Saginaw, Mich. Dual wrench or the like. 150,314, July 20.

Parker Pen Company, The, assignee: *See*—
Moholy-Nagy, Laszlo.

Parker Watch Company, assignee: *See*—
Ackerman, Seymour.

Ramsay, Wayne: *See*—
Chapman, David, and Ramsay.

Richards, Harper, assignor to Cory Corporation, Chicago, Ill. Coffee maker stand. 150,315, July 20.

Richman, Frances, New York, N. Y. Ink container or similar article. 150,316, July 20.

Roysher, Hudson B., Los Angeles, assignor to Ward Hickok, Beverly Hills, Calif. Visual educational projector. 150,317, July 20.

Ruskin, Henry, assignor of one-half to G. E. Hale, Chicago, Ill. Safety razor. 150,318, July 20.

Sawyer, Lester T., Leominster, Mass. Comb. 150,319, July 20.

Small, Frances M.: *See*—
Hoskins, Herschel R., and Small.

Starr, Joseph, assignor to The Conklin Pen Company Inc., Chicago, Ill. Fountain pen. 150,320, July 20.

Strassner, John F., New York, N. Y. Dress. 150,321, July 20.

Strassner, John F., New York, N. Y. Coat. 150,322, July 20.

Stratton, Richard C., Green River, Wyo. Child's spoon or similar article. 150,323, July 20.

Tall, Nathan, Los Angeles, Calif. Link chain for a bracelet or similar article. 150,324, July 20.

Tenczar, John B., Wallingford, Conn. Ash receiver. 150,325, July 20.

Ulvad, Bernard, assignor to Fosgood Corporation, Leominster, Mass. Comb or the like. 150,326, July 20.

Zimmerman, Edward C., Winnetka, assignor to Zenith Camera Corporation, Chicago, Ill. Camera. 150,327, July 20.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 20TH DAY OF JULY, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Adelman, Reuben H.: *See*—
Flynn, Francis K., and Adelman.

Allinger, Jeremiah F., Dorchester, Mass. Slide rule. 2,445,464, July 20.

Albert, Harry E., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Synthetic rubber composition containing a reaction product of sulfur dichloride, an aldehyde and an alkyl phenol. 2,445,737, July 20.

Allen, Harry L., and H. G. Kleinguenther, Philadelphia, Pa., assignors to Allied Chemical & Dye Corporation, New York, N. Y. Recovery of paracoumarone type resins from polymerized resin oils. 2,445,654, July 20.

Allen, Harry L., and H. G. Kleinguenther, Philadelphia, Pa., assignors to Allied Chemical & Dye Corporation, New York, N. Y. Distillation of sulfuric acid treated hydrocarbon oils. 2,445,655, July 20.

Allen, Joseph F., Cleveland Heights, assignor to The Warner & Swasey Company, Cleveland, Ohio. Cutter life calculator. 2,445,381, July 20.

Allied Chemical & Dye Corporation, assignee: *See*—
Allen, Harry L., and Kleinguenther.
Porter, Frank, and Nesty.
Sievenpiper, Frederic L.

Allied Chemical and Dye Corporation, assignee: *See*—
Sweet, Alvin J.

Aluminum Company of America, assignee: *See*—
Thomas, John W.

American Cyanamid Company, assignee: *See*—
Davis, Arnold R.
Foster, George H., and Williams.

American Flange & Manufacturing Co., Inc., assignee: *See*—
Amesbury, Earl M., Franks, and Jesevich.

American Hyalsol Corporation, assignee: *See*—
Engelbrecht, Heins-Joachim.

American Machine and Foundry Company, assignee: *See*—
Sowa, Frank J.

American Steel and Wire Company, The, assignee: *See*—
Reardon, Eugene J.
Trenbath, Herbert W.

Amesbury, Earl M., T. W. Franks, and J. Jesevich, Jr., Chicago, Ill., assignors to American Flange & Manufacturing Co., Inc., New York, N. Y. Closure plug for containers. 2,445,465, July 20.

Anderson, Harvey R., Eureka, assignor to Keasbey & Mattison Company, Ambler, Pa. Insulating board and making the same. 2,445,415, July 20.

Arenco Aktiebolag, assignee: *See*—
Von Segebaden, Ernst.

Arnhym, Albert A., Los Angeles, assignor to Solar Aircraft Company, San Diego, Calif. Fluid fuel combustion device. 2,445,466, July 20.

Ashton, Benjamin N., assignor to Electrol Incorporated, Kingston, N. Y. Valve. 2,445,505, July 20.

Athanassiades, John E., Teheran, Iran. Multiple filament electric lamp. 2,445,656, July 20.

Aust, Robert J., assignor to P. R. Mallory & Co., Inc., Indianapolis, Ind. High-frequency vibrator. 2,445,382, July 20.

Baker, Rest R., Swissvale, and W. R. Harris, Wilkinsburg, assignors to Westinghouse Electric Corporation, East Pittsburgh, Pa. Control system for paper machine drives. 2,445,416, July 20.

Baker, Walter E., Boaz, Ala. Steam generating attachment for electric irons. 2,445,506, July 20.

Baldwin Locomotive Works, The, assignee: *See*—
Macgeorge, William D.

Barlow, George W., Salt Lake City, Utah. Screw driver having two-part expanding bit. 2,445,383, July 20.

Barnett, Allan E.: *See*—
Robey, Richard F., Fedirko, and Barnett.

Barry, Arthur W., Los Angeles, Calif. Rivet set retainer spring. 2,445,551, July 20.

Bartholomew, Robert J., assignor to Fletcher Works Incorporated, Philadelphia, Pa. Twisting machine. 2,445,721, July 20.

Bartlett, C. O., & Snow Company, The, assignee: *See*—
Hofmann, Maximilian P.

Batts, Jerry L., Rahns, Pa. Self-cleaning nonskid cross link. 2,445,507, July 20.

Bauer, Oliver F.: *See*—
Turner, Lyman H., Bauer, and Michelson.

Baxter, Jack E., Mariemont, Ohio. Display structure. 2,445,552, July 20.

Beavers, Ellington M., assignor to The Resinous Products & Chemical Company, Philadelphia, Pa. Pressure-sensitive adhesive sheet. 2,445,553, July 20.

Beleskas, Stanley M., Oaklyn, N. J., assignor to Radio Corporation of America. Reactance tube and modulator circuit. 2,445,508, July 20.

Bell Telephone Laboratories, Incorporated, assignee: *See*—
Pollard, Charles E., Jr.
Shank, Robert J.
Stratton, William D.

Bemis Bro. Bag Company, assignee: *See*—
Williams, Russell J.

Bendix Aviation Corporation, assignee: *See*—
Dickey, John W.
Douglas, Kenneth F.
Frei, Jakob R., and Purdy.
Hood, E. Elliott.
Stroszinski, Anthony J.
Trautman, Walter C.

Bengert, Edgar F., Kansas City, Mo., assignor of one-half to A. N. Brunson. Telescope mounting for guns. 2,445,595, July 20.

Bennett, Harold F., Rochester, N. Y., assignor, by mesne assignments, to the United States of America as represented by the Secretary of the Navy. Telecentric projection lens. 2,445,594, July 20.

Bennett, Paul G., Boston, Mass. Toothbrush. 2,445,657, July 20.

Benton, Gela J., and W. A. Schumacher, Chicago, Ill. Skin massager. 2,445,596, July 20.

Bergstrom, Eric V., Short Hills, N. J., assignor to Socony-Vacuum Oil Company, Incorporated. Heater. 2,445,554, July 20.

Berke, Aaron, assignor to Victory Container Corporation, New York, N. Y. Shipping container. 2,445,467, July 20.

Best, Chris E.: *See*—
Radcliffe, Milton R., and Best.

Binda, Frederick J., assignor to Polaroid Corporation, Cambridge, Mass. Light-polarizing polyvinyl sheet containing polyvinyl compound-boric acid complex. 2,445,555, July 20.

Bircher, Clifford M., assignor to The Maico Company, Incorporated, Minneapolis, Minn. Dry cell battery with terminal cap. 2,445,556, July 20.

Blahofberger, Carl J., and W. E. Edelman, assignors to Minneapolis-Honeywell Regulator Company, Minneapolis, Minn. Motor and brake construction. 2,445,658, July 20.

Bissell, William T., assignor to Journal Box Servicing Corporation, Indianapolis, Ind. Journal box. 2,445,597, July 20.

Blasier, Herbert E., South Pasadena, Calif. Grinding apparatus. 2,445,557, July 20.

Blohm, Clyde L., Los Angeles, F. C. Riesenfeld, Hollywood, and H. D. Frazier, Alhambra, assignors to The Fluor Corporation, Ltd., Los Angeles, Calif. Removal of acidic constituents from gases. 2,445,468, July 20.

Bohannon, William A., Uniondale, N. Y., assignor to Republic Aviation Corporation. Aircraft power plant structure. 2,445,417, July 20.

Boisseau, Alexander C., Lansdowne, Pa., assignor to General Electric Company. Circuit breaker operating mechanism. 2,445,558, July 20.

Bonard, Claude, administrator: *See*—
Dreyfus, Henry.

Boor, Francis H., Lafayette, Ind., assignor to Fairfield Manufacturing Company. Bevel gear. 2,445,559, July 20.

Booth, Earl C., assignor to Noblitt-Sparks Industries, Inc., Columbus, Ind. Ironing board leg and brace structure. 2,445,598, July 20.

Borg-Warner Corporation, assignee: *See*—
Bruestle, Carl O.
Carnagua, Harold E.
Pasnow, Bud W.

Bousky, Samuel, Shaker Heights, assignor, by mesne assignments, to Jack & Heints Precision Industries, Inc., Cleveland, Ohio. Erector system. 2,445,384, July 20.

Bouthillier, Auguste J. and J. P., assignors to Imperial Machine Corporation, Worcester, Mass. Floating tool holder. 2,445,509, July 20.

Bouthillier, Jean P.: *See*—
Bouthillier, Auguste J. and J. P.

Bowen, Rayner V., Huntington, W. Va. Sander. 2,445,599, July 20.

Bowers, Vernon A., Baltimore, Md. Closure attachment for cigarette packages. 2,445,510, July 20.

Boyd, Landon B., La Porte, Ind. Copper topped piston. 2,445,309, July 20.

Boypower Incorporated, assignee: *See*—
Brauer, David G.

Bradley, Robert A., Vancouver, British Columbia, Canada. Conveyer. 2,445,469, July 20.

Brauer, David G., West Los Angeles, assignor to Boypower Incorporated, Los Angeles, Calif. Refrigerating apparatus assembled and removed from cabinet as a unit. 2,445,470, July 20.

Braun, G. A., Inc., assignee: *See*—
Yanchenko, Basil J.

Breckenridge, Frank, Mansfield, Ohio, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Ironer roller extension support. 2,445,418, July 20.

Bretos y Claveria, Manuel, Mexico City, Mexico. Safe and vault locking and unlocking mechanism. 2,445,511, July 20.

Bristol Aeroplane Company Limited, The, assignee: *See*—
Wotton, John.

Brown, Alexander P., Beechhurst, Long Island, N. Y. Piano action. 2,445,512, July 20.

Brown, Clarence J. and F. S., assignors of ten per cent to A. R. Kurtz, Hamilton, Mont., and forty per cent to M. Dohn, Bismarck, N. Dak. Cleanout apparatus for drill steel. 2,445,659, July 20.

Brown, Floyd S.: *See*—
Brown, Clarence J. and F. S.

Brown, Reeve J., Brooklyn, N. Y. Novelty wall bird cage. 2,445,419, July 20.

Brown, Roy W., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Rubber spring. 2,445,723, July 20.

Brown, Samuel J. and S. R., West Point, Ky. Dish washing and drying machine. 2,445,707, July 20.

Brown, Samuel R.: *See*—
Brown, Samuel J. and S. R.

Bruestle, Carl O., Rahway, N. J., assignor to Borg-Warner Corporation, Chicago, Ill. Tension device. 2,445,600, July 20.

Bruestle, Carl O., Rahway, assignor to Elevator Supplies Company, Inc., Perth Amboy, N. J. Electric treadle. 2,445,660, July 20.

Brunner Manufacturing Company, assignee: *See*—
Hirsch, Sylvan R.

Brunson, A. N., assignee: *See*—
Bengert, Edgar F.

Buckholdt, Robert E., assignor to The Salem Engineering Company, Salem, Ohio. Heat exchanger. 2,445,471, July 20.

Budd Company, The, assignee: *See*—
Watter, Michael.

Burgess, Early R., Good Hope, Ga. Coupling. 2,445,385, July 20.

Burke, Virginia A., assignee, et al.: *See*—
Moon, Adelle M.

Burndy Engineering Company, Inc., assignee: *See*—
Ge Wertz, Arthur L.

Butch, Adam F., Lawrence County, Pa. Support and traction of implements. 2,445,472, July 20.

Byrns, Alva C., Oakland, assignor to Union Oil Company of California, Los Angeles, Calif. Catalytic reforming of hydrocarbon mixtures. 2,445,845, July 20.

Caldwell, Hamilton P., Jr., Woodbury, N. J., assignor to Socony-Vacuum Oil Company, Incorporated. Catalytic alkylation. 2,445,560, July 20.

California Research Corporation, assignee: *See*—
Eldredge, Kenneth R., Hundere, and Macpherson.

Campos, Adolph, Clifton, N. J. Lighter construction. 2,445,513, July 20.

Carl, John C., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Dispersion of anti-oxidants in rubber latex. 2,445,734, July 20.

Carlsen, Herbert M., and E. F. Nordman, Spokane, Wash. Fishhook. 2,445,601, July 20.

Carlson, Bert G., Gates Mills, assignor, by mesne assignments, to Jack & Heints Precision Industries, Inc., Cleveland, Ohio. Vertical hydraulic gyro. 2,445,388, July 20.

Carnagua, Harold E., Muncie, Ind., assignor to Borg-Warner Corporation, Chicago, Ill. Electromagnetic actuator. 2,445,561, July 20.

Carnegie-Illinois Steel Corporation, assignee: *See*—
Moroco, Philip.

Carr, Edward L., and G. E. P. Smith, Jr., assignors to The Firestone Tire & Rubber Company, Akron, Ohio. Vulcanization accelerator. 2,445,722, July 20.

Carter, Mitchell, Yardley, Pa., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Manufacture of sponge rubber. 2,445,732, July 20.

Cartwright, Horace A., Galion, Ohio. Variable output pump. 2,445,603, July 20.

Casaroll, Ernest J., Detroit, Mich. Adustable control device. 2,445,602, July 20.

Catheron, Allan R.: *See*—
Philbrick, George A., and Catheron.

Cawein, Madison, and R. W. Sanders, Fort Wayne, Ind., assignors, by mesne assignments, to Farnsworth Research Corporation. Panoramic receiving system. 2,445,562, July 20.

Celanese Corporation of America, assignee: *See*—
Dreyfus, Henry.

Chandler, Milton E., New Britain, assignor, by mesne assignments, to Niles-Bement-Pond Company, West Hartford, Conn. Carburetor. 2,445,380, July 20.

Chicago Forging and Manufacturing Company, assignee: *See*—
Howe, Earl E.

Chilowsky, Constantin, New York, N. Y. Manufacture of piezoelectric elements. 2,445,310, July 20.

Clark, Frank M., Pittsfield, Mass., assignor to General Electric Company. Dielectric composition. 2,445,563, July 20.

Clausen, Henry P., White Plains, N. Y. Door holder and stop. 2,445,514, July 20.

Clayton, Martin M., Enon Valley, assignor to National Electric Products Corporation, Ambridge, Pa. Contact clip. 2,445,604, July 20.

Clyde, Paul M., assignee: *See*—
Shields, Samuel F.

Colgate-Palmolive-Peet Company, assignee: *See*—
Miles, Gilbert D. W.

Collins, George H., Lynn, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Machine for applying pressure to shoe bottoms. 2,445,420, July 20.

Collins Radio Company, assignee: *See*—
Doels, Melvin L.
Vaughn, Kenneth E.

Color Research Corporation, assignee: *See*—
Grimson, Samuel B.

Commercial Solvents Corporation, assignee: *See*—
Morey, Glen H.

Compo Shoe Machinery Corporation, assignee: *See*—
Dawson, Fred.

Connolly, Gerald C., Elizabeth, N. J., assignor to Standard Oil Development Company. Preparation of a titania gel-boria catalyst. 2,445,346, July 20.

Consolidated Vultee Aircraft Corporation, assignee: *See*—
Johnson, Francis B.

Constant, Hayne, South Farnborough, and W. Merchant, Salford, said Merchant assignor to Metropolitan-Vickers Electrical Company, London, England. Axial flow turbines, compressors and the like. 2,445,661, July 20.

Constant, Maurice, Reno, Nev. Glare screen. 2,445,473, July 20.

Cooke, Henry H., Elizabeth, and J. B. Holtzclaw, Roselle, N. J., assignors to Stanco Incorporated. Incendiary bomb mixture. 2,445,311, July 20.

Cooke, Henry H., Elizabeth, and J. B. Holtzclaw, Roselle, N. J., assignors to Stanco Incorporated. Incendiary bomb mixture. 2,445,312, July 20.

Cosmetto, Aristodeme J., New York, N. Y. Mercury vapor lamp. 2,445,313, July 20.

Cossor, A. C., Limited, assignee: *See*—
Davie, Owen H.

Cox, Irvin W., West Allis, and L. D. Drugmand, assignors to Cutler-Hammer, Inc., Milwaukee, Wis. Power tube. 2,445,564, July 20.

Crompton & Knowles Loom Works, assignee: *See*—
Sepavich, Victor F.

Crosby, John G., Minneapolis, Minn. Variable throw eccentric. 2,445,605, July 20.

Crosby, Murray G., Riverhead, Long Island, N. Y., assignor to Radio Corporation of America. Phase modulation. 2,445,708, July 20.

Crossman, Stephen H., St. Joseph, Mich. Gun sight. 2,445,314, July 20.

Cube Steak Machine Co., assignee: *See*—
Spang, Carl F.

Curley, Clarke C., Lorain, Ohio. Door seal assembly. 2,445,315, July 20.

Curtin-Hebert Company, Inc., assignee: *See*—
Gursky, Henry D.

Curtiss, George E., Jr., Penn Wynne, assignor, by mesne assignments, to Philco Corporation, Philadelphia, Pa. Latch. 2,445,709, July 20.

Cutler-Hammer, Inc., assignee: *See*—
Cox, Irvin W., and Drugmand.

Dann, John R.: *See*—
Parson, William F., and Dann.

Darash, Nicholas P., assignor to The Warner & Swasey Company, Cleveland, Ohio. Machine tool. 2,445,386, July 20.

Davie, Owen H., assignor to A. C. Cossor Limited, London, England. Frequency modulation system. 2,445,662, July 20.

Davis, Arnold R., Riverside, Conn., assignor to American Cyanamid Company, New York, N. Y. Aqueous rubber dispersions. 2,445,740, July 20.

Davis, Lawrence C., Miami, Fla. Amusement device. 2,445,387, July 20.

Davis, Leo, New York, N. Y. Alphabet jigsaw game. 2,445,421, July 20.

Davis, Ralph B., Okmulgee, Okla. Article holder. 2,445,606, July 20.

Dawson, Fred, West Roxbury, assignor to Compo Shoe Machinery Corporation, Boston, Mass. Shoe pressing apparatus. 2,445,565, July 20.

Dayton Acme Co., assignee: *See*—
Parry, Robert D.

Dederick, Clinton H., Brentwood, assignor to The Emerson Electric Mfg. Company, St. Louis, Mo. Electric motor follow-up type of control. 2,445,515, July 20.

De Ghetto, Anselm, Clifton, N. J., assignor to National Rubber Machinery Company, Akron, Ohio. Braked rotative assembly. 2,445,607, July 20.

De Lano, Willis L., Chelsea, Mass. Pneumatically operated contact printer. 2,445,566, July 20.

De Lorenzo, Bartholomeo, Elyria, Ohio, assignor to Foster Wheeler Corporation, New York, N. Y. Heater. 2,445,316, July 20.

De Orlow, Stephen, Jackson, Mich. Cable clamping device. 2,445,474, July 20.

Derr, Willard A., Wilkinsburg, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Control system. 2,445,422, July 20.

Detweiler, Wilbur O., Toronto, Ontario, Canada. Connecting plug. 2,445,608, July 20.

Dickey, John W., Elmira, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind. Laundry drier. 2,445,516, July 20.

Dilks, Uselma C. S., Narberth, Pa., assignor to the United States of America as represented by the Secretary of the Navy. Pendulum controlled electric dive angle indicator. 2,445,517, July 20.

Dodge, Adiel Y., Rockford, Ill. Adjustable crank. 2,445,710, July 20.

Doelz, Melvin L., Minneapolis, Minn., assignor to Collins Radio Company, Cedar Rapids, Iowa. Automatic frequency control system. 2,445,663, July 20.

Doelz, Melvin L., Minneapolis, Minn., assignor to Collins Radio Company, Cedar Rapids, Iowa. Multifrequency generating and selecting system. 2,445,664, July 20.

Doherty, William H., Elmhurst, N. Y. Shoe construction. 2,445,665, July 20.

Dohn, Myrtle, assignee, et al.: *See*—
Brown, Clarence J., and F. S.

Doniger, David D. & Co., Inc., assignee: *See*—
Sturz, Bernard V.

Douglas, Kenneth F., Elmira, N. Y., assignor to Bendix Aviation Corporation. Engine starter. 2,445,609, July 20.

Dow Chemical Company, The, assignee: *See*—
Gerould, Charles H., and Woodland.
Heitz, Robert G., and Oldershaw.
Pelton, Earl L., and Hutchenreuther.

Drake, Robert E., Morrisville, Pa., assignor to Winner Manufacturing Company, Inc., Trenton, N. J. Water ski binding. 2,445,610, July 20.

Dreyfus, Henry, deceased, by Claude Bonard, administrator, London, England, assignor to Celanese Corporation of America. Alkylene dihydrazines and production. 2,445,518, July 20.

Drugmand, Lester D.: *See*—
Cox, Irvin W., and Drugmand.

Dual Valve Company, assignee: *See*—
Wheeler, Harry N.

Dunn, Harold E., Corpus Christi, Tex. Flying toy. 2,445,611, July 20.

Du Pont, E. I., de Nemours & Company, assignee: *See*—
Nichols, James B.
Fox, Arthur L.

Durant, Albert A., Honolulu, T. H. Clamp. 2,445,475, July 20.

Duval, Montague H., Great Neck, N. Y. Match pack holder. 2,445,317, July 20.

Duvall, Harold A.: *See*—
Maechtlen, Lawrence G., Duvall, and Esler.

Dymond, Frederick L., assignee: *See*—
Minton, Versie R.

Eastman, Fred C., Marblehead, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Safety container for rockets. 2,445,423, July 20.

Eastman Kodak Company, assignee: *See*—
Parsons, William F., and Dann.

Eaton Manufacturing Company, assignee: *See*—
Findley, Howard J.

Edelman, Walter E.: *See*—
Bishofberger, Carl J., and Edelman.

Ehlinger, Marcel, Paris, France. Inhaler. 2,445,347, July 20.

Eldredge, Kenneth R., A. Hundere and J. H. Macpherson, Jr., Berkeley, assignors, by mesne assignments, to California Research Corporation, San Francisco, Calif. Magnetostrictive pickup unit. 2,445,318, July 20.

Electric & Musical Industries Limited, assignee: *See*—
Mayo, Bernard J.

Electro Metallurgical Company, assignee: *See*—
Wyckoff, Lewis B.

Electrol Incorporated, assignee: *See*—
Ashton, Benjamin N.

Elevator Supplies Company, Inc., assignee: *See*—
Bruestle, Carl O.

Ellam, Frederick, Watford, England. Inking device for rotary duplicating machines. 2,445,666, July 20.

Elliott, John R., Schenectady, N. Y., assignor to General Electric Company. Stabilizing organo-substituted polysiloxanes. 2,445,567, July 20.

Ellis, Robert M., assignor to P. R. Mallory & Co., Inc., Indianapolis, Ind. Vibrator circuit with primary current division. 2,445,390, July 20.

Elmes, John A., Beaver Falls, and H. F. Johnson, Ellwood City, assignors to W. L. Ryman, Pittsburgh, Pa. Grinding machine. 2,445,391, July 20.

Elmore, Norman M.: *See*—
Young, David W., and Elmore.

Emerson Electric Mfg. Company, The, assignee: *See*—
Dederick, Clinton H.

Engelbrecht, Heinz-Joachim, Dessau, Germany, assignor, by mesne assignments, to American Hyalsol Corporation, Wilmington, Del. Manufacture of quaternary nitrogen-compounds. 2,445,319, July 20.

Esler, Charles G.: *See*—
Maechtlen, Lawrence G., Duvall, and Esler.

Fairfield Manufacturing Company, assignee: *See*—
Boor, Francis H.

Fanshier, Chester, Bartlesville, Okla. Excess flow valve. 2,445,612, July 20.

Farnsworth Research Corporation, assignee: *See*—
Cawein, Madison, and Sanders.
Ferguson, Joe C.

Fedirko, John: *See*—
Robey, Richard F., Fedirko, and Barnett.

Ferguson, Joe C., Fort Wayne, Ind., assignor, by mesne assignments, to Farnsworth Research Corporation. Modulating system. 2,445,568, July 20.

Fincher, Walter, Salina, Kans. Drive mechanism for reciprocating devices. 2,445,613, July 20.

Findley, Howard J., Shaker Heights, assignor to Eaton Manufacturing Company, Cleveland, Ohio. Heating and ventilating apparatus for vehicles. 2,445,392, July 20.

Firestone Tire & Rubber Company, The, assignee: *See*—
Albert, Harry B.
Brown, Roy W.
Carl, John C.
Carr, Edward L., and Smith.
Carter, Mitchell.
Gottschalk, Gordon W.
Jaycox, Edward V. K.
Kitchen, Leland, Jr.
Kinzinger, Siegfried M.
Kuhn, Max O.
Radcliffe, Milton R., and Best.
Radcliffe, Milton R., and Mayes.
Rowland, George P., Jr., and Reid.
Smith, George E. P., Jr.
Stevens, Horace D.
Walker, Ralph C.
Willert, William H.

Fischer, William R., and C. W. Kendall, Dayton, Ohio. Photographic film processing frame. 2,445,320, July 20.

Fitch and Sons, Inc., assignee: *See*—
Fitch, William L.

Fitch, William L., Santa Cruz, Calif., assignor to Fitch and Sons, Inc. Mechanical movement. 2,445,711, July 20.

Flashlight Company of America, assignee: *See*—
Poliakoff, Theodore.

Fletcher Works Incorporated, assignee: *See*—
Bartholomew, Robert J.

Floegel, Merle E., Takoma Park, Md. Device for exercising ocular muscles. 2,445,519, July 20.

Fluor Corporation, Ltd., The, assignee: *See*—
Blohm, Clyde L., Riesenfeld, and Frazier.

Flynn, Francis K., and R. H. Adelman, New York, assignors, by mesne assignments, to Silent Hoist & Crane Co., Inc., Brooklyn, N. Y. Load handling apparatus. 2,445,614, July 20.

Folkman, Marvin L., Shaker Heights, Ohio. Cigarette article. 2,445,476, July 20.

Folkman, Marvin L., Shaker Heights, Ohio. Ampoule. 2,445,477, July 20.

Food Machinery Corporation, assignee: *See*—
Rankin, Dan R., and Wade.

Forbes, Theodore W., Cambridge, Mass., assignor to United States of America as represented by the Executive Secretary of the office of Scientific Research and Development. Auditory tone signal indications for flying. 2,445,712, July 20.

Ford, John R., Narberth, Pa., assignor to Radio Corporation of America. Reflectometer for waveguide systems. 2,445,348, July 20.

Forrest, William H.: *See*—
Greene, Edgeworth, and Forrest.

Forsman, Gunard, assignor to Johnson Steel & Wire Company, Inc., Worcester, Mass. Wire straightener or shaper. 2,445,615, July 20.

Foster, George H., Stamford, and E. F. Williams, Old Greenwich, Conn., assignors to American Cyanamid Company, New York, N. Y. Crystalline material preparation. 2,445,478, July 20.

Foster Wheeler Corporation, assignee: *See*—
De Lorenzo, Bartholomeo.

Fountain, Lawrence L., Wilkinsburg, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Bus bar support. 2,445,424, July 20.

Fourneau, Ernest, assignor to Societe des Usines Chimiques Rhone Poulenc, Paris, France. New amino-derivatives of dioxa-cyclopentane. 2,445,393, July 20.

Fox, Arthur L., Easton, Pa., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Sulfonated polybenzyl. 2,445,560, July 20.

Fox, William T., Jr., United States Navy. Governor. 2,445,321, July 20.

Foxboro Company, The, assignee: *See*—
Philbrick, George A., and Catheron.

Francis, Alfred W., Woodbury, N. J., and E. E. Reid, Baltimore, Md., assignors to Socony-Vacuum Oil Company, Incorporated. Separation of olefins. 2,445,520, July 20.

Francis, Fred P., Hartford, Conn. Automatic metering water injector for engines. 2,445,479, July 20.

Franco, John G., Cristobal, C. Z. Composition for cold water cement paint. 2,445,521, July 20.

Franks, Theodore W.: *See*—
Amesbury, Earl M., Franks, and Jesevich.

Franz, Arvel O., and O. C. Keplinger, Alton, Ill., assignors to Olin Industries, Inc. Apparatus for the manufacture of explosives. 2,445,741, July 20.

Frazier, Henry D.: *See*—
Blohm, Clyde L., Riesenfeld, and Frazier.

Frei, Jakob R., Sidney, and R. M. Purdy, Bainbridge, assignors to Bendix Aviation Corporation, New York, N. Y. Ignition apparatus. 2,445,570, July 20.

Fridolph, Maude C., Los Angeles, Calif. Body garment. 2,445,322, July 20.

Friedrich, Robert E.: *See*—
Leeds, Winthrop M., and Friedrich.

Fritsch, Nicholas, Graf, Iowa. Dirt retainer for culverts and pipes. 2,445,522, July 20.

Froelich, Herman C.: *See*—
Porter, Lawrence C., and Froelich.

Fuglie, Elmer A., assignor to Winona Tool Manufacturing Company, Winona, Minn. Electrical circuit tester. 2,445,667, July 20.

Fuston, Leon L., Oak Park, Ill. Toothbrush. 2,445,571, July 20.

Gabbert, Ferdinand A., Minneapolis, Minn., assignor, by mesne assignments, to W. E. Johnston. Hearing aid. 2,445,425, July 20.

Gabriel Steel Company, assignee: *See*—
Zabriskie, William F., and Post.

Galatioto, Luigi C., Providence, R. I., assignor to Textron, Incorporated, New York, N. Y. Recovering spent dye liquors by treatment with activated carbon and product thereof. 2,445,323, July 20.

Gamel, Gayne D., Verona, and W. S. Hawkins, Wilkinsburg, assignors to Westinghouse Electric Corporation, East Pittsburgh, Pa. Circuit breaker. 2,445,426, July 20.

Gantt, Jacob P., Rock Hill, S. C. Pivoted jaw plier wrench with slotted fulcrum guide. 2,445,480, July 20.

Garbutt, Rose M., San Diego, Calif. Garment supporter. 2,445,349, July 20.

General Electric Company, assignee: *See*—
Boisseau, Alexander C.
Clark, Frank M.
Elliott, John R.
Haber, Charles P.
Lemmers, Eugene.
Melville, William S.
Porter, Lawrence C., and Froelich.
Ramo, Simon.
Sims, Marion W.
Skeats, Wilfred F.
Stephenson, Hugh M.
Sullivan, Earle C.
Zabel, William P.

General Motors Corporation, assignee: *See*—
Norris, Paul A.
Rossman, Edwin F.

Gerould, Charles H., and P. C. Woodland, assignors to The Dow Chemical Company, Midland, Mich. Drying photographic prints. 2,445,572, July 20.

Ge Wertz, Arthur L., Mount Vernon, N. Y., assignor to Burndy Engineering Company, Inc. Cable hanger. 2,445,481, July 20.

Gilbert & Barker Manufacturing Company, assignee: *See*—
Grise, Alfred L.
Mesh, Theodore J.

Ginnings, Defoe C., Macomb, Ill. Multiple-effect solar still. 2,445,350, July 20.

Giralt, Thomas R., Habana, Cuba. Domestic bar with disappearing shelf compartment. 2,445,394, July 20.

Girdler Corporation, The, assignee: *See*—
Zottu, Paul D.

Glassner, Mitchel, assignor to Maryland Baking Company, Inc., Baltimore, Md. Cone jacket applying machine. 2,445,713, July 20.

Gleason Works, assignee: *See*—
Turner, Lyman H., Bauer, and Michelson.

Godbe, Murray, Jr., Salt Lake City, Utah. Transmission. 2,445,573, July 20.

Godsey, Frank W., Jr., Forest Hills, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Torquemeter. 2,445,427, July 20.

Goetz, Alexander, Pasadena, Calif., assignor to Sunshine Mining Company, Yakima, Wash. Chemical process for production of potable water from non-potable saline water. 2,445,669, July 20.

Gohr, Edwin J., Summit, N. J., assignor to Standard Oil Development Company. Adding heat in the regeneration of catalyst for the conversion of hydrocarbons. 2,445,351, July 20.

Goldbach, John C., Jacksonville, Fla. Fishing lure. 2,445,523, July 20.

Goldberg, Harry H., Denver, Colo. Joint for metal window sash frames. 2,445,428, July 20.

Goldsborough, Shirley L., Basking Ridge, N. J., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Ground-fault protective relaying system. 2,445,429, July 20.

Goodrich, B. F., Company, The, assignee: *See*—
Legallion, Charles W.

Gottschalk, Gordon W., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Stabilization of rubber-like copolymers with reaction products of sulfur dichloride, and aldehyde, and a phenol. 2,445,736, July 20.

Greene, Edgeworth, Upper Montclair, N. J., and W. H. Forrest, Brooklyn, N. Y. Bottle closure. 2,445,395, July 20.

Greene, James B.: *See*—
Rubidge, David W., Manning, Greene, and Hood.

Greenwell, Earl E., Vallejo, Calif. Contour transfer device. 2,445,324, July 20.

Grimson, Samuel B., assignor to Color Research Corporation, New York, N. Y. Color camera. 2,445,668, July 20.

Grise, Alfred L., Springfield, assignor to Gilbert & Barker Manufacturing Company, West Springfield, Mass. Automatic shut-off valve for hose. 2,445,524, July 20.

Grunow, Alfred W., Nutley, N. J. Die set. 2,445,574, July 20.

Guiden, Moses L., Milwaukie, Oreg. Fastening device. 2,445,525, July 20.

Gursky, Henry D., assignor to Curtin-Hebert Company, Inc., Gloversville, N. Y. Clamp. 2,445,396, July 20.

Guthrie, Andrew J., St. Albans, W. Va. Ball rolling game. 2,445,575, July 20.

Haber, Charles P., Schenectady, N. Y., asignor to General Electric Company. Preparing orthosilicates. 2,445,576, July 20.

Hamilton, Keith C., McKeesport, Pa., assignor to National Tube Company. Manufacturing pipes and tubes. 2,445,352, July 20.

Harris, Walter R.: *See*—
Baker, Rest R., and Harris.

Harvey, Clarence T., Fayetteville, N. Y. Nonslip device for footwear. 2,445,353, July 20.

Haug, Eugene H., Glencoe, assignor to La Salle National Bank, Chicago, Ill., as trustee. Adjustable constant-current control. 2,445,577, July 20.

Hawkins, Walter S.: *See*—
Gamel, Gayne D., and Hawkins.

Heitz, Robert G., Antioch, and C. F. Oldershaw, Concord, Calif., assignors to The Dow Chemical Company, Midland, Mich. Distillation of hexachlorethane. 2,445,526, July 20.

Hemp, Joseph L., Macomb, Ill. Insulated container closure. 2,445,325, July 20.

Herchenroeder, Louis W., Pittsburgh, Pa., and A. L. Scott, Portland, Oreg., assignors to Westinghouse Electric Corporation, East Pittsburgh, Pa. Induction motor braking system. 2,445,430, July 20.

Hercules Powder Company, assignee: *See*—
Rummelsburg, Alfred L.
Van Wyck, Peter.

Hill, Lawrence R., Pittsburgh 21, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Soldering with resin fluxes. 2,445,431, July 20.

Hirsch, Sylvan R., assignor to Brunner Manufacturing Company, Utica, N. Y. Compressor unloader. 2,445,527, July 20.

Hoch, John, Corona, assignor to Victor Metal Products Corporation, Brooklyn, N. Y. Automatic molding machine and method. 2,445,742, July 20.

Hodell, William R., Pittsburgh, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Bearing assembly. 2,445,432, July 20.

Hodgson, Richard H., Vancouver, British Columbia, Canada. Automatic transmission. 2,445,482, July 20.

Hofmann, Maximilian P., Bay Village, assignor to The C. O. Bartlett & Snow Company, Cleveland, Ohio. Apparatus for mixing. 2,445,617, July 20.

Holcomb, Harry E.: *See*—
McDermott, Paul F., and Holcomb.

Holdren, Robert F., assignor to Iowa State College Research Foundation, Ames Iowa. Manufacture of methylfuran. 2,445,714, July 20.

Holland Furnace Company, assignee: *See*—
Weyenberg, Henry, and Quist.

Holmstrom, Carl L., assignor to Sundstrand Machine Tool Co., Rockford, Ill. Cutter relief mechanism for milling machines. 2,445,433, July 20.

Holtzclaw, John B.: *See*—
Cooke, Henry H., and Holtzclaw.

Hood, F. Elliott, Elmira, N. Y., assignor to Bendix Aviation Corporation, Vehicle brake. 2,445,616, July 20.

Hood, James D.: *See*—
Rubidge, David W., Manning, Greene, and Hood.

Hoof Products Company, assignee: *See*—
Jennings, Jarvis S.

Hopkins, Robert K., assignor to The M. W. Kellogg Company, New York, N. Y. Apparatus for producing cast metal bodies. 2,445,670, July 20.

Hoppes, Robert G., Washington, C. H., Ohio. Helicopter. 2,445,354, July 20.

Hornbarger, Earl H., Edgewood, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Dual-voltage motor control system. 2,445,434, July 20.

Horowitz, Robert M.: *See*—
Morris, Rupert C., Horowitz, and Snider.

Horton, Alfred G., Jacksonville, Fla. Wheel aligning stand. 2,445,397, July 20.

Howe, Earl E., assignor, by mesne assignments, to Chicago Forging and Manufacturing Company, Chicago, Ill. Joint for tubes. 2,445,578, July 20.

Huetten, Clarence, assignor to P. R. Mallory & Co., Inc., Indianapolis, Ind. Vibrator system. 2,445,398, July 20.

Hulst, George D., Jr.: *See*—
Mountjoy, Garrard, Hulst, and Schoenfeld.

Hundere, Alf: *See*—
Eldredge, Kenneth R., Hundere, and MacPherson.

Hurt, Hansford D., Los Angeles, Calif. Headgear for optical devices. 2,445,355, July 20.

Hutchenreuther, Charles O.: *See*—
Pelton, Earl L., and Hutchenreuther.

Hutcheson, John A., Baltimore, Md., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Modulation system. 2,445,618, July 20.

Hydrocarbon Research, Inc., assignee: *See*—
Keith, Percival C.

Hyman, Mark, Jr., and C. D. West, assignors to Polaroid Corporation, Cambridge, Mass. Sheetlike light-polarizing complex of iodine and a polyvinyl compound with protective surface boric acid-polyvinyl compound complex. 2,445,579, July 20.

Imperial Machine Corporation, assignee: *See*—
Bonthiller, Auguste J. and J. P.

International Business Machines Corporation, assignee: *See*—
Rubidge, David W., Manning, Greene, and Hood.

Iowa State College Research Foundation, assignee: *See*—
Holdren, Robert F.

Jack & Heintz, Precision Industries, Inc.: *See*—
Bousky, Samuel.
Carlson, Bert G.

Jacobs Rubber Products, Incorporated, assignee: *See*—
Moe, J. Edgar.

Jacobsen, Edwin, Altadena, Calif. Producing power. 2,445,483, July 20.

Janney, Herman J., Opportunity, Wash. Device for launching projectiles. 2,445,326, July 20.

Jaycox, Edward V. K., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Tire inspection device. 2,445,731, July 2.

Jennings, Jarvis S., assignor to Hoof Products Company, Chicago, Ill. Crankcase compression, two-cycle engine. 2,445,715, July 20.

Jennings, Lawrence D., and J. Naymik, Sharon, assignors to Westinghouse Electric Corporation, East Pittsburgh, Pa. Induction generator starting gear. 2,445,433, July 20.

Jesevich, John, Jr.: *See*—
Amesbury, Earl M., Franks, and Jesevich.

Johns-Manville Corporation, assignee: *See*—
McDermott, Paul F., and Holcomb.

Johnson, Ervin G., Eureka, assignor of one-half to O. C. Whisman, Oakland, Calif. Convertible folder and manuscript cover. 2,445,671, July 20.

Johnson, Francis B., Wayne, Mich., assignor to Consolidate Cultee Aircraft Corporation, San Diego, Calif. Airplane hinge connection. 2,445,399, July 20.

Johnson, Howard F.: *See*—
Elmes, John A., and Johnson.

Johnson, Sigurd W., Minneapolis, and C. G. Zarembinski, St. Paul, Minn. Device for handling, progressing, and turning a wheel-equipped axle. 2,445,436, July 20.

Johnson Steel & Wire Company, Inc., assignee: *See*—
Forsman, Gunard.

Johnston, Loreene, Cleveland, Ohio. Descent retarder. 2,445,400, July 20.

Johnston, William E., assignee: *See*—
Gabbert, Ferdinand A.

Jones, William O., Baltimore, Md. Heart testing machine of a beam reflector type. 2,445,672, July 20.

Josephs, John J., Philadelphia, Pa. Riser. 2,445,619, July 20.

Journal Box Servicing Corporation, assignee: *See*—
Bissell, William T.

Kail, Karl A., Montrose, Pa., assignor to Link Aviation, Inc., Binghamton, N. Y. Magnetic compass indicating system for aviation trainers. 2,445,673, July 20.

Kasten, Walter, Franklin, assignor to Renniks Company, Detroit, Mich. Expansion joint. 2,445,580, July 20.

Keasbey & Mattison Company assignee: *See*—
Anderson, Harvey R.

Keith, Percival C., Peapack, N. J., assignor to Hydrocarbon Research, Inc., New York, N. Y. Fluidizing process for gasifying carbonaceous solids. 2,445,327, July 20.

Keith, Percival C., Peapack, N. J., assignor to Hydrocarbon Research, Inc., New York, N. Y. Conversion process for heavy hydrocarbons. 2,445,328, July 20.

Keller Tool Company, assignee: *See*—
Shaff, Ernest H.

Kellogg, Joseph, assignor to Nordberg Manufacturing Company, Milwaukee, Wis. Fluid pressure system. 2,445,437, July 20.

Kellogg, M. W., Company, The, assignee: *See*—
Hopkins, Robert K.
Rinne, John, and Mallard.

Kemper, Clara A.: *See*—
Musso, Leo P.

Kendall, Clarence W.: *See*—
Fischer, William R., and Kendall.

Kendall, Willard E., Fitchburg, Mass. Pneumatic nail driver. 2,445,674, July 20.

Keogh, Edward S., Jr., Monmouth County, N. J. Razor. 2,445,528. July 20.

Keplinger, Orin C.: *See*—
Frans, Arvel O., and Keplinger.

Kester, Robert E., and W. S. Quincy, Jr., Dayton, Ohio. Mast antenna. 2,445,329, July 20.

Ketland, William E., Alexandria, Va. Fish picker. 2,445,620, July 20.

Kharasch, Morris S., Chicago, Ill., and S. Weinhouse, Chester, Pa., assignors to the United States of America as represented by the Secretary of War. Thiol derivatives. 2,445,356, July 20.

King, Carl C., Massapequa, assignor to Republic Aviation Corporation, Farmingdale, N. Y. Canopy mounting and releasing mechanism. 2,445,438, July 20.

King, George E., Swissvale, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Motor control system. 2,445,439, July 20.

Kinzinger, Siegfried M., Montclair, N. J., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Moistureproof film. 2,445,727, July 20.

Kitchen, Leland J., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Alkylated phenol and producing same. 2,445,735, July 20.

Kleinguenther, Herbert C.: *See*—
Allen, Harry L., and Kleinguenther.

Klemm, William F., Detroit, Mich. Punch for loose-leaf binders. 2,445,440, July 20.

Kopperman, Paul, Philadelphia, Pa. Expansion joint and integral anchor. 2,445,484, July 20.

Kopperman, Paul, Philadelphia, Pa. Corrugation limit stop. 2,445,485, July 20.

Korsmo, Torbjorn C., assignor to Madison-Kipp Corporation, Madison, Wis. Rotary tool for beading-over cylindrical flanges. 2,445,357, July 20.

Krieger, Gardner L., Princeton, N. J., assignor to Radio Corporation of America. Rectifier. 2,445,441, July 20.

Kuhn, Max O., Cuyahoga Falls, assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Reinforced sectional barrel. 2,445,730, Jul 20.

Kurtz, August R., assignee, et al.: *See*—
Brown, Clarence J. and F. S.

La Londe, Frederick J., Los Angeles, Calif. Drum pedal apparatus. 2,445,486, July 20.

La Monte, George, & Son, assignee: *See*—
Simons, Francis L.

Land, Edwin H., assignor to Polaroid Corporation, Cambridge, Mass. Treatment of polarizing polyvinyl alcohol-iodine sorption complex image with boric acid. 2,445,581, July 20.

Lang, William C., Willoughby, Ohio. Apparatus for producing coated wires by continuous process. 2,445,675, July 20.

Lange, Edward H., Baltimore, Md. Demodulator device for frequency and amplitude modulations. 2,445,621, July 20.

Langer, Nicholas, New York, N. Y., assignor to P. R. Mallory & Co., Inc., Indianapolis, Ind. Vibrator. 2,445,401, July 20.

La Salle National Bank assignee, trustee: *See*—
Haug, Eugene H.

Lasar, William, Los Angeles, Calif. Reciprocating work table for band saws with means for retracting the table from the cutting plane after each cutting stroke. 2,445,676, July 20.

Lausten, Elsie, assignee, et al.: *See*—
Moon, Adelle M.

Leeds, Winthrop M., Pittsburgh, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Circuit interrupter. 2,445,529, July 20.

Leeds, Winthrop M., Forest Hills, and R. E. Friedrich, Pittsburgh, assignors to Westinghouse Electric Corporation, East Pittsburgh, Pa. Circuit interrupter. 2,445,442, July 20.

Leguillon, Charles W., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Apparatus for applying plastic materials to bands. 2,445,677, July 20.

Lemmers, Eugene, Cleveland Heights, Ohio, assignor to General Electric Company. Electric discharge device. 2,445,678, July 20.

Lemmers, Eugene, Cleveland Heights, Ohio, assignor to General Electric Company. Modulable electric discharge lamp. 2,445,679, July 20.

Lester, Andrew: *See*—
Lester, Dorothy and A.

Lester, Dorothy and A., Hobe Sound, Fla. Head cover. 2,445,487, July 20.

Lewk, Ida B., Tulsa, Okla. Sun bath device. 2,445,622 July 20.

Lima-Hamilton Corporation, assignee: *See*—
Schurr, Otto E.

Linhart, Harry M., Pitcairn, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Brake apparatus. 2,445,680, July 20.

Link Aviation, Inc., assignee: *See*—
Kail, Karl A.

Littwin, Leo F., Chicago, Ill. Control apparatus. 2,445,681, July 20.

Long, Charles R., Fort Monroe, Va., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Drying extended lengths of thread with infrared lamps. 2,445,443, July 20.

Luckower, Francis, Mount Vernon, N. Y. Fur buffing machine. 2,445,623, July 20.

Luteran, Frank D., Dearborn, Mich. Piece cutting machine. 2,445,488, July 20.

Lyon, George A., Allenhurst, N. J. Wheel structure. 2,445,330, July 20.

Macgeorge, William D., Drexel Hill, Pa., assignor to The Baldwin Locomotive Works. Rate of loading control for materials testing machines. 2,445,682, July 20.

Macgeorge, William D., Drexel Hill, Pa., assignor to The Baldwin Locomotive Works. Apparatus for effecting a predetermined rate of specimen strain. 2,445,683, July 20.

Macpherson, John H., Jr.: *See*—
Eldredge, Kenneth R., Hundere, and Macpherson.

Madison-Kipp Corporation, assignee: *See*—
Korsmo, Torbjorn C.

Maechtlen, Lawrence G., San Marino, and H. A. Duvall and C. G. Esler, Los Angeles, Calif., assignors to Square D Company, Detroit, Mich. Pipe joint. 2,445,358, July 20.

Maico Company, Incorporated, The, assignee: *See*—
Bircher, Clifford M.

Mainwold, David, Brooklyn, N. Y. Fur curler. 2,445,444, July 20.

Majer, Ferdinand, assignor to H. Majer, Zurich, Switzerland. Hair cutting machine with adjustable cut regulator. 2,445,530, July 20.

Majer, Hans, assignee: *See*—
Majer, Ferdinand.

Mallard, Robert G.: *See*—
Rinne, John, and Mallard.

Mallory, Marion, Detroit, Mich. Engine cooling system temperature control. 2,445,684, July 20.

Mallory, P. R., & Co., Inc., assignee: *See*—
Aust, Robert J.
Ellis, Robert M.
Huetten, Clarence.
Langer, Nicholas.

Malmberg, Bror V., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Gear measuring device. 2,445,402, July 20.

Mangold, Jacob A., Lebanon, Oreg. Folding camp stool. 2,445,489, July 20.

Manning, Clarence R.: *See*—
Rubidge, David W., Manning, Greene, and Hood.

Mannion, Gerald F.: *See*—
Weinstein, Norman, and Mannion.

Marcum, Jess I., Wilkinsburg, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Dual cavity-resonator switching system. 2,445,445, July 20.

Martin, Stuart T., Jr., Arlington, Va., assignor to Radio Corporation of America. Electron discharge device utilizing cavity resonators. 2,445,447, July 20.

Maryland Baking Company, Inc., assignee: *See*—
Glassner, Mitchel.

Mas, Antonio, New York, N. Y. Propeller transmission means. 2,445,446, July 20.

Mayerman, Phillip, Yonkers, N. Y. Portable drier. 2,445,403, July 20.

Mayes, William G.: *See*—
Radcliffe, Milton R., and Mayes.

Mayo, Bernard J., Hayes, assignor to Electric & Musical Industries Limited, Middlesex, England. Electron discharge device and associated circuit. 2,445,404, July 20.

Maytag Company, The, assignee: *See*—
Smith, Thomas R.

McDermott, Paul F., Martinsville, N. J., and H. E. Holcomb, Stratford, Conn., assignors to Johns-Manville Corporation, New York, N. Y. Making tubular coverings. 2,445,624, July 20.

McDonnell, Harry E., Steubenville, Ohio. Metallurgical apparatus. 2,445,743, July 20.

Meade, John, Erskineville, near Sydney, Australia. Automatic suction means for removing egg liquid. 2,445,490, July 20.

Meidenbauer, Phillip E., Jr., assignor to Scott Aviation Corporation, Lancaster, N. Y. Valve mechanism for breathing apparatus. 2,445,359, July 20.

Meinholdt, Charles L., Topeka, Kans. Safety switch for internal-combustion engines. 2,445,625, July 20.

Melville, William S., Rugby, England, assignor to General Electric Company. Thermionic valve and circuit mounting. 2,445,582, July 20.

Merchant, Wilfred: *See*—
Constant, Hayne, and Merchant.

Merriam Manufacturing Company, The, assignee: *See*—
Wiepert, George D.

Mesh, Theodore J., Easthampton, assignor to Gilbert & Barker Manufacturing Company, West Springfield, Mass. Safety control system for burners. 2,445,531, July 20.

Metropolitan-Vickers Electric Company Limited, assignee: *See*—
Constant, Hayne, and Merchant.

Michelson, Leonard C.: *See*—
Turner, Lyman H., Bauer, and Michelson.

Miles, Gilbert D., New York, N. Y., assignor to Colgate-Palmolive-Peet Company, Jersey City, N. J. Cake make-up container. 2,445,685, July 20.

Miller, Pharis, Mountainside, N. J., assignor to Standard Oil Development Company. Motor fuel. 2,445,360, July 20.

Miller, William A., Port Jefferson, N. Y., assignor to Radio Corporation of America. Electron discharge device trigger circuit. 2,445,448, July 20.

Minneapolis-Honeywell Regulator Company, assignee: *See*—
Bishofberger, Carl J., and Edelman.

Minton, Versie R., assignor of one-third to F. I. Dymond, New Orleans, La. Razor strop sterilizer. 2,445,532, July 20.

Moe, J. Edgar, assignor to Jacobs Rubber Products, Incorporated, Danielson, Conn. Lug strap. 2,445,744, July 20.

Moe, J. Edgar, assignor to Jacobs Rubber Products, Incorporated, Danielson, Conn. Sweepstick. 2,445,745, July 20.

Moloney, Edgar J., East Orange, N. J. Building construction. 2,445,491, July 20.

Mondron, Ralph R. and R. E., Mount Vernon, Ohio. Variable fraction plug. 2,445,533, July 20.

Mondron, Romaine E.: *See*—
Mondron, Ralph R. and R. E.

Moon, Adelle M., Oakland, assignor of one-third to V. A. Burke, and one-third to E. Lausten, both of San Francisco, Calif. Brassière. 2,445,449, July 20.

Morey, Glen H., assignor to Commercial Solvents Corporation, Terre Haute, Ind. Preparing alkylaminoketone oximes. 2,445,626, July 20.

Morgan, Ben O.: *See*—
Vaughn, Thomas J., and Morgan.

Moroco, Philip, Farrell, Pa., assignor to Carnegie-Illinois Steel Corporation. Method and apparatus for casting metals. 2,445,583, July 20.

Morris, Rupert C., and R. M. Horowitz, Berkeley, and A. V. Snider, Richmond, assignors to Shell Development Company, San Francisco, Calif. Monomeric and polymeric unsaturated esters and their production. 2,445,627, July 20.

Mountjoy, Garrard, Manhasset, N. Y., G. D. Hulst, Jr., Upper Montclair, N. J., and E. Schoenfeld, Mamaroneck, N. Y., assignors to Radio Corporation of America. Radio navigation system. 2,445,361, July 20.

Moyer, Edward, Trenton, N. J. Cartridge case venting machine. 2,445,331, July 20.

Muller, Jacques, La Garenne Colombes, France. Insubmersible pipe line. 2,445,628, July 20.

Musso, Leo P., Ecorse, assignor of forty-nine percent to C. A. Kamper, Lincoln Park, Mich. Spool support. 2,445,534, July 20.

Nabors, William C., Mansfield, La. Tandem axle assembly. 2,445,686, July 20.

Narbutovskih, Paul, Sharon, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Electrical induction apparatus. 2,445,450, July 20.

National Electric Products Corporation, assignee: *See*—
Clayton, Martin M.

National Rubber Machinery Company, assignee: *See*—
De Ghetto, Anselm.

National Tube Company, assignee: *See*—
Hamilton, Keith C.

Navy, United States of America as represented by the Secretary of the, assignee: *See*—
Bennett, Harold F.
Dilks, Uselma C. S.

Naymik, Joseph: *See*—
Jennings, Lawrence D., and Naymik.

Neely, David R., Ellijay, Ga. Spinning frame control. 2,445,687, July 20.

Nelson, Homer B., United States Navy. Plumb bob reel. 2,445,332, July 20.

Nesty, Glenn A.: *See*—
Porter, Frank, and Nesty.

New Jersey Zinc Company, The, assignee: *See*—
Truesdale, Edward C.

Newton, Charles W., Kansas City, Mo. Thread holder and cutter. 2,445,629, July 20.

Nichols, James B., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Making regenerated cellulose films. 2,445,333, July 20.

Niles-Bement-Pond Company, assignee: *See*—
Chandler, Milton E.

Noblitt-Sparks Industries, Inc., assignee: *See*—
Booth, Earl C.

Nordberg Manufacturing Company, assignee: *See*—
Kellogg, Joseph.

Nordman, Edwin F.: *See*—
Carlsen, Herbert M., and Nordman.

Norris, Paul A., Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Apparatus for molding. 2,445,405, July 20.

Nunes, Edward, San Francisco, Calif. Folding back rest for bleacher seats. 2,445,362, July 20.

Office of Scientific Research and Development, United States of America as represented by the Executive Secretary of the, assignee: *See*—
Forbes, Theodore W.

Oldershaw, Charles F.: *See*—
Heitz, Robert G., and Oldershaw.

Olin Industries, Inc., assignee: *See*—
Frans, Arvel O., and Keplinger.

Padelford, Lester E., North Arlington, N. J. Combination spraying booth and drying chamber. 2,445,461, July 20.
Page, Herbert E., Pasadena, Calif. Hydraulic valve. 2,445,334, July 20.
Page, Herbert E., Alhambra, Calif. Pressure-applying device. 2,445,630, July 20.
Pako Corporation, assignee: *See*—
Sardeson, Robert, and Savela.
Panhandle Eastern Pipe Line Company, assignee: *See*—
Stephens, Dishman K.
Parra, Joseph, and W. White, Newark, N. J. Pin spotter carriage for pin setting apparatue. 2,445,688, July 20.
Parry, Robert D., assignor to Dayton Acme Co., Cincinnati, Ohio. Motion-picture apparatus. 2,445,689, July 20.
Parsons, William F., Rochester, N. Y., and J. R. Dann, Boulder, Colo., assignors to Eastman Kodak Company, Rochester, N. Y. Thermosetting lens cement. 2,445,535, July 20.
Parsons, William F., Cambridge, Mass., and J. R. Dann, assignors to Eastman Kodak Company, Rochester, N. Y. Thermosetting lens cement. 2,445,536, July 20.
Pasnow, Bud W., South Euclid, Ohio, assignor to Borg-Warner Corporation, Chicago, Ill. Metering valve. 2,445,631, July 20.
Pattamaly, Elavathur S. V., Kannimangalam, Nemmara Post, India. Electron oscillator. 2,445,690, July 20.
Pechukas, Alphonse, Akron, Ohio, assignor to Pittsburgh Plate Glass Co., Allegheny County, Pa. Preparation of titanium dioxide. 2,445,691, July 20.
Peed, Horace S., Denver, Colo. Window shade roller. 2,445,452, July 20.
Pelton, Earl L., and C. O. Hutchenreuther, assignors to The Dow Chemical Company, Midland, Mich. Indigosol composition comprising a naphthol sulfonate and applying same. 2,445,632, July 20.
Pennington, Lacy K., Fremont, Mich. Portable scaffold. 2,445,453, July 20.
Pentecost, Lionel G., Portland, Oreg. Honing device. 2,445,492, July 20.
Peters, Walter, Linden, assignor to The Thomas & Betts Co., Elizabeth, N. J. Cable connector. 2,445,633, July 20.
Philbrick, George A., Sharon, and A. R. Catheron, Needham, assignors to The Foxboro Company, Foxboro, Mass. Altitude and rate of change measuring device and control for aircrafts. 2,445,835, July 20.
Philco Corporation, assignee: *See*—
Curtiss, George E., Jr.
Phillips, Homer L., Charleston, W. Va. Electrode extension. 2,445,363, July 20.
Piatkowski, Stephen L., assignee: *See*—
Weavie, Karl D.
Pierce, Jerry A: *See*—
Spicer, William E., and Pierce.
Pittsburgh Plate Glass Co., assignee: *See*—
Pechukas, Alphonse.
Plumb, Edwin W., Morris, Conn. Quick-change lathe tool holder. 2,445,634, July 20.
Polaroid Corporation, assignee: *See*
Binda, Frederick J.
Hyman, Mark, Jr., and West.
Land, Edwin H.
Poliakoff, Theodore, New York, N. Y., assignor to Flashlight Company of America, Jersey City, N. J. Lock switch. 2,445,635, July 20.
Pollard, Charles E., Jr., Hohokus, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Circuit maker and breaker. 2,445,406, July 20.
Porter, Frank, and G. A. Nesty, Morristown, N. J., assignors to Allied Chemical & Dye Corporation. Preparation of acrylonitrile from hydrocarbons and HCN. 2,445,693, July 20.
Porter, Lawrence C., East Cleveland, and H. C. Froelich, Cleveland Heights, Ohio, assignors to General Electric Company. Ultraviolet ray generator. 2,445,692, July 20.
Post, Hoyt: *See*—
Zabriskie, William F., and Post.
Predmore, Bert, assignor to The Seamless Rubber Company, New Haven, Conn. Urinal. 2,445,694, July 20.
Priest, Vall C., Mountainair, N. Mex. Valve actuating means. 2,445,498, July 20.
Prosperity Company, Inc., The, assignee: *See*—
Zimarik, Louis.
Puchlowski, Konstanty P., Wilkinsburg, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Reactor operated electronic control system. 2,445,454, July 20.
Purdy, Rolland M.: *See*—
Frei, Jakob R., and Purdy.
Quincy, William S., Jr.: *See*—
Kester, Robert E., and Quincy.
Quist, Cornelius: *See*—
Weyenberg, Henry, and Quist.
Radcliffe, Milton R., Glen Rock, and C. E. Best, Montclair, N. J., assignors to The Firestone Tire & Rubber Company, Akron, Ohio. Preparation of solid tetrachlorobutane. 2,445,729, July 20.
Radcliffe, Milton R., Glen Rock, N. J., and W. G. Mayes, Cuyahoga Falls, assignors to The Firestone Tire & Rubber Company, Akron, Ohio. Resins from methylene dioxolanes. 2,445,733, July 20.
Radio Corporation of America, assignee: *See*—
Beleskas, Stanley M.
Crosby, Murray G.
Ford, John R.
Krieger, Gardner L.
Martin, Stuart T., Jr.
Miller, William A.
Mountjoy, Garrard, Hulst, and Schoenfeld.
Wittenberg, Hubert H.
Ramo, Simon, Schenectady, N. Y., assignor to General Electric Company. Pulse receiving system. 2,445,584, July 20.
Rankin, Dan R., Los Angeles, and J. B. Wade, Arcadia, assignors to Food Machinery Corporation, San Jose, Calif. Casting tubular elements. 2,445,364, July 20.
Rapp, Harry S., assignee: *See*—
Thorn, Harry A.
Raspet, August, Locust Valley, N. Y., assignor to Specialties, Inc. Fluid stream direction indicator. 2,445,746, July 20.
Rauch, Alexander, Eatontown, N. J., assignor to United States of America as represented by the Secretary of War. Antenna mounting. 2,445,336, July 20.
Reardon, Eugene J., Mount Lebanon, Pa., assignor to The American Steel and Wire Company of New Jersey. Wire rope and manufacturing the same. 2,445,365, July 20.
Redmond, John F., Houston, Tex., assignor to Shell Development Company, San Francisco, Calif. Determining the fluid contents of underground formation samples. 2,445,494, July 20.
Reid, Ebenezer E.: *See*—
Francis, Albert W., and Reid.
Reid, Robert J.: *See*—
Rowland, George P., Jr., and Reid.
Rennika Company, assignee: *See*—
Kasten, Walter.
Republic Aviation Corporation, assignee: *See*—
Bohannon, William A.
King, Carl C.
Resinous Products & Chemical Company, The, assignee: *See*—
Beavers, Ellington M.
Richards, Lorenso A., Riverside, Calif. Irrigating plants. 2,445,717, July 20.
Riesenfeld, Fred C.: *See*—
Blohm, Clyde L., Riesenfeld, and Frasier.
Rigby, George W., Wilmington, Del., assignor, by mesne assignments to the United States of America as represented by the Secretary of War. Ophthalmic compositions. 2,445,366, July 20.
Rights, Herbert T., Verona, and H. Toomim, Newark, N. J., assignors to Westinghouse Electric Corporation, East Pittsburgh, Pa. Electrical micrometer gauge. 2,445,455, July 20.
Rinne, John, Brooklyn, and R. G. Mallard, Staten Island, assignors to The M. W. Kellogg Company, New York, N. Y. Filling feeler mechanism. 2,445,695, July 20.
Robey, Richard F., Cranford, J. Fedirko, Elizabeth, and A. E. Barnett, Westfield, N. J., assignors to Standard Oil Development Company. Stabilizing hydrocarbons. 2,445,367, July 20.
Robinson, Hugh S., U. S. Navy. Injection control system. 2,445,337, July 20.
Rockwell, Edward A., Cleveland, Ohio. Braking means for connected vehicles. 2,445,456, July 20.
Root, John J., New York, N. Y. Reactor. 2,445,408, July 20.
Rossman, Edwin F., Dayton, Ohio, assignor to General Motors Corporation, Detroit, Mich. Shock absorber. 2,445,407, July 20.
Roth, Willard, Forest Hills, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Pot furnace. 2,445,457, July 20.
Rousso, Jacques, Los Angeles, Calif. Multiple towel holder and dispenser. 2,445,495, July 20.
Rowland, George P., Jr., Pottstown, Pa., and R. J. Reid, Canal Fulton, assignors to The Firestone Tire & Rubber Company, Akron, Ohio. Stabilization of dichlorobutadiene resins. 2,445,739, July 20.
Rubidge, David W., Chatham, N. J., C. R. Manning, Vestal, N. Y., J. B. Greene, New Brunswick, N. J., and J. D. Hood, Endwell, assignors to International Business Machines Corporation, New York, N. Y. Record controlled machine. 2,445,636, July 20.
Rudd, Harry B., Flushing, N. Y. Lock nut. 2,445,696, July 20.
Rummelsburg, Alfred L., assignor to Hercules Powder Company, Wilmington, Del. Coating composition comprising a drying oil, a resin and an acyclic terpene solvent. 2,445,637, July 20.
Ryman, Walter L., assignee: *See*—
Elmes, John A., and Johnson.
St. John, Lewis D., Edgerton, Wis. Weedless fishing plug. 2,445,461, July 20.
Saks, Ira, Shaker Heights, Ohio. Friction clutch. 2,445,638, July 20.
Salem Engineering Company, The, assignee: *See*—
Buckholdt, Robert E.
Sanders, Robert W.: *See*—
Cawein, Madison, and Sanders.
Sandhofer, Richard, Zurich, Switzerland. Articulating apparatus for artificial teeth. 2,445,639, July 20.

Sardeson, Robert, and E. H. Savela, assignors to Pako Corporation, Minneapolis, Minn. Photographic film holder. 2,445,496, July 20.
Savela, Edward H.: *See*—
Sardeson, Robert, and Savela.
Schaeffer, Edward G., Holyoke, Mass. Producing electrical outlet plugs. 2,445,537, July 20.
Scharnhorst, Henry, Edinburg, Tex. House construction. 2,445,368, July 20.
Schermuly, Alfred J.: *See*—
Schermuly, Conrad D., A. J., and C.
Schermuly, Charles: *See*—
Schermuly, Conrad D., A. J., and C.
Schermuly, Conrad D., A. J., and C., Parkgate, Newdigate, England. Smoke, signal, or illuminating flare. 2,445,640, July 20.
Schoenfeld, Earl: *See*—
Mountjoy, Garrard, Hulst, and Schoenfeld.
Schumacher, William A.: *See*—
Benton, Gela J., and Schumacher.
Schurr, Otto E., assignor, by mesne assignments, to Lima-Hamilton Corporation, Hamilton, Ohio. Boring mill. 2,445,497, July 20..
Schurr, Otto E., assignor, by mesne assignments, to Lima-Hamilton Corporation, Hamilton, Ohio. Control for boring mills. 2,445,498, July 20.
Scott, Arden L.: *See*—
Herchenroeder, Louis W., and Scott.
Scott Aviation Corporation, assignee: *See*—
Meidenbauer, Phillip E., Jr.
Seamless Rubber Company, The, assignee: *See*—
Predmore, Bert.
Sepavich, Victor F., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Electric weft detecting system for looms. 2,445,641, July 20.
Shaff, Ernest H., Spring Lake, assignor to Keller Tool Company, Grand Haven, Mich. Pneumatic hoist and reversing valve mechanism therefor. 2,445,585, July 20.
Shank, Robert J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Automatic frequency control. 2,445,409, July 20.
Shell Development Company, assignee: *See*—
Morris, Rupert C., Horowitz, and Snider.
Redmond, John F.
Whetstone, Richard R.
Shelton, A. B., Corporation, assignee: *See*—
Shelton, Andrew B.
Shelton, Andrew B., assignor to A. B. Shelton Corporation, Columbus, Ga. Flaw detector for looms. 2,445,697, July 20.
Shields, Samuel F., McDavid, assignor of one-half to P. M. Clyde, Pensacola, Fla. Hydraulic transmission for outboard motors. 2,445,369, July 20.
Siebring, Maurice B., Kersey, Colo. Planter. 2,445,698, July 20.
Sievenpiper, Frederic L., Alden, assignor to Allied Chemical & Dye Corporation, New York, N. Y. Manufacture of quinizarine. 2,445,538, July 20.
Silent Hoist & Crane Co., Inc., assignee: *See*—
Flynn, Francis K., and Adelman.
Silge, Martin, Oakland, Calif. Refractometer based on the principle of total reflections. 2,445,499, July 20.
Simons, Francis L., Montclair, assignor to George La Monte & Son, Nutley, N. J. Moisture-sensitive paper and the manufacture thereof. 2,445,586, July 20.
Simonsen, Otta L., Burbank, Calif. Clothes form. 2,445,458, July 20.
Sims, Marion W., Fort Wayne, Ind., assignor to General Electric Company. Electric terminal and coil. 2,445,587, July 20.
Singer, Harry, Montreal, Quebec, Canada. Clinical thermometer. 2,445,539, July 20.
Skeats, Wilfred F., Lansdowne, Pa., assignor to General Electric Company. Electrical switchgear. 2,445,588, July 20.
Smillie, George, London, England. Apparatus for injecting liquid chemicals into a flowing stream. 2,445,540, July 20.
Smith, George E. P., Jr.: *See*—
Carr, Edward L., and Smith.
Smith, George E. P., Jr., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Vulcanization accelerator. 2,445,724, July 20.
Smith, Thomas R., assignor to The Maytag Company, Newton, Iowa. Shaft sealing means. 2,445,410, July 20.
Snider, Alva V.: *See*—
Morris, Rupert C., Horowitz, and Snider.
Snyder, Frederick D., Milton, Mass., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Control circuits for electromagnetic chucks. 2,445,459, July 20.
Snyder, Frederick D., Milton, Mass., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Dynamic braking system. 2,445,460, July 20.
Snyder, Howard L., Sodus, N. Y. Nail stripper. 2,445,541, July 20.
Societe des Usines Chimiques Rhone Poulenc, assignee: *See*—
Fourneau, Ernest.
Socony-Vacuum Oil Company, Incorporated, assignee: *See*—
Bergstrom, Eric V.
Caldwell, Hamilton P., Jr.
Francis, Alfred W., and Reid.
Soday, Frank J., Baton Rouge, La., assignor to The United Gas Improvement Company. Plastic composition composed of a cellulose compound and an indanol ester. 2,445,642, July 20.
Soday, Frank J., Baton Rouge, La., assignor to The United Gas Improvement Company. Hydrocarbon resins and compositions containing the same. 2,445,643, July 20.
Soday, Frank J., Baton Rouge, La., assignor to The United Gas Improvement Company. Oxygen treated hydrocarbon resins and compositions containing the same. 2,445,644, July 20.
Solar Aircraft Company, assignee: *See*—
Arnhym, Albert A.
Sowa, Frank J., Cranford, N. J., assignor to American Machine and Foundry Company. Tobacco and treating the same. 2,445,335, July 20.
Spang, Carl F., Milton, Mass., assignor to Cube Steak Machine Co. Slicing machine including a stationary cutting grid and a reciprocating plunger. 2,445,589, July 20.
Specialties, Inc., assignee: *See*—
Raspet, August.
Spicer, William E., and J. A. Pierce, Baton Rouge, La., assignors to Standard Oil Development Company. Catalytic cracking of hydrocarbon oils with activated clays. 2,445,370, July 20.
Square D Company, assignee: *See*—
Maechtlen, Lawrence G., Duvall, and Esler.
Stanco Incorporated, assignee: *See*—
Cooke, Henry H., and Holtsclaw.
Standard Oil Development Company, assignee: *See*—
Connolly, Gerald C.
Gohr, Edwin J.
Miller, Pharis.
Robey, Richard F., Fedirko, and Barnett.
Spicer, William E., and Pierce.
Young, David W., and Elmore.
Stanley Works, The, assignee: *See*—
Webster, John H.
Stephens, Dishman K., assignor to Panhandle Eastern Pipe Line Company, Kansas City, Mo. Apparatus for painting the inside of pipe lines. 2,445,645, July 20.
Stephenson, Hugh M., Fort Wayne, Ind., assignor to General Electric Company. Driving mechanism. 2,445,590, July 20.
Sternberg, Ernest R., administrator cum testamento annexo: *See*—
Sternberg, Ernst M.
Sternberg, Ernst M., deceased, Miami, Fla.; E. R. Sternberg, administrator cum testamento annexo. Dual transmission control. 2,445,716, July 20.
Sternberg, Jules R. and M. L. B., Fort Smith, Ark. Putter type golf club. 2,445,718, July 20.
Sternberg, Mary L. B.: *See*—
Sternberg, Jules R. and M. L. B.
Stevens, Horace D., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Tire building apparatus (ply turn-up). 2,445,728, July 20.
Stratton, William D., Paterson, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Filamentary electrode mounting for electronic devices. 2,445,411, July 20.
Strosinski, Anthony J., Elmira Heights, N. Y., assignor to Bendix Aviation Corporation. Bobbin holder. 2,445,542, July 20.
Sturz, Bernard V., Mountain Lakes, N. J., assignor to David D. Doniger & Co., Inc., New York, N. Y. Shoulder pad assembly. 2,445,646, July 20.
Sullivan, Earle C., Bridgeport, Conn., assignor to General Electric Company. Coffee maker. 2,445,591, July 20.
Summerbell, William, Washington, D. C. Gun tubes, breech rings and coupling means therefor. 2,445,330, July 20.
Sundstrand Machine Tool Co., assignee: *See*—
Holmstrom, Carl L.
Sunshine Mining Company, assignee: *See*—
Goetz, Alexander.
Surface Combustion Corporation, assignee: *See*—
Trimble, John L., and Myler.
Sweet, Alvin J., East Aurora, assignor to Allied Chemical and Dye Corporation, New York, N. Y. Manufacture of 2-anthrahydroquinonecarboxylic acid. 2,445,699, July 20.
Sylvester, Frederick F., Springfield, N. J. Electrical component. 2,445,719, July 20.
Textron, Incorporated, assignee: *See*—
Galatioto, Luigi C.
Thines, Hubert, Brussels, Belgium. Mine prop. 2,445,543, July 20.
Thomas & Betts Co., The, assignee: *See*—
Peters, Walter.
Thomas, Howard R., Kensington, Md. Long-base strain or distance gauge. 2,445,340, July 20.
Thomas, John W., New Kensington, assignor to Aluminum Company of America, Pittsburgh, Pa. Closure and container. 2,445,647, July 20.

Thurn, Harry A., assignor to H. S. Rapp, Warren, Pa. Washing machine conveyer. 2,445,371, July 20.
Toomim, Hershel: *See*—
Rights, Herbert T., and Toomim.
Trautman, Walter C., Los Angeles, Calif., assignor to Bendix Aviation Corporation, South Bend, Ind. Flow-regulating valve. 2,445,544, July 20.
Trenbath, Herbert W., Shaker Heights, Ohio, assignor to The American Steel and Wire Company of New Jersey. Copper coating stainless steel. 2,445,872, July 20.
Trimble, John I., and W. M. Myler, Jr., Columbus, assignors, by mesne assignments, to Surface Combustion Corporation, Toledo, Ohio. Aircraft heater with wick burner. 2,445,341, July 20.
Trofimov, Lev A., Willoughby, Ohio. Constant speed power supplying apparatus. 2,445,342, July 20.
Trogman, William, Chicago, Ill. Box fastening means. 2,445,412, July 20.
Truesdale, Edward C., Palmerton, Pa., assignor to The New Jersey Zinc Company, New York, N. Y. Producing powdered metal. 2,445,648, July 20.
Turner, Erville W., Manchester, Wash., assignor of one-half to H. E. Wood, Glendale, Calif. Hairpin opener. 2,445,373, July 20.
Turner, Lyman H., Irondequoit, O. F. Bauer, East Rochester, and L. C. Michelson, Brighton, assignors to Gleason Works, Rochester, N. Y. Machine for finishing gears. 2,445,649, July 20.
Tyra, Thomas D., United States Navy. Control system for airplanes. 2,445,343, July 20.
Tyrer, Daniel, Stockton-on-Tees, England. Manufacture of ethers of phenols. 2,445,500, July 20.
Union Oil Company of California, assignee: *See*—
Byrns, Alva C.
United Gas Improvement Company, assignee: *See*—
Soday, Frank J.
United Shoe Machinery Corporation, assignee: *See*—
Collins, George H.
Eastman, Fred C.
Vagim, Edward J., Fresno, Calif. Hopper assembly with solenoid operated gate. 2,445,501, July 20.
Van Wyck, Peter, Bland District, Va., assignor to Hercules Powder Company, Wilmington, Del. Stabilization of cellulose ethers. 2,445,374, July 20.
Vaughn, Kenneth E., assignor to Collins Radio Company, Cedar Rapids, Iowa. High-frequency tuning unit. 2,445,700, July 20.
Vaughn, Thomas J., and B. O. Morgan, Odessa, Tex.; said Morgan assignor to said Vaughn. Apparatus for converting fuels from liquid to gaseous state. 2,445,502, July 20.
Verner, James, Pocahontas, Iowa. Corner brace for fences. 2,445,545, July 20.
Victor Metal Products Corporation, assignee: *See*—
Hoch, John.
Victory Container Corporation, assignee: *See*—
Berke, Aaron.
Vogt, Clarence W., Norwalk, Conn. Manufacture of tires. 2,445,701, July 20.
Von Segebaden, Ernst, Drottningholm, assignor to Arenco Aktiebolag, Stockholm, Sweden. Triangulation apparatus for determining the path of an aerial target. 2,445,546, July 20.
Wachtel, James, San Francisco, Calif. Skier's resting device. 2,445,344, July 20.
Wade, John B.: *See*—
Rankin, Dan R., and Wade.
Walker, Marvin A., New Madrid, Mo. Cotton picker's sack. 2,445,650, July 20.
Walker, Ralph C., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Tire construction. 2,445,725, July 20.
Wallis, Lionel S., Knowle, England. Spring structure for mattress, cushions, or the like. 2,445,375, July 20.
War, United States of America as represented by the Secretary of, assignee: *See*—
Kharasch, Morris S., and Weinhouse.
Rauch, Alexander.
Rigby, George W.
Warner & Swasey Company, The, assignee: *See*—
Allen, Joseph F.
Darash, Nicholas P.
Watrous, Ward W., Jr., Chatham, N. J., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Electrical discharge device and base. 2,445,462, July 20.
Watter, Michael, assignor to The Budd Company, Philadelphia, Pa. Indentation-free welding. 2,445,747, July 20.
Weavie, Karl D., Saline, assignor of one-half to S. L. Piatkowski, Ann Arbor, Mich. Flashlight movie projector. 2,445,651, July 20.
Webster, John H., Rocky Hill, assignor to The Stanley Works, New Britain, Conn. Clear vision windshield deicer. 2,445,413, July 20.
Weinhouse, Sidney: *See*—
Kharasch, Morris S., and Weinhouse.
Weinstein, Norman, and G. F. Mannion, Chicago, Ill. Air conditioning apparatus. 2,445,705, July 20.
Wenzel, John S., Manchester, Conn., assignor to Wenzel, Wenzel, MacQuire & Richardson. Opposed cylinder two-cycle engine. 2,445,720, July 20.
Wenzel, Wenzel, MacQuire & Richardson, assignee: *See*—
Wenzel, John S.
West, Charles P., Forest Hills, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Universal bus-bar support. 2,445,463, July 20.
West, Cutler D.: *See*—
Hyman, Mark, Jr., and West.
Western Electric Company, Incorporated, assignee: *See*—
Malmberg, Bror V.
Westinghouse Air Brake Company, The, assignee: *See*—
Linhart, Harry M.
Westinghouse Electric Corporation, assignee: *See*—
Baker, Reat R., and Harris.
Breckenridge, Frank.
Derr, Willard A.
Fountain, Lawrence L.
Gamel, Gayne D., and Hawkins.
Godsey, Frank W., Jr.
Goldaborough, Shirley L.
Herchenroeder, Louis W., and Scott.
Hill, Lawrence R.
Hodell, William R.
Hornbarger, Earl H.
Hutcheson, John A.
Jennings, Lawrence D., and Naymik.
King, George E.
Leeds, Winthrop M.
Leeds, Winthrop M., and Friedrich.
Long, Charles R.
Marcum, Jess I.
Narbutovskih, Paul.
Puchlowski, Konstanty P.
Rights, Herbert T., and Toomim.
Roth, Willard.
Snyder, Frederick D.
Watrous, Ward W., Jr.
West, Charles P.
Weyenberg, Henry, and C. Quist, assignors to Holland Furnace Company, Holland, Mich. Tube coupling. 2,445,702, July 20.
Wheeler, Harry N., assignor to Dual Valve Company, Birmingham, Ala., a co-partnership composed of H. N. Wheeler and O. Somerville. Dual tire valve. 2,445,547, July 20.
Whetstone, Richard R., Berkeley, assignor to Shell Development Company, San Francisco, Calif. Derivatives of polymeric allyl-type alcohols. 2,445,652, July 20.
Whisman, Orville C., assignee: *See*—
Johnson, Ervin G.
White, Charles E., Salamanca, N. Y. Nasal applicator. 2,445,653, July 20.
White, William: *See*—
Parra, Joseph, and White.
Wiepert, George D., Branford, assignor to The Merriam Manufacturing Company, Durham, Conn. Making box-like containers. 2,445,548, July 20.
Willert, William H., Paterson, N. J., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Forming and orienting crystalline resinous bodies. 2,445,726, July 20.
Willert, William H., Clifton, N. J., assignor to The Firestone Tire & Rubber Company, Akron, Ohio. Distillation of 2,3-dichlorobutadiene-1,3. 2,445,738, July 20.
Williams, Emil F.: *See*—
Foster, George H., and Williams.
Williams, John H., St. Johns, New Foundland, Canada. Twin tires for motor vehicles. 2,445,503, July 20.
Williams, Russell J., Richmond Heights, assignor to Bemis Bro. Bag Company, St. Louis, Mo. Web associating mechanism. 2,445,703, July 20.
Williams, Sumner H., Charlotte, N. C. Fluid treating webs of fabric. 2,445,504, July 20.
Winner Manufacturing Company, Inc., assignee: *See*—
Drake, Robert E.
Winona Tool Manufacturing Company, assignee: *See*—
Fuglie, Elmer A.
Wittenberg, Hubert H., Lancaster, Pa., assignor to Radio Corporation of America. Control circuit. 2,445,549, July 20.
Wolff, Franklyn J., Trenton, N. J. Spark plug. 2,445,704, July 20.
Wood, Hope E., assignee: *See*—
Turner, Erville W.
Woodland, Paul C.: *See*—
Gerould, Charles H., and Woodland.
Woolmer, Thomas J., Jr., Baltimore, Md. Electromagnetic lock-opening system. 2,445,376, July 20.
Wotton, John, assignor to The Bristol Aeroplane Company Limited, Bristol, England. Control systems for adjusting the incidence of the blades of the rotor of a rotary-wing aircraft. 2,445,550, July 20.
Wyckoff, Lewis B., Lewiston, N. Y., assignor to Electro Metallurgical Company. Treating ores and concentrate produced thereby. 2,445,377, July 20.
Yanchenko, Basil J., Syracuse, N. Y., assignor to G. A. Braun, Inc., Chicago, Ill. Garment spotting apparatus. 2,445,592, July 20.
Young, David W., Roselle, and N. M. Elmore, Elizabeth, N. J., assignors to Standard Oil Development Company. Alkoxypolyolefin polymers and making same. 2,445,378, July 20.

Young, David W., Roselle, and N. M. Elmore, Elizabeth, N. J., assignors to Standard Oil Development Company. Polymerizing dialkoxydiolefins and isoolefins. 2,445,379, July 20.
Zabel, William P., Cleveland Heights, Ohio, assignor to General Electric Company. Vapor-supplying cartridge. 2,445,706, July 20.
Zabriskie, William F., Detroit, and H. Post, Grosse Pointe, assignors to Gabriel Steel Company, Detroit, Mich. Water service system for railway yards. 2,445,414, July 20.
Zarembinski, Clement G.: *See*—
Johnson, Sigurd W., and Zarembinski.
Zimarik, Louis, assignor to The Prosperity Company, Inc., Syracuse, N. Y. Outer and inner cylindrical drum supporting base and actuating mechanism assembly for washing machines. 2,445,593, July 20.
Zottu, Paul D., Indian Hills, assignor to The Girdler Corporation, Louisville, Ky. Coaxial transmission line. 2,445,380, July 20.

LIST OF DESIGN INVENTIONS

Ash tray and pipe smoker's accessory, Combined. P. S. Harper. 150,294, July 20.
Belt, shell pocket and game carrier, Combined hunter's. M. Keim. 150,305, July 20.
Box, Watch. S. Ackerman. 150,283, July 20.
Brooch or similar article. A. Katz. 150,302, July 20.
Camera, Box. A. H. Crappey, Jr. 150,289, July 20.
Coat. J. F. Strassner. 150,322, July 20.
Comb. L. T. Sawyer. 150,319, July 20.
Comb and nail file container or the like, Combined. J. S. McHugh. 150,309, July 20.
Container, Combined cigarette and jewelry. M. Giannillo. 150,292, July 20.
Dish, Baby. D. Chapman and W. Ramsay. 150,288, July 20.
Drawer pull. E. B. Lee. 150,307, July 20.
Dress. J. F. Strassner. 150,321, July 20.
Earring or similar article. A. Katz. 150,300, July 20.
Earring or similar article. A. Katz. 150,304, July 20.
Game board. H. R. Hoskins and F. M. Small. 150,295, July 20.
Guard or similar article, Instrument key. W. G. Johnson. 150,299, July 20.
Holder, Work. K. P. Friese. 150,291, July 20.
Ink container or similar article. F. Richman. 150,316, July 20.
Lamp or similar article, Musical. H. Asch. 150,286, July 20.
Necklace or similar article. A. Katz. 150,301, July 20.
Necklace or similar article. A. Katz. 150,303, July 20.
Pan for water closet tanks, Drip. V. E. Laufenberg. 150,306, July 20.
Pen, Fountain. J. Starr. 150,320, July 20.
Pen receptacle unit, Fountain. L. Moholy-Nagy. 150,311–13, July 20.
Projector, Visual educational. H. B. Roysher. 150,317, July 20.
Razor, Safety. H. Ruskin. 150,318, July 20.
Signalling device, Electric. G. L. Bossard. 150,287, July 20.
Sprinkler, Lawn. F. C. Hubbard. 150,296, July 20.
Squeezer, Fruit juice. F. N. Mariani. 150,308, July 20.
Stand, Coffee maker. H. Richards. 150,315, July 20.
Textile fabric or similar article. R. E. Minger. 150,310, July 20.
Tool, Scribing. R. A. Hutchinson. 150,297, July 20.
Toy whistle. R. Y. Grant, Jr. 150,293, July 20.
Viewer, Photographic. L. Frankel. 150,290, July 20.
Watch or similar article, Wrist. C. Arpels. 150,284, July 20.
Watch or similar article, Wrist. C. Arpels. 150,285, July 20.
Watch, Sun. J. E. Johanson and F. O. Boyd. 150,298, July 20.
Wrench or the like, Dual. F. E. Nettleton. 150,314, July 20.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 20TH DAY OF JULY, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Acrylonitrile from hydrocarbons and HCN, Preparation of. F. Porter and G. A. Nesty. 2,445,693, July 20.
Adding heat in the regeneration of catalyst for the conversion of hydrocarbons. E. J. Gohr. 2,445,351, July 20.
Air conditioning apparatus. N. Weinstein and G. F. Mannion. 2,445,705, July 20.
Aircraft power plant structure. W. A. Bohannon. 2,445,417, July 20.
Alkoxypolyolefin polymers and making same. D. W. Young and N. M. Elmore. 2,445,378, July 20.
Alkylaminoketone oximes, Preparing. G. H. Morey. 2,445,626, July 20.
Alkylated phenol and producing same. L. J. Kitchen. 2,445,735, July 20.
Alkylene dihydrazines and production. H. Dreyfus. 2,445,518, July 20.
Alphabet jigsaw game. L. Davis. 2,445,421, July 20.
Altitude and rate of change measuring device and control for aircrafts. G. A. Philbrick and A. R. Cathcron. 2,445,335, July 20.
Amino-derivatives of dioxa-cyclopentane, New. E. Fourneau. 2,445,393, July 20.
Ampoule. M. L. Folkman. 2,445,477, July 20.
Amusement device. L. C. Davis. 2,445,387, July 20.
Antenna, Mast. R. E. Kester and W. S. Quincy. 2,445,329, July 20.
Antenna mounting. A. Rauch. 2,445,336, July 20.
Apparatus for applying plastic materials to bands. C. W. Leguillon. 2,445,677, July 20.
Apparatus for converting fuels from liquid to gaseous state. T. J. Vaughn and B. O. Morgan. 2,445,502, July 20.
Apparatus for effecting a predetermined rate of specimen strain. W. D. Macgeorge. 2,445,683, July 20.
Apparatus for injecting liquid chemicals into a flowing stream. G. Smillie. 2,445,540, July 20.
Apparatus for mixing. M. P. Hofmann. 2,445,617, July 20.
Apparatus for molding. P. A. Norris. 2,445,405, July 20.
Apparatus for painting the inside of pipe lines. D. K. Stephens. 2,445,645, July 20.
Apparatus for producing cast metal bodies. R. K. Hopkins. 2,445,670, July 20.
Apparatus for producing coated wires by continuous process. W. C. Lang. 2,445,675, July 20.
Apparatus for the manufacture of explosives. A. O. Franz and O. C. Keplinger. 2,445,741, July 20.
Applicator, Nasal. C. E. White. 2,445,653, July 20.
Article holder. R. B. Davis. 2,445,606, July 20.
Articulating apparatus for artificial teeth. R. Sandhofer. 2,445,639, July 20.
Back rest for bleacher seats, Folding. E. Nunes. 2,445,362, July 20.
Ball rolling game. A. J. Guthrie. 2,445,575, July 20.
Barrel, Reinforced sectional. M. O. Kuhn. 2,445,730, July 20.
Bearing assembly W R. Hodell. 2,445,432, July 20.
Bevel gear. F. H. Boor. 2,445,559, July 20.
Binding, Water ski. R. H. Drake. 2,445,610, July 20.
Bobbin holder. A. J. Strosinski. 2,445,542, July 20.
Body garment. M. C. Fridolph. 2,445,322, July 20.
Booth and drying chamber, Combination spraying. L. E Padelford. 2,445,451, July 20.
Boring mill. O. E. Schurr. 2,445,497, July 20.
Bottle closure. E. Greene. 2,445,395, July 20.
Box: *See*—
Journal box.
Box fastening means. W. Trogman. 2,445,412, July 20
Brace for fences, Corner. J. Verner. 2,445,545, July 20.
Brake: *See*—
Vehicle brake.
Brake apparatus. H. M. Linhart. 2,445,680, July 20.
Braked rotative assembly. A. De Ghetto. 2,445,607, July 20.
Brassière. A. M. Moon. 2,445,449, July 20.
Building construction. E. J. Moloney. 2,445,491, July 20.
Bus bar support. L. L. Fountain. 2,445,424, July 20.
Cable clamping device. S. De Oriow. 2,445,474. July 20.
Cable connector. W. Peters. 2,445,633, July 20.
Cable hanger. A. L. Ge Wertz. 2,445,481, July 20.
Cage, Novelty wall bird. R. J. Brown. 2,445,419, July 20.
Cake make-up container. G. D. Miles. 2,445,685, July 20.
Calculator, Cutter life. J. F. Allen. 2,445,361, July 20.
Carburetor. M. E. Chandler. 2,445,289, July 20.
Cartridge case venting machine. E. Moyer. 2,445,331, July 20.
Cartridge, Vapor-supplying. W. P. Zabel. 2,445,706, July 20.
Casting metals, Method and apparatus for. P. Moreco. 2,445,563, July 20.
Casting tubular elements. D. R. Rankin and J. B. Wade. 2,445,364, July 20.
Catalytic alkylation. H. P. Caldwell, Jr. 2,445,560, July 20.
Catalytic cracking of hydrocarbon oils with activated clays. W. E. Spicer and J. A. Pierce. 2,445,370, July 20.
Catalytic reforming of hydrocarbon mixtures. A. C. Byrns. 2,445,345, July 20.
Cavity-resonator switching system, Dual. J. I. Marcum. 2,445,445, July 20.
Cellulose ethers, Stabilization of. P. Van Wyck. 2,445,374, July 20.
Cement, Thermosetting lens. W. F. Parsons and J. R. Dann. 2,445,535–6, July 20.
Chemical production of potable water from non-potable saline water. A. Goetz. 2,445,669, July 20.
Cigarette article. M. L. Folkman. 2,445,476, July 20.
Circuit: *See*—
Control circuit.
Circuit breaker. G. D. Gamel and W. S. Hawkins. 2,445,426, July 20.
Circuit breaker operating mechanism. A. C. Boisseau. 2,445,538, July 20.
Circuit interrupter. W. M. Leeds. 2,445,529, July 20.
Circuit interrupter. W. M. Leeds and R. E. Friedrich. 2,445,442, July 20.
Circuit maker and breaker. C. E. Pollard, Jr. 2,445,406, July 20.
Circuit tester, Electrical. E. A. Fuglie. 2,445,667, July 20.
Clamp. A. A. Durant. 2,445,475, July 20.
Clamp. H. D. Gursky. 2,445,396, July 20.
Cleanout apparatus for drill steel. C. J. and F. S. Brown. 2,445,659, July 20.
Clip: *See*—
Contact clip.
Closure and container. J. W. Thomas. 2,445,647, July 20.

Reactance tube and modulator circuit. S. M. Beleskas. 2,445,508, July 20.
Reactor. J. J. Boot. 2,445,408, July 20.
Record controlled machine. D. W. Rubidge, C. R. Manning, J. B. Greene, and J. D. Hood. 2,445,636, July 20.
Rectifier. G. L. Krieger. 2,445,441, July 20.
Reel: *See*—
Plumb bob reel.
Reflectometer for waveguide systems. J. R. Ford. 2,445,348, July 20.
Refractometer based on the principle of total reflections. M. Silge. 2,445,499, July 20.
Refrigerating apparatus assembled and removed from cabinet as a unit. D. G. Brauer. 2,445,470, July 20.
Regenerated cellulose films, Making. J. B. Nichols. 2,445,333, July 20.
Removal of acidic constituents from gases. C. L. Blohm, F. C. Riesenfeld, and H. D. Frazier. 2,445,468, July 20.
Resins from methylene dioxolanes. M. R. Radcliffe and W. G. Mayes. 2,445,733, July 20.
Resting device, Skier's. J. Wachtel. 2,445,344, July 20.
Riser. J. J. Josepha. 2,445,619, July 20.
Rivet set retainer spring. A. W. Darry. 2,445,551, July 20.
Roller, Window shade. H. S. Peed. 2,445,452, July 20.
Rotary tool for beading over cylindrical flanges. T. C. Korsmo. 2,445,357, July 20.
Rubber dispersions, Aqueous. A. R. Davis. 2,445,740, July 20.
Rubber spring. R. W. Brown. 2,445,723, July 20.
Sack, Cotton picker's. M. A. Walker. 2,445,650, July 20.
Safety container for rockets. F. C. Eastman. 2,445,423, July 20.
Safety control system for burners. T. J. Mesh. 2,445,531, July 20.
Sander. R. V. Bowen. 2,445,509, July 20.
Scaffold, Portable. L. K. Pennington. 2,445,453, July 20.
Screen: *See*—
Glare screen.
Screw driver having two-part expanding bit. G. W. Barlow. 2,445,383, July 20.
Sealing means, Shaft. T. R. Smith. 2,445,410, July 20.
Self-cleaning nonskid cross link. J. L. Batts. 2,445,507, July 20.
Sheet, Pressure-sensitive adhesive. E. M. Beavers. 2,445,553, July 20.
Sheetlike light-polarizing complex of iodine and a polyvinyl compound with protective surface boric acid-polyvinyl compound complex. M. Hyman, Jr. and C. D. West. 2,445,579, July 20.
Shipping container. A. Berke. 2,445,467, July 20.
Shock absorber. E. F. Rosaman. 2,445,407, July 20.
Shoe construction. W. H. Doherty. 2,445,665, July 20.
Shoe pressing apparatus. F. Dawson. 2,445,565, July 20.
Shoulder pad assembly. B. V. Sturs. 2,445,646, July 20.
Signal indications for flying, Auditory tone. T. W. Forbes. 2,445,712, July 20.
Slicing machine including a stationary cutting grid and a reciprocating plunger. C. F. Spang. 2,445,589, July 20.
Slide rule. J. F. Allinger. 2,445,464, July 20.
Soldering with resin fluxes. L. R. Hill. 2,445,431, July 20.
Solid tetrachlorobutane, Preparation of. M. R. Radcliffe and C. E. Best. 2,445,729, July 20.
Spark plug. F. J. Wolff. 2,445,704, July 20.
Spinning frame control. D. R. Neely. 2,445,687, July 20.
Spool support. L. P. Musso. 2,445,534, July 20.
Spring: *See*—
Rivet set retainer spring.
Spring structure for mattress, cushions, or the like. L. S. Wallis. 2,445,375, July 20.
Stabilization of dichlorobutadiene resins. G. P. Rowland, Jr., and R. J. Reid. 2,445,739, July 20.
Stabilization of rubber-like copolymers with reaction products of sulfur dichloride, and aldehyde, and a phenol. G. W. Gottschalk. 2,445,736, July 20.
Stainless steel, Copper coating. H. W. Trenbath. 2,445,372, July 20.
Stand: *See*—
Wheel aligning stand.
Steam generating attachment for electric irons. W. E. Baker. 2,445,506, July 20.
Sterilizer, Razor strop. V. R. Minton. 2,445,532, July 20.
Still, Multiple-effect solar. D. C. Ginnings. 2,445,350, July 20.
Stool, Folding camp. J. A. Mangold. 2,445,489, July 20.
Straightener or shaper, Wire. G. Forsman. 2,445,615, July 20.
Strap, Lug. J. E. Moe. 2,445,744, July 20.
Stripper, Nail. H. L. Snyder. 2,445,541, July 20.
Suction means for removing egg liquid, Automatic. J. Meade. 2,445,490, July 20.
Sulfonated polybenzyl. A. L. Fox. 2,445,569, July 20.
Sun bath device. I. B. Lewk. 2,445,622, July 20.
Support: *See*—
Bus bar support.
Ironer roller extension support.
Spool support.
Universal bus-bar support.
Support and traction of implements. A. F. Butch. 2,445,472, July 20.
Supporter, Garment. R. M. Garbutt. 2,445,349, July 20.
Switch: *See*—
Lock switch.
Switch for internal-combustion engines, Safety. C. L. Meinholdt. 2,445,625, July 20.
Sweepstick. J. E. Moe. 2,445,745, July 20.
Synthetic rubber composition containing a reaction product of sulfur dichloride, an aldehyde and an alkyl phenol. H. E. Albert. 2,445,737, July 20.
Table for band saws with means for retracting the table from the cutting plane after each cutting stroke, Reciprocating work. W. Lasar. 2,445,676, July 20.
Tandem axle assembly. W. C. Nabors. 2,445,686, July 20.
Telecentric projection lens. H. F. Bennett. 2,445,594, July 20.
Telescope mounting for guns. E. F. Bengert. 2,445,595, July 20.
Tension device. C. O. Bruestle. 2,445,600, July 20.
Terminal and coil, Electric. M. W. Sims. 2,445,567, July 20.
Thermionic valve and circuit mounting. W. S. Melville. 2,445,582, July 20.
Thermometer, Clinical. H. Singer. 2,445,539, July 20.
Thiol derivatives. M. S. Kharasch and S. Weinhouse. 2,445,356, July 20.
Tire building apparatus (ply turn-up). H. D. Stevens. 2,445,728, July 20.
Tire construction. R. C. Walker. 2,445,725, July 20.
Tire inspection device. E. V. K. Jaycox. 2,445,731, July 20.
Tires for motor vehicles, Twin. J. H. Williams. 2,445,503, July 20.
Tires, Manufacture of. C. W. Vogt. 2,445,701, July 20.
Titania gel-boria catalyst, Preparation of a. G. C. Connolly. 2,445,346, July 20.
Titanium dioxide, Preparation of. A. Pechukas. 2,445,691, July 20.
Tobacco and treating the same. F. J. Sowa. 2,445,338, July 20.
Tool: *See*—
Machine tool.
Toothbrush. P. G. Bennett. 2,445,657, July 20.
Toothbrush. L. L. Fuston. 2,445,571, July 20.
Torquemeter. F. W. Godsey, Jr. 2,445,427, July 20.
Towel holder and dispenser, Multiple. J. Russo. 2,445,496, July 20.
Toy, Flying. H. E. Dunn. 2,445,611, July 20.
Transmission. M. Godbe, Jr. 2,445,573, July 20.
Transmission, Automatic. R. H. Hodgson. 2,445,482, July 20.
Transmission control, Dual. E. M. Sternberg. 2,445,716, July 20.
Treadle, Electric. C. O. Bruestle. 2,445,660, July 20.
Triangulation apparatus for determining the path of an aerial target. E. von Segebaden. 2,445,546, July 20.
Tube: *See*—
Power tube.
Tube coupling. H. Weyenberg and C. Quist. 2,445,702, July 20.
Tubular coverings, Making. P. F. McDermott and H. B. Holcomb. 2,445,624, July 20.
Turbines, compressors and the like, Axial flow. H. Constant and W. Merchant. 2,445,661, July 20.
Twisting machine. R. J. Bartholomew. 2,445,721, July 20.
2-anthrahydroquinonecarboxylic acid, Manufacture of. A. J. Sweet. 2,445,699, July 20.
Ultraviolet ray generator. L. C. Porter and H. C. Froelich. 2,445,692, July 20.
Universal bus-bar support. C. P. West. 2,445,463, July 20.
Urinal. B. Predmore. 2,445,694, July 20.
Valve: *See*—
Dual tire valve.
Excess flow valve.
Flow-regulating valve.
Hydraulic valve.
Metering valve.
Valve. B. N. Ashton. 2,445,505, July 20.

Valve actuating means. V. C. Priest. 2,445,493, July 20.
Valve for hose nozzles, Automatic shut-off. A. L. Grise. 2,445,524, July 20.
Valve mechanism for breathing apparatus. P. E. Meidenbauer, Jr. 2,445,369, July 20.
Variable fraction plug. R. R. and R. E. Mondron. 2,445,533, July 20.
Variable output pump. H. A. Cartwright. 2,445,603, July 20.
Variable throw eccentric. J. G. Crosby. 2,445,605, July 20.
Vehicle brake. E. R. Hood. 2,445,616, July 20.
Vehicle, Braking connected. E. A. Rockwell. 2,445,456, July 20.
Vibrator. N. Langer. 2,445,401, July 20.
Vibrator circuit with primary current division. R. M. Ellis. 2,445,390, July 20.
Vibrator, High-frequency. R. J. Aust. 2,445,382, July 20.
Vibrator system. C. Huetten. 2,445,398, July 20.
Vulcanization accelerator. E. L. Carr and G. E. P. Smith, Jr. 2,445,722, July 20.
Vulcanization accelerator. G. E. P. Smith, Jr. 2,445,724, July 20.
Washing and drying machine, Dish. S. J. and S. R. Brown. 2,445,707, July 20.
Washing machine conveyer. H. A. Thurn. 2,445,371, July 20.
Water service system for railway yards. W. F. Zabriskie and H. Post. 2,445,414, July 20.
Web associating mechanism. R. J. Williams. 2,445,703, July 20.
Weedless fishing plug. L. D. St. John. 2,445,461, July 20.
Weft detecting system for looms, Electric. V. F. Sepavich. 2,445,641, July 20.
Welding, Indentation-free. M. Watter. 2,445,747, July 20.
Wheel aligning stand. A. G. Horton. 2,445,397, July 20.
Wheel structure. G. A. Lyon. 2,445,330, July 20.
Wire rope and manufacturing the same. E. J. Reardon. 2,445,365, July 20.
Wrench with slotted fulcrum guide, Pivoted jaw plier. J. P. Gantt. 2,445,480, July 20.

CLASSIFICATION OF PATENTS

ISSUED JULY 20, 1948

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number—class, second number—subclass, third number—patent number

1— 46.1: 2,445,674
49.7: 2,445,841
2— 10: 2,445,355

DESIGN FOR A COMB
Lester T. Sawyer, Leominster, Mass.
Application June 18, 1947, Serial No. 139,778
Term of patent 14 years
(Cl. D86—8)

The ornamental design for a comb, as shown and described.

150,320
DESIGN FOR A FOUNTAIN PEN
Joseph Starr, Chicago, Ill., assignor to The Conklin Pen Company Inc., Chicago, Ill., a corporation of Illinois
Application April 3, 1947, Serial No. 138,132
Term of patent 14 years
(Cl. D74—17)

The ornamental design for a fountain pen, substantially as shown.

150,321
DESIGN FOR A
John F. Strassner, Ne
Application July 15, 1947,
Term of patent 3
(Cl. D3—2

The ornamental design for
tially as shown.

150,322
DESIGN FOR A
John F. Strassner, New
Application July 15, 1947,
Term of patent 3½
(Cl. D3—4)

The ornamental design for a
as shown.

THE LIKE
, assignor to
, Mass., a cor-

rial No. 143,315
rs

mb or the like,
bed.

RA
, Ill., assignor
Chicago, Ill., a

rial No. 143,432
rs

n ash receiver,
cribed.

The ornamental design for a camera, substantially as shown.

Condition of Applications Under Examination at Close of Business July 9, 1948

(Total number of applications awaiting action, excluding Trade-Mark Operation, 144,262; Trade-Mark Operation, 30,996. Oldest new case, June 21, 1948; oldest amended, April 12, 1946.)

DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTIONS	Oldest new application and oldest action by applicant awaiting Office action: New	Amended	Applications awaiting action
1. GOLDBERG, A. J., Closure Operators; Fences; Gates; Planters; Plows; Harrows and Diggers; Plant Husbandry; Scattering Unloaders; Baths, Closets, Sinks, and Spittoons; Sewerage.	Nov. 20	Aug. 14	2,923
	Aug. 20	June 17	3,027
2. HERRMANN, D., Fishing, Trapping and Vermin Destroying; Animal Husbandry; Presses; Tobacco; Textile Wringers; Butchering.	†Sept. 20	†Aug. 6	1,826
3. MARMELSTEIN, N., Metal Founding and Treatment; Metallurgy (Process and Apparatus)	Dec. 22	Dec. 7	3,880
4. BISHOP, WALTER C., Conveyors; Hoists; Handling Apparatus; Excavating; Elevators; Fire Escapes; Ladders; Scaffolds; Pneumatic Dispatch; Store Service; Mining, Quarrying, and Ice Harvesting.	Sept. 11	Aug. 7	1,798
5. ROBINSON, C. W., Harvesters; Bee Culture; Dairy; Music; Acoustics; Sound Recording; Knotters; Buckles, Buttons, Clasps.	†Aug. 21	†July 8	1,764
6. SURLE, H., Carbon Chemistry (part)	†Aug. 20	†June 3	1,755
7. HANLIN, GEORGE, Optics; Photographic Apparatus	Sept. 22	July 3	4,388
8. COBLE, A. S., (Acting), Furniture; Racks and Cabinets	†Mar. 26	July 6	2,240
9. BENSON, R. B., Pumps and Fans; Fluid and Fluid-Current Motors	†Oct. 21	†Sept. 11	1,725
10. ANDRUS, L. M., Radiant Energy (part, e. g., Portable Radio Sets, Radio Accessories, Detectors, Oscillation Generators, Wave Meters, Tuners); Music; Modulators; Piezo-electric Crystals.	†Aug. 22	†Nov. 1	725
11. BENHAM, E. V., Boots, Shoes, and Leggings, Button, Eyelet, and Rivet Setting; Harness; Leather Manufactures; Nailing and Stapling; Whip Apparatus.	†Sept. 17	Aug. 5	2,079
12. SPINTMAN, S., Machine Elements (part); Engine Starters; Motor Control with Clutch or Brake; Transmission with Clutch or Brake.	Sept. 7	Aug. 1	2,980
13. BEALL, T. E., Gear Cutting, Milling, Planing, Metal Working (part); Needle and Pin Making; Turning	†Oct. 4	†July 12	1,385
14. FREEHOF, H. B., Metal Working (Bending; Sheet-Metal; Wire; Misc. Processes); Wire Fabrics; Farriery	†Feb. 11	Sept. 30	3,111
15. HENKIN, B., Plastics; Plastic Block and Earthenware Apparatus; Glass	†Sept. 11	†June 5	1,906
16. LOVEWELL, N. N., Television; Telephony	Dec. 30	Aug. 17	2,079
17. HABECKER, LEON B., Paper Manufactures; Typewriters; Printing; Type Casting and Setting; Sheet Material Associating or Folding; Sheet or Web Feeding.	†Mar. 24	July 26	1,986
18. KURZ, J. A., Motors, Expansible-Chamber Type; Power Plants; Speed Responsive Devices; Rotary Internal-Combustion Engines.	†Mar. 21	Oct. 19	1,982
19. PATRICK, P. L., Liquid and Gaseous Fuel Burners; Stoves and Furnaces	†Jan. 30	Nov. 1	1,900
20. BROWN, L. M., Miscellaneous Hardware; Closure Fasteners; Locks; Undertaking; Bread, Pastry, and Confection Making; Bank Protection; Safes; Tents, Canopies, Umbrellas and Canes.	†Aug. 5	†July 1	1,286
21. MADER, R. C., Textiles	†July 15	Aug. 2	1,781
22. CARPENTER, B. H., Aeronautics; Firearms; Ordnance	Dec. 13	July 26	1,285
23. LEWIS, J. B., Cash Registers; Calculators and Counters; Education	†Aug. 1	†July 19	2,542
24. LUSBY, CHARLES, Apparel; Apparel Apparatus; Package and Article Carriers; Sewing Machines	†Aug. 20	Oct. 3	1,770
25. BLAKELY, C. F., Classifying Solids; Centrifugal-Bowl Separators; Mills; Threshing; Vegetable and Meat Cutters and Comminutors; Distillation.	†Oct. 1	Nov. 6	1,418
26. YOUNG, R. R., Electricity—Generation and Motive Power	†Apr. 12	Oct. 21	3,222
27. JAMES, S., Brushing, Scrubbing; Fluid Treatment of Textiles (Apparatus); Liquid Treatment of Solids; General Cleaning; Ironing; Brush, Broom and Mop Making.	†May 20	†May 26	1,128
28. SOLYOM, H. L., Heating; Internal-Combustion Engines (part); Cylinders; Pistons	†Jan. 3	Aug. 9	3,190
29. SKLARIN, J. B., Baggage; Cloth, Leather, and Rubber Receptacles; Button Making; Woodworking; Tools	†Oct. 9	†Apr. 5	2,474
30. BISHOFF, A., Automatic Temperature and Humidity Regulation; Illumination; Thermostats and Humidostats; Heating Systems; Ammunition and Explosive Devices.	†Oct. 8	†Oct. 14	2,156
31. DUNCOMBE, C. S., Mineral Oils; Carbocyclic or Acyclic Carbon Compounds (part)—e. g., Ketones, Aldehydes, Ethers, Hydroxy Compounds, Hydrocarbons, Halogenated Hydrocarbons.	†Jan. 9	July 1	3,170
32. LESH, KARL R., Gas and Liquid Contact Apparatus; Heat Exchange; Gas Separation; Agitating; Wells; Earth Boring.	Sept. 16	June 26	3,886
33. KAUFFMAN, H. E., Bridges; Hydraulic and Earth Engineering; Building Structures; Roads and Pavements	Nov. 9	July 19	1,476
34. SAPERSTEIN, S., Electricity—Transmission to Vehicles; Railways; Track Sanders; Signals and Indicators	†Apr. 17	Sept. 10	3,189
35. BROMLEY, E. D., Card and Sign Exhibiting; Dispensing; Filling and Closing Portable Receptacles; Ammunition and Explosive Charge Making.	Oct. 1	June 26	2,682
36. McFADYEN, A. D., Automatic Weighers; Measuring and Testing; Force Measuring	†Oct. 11	†Jan. 21	1,469

CLASSIFIED LIST OF TRADE-MARKS REGISTERED

CLASS 1

Coal. Campbell Coal Company. 240,763, renewed Apr. 10, 1948. O. G. July 27.

Coal. Campbells Creek Coal Company. 70,045, re-renewed July 28, 1948. O. G. July 27.

Coal. Island Creek Coal Company. 191,978, Nov. 25, 1924. Republished July 27.

Coal. Island Creek Coal Company. 276,012, Oct. 7, 1930. Republished July 27.

Coal. Island Creek Coal Sales Company. 341,756, Dec. 22, 1936. Republished July 27.

Coal. Island Creek Coal Sales Company. 341,775, Dec. 22, 1936. Republished July 27.

Coal. Island Creek Coal Sales Company. 342,535, Jan. 19, 1937. Republished July 27.

Coal. Island Creek Coal Sales Company. 343,680, Mar. 2, 1937. Republished July 27.

Coal. Island Creek Coal Sales Company. 360,123, Sept. 6, 1938. Republished July 27.

Coal. Island Creek Coal Sales Company. 415,097, July 10, 1945. Republished July 27.

Coal. Philadelphia and Reading Coal and Iron Company. 192,216, renewed Jan. 5, 1948. O. G. July 27.

Coal. Philadelphia and Reading Coal and Iron Company. 229,012, renewed Jan. 5, 1948. O. G. July 27.

Coal, Bituminous. Taylor Coal Company. 132,832, June 29, 1920. Republished July 27.

Cut Sowers. Ariston, Incorporated. 439,940, July 27; Serial No. 473,972.

Feathers and sponges. Wm. Filene's Sons Company. 266,869, Feb. 4, 1930. Republished July 27.

Flower bulbs. Oregon Bulb Farms. 439,932–3, July 27; Serial Nos. 525,028–9, published Mar. 16, 1948.

Full-grained and buffed sole leather. J. Greenebaum Tanning Co. 501,173, July 27; Serial No. 529,036, published Apr. 20, 1948.

Goat, sheep and cow hides, of the antelope finish type. Tanned. C. I. D. E. C. Compania Industrial Del Cuero S. A. 439,942, July 27; Serial No. 512,227, published Mar. 16, 1948.

Horses and cattle. G. R. Browne. 439,937, July 27; Serial No. 525,295, published Apr. 27, 1948.

Leather. Peter Baran & Sons, Inc. 501,172, July 27; Serial No. 528,887, published Mar. 30, 1948.

Leather. Eagle-Ottawa Leather Company. 439,920, July 27; Serial No. 522,832, published Apr. 6, 1948.

Leather, Calf. American Hide and Leather Company. 241,564, renewed May 1, 1948. O. G. July 27.

Leather in the piece. J. Greenebaum Tanning Co. 501,174–5, July 27; Serial Nos. 530,037–8, published Apr. 20, 1948.

Nitro cellulose bases. Burbank Chemical Company. 439,844, July 27; Serial No. 508,787, published Feb. 17, 1948.

Oakum for packing and caulking. American Manufacturing Company. 501,275, July 27; Serial No. 528,849.

Ore, Chrome. E. J. Lavino and Company. 248,118, renewed Oct. 16, 1948. O. G. July 27.

Plastic material in the form of tapes, tubes, rods, etc. Extruded resinoid. Irvington Varnish & Insulator Co. 439,823, July 27; Serial No. 494,792, published June 3, 1947.

Resins. Reichhold Chemicals Inc. 306,504, Apr. 18, 1939. Republished July 27.

Rigid and semi-rigid sheets surfaced with plastic materials. Western Products, Inc. 439,841, July 27; Serial No. 505,209, published Mar. 30, 1948.

Seed corn. E. W. Conklin & Son. 46,094, Sept. 5, 1905. Republished July 27.

Seed, Grass. E. W. Conklin & Son. 45,651, Aug. 22, 1905. Republished July 27.

Seed, Grass. E. W. Conklin & Son. 46,088, Sept. 5, 1905. Republished July 27.

Seed, Grass. E. W. Conklin & Son. 46,092, Sept. 5, 1905. Republished July 27.

Seed, Grass. Philadelphia Seed Co. 297,494, Sept. 13, 1932. Republished July 27.

Seed, Lawn grass. I. Ostberg. 274,378, Aug. 28, 1930. Republished July 27.

Seeds, Field, flower, and garden. Paramount Seed Company. 312,928, May 18, 1934. Republished July 27.

Skins and leather, Processed. Anglo American Leather Co., Inc. 439,921, July 27; Serial No. 522,979, published Apr. 6, 1948.

Synthetic resinous materials in the form of sheets, rods, or molding compounds. Rohm & Haas Company. 501,227, July 27; Serial No. 534,473, published Apr. 13, 1948.

Synthetic resins for use in solid or solution form. Monsanto Chemical Company. 501,147, July 27; Serial No. 518,846, published Apr. 13, 1948.

Syrups or solutions of polymerizable synthetic resins. Aerywin Corporation of America. 439,877, July 27; Serial No. 515,812, published Apr. 20, 1948.
Waste, Cotton, wool and rayon. Sapt, Inc. 439,929, July 27; Serial No. 524,019, published Mar. 16, 1948.
Wood pulp and mechanical pulp, etc., Chemical. Aktiebolaget Iggesunds Bruk. 439,941, July 27; Serial No. 476,944.

CLASS 2

Bags, Paper. Thomas M. Royal & Co. 371,659, Oct. 3, 1939. Republished July 27.
Bags, Paper sandwich. Marcalus Manufacturing Co., Inc. 501,134, July 27; Serial No. 506,761, published Apr. 20, 1948.
Bags, Refrigerator. Hodgman Rubber Company. 394,488. Apr. 7, 1942. Republished July 27.
Cans, Metal. Crown Can Company. 343,530, Feb. 23, 1937. Republished July 27.
Casks and barrels. Greif Bros. Co. 85,344, Feb. 13, 1912. Republished July 27.
Casks and barrels. Greif Bros. Co. 86,528, May 14, 1912. Republished July 27.
Casks and barrels. Greif Bros. Co. 86,530, May 14, 1912. Republished July 27.
Containers, Cylindrical. Greif Bros. Cooperage Co. 91,572-4, May 13, 1913. Republished July 27.
Cylinder and tank converters. William Wharton, Jr., & Company, Incorporated. 294,888, June 7, 1932. Republished July 27.
Metal liners. Poloron Products, Inc. 439,897, July 27; Serial No. 519,028, published Apr. 20, 1948.
Plastic storage bags adapted for the reception and retention of commodities. A. Tanaki. 439,923, July 27; Serial No. 523,214, published Apr. 27, 1948.
Shipping drums. Seymour & Peck Company. 179,244-5, Feb. 5, 1924. Republished July 27.
Vacuum bottles and heat-insulated receptacles. Aladdin Industries, Incorporated. 501,130, July 27; Serial No. 480,126, published Apr. 27, 1948.
Vanity cases, compacts, and lipstick holders, etc. Les Parfums De Dana, Inc. 439,824, July 27; Serial No. 495,039, published Dec. 24, 1946.

CLASS 3

Handbags and pocketbooks, Leather. Buscarlet Glove Company, Inc. 327,930, Sept. 10, 1935. Republished July 27.
Handbags, Ladies'. Pichel Inc. 417,756, Nov. 13, 1945. Republished July 27.
Suitcases, trunks, etc. Wm. Filenes Sons Company. 431,285, July 15, 1947. Republished July 27.

CLASS 4

Chemical preparation for cleaning. Hospital Liquids, Inc. 501,179, July 27; Serial No. 529,767, published Apr. 20, 1948.
Cleaner, dry cleaning fluid, spark plug abrasive and cleaning sand, etc., Chrome. 439,938, July 27; Serial No. 525,419, published Apr. 6, 1948.
Cleaning and washing compound. Advanco Laboratories, Incorporated. 439,811, July 27; Serial No. 482,777, published Apr. 6, 1948.
Cleaning preparation, General household. Help, Inc. 439,859, July 27; Serial No. 511,472, published Apr. 6, 1948.
Cleaning powder, Soapless. Irwin-Newman Products Corp. 439,822, July 27; Serial No. 493,687, published Apr. 6, 1948.
Coated abrasive products. Armour and Company. 501,169, July 27; Serial No. 528,679, published Apr. 20, 1948.
Dressing, Shoe. Old Dutch Industrial Products Co., Inc. 408,191, July 25, 1944. Republished July 27.
Polish, Shoe. Old Dutch Industrial Products Co., Inc. 318,342, Oct. 23, 1934. Republished July 27.
Polish, shoe dressing, Shoe. Old Dutch Industrial Products Co., Inc. 417,893, Nov. 20, 1945. Republished July 27.
Flint paper, emery paper, emery cloth, etc. Simmons Hardware Company. 70,180, re-renewed Aug. 11, 1948. O. G. July 27.
Paste, and liquid cleaning and polishing products, etc., Neutral. Clean Surface Products Company. 241,402, renewed Apr. 24, 1948. O. G. July 27.
Paste and powder, soaps, etc., Liquid. B. A. Railton Co. 210,428, Mar. 16, 1926. Republished July 27.
Preparation for cleansing and polishing metals and glass, Electro Silicon Co. 49,035, Jan. 23, 1906. Republished July 27.
Preparation for cleansing and polishing metals and glass, Electro Silicon Co. 131,100, May 4, 1920. Republished July 27.
Preparation for shaving. International Chemical Company. 230,882, Aug. 9, 1927. Republished July 27.
Preparation, in tablet form which is dissolved in water and used for washing fruit and vegetables. Peerless Packers. 439,903, July 27; Serial No. 519,976, published Apr. 13, 1948.
Preparations for washing, polishing, and cleaning noble and base metals, etc. F. Rochow & Co. Inc. 239,541, renewed Mar. 6, 1948. O. G. July 27.
Soap. Colgate & Company. 247,861, renewed Oct. 9, 1948. O. G. July 27.
Soap. Palmolive-Peet Company. 247,858, renewed Oct. 9, 1948. O. G. July 27.
Soap and laundry soap, Toilet. N. J. Phelps. 439,813, July 27; Serial No. 484,274, published Apr. 20, 1948.
Soap, Dry-cleaning. C. B. Langfield. 243,223, renewed June 12, 1948. O. G. July 27.
Soaps, Glove laundry. Buscarlet Glove Company, Inc. 328,864, Oct. 8, 1935. Republished July 27.
Soaps. Naamlooze Vennootschap International Perfumery Company. 239,636, renewed Mar. 6, 1948. O. G. July 27.
Soaps, Toilet. Charles of the Ritz, Inc. 419,641, Feb. 26, 1946. Republished July 27.
Solvent, Non-explosive. R. E. Derby. 384,351, Jan. 14, 1941. Republished July 27.

CLASS 5

Cement, Adhesive optical. Argus, Incorporated. 410,939, Dec. 26, 1944. Republished July 27.
Tape, Gummed paper. Nashua Gummed and Coated Paper Company. 209,310, Feb. 23, 1926. Republished July 27.
Tape in bundles, Gummed paper. Nashua Gummed and Coated Paper Company. 379,568, July 16, 1940. Republished July 27.

CLASS 6

Acetanilid; aloins; ammonia; etc. New York Quinine & Chemical Works Limited. 68,898, re-renewed May 5, 1948. O. G. July 27.
Acetic anhydride, acetone, acid acetic, etc. Mallinckrodt Chemical Works. 357,790, June 14, 1938. Republished July 27.
Acetphenetidin (acetophenetidinum), acid acetylsalicylic (acidum acetylsalicylicum), etc. Mallinckrodt Chemical Works. 359,179, Aug. 9, 1938. Republished July 27.
Alkaline, deodorising and non-irritating solution for application to skin and mucous membranes. Kress & Owen Company. 501,230, July 27; Serial No. 534,639, published Apr. 20, 1948.
Analgesic. Schering Corporation. 501,250, July 27; Serial No. 540,110, published Apr. 13, 1948.
Analgesic and counter irritant. Sydney Ross Co. 248,586, renewed Oct. 23, 1948. O. G. July 27.
Anthelmintics, antigens, bacterins, etc. Dr. Salsbury Laboratories. 501,220, July 27; Serial No. 533,205, published Apr. 20, 1948.
Anti-histaminic preparations. William R. Warner & Co., Inc. 501,256, July 27; Serial No. 541,367, published Apr. 27, 1948.
Antiseptic. Haco Gesellschaft, A. G. 194,795, renewed Feb. 10, 1945. O. G. July 27.
Antiseptic medicinal bandages. T. J. Millisack. 439,866, July 27; Serial No. 513,520, published Apr. 20, 1948.
Antiseptic wash, Alkaline. Alkaloi Company. 44,706, July 18, 1905. Republished July 27.
Antiseptics, bactericides, antiferments, etc. Preservaline Manufacturing Co. 32,041, re-renewed Oct. 11, 1948. O. G. July 27.
Aromatic chemical. Dow Chemical Company. 501,248-9, July 27; Serial Nos. 540,053-4, published Apr. 27, 1948.
Biological immunizing agent for immunizing against diphtheria and whooping cough by inoculation. Cutter Laboratories. 439,855, July 27; Serial No. 509,637, published Apr. 27, 1948.
Brake fluids. Porte Manufacturing Co. Inc. 439,915, July 27; Serial No. 521,947, published Apr. 20, 1948.
Calcium caseinate preparation. Mead Johnson & Company. 501,140, July 27; Serial No. 516,932, published Apr. 6, 1948.
Calcium hypochlorite. Hood Chemical Co., Inc. 501,254, July 27; Serial No. 540,813, published Apr. 20, 1948.
Chemical compound used to impregnate fabrics to simulate artificial leather. American Finishing Company. 501,270, July 27; Serial No. 513,995.
Chemical compounds. Rubber Service Laboratories Company. 247,408, renewed Sept. 25, 1948. O. G. July 27.
Chemical for cleansing drains. P. W. Drackett & Sons Company. 157,600, Aug. 15, 1922. Republished July 27.
Chemical for cleansing drains, sinks, wash bowls, etc. Drackett Company. 390,245, Dec. 22, 1942. Republished July 27.
Chemical preparation for absorbing disagreeable odors. Puritan Chemical Company. 425,166, Nov. 5, 1946. Republished July 27.
Chemical substances. Nipa Laboratories. 439,829, July 27; Serial No. 498,440, published Aug. 13, 1946.
Chemicals, Photographic. I. G. Farbenindustrie Aktiengesellschaft. 241,490, renewed May 1, 1948. O. G. July 27.
Chewing gum containing aspirin. W. C. Nalle. 266,349, Jan. 14, 1930. Republished July 27.
Cleansing cream and toilet water. Lehn & Fink Products Corporation. 439,913, July 27; Serial No. 521,341, published Mar. 16, 1948.
Cod-liver-oil concentrate. Health Products Corporation. 274,132, Aug. 19, 1930. Republished July 27.
Cold and grippe preparation, Liquid. Voght Chemical Company. 221,866, renewed Dec. 14, 1946. O. G. July 27.
Cold cream, hand cream, face cream, etc. B. H. Cohen. 439,876. July 27; Serial No. 515,698, published Apr. 20, 1948.
Coloring for cheese, butter, milk, etc. Preservaline Manufacturing Co. 247,665, renewed Oct. 2, 1948. O. G. July 27.

Composition employed in the acid treatment of metals or metal products. Rubber Service Laboratories Company. 247,410, renewed Sept. 25, 1948. O. G. July 27.
Compound used as a vulcanization accelerator in the curing of rubber articles. Rubber Service Laboratories Co. 244,695, renewed July 24, 1948. O. G. July 27.
Conditioner and tonic for poultry, Health. Philadelphia Seed Co. 266,581, Jan. 14, 1930. Republished July 27.
Cosmetic cream, All-purpose. Hormone Institute. 439,818, July 27; Serial No. 499,121.
Cosmetics. Factor, Max, & Co. 501,210, July 27; Serial No. 532,244, published Apr. 27, 1948.
Cough drops and cough mixture. F. W. Hampshire and Company, Ltd. 501,216, July 27; Serial No. 532,406, published Apr. 20, 1948.
Crystalline powder, White. "Chinoin" Gyógyszer és vegyészeti termékek gyára részvénytársaság. 240,537, renewed Mar. 27, 1948. O. G. July 27.
Dandruff, hair, and scalp lotions. M. Kropp. 439,836, July 27; Serial No. 503,290, published Apr. 20, 1948.
Device containing chemicals. Puritan Chemical Company. 397,193, Aug. 25, 1942. Republished July 27.
Dyes, Leather. Old Dutch Industrial Products Co., Inc. 408,289, Aug. 1, 1944. Republished July 27.
Dyes, Shoe. Old Dutch Industrial Products Co., Inc. 400,932, Oct. 31, 1944. Republished July 27.
Eau de cologne, perfumery, cosmetics and toilet articles, etc. Commanditaire Vennootschap Pento Cosmtec. 439,927, July 27; Serial No. 523,768, published Apr. 13, 1948.
Emulsion of cod-liver oil and port-wine. H. T. Dewey & Sons Co. 181,314, Mar. 18, 1924. Republished July 27.
Essences, perfumes, lotions for the skin, body, and hair. Chemdrug Corporation. 501,211, July 27; Serial No. 532,275, published Mar. 9, 1948.
Expectorant preparation. L. N. Brigham. 501,269, July 27; Serial No. 506,025.
Face powder. Dorothy Gray Salons. 368,224, June 13, 1939. New certificate. O. G. July 27.
Face powder, rouge, lipstick, etc. M. G. Neumann. 241,151, renewed Apr. 17, 1948. O. G. July 27.
Foot-bath tablets, Medicated and perfumed. Scholl Mfg. Co., Inc. 243,240, renewed June 12, 1948. O. G. July 27.
Hair dressing. J. Strickland and Co. 501,236, July 27; Serial No. 536,310, published Apr. 27, 1948.
Hair dressing, massage cream, mud packs, pressing oil, etc. Mecos, Inc. 428,698, Apr. 1, 1947. Republished July 27.
Hair paste. A. Alexander. 501,202, July 27; Serial No. 531,975, published Apr. 20, 1948.
Hand cream. Lehn & Fink Products Corporation. 501,271, July 27; Serial No. 514,281.
Insecticide. Chemical Associates of America, Inc. 439,819, July 27; Serial No. 490,791, published Jan. 21, 1947.
Insecticide. Northern Laboratories. 501,131, July 27; Serial No. 489,979, published Apr. 27, 1948.
Insecticide. West Disinfecting Company. 439,925, July 27; Serial No. 523,437, published Apr. 20, 1948.
Insecticides. Food Machinery Corporation. 501,257, July 27; Serial No. 542,303, published Apr. 20, 1948.
Insecticides. Kentucky Color & Chemical Co. 413,895, May 1, 1945. Republished July 27.
Insecticides. McCormick and Co., Incorporated. 439,833, July 27; Serial No. 502,224, published Apr. 27, 1948.
Insecticides. F. B. Nobrega. 244,395, renewed July 17, 1948. O. G. July 27.
Insecticides. Stauffer Chemical Company. 501,215, July 27; Serial No. 532,371, published Apr. 27, 1948.
Insecticides. Thompson-Hayward Chemical Company. 501,258, July 27; Serial No. 542,371, published Apr. 20, 1948.
Insecticides and sulphur. Stauffer Chemical Company. 501,213, July 27; Serial No. 532,362, published Apr. 27, 1948.
Intravenous solutions. Intravenous Products Co. of America, Inc. 324,936, June 4, 1935. Republished July 27.
Iodine pencils, disinfectants, bay rum, etc. Wm. Filene's Sons Company. 267,352, Feb. 18, 1930. Republished July 27.
Leather stuffing known as fat liquor, Kind of. Martin Dennis Company. 244,130, renewed July 10, 1948. O. G. July 27.
Lighter fluid. Ronson Art Metal Works, Inc. 501,135, July 27; Serial No. 506,961, published Apr. 20, 1948.
Liniment for the relief of pain, foot troubles, etc. Scholl Mfg. Co., Inc. 243,734, renewed June 26, 1948. O. G. July 27.
Lipstick and lip coloring material. Lady Esther, Ltd. 501,232, July 27; Serial No. 535,319, published Apr. 20, 1948.
Liquid for protecting the skin from sunburn. W. C. McCusker. 439,820, July 27; Serial No. 491,664, published Apr. 20, 1948.
Liquid preparation. H. B. Laymon. 356,426, Apr. 26, 1938. Republished July 27.
Lotion, cologne, hair dress (liquid), etc., After shave. L & K Laboratories & Co. Inc. 501,153, July 27; Serial No. 526,730, published Apr. 13, 1948.
Lubricating ointment. Schoonmaker Laboratories, Inc. 501,167, July 27; Serial No. 528,513, published Apr. 20, 1948.
Lye. H. M. Sinclair, Jr. 501,156, July 27; Serial No. 526,968, published Apr. 6, 1948.
Manicure aid preparation. J. F. Leopard. 226,501, renewed Apr. 12, 1947. O. G. July 27.
Medical preparation. G. Savich. 243,190, renewed June 12, 1948. O. G. July 27.
Medical preparations. Norito Co. 390,974, Feb. 9, 1943. Republished July 27.
Medicinal preparation in powder form. H. B. Laymon. 336,383, July 7, 1936. Republished July 27.
Medicinal preparation to be used in the treatment of anaemic conditions. Burroughs Wellcome & Co. (U. S. A.), Inc. 346,788, June 8, 1937. Republished July 27.
Medicine. Endo Products Inc. 501,261, July 27; Serial No. 542,751, published Apr. 20, 1948.
Moth-proofing solutions. Bengal Company. 439,944, July 27; Serial No. 510,274.
Nail lacquers, lip sticks and face powder. Riant Products Co. 439,905, July 27; Serial No. 520,056, published Apr. 20, 1948.
Natural bone mineral product used for medicinal purposes. Armour and Company. 501,161, July 27; Serial No. 527,762, published Apr. 13, 1948.
Oil of cedarwood. George C. Brown & Company. 247,284, renewed Sept. 25, 1948. O. G. July 27.
Oil, Wheat germ. R. I. Guy. 501,252, July 27; Serial No. 540,404, published Apr. 27, 1948.
Ointment, Borated. Wellcome Burrouchs & Co. (U. S. A.) Inc. 399,607, Jan. 19, 1943. Republished July 27.
Ointment, Lubricating and soothing. Scholl Mfg. Co., Inc. 243,618, renewed June 26, 1948. O. G. July 27.
Peppermint lozenges for the relief of discomfort after meals. Smith & Company. 439,858, July 27; Serial No. 511,424, published Apr. 27, 1948.
Perfume and sachet powder. I. McKnight. 439,895, July 27; Serial No. 518,547, published Apr. 20, 1948.
Perfume, toilet water, cologne, etc. D. A. Molinari. 501,226, July 27; Serial No. 534,311, published Apr. 20, 1948.
Perfumes. Parfums Chiaparelli, Inc. 501,255, July 27; Serial No. 540,965, published Apr. 20, 1948.
Perfumes and toilet water. Syndicate-Arkwright Trading Corp. 501,228, July 27; Serial No. 534,486, published Apr. 27, 1948.
Perfumes, toilet waters, and cosmetic creams. Lentheric, Incorporated. 439,848, July 27; Serial No. 507,197, published Dec. 9, 1947.
Perfumes, toilet waters, compact make-up, etc. Charles of the Ritz, Inc. 420,719, Apr. 30, 1946. Republished July 27.
Perfumes, toilet waters, hair tonics, etc. H. Huebschman. 226,718, Apr. 19, 1927. Republished July 27.
Perfumes, toilet waters, rouge, lipstick, etc. Societe A Responsabilite Parfums Chinon Limitee. 501,272, July 27; Serial No. 517,515.
Polyhydric alcohol-fatty acid esters. Griffin Chemical Company. 501,200, July 27; Serial No. 531,793, published Apr. 20, 1948.
Polyvitamin product. Wellcome, Burroughs, & Co. (U. S. A.) Inc. 421,409, June 4, 1946. Republished July 27.
Pomades for the hair. Standard Laboratories, Inc. 245,437-8, renewed Aug. 14, 1948. O. G. July 27.
Powder for external embalming and the sterilization of enclosed containers. Hisone Products. 501,143, July 27; Serial No. 518,886, published Apr. 27, 1948.
Preparation for diseases of the kidneys. Reed & Carnrick. 236,277, Dec. 13, 1927. Republished July 27.
Preparation for the treatment of athlete's foot. J. F. Lorine. 439,946, July 27; Serial No. 521,868.
Preparation for the treatment of vitamin deficiency. Wm. S. Merrell Company. 501,171, July 27; Serial No. 528,878, published Jan. 27, 1948.
Preparation for use in sex hormone therapy. Ciba Pharmaceutical Products, Inc. 439,881, July 27; Serial No. 516,396, published Apr. 20, 1948.
Preparation to aid digestion. White Laboratories, Inc. 377,570, May 7, 1940. Republished July 27.
Preparation used for the treatment of symptoms of bronchial asthma and hay fever. Schenley Products, Inc. 391,716, Nov. 18, 1941. Republished July 27.
Preparation useful to influence the basal metabolic rate. Sharp & Dohme, Incorporated. 501,237, July 27; Serial No. 536,552, published Apr. 6, 1948.
Preparations for the treatment of headaches, colds, neuralgia, etc. Bradey's Laboratory. 243,733, June 26, 1928. Amended. O. G. July 27.
Product intended for use as an insectifuge. Wellcome, Burroughs, & Co. (U. S. A.) Inc. 399,606, Jan. 19, 1943. Republished July 27.
Protein hydrolysate. Wellcome, Burroughs, & Co. (U. S. A.) Inc. 423,842, Sept. 10, 1946. Republished July 27.
Reagent for acetone. M. J. Lewenstein. 501,208, July 27; Serial No. 532,037, published Apr. 20, 1948.
Reducing lotions. Elizabeth Arden Sales Corporation. 501,273, July 27; Serial No. 524,315.
Refrigerator deodorants. R. F. Charbach Co. 439,875, July 27; Serial No. 515,656, published Apr. 20, 1948.

Sachets and for wave-setting preparations. Eugene Ltd. 245,466, renewed Aug. 14, 1948. O. G. July 27.
Scientifically compounded preparation for relief of hyperacidity, ulcerations, etc. Cal-Pro Laboratories Inc. 501,229, July 27; Serial No. 534,509, published Apr. 20, 1948.
Shampoo. Procter & Gamble Company. 439,806, July 27; Serial No. 473,676, published Dec. 5, 1944.
Silicate of soda. Philadelphia Quartz Company. 501,262, July 27; Serial No. 543,037, published Apr. 20, 1948.
Solvent and disinfectant, Stain and incrustation. Eagle Chemical Company. 242,504, renewed May 29, 1948. O. G. July 27.
Strophanthus tincture, bismuth subsalicylate with chlorobutanol in oil, etc. Wellcome, Burroughs, & Co. (U. S. A.) Inc. 426,394, Dec. 24, 1946. Republished July 27.
Sulphur. Stauffer Chemical Company. 501,214, July 27; Serial No. 532,369, published Apr. 27, 1948.
Suntan oil. Shawnee Products Company. 439,896, July 27; Serial No. 518,701, published Apr. 20, 1948.
Toilet cream. C. B. Woodworth Sons Co. 70,935, re-renewed Oct. 20, 1948. O. G. July 27.
Toilet preparations, perfumery, and cosmetics, etc. Les Parfums De Dana, Inc. 501,259, July 27; Serial No. 542,603 published Apr. 20, 1948.
Tonic and blood purifier. New Life Herb Company. 236,991, renewed Jan. 3, 1948. O. G. July 27.
Tonic, Malt. M. K. Goetz Brewing Company. 252,361, Feb. 5, 1929. Republished July 27.
Tooth-paste and tooth-powder. P. Beiersdorf & Co. 61,678, Apr. 2, 1907. New certificate. O. G. July 27.
Vitamin B preparation. R. I. Guy. 501,253, July 27; Serial No. 540,409, published Apr. 27, 1948.
Vitamin tablets, ammoniated mercury ointment, analgesic balm, etc. Purepac Corporation. 439,888, July 27; Serial No. 518,171, published Mar. 16, 1948.
Vitamins in dosage form, Multiple. International Vitamin Corporation. 439,909, July 27; Serial No. 520,628, published Oct. 14, 1947.
Wetting agents, water soluble oils, and softeners. Dexter Chemical Corporation. 439,890, July 27; Serial No. 518,279, published Aug. 19, 1947.

CLASS 7

Cords made partly or totally of fireproof material. Duplan Corporation. 411,360, Jan. 16, 1945. Republished July 27.
Rope, Cotton. Mt. Vernon-Woodberry Mills, Inc. 114,264, Dec. 5, 1916. Republished July 27.
Twine, Mt. Vernon-Woodberry Mills, Inc. 415,128, July 10, 1945. Republished July 27.
Twine, Cotton. Mt. Vernon-Woodberry Mills, Inc. 129,995, Mar. 16, 1920. Republished July 27.
Twine, Cotton. Mt. Vernon-Woodberry Mills, Inc. 186,103-4, July 1, 1924. Republished July 27.

CLASS 8

Ash receivers of non-precious metal. Smokador Manufacturing Co., Inc. 300,816, Feb. 7, 1933. Republished July 27.
Pipes, Smoking. H. Smith. 501,225, July 27; Serial No. 534,200, published May 4, 1948.
Pouches, Tobacco. A. E. McManus. 439,839, July 27; Serial No. 505,117, published May 4, 1948.

CLASS 9

Wadding, Gun. American Hair Felt Company. 247,789, renewed Oct. 2, 1948. O. G. July 27.

CLASS 10

Fertilizer. Virginia-Carolina Chemical Company. 69,051, re-renewed May 19, 1948. O. G. July 27.
Fertilizers. Virginia-Carolina Chemical Company. 67,682, re-renewed Feb. 11, 1948. O. G. July 27.
Fertilizers. Virginia-Carolina Chemical Company. 68,321, re-renewed Mar. 31, 1948. O. G. July 27.
Fertilizers. Virginia-Carolina Chemical Company. 69,246, re-renewed May 26, 1948. O. G. July 27.
Fertilizers. Virginia-Carolina Chemical Company. 69,764, re-renewed July 7, 1948. O. G. July 27.
Fertilizers. Virginia-Carolina Chemical Corporation. 240,880-1, renewed Apr. 10, 1948. O. G. July 27.
Fertilizers. Virginia-Carolina Chemical Corporation. 240,899, renewed Apr. 10, 1948. O. G. July 27.
Fertilizers, Chemical. American Agricultural Chemical Company. 241,537, renewed May 1, 1948. O. G. July 27.

CLASS 11

Carbon paper. Codo Manufacturing Corporation. 501,246, July 27; Serial No. 539,023, published Apr. 13, 1948.
Inks and ingredients thereof, etc., Printing and lithographic. American Printing Ink Company. 239,196, renewed Feb. 28, 1948. O. G. July 27.
Printers' ink. Markem Machine Company. 501,235, July 27; Serial No. 535,976, published Apr. 20, 1948.
Ribbons, Typewriter. Nelson-Eismann Company. 247,380, renewed Sept. 25, 1948. O. G. July 27.

CLASS 12

Aluminum silicate refractories. Chas. Taylor Sons Co. 317,519, Sept. 13, 1934. Republished July 27.
Bars, clamps, deck beams, etc. Concrete-reenforcing. Bethlehem Steel Company. 202,880, renewed Jan. 6, 1948. O. G. July 27.
Bituminous construction material, Liquid or liquefiable. Barrett Company. 242,455, renewed May 22, 1948. O. G. July 27.
Brick, Building. Alabama Brick & Tile Co. 248,340, renewed Oct. 16, 1948. O. G. July 27.
Bricks. Babcock & Wilcox Company. 241,626, renewed May 1, 1948. O. G. July 27.
Building materials, Road. Barrett Company. 245,588, renewed Aug. 14, 1948. O. G. July 27.
Cement, Portland. Standard Lime and Stone Company. 242,350, renewed May 22, 1948. O. G. July 27.
Cement, Portland. Van Sciver Corporation. 238,022, renewed Jan. 24, 1948. O. G. July 27.
Cements, ramming mixes, bricks, etc., Refractory. Chas. Taylor Sons Co. 407,172-8, May 23, 1944. Republished July 27.
Cements, refractory ramming mixes, refractory bricks, etc., Refractory. Chas. Taylor Sons Co. 412,917, Apr. 3, 1945. Republished July 27.
Felt roofing and also for sheathing and building paper. Barrett Manufacturing Company. 70,858, re-renewed Aug. 25, 1948. O. G. July 27.
Lime, Building. Washington Building Lime Co. 243,639, renewed June 26, 1948. O. G. July 27.
Lime, lump lime in various sizes, pebble lime, etc. American Lime & Stone Company. 238,848, renewed Feb. 14, 1948. O. G. July 27.
Talc, Special. W. H. Loomis Talc Corporation. 209,106, Feb. 16, 1926. Republished July 27.

CLASS 13

Cups, mugs, etc., Drinking. Wm. Filene's Sons Company. 267,398, Feb. 18, 1930. Republished July 27.
Fence posts, Metallic. Calumet Steel Company. 216,283, Aug. 10, 1926. Republished July 27.
Fence posts, Steel. Calumet Steel Company. 338,616, Sept. 8, 1936. Republished July 27.
Hardware. Winsted Hardware Manufacturing Co. 245,171, renewed Aug. 7, 1948. O. G. July 27.
Hinges. Chicago Spring Hinge Company. 246,868, renewed Sept. 4, 1948. O. G. July 27.
Hinges, screen hangers, storm-sash hangers, etc. Stanley Works. 247,896, renewed Oct. 9, 1948. O. G. July 27.
Hollow bodies, Cast. American Cast Iron Pipe Company. 281,896, Mar. 17, 1931. Republished July 27.
Hollow bodies, etc., Centrifugally-cast. American Cast Iron Pipe Company. 217,262, Aug. 31, 1926. Republished July 27.
Metal bodies, etc., Hollow cast. American Cast Iron Pipe Company. 288,068, Oct. 20, 1931. Republished July 27.
Molded articles of plastic composition. General Industries Company. 243,250, renewed June 19, 1948. O. G. July 27.
Pipe, Cast iron. American Cast Iron Pipe Company. 341,915, Dec. 29, 1936. Republished July 27.
Pipe fittings, Metal. Corley Co. 421,296, May 28, 1946. Corrected. O. G. July 27.
Pulley covers, Metallic. Walter Kidde & Company, Inc. 422,954, Aug. 20, 1946. Republished July 27.
Staples, Machine. A. L. Hansen Mfg. Co. 333,562, Mar. 24, 1936. Republished July 27.
Staples, Machine. A. L. Hansen Mfg. Co. 376,489, Mar. 28, 1940. Republished July 27.
Urinals, closets, drinking fountains, etc. D. A. Ebinger Sanitary Mfg. Co. 190,125, Oct. 7, 1924. Republished July 27.
Valve stems, dust caps, valve caps, etc. Dill Manufacturing Company. 233,463, renewed Jan. 5, 1948. O. G. July 27.
Valves. Lunkenheimer Company. 70,450, re-renewed Sept. 1, 1948. O. G. July 27.

CLASS 14

Alloy castings, etc., Ferrous and nonferrous metal. Frank Foundries Corporation. 315,748, Aug. 7, 1934. Republished July 27.
Alloy, Deoxidizing and graphitizing. Vanadium Corporation of America. 356,152, Apr. 12, 1938. Republished July 27.
Alloys. Vanadium Corporation of America. 246,056, Aug. 28, 1928. Republished July 27.
Alloys. Vanadium Corporation of America. 344,309, Mar. 16, 1937. Republished July 27.
Alloys, Ferro. H. Boker & Co., Inc. 421,813, June 18, 1946. Republished July 27.
Ferro-alloys. Vanadium Corporation of America. 350,787, Oct. 5, 1937. Republished July 27.
Alloys, Iron or steel. Taylor-Wharton Iron and Steel Company. 297,188, May 23, 1929. Republished July 27.
Castings, Composite metal. H. Boker & Co., Inc. 421,514, June 18, 1946. Republished July 27.
Castings, Railway-car. National Malleable Castings Company. 69,187, re-renewed May 28, 1948. O. G. July 27.
Iron and steel, Rolled, hammered, forged, and drawn. Klosters Aktiebolag. 241,210, renewed Apr. 17, 1948. O. G. July 27.

Metal, Sheet. H. Boker & Co., Inc. 111,855, July 25, 1916. Republished July 27.
Rods, Welding. R. G. Le Tourneau, Inc. 382,113, Jan. 27, 1942. Republished July 27.
Steel bars, steel rods, and steel drill rods. H. Boker & Co., Inc. 306,880, Dec. 1, 1942. Republished July 27.
Steel, Manganese. Taylor-Wharton Iron and Steel Company. 125,267, Apr. 22, 1919. Republished July 27.
Steel sheets, Laminated. Ingersoll Steel and Disc Co. 318,685, Oct. 30, 1934. Republished July 27.
Steel strips. National-Standard Company. 420,879, Apr. 23, 1946. Republished July 27.
Steels, Carbon and alloy. Taylor-Wharton Iron and Steel Company. 307,750, Oct. 31, 1933. Republished July 27.

CLASS 15

Candles. Emery Candle Co. 241,836, renewed May 1, 1948. O. G. July 27.
Fuel oil stabilizer. G. W. Galloway. 439,864, July 27; Serial No. 512,832, published Mar. 30, 1948.
Gasoline. Associated Oil Company. 244,648, renewed July 24, 1948. O. G. July 27.
Gasoline. Champlin Refining Company. 234,126, renewed Oct. 18, 1947. O. G. July 27.
Gasoline. Hancock Oil Company of California. 439,852, July 27; Serial No. 506,995, published May 4, 1948.
Gasoline and motor oils and motor lubricating oils. Hartol Products Corporation. 333,343, Mar. 17, 1936. Republished July 27.
Gasoline, kerosene, Diesel motor fuel oil, etc. Shell Oil Company, Incorporated. 439,891, July 27; Serial No. 518,367, published May 4, 1948.
Greases, lubricating graphite, lubricating oils, etc., Lubricating. Joseph Dixon Crucible Company. 439,860, July 27; Serial No. 511,801, published May 4, 1948.
Naphtha. Standard Oil Company. 439,922, July 27; Serial No. 525,136, published Apr. 20, 1948.
Naphtha, Industrial. Gulf Oil Corporation. 439,873, July 27; Serial No. 515,173, published Mar. 23, 1948.
Oil and drinker oil, for heat, burning and internal combustion, Fuel. Coastal Oil Company. 439,904, July 27; Serial No. 520,016, published Apr. 20, 1948.
Oil for lubricating purposes, Motor. Jackson Oil Company, Inc. 439,907, July 27; Serial No. 520,457, published Mar. 23, 1948.
Oil, Lubricating. Standard Oil Company. 439,934, July 27; Serial No. 525,133, published Apr. 20, 1948.
Oil, Machine lubricating. Great American Tea Company. 501,166, July 27; Serial No. 528,463, published Apr. 6, 1948.
Oils and greases, Lubricating. Hancock Oil Company of Calif. 439,913, July 27; Serial No. 508,964, published Apr. 20, 1948.
Oils and greases, Lubricating. Jenkin-Guerin Inc. 501,158, July 27; Serial No. 527,421, published Apr. 13, 1948.
Oils and greases, Lubricating. National Lubricants Corporation. 439,893, July 27; Serial No. 518,477, published May 4, 1948.
Oils, Lubricating. Standard Oil Company. 439,936, July 27; Serial No. 525,137, published Apr. 20, 1948.
Oils, Lubricating. Mid-West Oil Company. 240,103, renewed Mar. 20, 1948. O. G. July 27.
Oils, waxes and greases, Lubricating. Union Oil Company of California. 264,371, Nov. 26, 1929. Republished July 27.
Petroleum, fuel oils, engine distillate, etc., Crude. Associated Oil Company. 244,630, renewed July 24, 1948. O. G. July 27.
Wax, Oxidized petroleum. Sun Chemical Corporation. 439,879, July 27; Serial No. 516,043, published Mar. 22, 1948.

CLASS 16

Carbon black. Godfrey L. Cabot, Inc. 170,778, July 24, 1923. Republished July 27.
Carbon black for paints, lacquers, enamels, etc. Peerless Carbon Black Company. 241,183, renewed Apr. 17, 1948. O. G. July 27.
Paint, Flat washable wall. California Flaxseed Products Company. 381,909-10, Oct. 18, 1940. Republished July 27.
Paint in paste form and art colors. United States Gypsum Company. 329,284, Oct. 22, 1935. Republished July 27.
Paint, Waterproofing and cement. General Waterproofing Company. 386,038, Mar. 25, 1941. Republished July 27.
Paints in paste and ready mixed forms and varnishes. True-Tagg Paint Company. 382,971, Nov. 19, 1940. Republished July 27.
Paints, Ready mixed. Tremec Company, Inc. 231,435, Jan. 7, 1936. Republished July 27.
Varnishes and polishes for furniture, pencils, and motor cars, etc. Verein für Chemische Industrie Aktiengesellschaft. 240,217, renewed Mar. 20, 1948. O. G. July 27.
Varnishes, Clear. O'Brien Varnish Company. 306,189. Sept. 12, 1933. Republished July 27.

CLASS 17

Cigarettes. P. Lorillard Company. 501,239. July 27; Serial No. 536,927, published Apr. 27, 1948.
Cigarettes. Reed Tobacco Company. 129,057, Sept. 16, 1924. New certificate. O. G. July 27.
Cigarettes and cigarette tobacco. P. Lorillard Company. 501,242, July 27; Serial No. 536,936, published Apr. 27, 1948.

Cigars. Havana-American Company. 69,242, re-renewed June 9, 1948. O. G. July 27.
Tobacco, Chewing. P. Lorillard Company. 501,241, July 27; Serial No. 536,932, published Apr. 27, 1948.
Tobacco, Chewing. P. Lorillard Company. 501,243, July 27; Serial No. 536,935, published Apr. 27, 1948.

CLASS 19

Bicycles and like vehicles. Eclipse Bicycle Co. 31,201, re-renewed Feb. 1, 1948. O. G. July 27.
Bicycles, baby carriages, go-carts. Filene's, Wm., Sons Company. 267,400, Feb. 18, 1930. Republished July 27.
Mobile units for fire extinguishing equipment, etc. Walter Kidde & Company, Inc. 426,527, Dec. 31, 1946. Republished July 27.
Trucks, Trailer. R. G. Le Tourneau, Inc. 387,159, May 6, 1941. Republished July 27.
Trucks, Trailer. R. G. Le Tourneau, Inc. 404,899, Dec. 28, 1943. Republished July 27.

CLASS 21

Air circulators, Deflector type. Kleco Company, Inc. 501,190, July 27; Serial No. 530,647, published Apr. 20, 1948.
Batteries. National Lead Battery Co. 242,106, renewed May 15, 1948. O. G. July 27.
Batteries and parts thereof, Storage. Gould Storage Battery Co., Inc. 243,883, renewed July 3, 1948. O. G. July 27.
Batteries, Flash light. H. B. Laymon. 382,382, Dec. 23, 1941. Republished July 27.
Broiler, Electric. Grover M. Nie. 439,882, July 27; Serial No. 516,497, published Apr. 20, 1948.
Broilers and cookers, Electric. National Stamping & Electric Works. 501,188, July 27; Serial No. 530,552, published Apr. 13, 1948.
Cigar and cigarette lighters, Electric. Santay Corporation. 501,199, July 27; Serial No. 531,622, published Apr. 27, 1948.
Couplers, Electric car. Ohio Brass Company. 501,123, July 27; Serial No. 514,218, published Mar. 23, 1948.
Drills, Portable electric. Stanley Works. 247,955, renewed Oct. 9, 1948. O. G. July 27.
Electrical apparatus. Appleton Electric Company. 501,151, July 27; Serial No. 526,647, published Apr. 20, 1948.
Electrical apparatus. A. Strobl. 501,168, July 27; Serial No. 528,653, published Apr. 27, 1948.
Electrical conductor cords. American Electrical Heater Company. 182,166, Apr. 1, 1924. Republished July 27.
Electrical connectors. James R. Kearney Corporation. 501,148, July 27; Serial No. 519,275, published Apr. 27, 1948.
Electrical insulating material. Rail Joint Company. 69,171, re-renewed May 26, 1948. O. G. July 27.
Electrical signal amplifying and/or relaying apparatus. Photoswitch Incorporated. 501,139, July 27; Serial No. 514,286, published Apr. 20, 1948.
Electrical wires, cables, and cordage, etc. Belden Manufacturing Company. 501,189, July 27; Serial No. 530,618, published Apr. 20, 1948.
Electrically heated toasters, broilers, grills, etc. Magic-Chef Mitch'n Equipment Corporation. 501,222, July 27; Serial No. 533,474, published Apr. 27, 1948.
Electrically operated code senders or transmitters, etc. Mead Electric Signal Company. 162,906, Dec. 12, 1922. Republished July 27.
Electrically operated domestic vacuum cleaners and floor polishing machines. Regina Corporation. 501,170, July 27; Serial No. 528,820, published Apr. 27, 1948.
Electrically operated phonographs. Webster-Chicago Corporation. 501,141, July 27; Serial No. 517,807, published Apr. 20, 1948.
Electromagnetic relays. Barber-Colman Company. 501,191, July 27; Serial No. 530,914, published Apr. 13, 1948.
Fixtures for adjustable hanging lamps. Thompson Electric Company. 375,677, Feb. 27, 1940. Republished July 27.
Flame actuated electric apparatus. Walter Kidde & Company, Inc. 427,807, Feb. 25, 1947. Republished July 27.
Generators, Universal signal. Rodex Corporation. 406,622, Aug. 22, 1944. Republished July 27.
Hangers, Lowering electrical lamp. Thompson Electric Company. 429,051, Apr. 15, 1947. Republished July 27.
Headlights, Electric. Telescopic Company. 501,144, July 27; Serial No. 513,630, published Apr. 27, 1948.
Heaters, Electric room. L. A. Laboratories, Inc. 439,837, July 27; Serial No. 503,643, published Apr. 1, 1947.
Hedge trimmers and parts thereof, Electric. Sunbeam Corporation. 439,886, July 27; Serial No. 517,436, published Apr. 27, 1948.
Holders, Rod. Arcos Corporation. 501,146, July 27; Serial No. 518,648, published Apr. 27, 1948.

Lamps (table, bridge and floor), flash lights, batteries, Electric. Wm. Filene's Sons Company. 267,134, Feb. 14, 1930. Republished July 27.
Lights, Electric fog. Teleoptic Company. 501,142, July 27; Serial No. 517,877, published Apr. 27, 1948.
Lights, Electrical warning. Teleoptic Company. 501,145, July 27; Serial No. 518,632, published Apr. 27, 1948.
Motors and electric generators, Electric. Elliott Company. 501,165, July 27; Serial No. 528,201, published Apr. 27, 1948.
Motors, Electric. U. S. Electrical Motors, Inc. 379,845, July 30, 1940. Republished July 27.
Motors, Electric. U. S. Electrical Motors, Inc. 391,273, Oct. 28, 1941. Republished July 27.
Motors, Electric. U. S. Electrical Motors, Inc. 393,822, Mar. 3, 1942. Republished July 27.
Nursing bottle warmers and nursing bottle sterilizers, Combination electric. Sanit-All Products Corporation. 439,939, July 27; Serial No. 526,295, published Apr. 27, 1948.
Power units, Electric. Altorfer Bros. Company. 287,126-7, Sept. 15, 1931. Republished July 27.
Radio receiving sets and radio phonograph combination sets. Magnavox Company. 501,217, July 27; Serial No. 532,737, published Apr. 20, 1948.
Radio receiving sets, electronic record players and battery operated portable fluorescent lamps. Brand and Millen, Limited. 439,911, July 27; Serial No. 520,857, published Apr. 27, 1948.
Ranges, Electric. Gibson Electric Refrigerator Corporation. 369,978, Aug. 8, 1939. Republished July 27.
Sadirons, Electric. American Thermo Appliance Company. 501,133, July 27; Serial No. 505,723, published Apr. 20, 1948.
Sound amplifying and transmitting system, etc., Intercommunicating. Webster Electric Company. 430,830, June 24, 1947. Republished July 27.
Sound amplifying and transmitting systems and parts thereof, Intercommunicating. Webster Electric Company. 369,450, July 25, 1939. Republished July 27.
Sound reproduction equipment. Webster Electric Company. 351,332, Oct. 26, 1937. Republished July 27.
Switches, Rotary snap. Arrow Electric Company. 217,895, Sept. 14, 1926. Republished July 27.
Switches, Thermally-operated electric cut-out. Minneapolis Heat Regulator Co. 241,954, renewed May 8, 1948. O. G. July 27.
Transformers. Jefferson Electric Company. 501,160, July 27; Serial No. 527,527, published Apr. 27, 1948.
Vacuum cleaners, Electric. Sun Vacuum Stores. 439,814, July 27; Serial No. 486,176, published Nov. 13, 1945.
Water heaters and accessories therefor, Electric. Cleveland Heater Company. 422,408, July 23, 1946. Republished July 27.

CLASS 22

Bags and appliances, Striking. Draper and Maynard Company. 60,676, Feb. 19, 1907. Republished July 27.
Bait. Animal Trap Company of America. 439,894, July 27; Serial No. 518,510, published Apr. 20, 1948.
Balls, rubber toy animals, rubber toy male and female figures, etc., Rubber. Geo. Borgfeldt & Co. 67,512, renewed Feb. 4, 1948. O. G. July 27.
Baseball bats. Southwest Handle & Mfg. Co. 414,052, May 22, 1945. Republished July 27.
Board game. Lane-Walker & Gravely, Inc. 439,849, July 27; Serial No. 508,049, published Apr. 13, 1948.
Card game. R. E. Voshell and J. T. Berdner. 439,898, July 27; Serial No. 519,151, published Apr. 13, 1948.
Dice. G. Weinbrenner. 334,024, Apr. 14, 1936. Republished July 27.
Dolls and dolls' clothes. D. Ippolito. 439,826-7, July 27; Serial Nos. 496,805-6, published May 21, 1946.
Educational and amusement device. S. Bishop. 439,872, July 27; Serial No. 514,883, published Apr. 20, 1948.
Fish-hooks. O. Mustad & Son. 68,621, re-renewed Apr. 21, 1948. O. G. July 27.
Fishing rods, fishing tip-ups and fishing reels. Stony Brook Industries. 439,843, July 27; Serial No. 505,520, published Apr. 6, 1948.
Game. Bee-Line Products Co. 439,874, July 27; Serial No. 515,216, published Apr. 13, 1948.
Games. J. Scarne. 439,846, July 27; Serial No. 506,479, published Apr. 20, 1948.
Golf balls. Dunlop Tire and Rubber Corporation. 313,018, May 15, 1934. Republished July 27.
Golf clubs. General Machine Company. 439,854, July 27; Serial No. 509,510, published Apr. 13, 1948.
Ice skate guard. W. H. Wade. 439,851, July 27; Serial No. 508,878, published Apr. 13, 1948.
Paddle balls and bandalore tops. Cheerio Toys & Games Limited. 439,840, July 27; Serial No. 505,183, published Apr. 13, 1948.
Roller skates and ice skates. A. E. Murray. 439,856, July 27; Serial No. 509,866, published Apr. 20, 1948.
Roulette and put and take game. Saxon Toy Corporation. 439,831, July 27; Serial No. 500,901, published Apr. 6, 1948.
Tapes or thread for powering model aircraft, Rubber. United States Rubber Company. 501,137, July 27; Serial No. 513,481, published Apr. 6, 1948.
Toy banks. K. J. McCarren. 439,838, July 27; Serial No. 504,778, published Apr. 13, 1948.
Toy electric motors, Miniature. T. J. Menten. 439,868, July 27; Serial No. 513,752, published Apr. 20, 1948.
Toy rattles, dolls, toy chains, etc. Zadek Feldstein Co., Inc. 439,825, July 27; Serial No. 496,022, published Apr. 6, 1948.
Toy rattles, teething toys, dolls, etc. Zadek Feldstein Co., Inc. 439,816, July 27; Serial No. 487,775, published Apr. 20, 1948.
Toys, Child's. W. R. Franklin. 439,834, July 27; Serial No. 502,371, published Apr. 13, 1948.
Toys, Mechanical. Ranger Steel Products Corporation. 439,845, July 27; Serial No. 506,126, published Apr. 20, 1948.
Toys, Pull. United Manufacturers, Inc. 439,850, July 27; Serial No. 508,454, published Apr. 13, 1948.
Toys, pull toys and educational toys, Wooden. Londonderry Products, Inc. 439,828, July 27; Serial No. 497,871, published Apr. 13, 1948.
Toys, Wooden. H. Moore. 439,815, July 27; Serial No. 487,271, published Apr. 13, 1948.

CLASS 23

Apparatus to be used in connection with water tanks etc., Special. Paige & Jones Chemical Co., Inc. 238,116, renewed Jan. 24, 1948. O. G. July 27.
Blade, Hack saw. G. W. Griffin Co. 422,602, Aug. 6, 1946. Republished July 27.
Blades, Safety razor. H. B. Laymon. 379,370, July 9, 1940. Republished July 27.
Boat hooks. Harvard Lock Company. 439,948, July 27; Serial No. 525,841.
Bottle-capping machines, bottle-filling machines, and bottle filling and capping machine. Crown Cork and Seal Company of Baltimore City. 127,916, Dec. 16, 1919. Republished July 27.
Carburetors. Wheeler-Schebler Carburetor Co. 203,764, Sept. 22, 1925. Republished July 27.
Carburetors, thermostatic controls for internal combustion engines, etc. Bemeke & Kropf Manufacturing Company. 161,406, Nov. 14, 1922. Republished July 27.
Clippers, Hair. H. Boker & Co., Inc. 221,755, Dec. 7, 1926. Republished July 27.
Clippers, Hair. H. Boker & Co., Inc. 221,758, Dec. 7, 1926. Republished July 27.
Cotton-gin, cotton-linters, etc. Lummus Cotton Gin Company. 131,178, May 4, 1920. Republished July 27.
Cutlery. Eskilstuna Jernmanufaktur Aktiebolag. 241,053, renewed Apr. 17, 1948. O. G. July 27.
Cutlery, Articles of. H. Boker & Co., Inc. 336,814, July 21, 1936. Republished July 27.
Cutters, Grass and weed. Village Blacksmith Folks. 247,098, renewed Sept. 18, 1948. O. G. July 27.
Cutters, table knives, glass knives, etc., Cigar. Wm. Filene's Sons Company. 267,867, Mar. 4, 1930. Republished July 27.
Discs, clutch discs, friction discs, etc., Harrow. Ingersoll Steel and Disc Co. 282,645, Apr. 28, 1931. Republished July 27.
Discs; disc colters; disc plows; disc blades, etc. Galesburg Coulter-Disc Co. 96,269, Apr. 14, 1914. Republished July 27.
Earth working, construction, and industrial equipment. R. G. Le Tourneau, Inc. 428,215, Mar. 11, 1947. Republished July 27.
Fire detecting and extinguishing apparatus, Fixed. Kidde, Walter & Company, Inc. 424,894, Oct. 29, 1946. Republished July 27.
Fire extinguishers and automatic fire extinguishers, Portable hand. Burnoyl Heating Corporation. 248,039, renewed Oct. 16, 1948. O. G. July 27.
Grading and earth working equipment. R. G. Le Tourneau, Inc. 341,534, Dec. 15, 1936. Republished July 27.
Grading and earth working equipment. R. G. Le Tourneau, Inc. 402,782, Aug. 10, 1943. Republished July 27.
Gravel screening machines and conveyors, Portable and stationary. Simplicity Engineering Company. 240,943, renewed Apr. 10, 1948. O. G. July 27.
Hoisting units. Dempster Brothers, Incorporated. 402,672, Aug. 10, 1943. Republished July 27.
Knives, forks, scissors, etc. H. Boker & Co., Inc. 382,474, Oct. 29, 1940. Republished July 27.
Machines and tools for moistening, serving or applying adhesive or gummed tape, etc. Nashua Package Sealing Co. Inc. 301,244-5, Feb. 21, 1933. Republished July 27.
Machines and tools for moistening, serving or applying adhesive or gummed tape, etc. Nashua Package Sealing Co. Inc. 351,556, Nov. 2, 1937. Republished July 27.
Machines and tools for moistening, serving or applying adhesive or gummed tape, wrappers, labels, etc. Nashua Package Sealing Co. Inc. 351,794, Nov. 9, 1937. Republished July 27.
Machines and tools for moistening, serving or applying adhesive or gummed tape, etc. Nashua Package Sealing Co. Inc. 389,382, Aug. 5, 1941. Republished July 27.
Machines for moistening, serving, or applying adhesive or gummed tape, etc. Nashua Package Sealing Co. Inc. 232,741, Sept. 13, 1927. Republished July 27.
Milking machines and parts, Vacuum type. Rite-Way Products Company. 422,171, July 9, 1946. Republished July 27.

Multiple spindle drill head for a drill press or other drilling machine. Commander Manufacturing Co. 439,942, July 27; Serial No. 492,034.
Nozzles for washing, drying, and vacuum apparatus, etc. Central Engineering & Sales Company. 241,641, renewed May 1, 1948. O. G. July 27.
Oil rings made of metal, Engine, pump and compressor. McQuay-Norris Mfg. Co. 120,758, Mar. 5, 1918. Republished July 27.
Openers, Bottle. Crown Cork and Seal Co. 114,950, Jan. 16, 1917. Republished July 27.
Peining tool holding attachment. J. L. White. 439,943, July 27; Serial No. 508,079.
Plows and parts thereof. Collins Company. 70,130, renewed Aug. 4, 1948. O. G. July 27.
Portable house form assembly, etc. R. G. Le Tourneau, Inc. 430,275, June 10, 1947. Republished July 27.
Profile-cutters, milling-cutters, side mills, etc. Goddard & Goddard Company. 125,432, May 20, 1919. Republished July 27.
Pulsators. Rite-Way Products Company. 424,892, Oct. 29, 1946. Republished July 27.
Pumps. F. E. Myers & Bros. Company. 371,743, Oct. 3, 1939. Republished July 27.
Pumps, Rotary vacuum. Rite-Way Products Company. 422,653, Aug. 6, 1946. Republished July 27.
Razors. Boker Cutlery & Hardware Company, Inc. 133,575, Aug. 3, 1920. Republished July 27.
Scissors and shears. Acme Shear Company. 211,099, Apr. 6, 1926. Republished July 27.
Scissors and shears. Acme Shear Company. 278,344, Dec. 16, 1930. Republished July 27.
Scythes, sickles, shears, etc. H. Boker & Co., Inc. 317,039, Sept. 11, 1934. Republished July 27.
Sprayers and spray guns, Paint. W. R. Brown Corporation. 439,947, July 27; Serial No. 522,962.
Stretchers and sealers employed in the acme method of loading freight cars and the like. Acme Steel Company. 241,287, renewed Apr. 24, 1948. O. G. July 27.
Tools, pinch-off tools, tube cutters, etc., Bending. Imperial Brass Manufacturing Company. 336,864, July 21, 1936. Republished July 27.
Tools, pinch-off tools, tube cutters, etc., Bending. Imperial Brass Manufacturing Company. 336,867, July 21, 1936. Republished July 27.
Tools, saws, spot-facers, etc., Counterboring. National Twist Drill & Tool Co. 128,469, Jan. 6, 1920. Republished July 27.
Tractors. R. G. Le Tourneau, Inc. 404,772, Dec. 21, 1943. Republished July 27.
Trucks, Self propelled hoist. R. G. Le Tourneau, Inc. 407,985, July 11, 1944. Republished July 27.
Universal joints and change-speed transmissions. Mechanics Machine Company. 251,466, Jan. 8, 1929. Republished July 27.

CLASS 24

Clothes-pins. Forster Manufacturing Co., Inc. 501,132, July 27; Serial No. 505,192, published Apr. 20, 1948.
Extractors, etc., Centrifugal. American Laundry Machinery Company. 341,386, Dec. 6, 1936. Republished July 27.
Ironing machines. Meadows Corporation. 377,161, Apr. 23, 1940. New certificate. O. G. July 27.
Racks, Clothes drying. J. R. Clark Company. 501,185-6, July 27; Serial No. 530,876, published Apr. 20, 1948.
Sad-irons, Self-heating gasoline. Coleman Company, Inc. 501,219, July 27; Serial No. 533,145, published Apr. 27, 1948.
Washing machines. Meadows Manufacturing Co. 226,300, Apr. 5, 1927. New certificate. O. G. July 27.
Washing machines, Clothes or laundry. Altorfer Bros. Company. 215,158, July 13, 1926. Republished July 27.
Washing-machines, etc., Laundry. Pittsburgh Gage & Supply Company. 109,950, Apr. 25, 1916. New certificate. O. G. July 27.
Washing machines, Laundry. Altorfer Bros. Company. 127,572, Nov. 18, 1919. Republished July 27.
Washing machines, Laundry. Altorfer Bros. Company. 244,340, July 17, 1928. Republished July 27.
Washing machines, Laundry. Altorfer Bros. Company. 257,700, June 18, 1929. Republished July 27.
Washing machines, Laundry. Altorfer Bros. Company. 268,390, Mar. 11, 1930. Republished July 27.
Washing machines, Laundry. Altorfer Bros. Company. 313,760, June 5, 1934. Republished July 27.
Washing machines, Laundry. Altorfer Bros. Company. 384,968, Feb. 11, 1941. Republished July 27.

CLASS 25

Locks and keys. Independent Lock Company. 501,244, July 27; Serial No. 537,042, published Apr. 20, 1948.
Locks, cabinet locks, and door locks, Trunk. Eagle Lock Company. 501,178, July 27; Serial No. 529,613, published Apr. 27, 1948.
Vault door relocking devices, Heat responsive. Diebold Incorporated. 501,187, July 27; Serial No. 530,387, published Apr. 27, 1948.

CLASS 26

Cut-off and speed of steam engines, Device for simultaneously indicating. Cut-Off & Speed Recorder Corporation. 244,169, renewed July 17, 1948. O. G. July 27.
Electrical temperature measuring instruments and parts thereof. Illinois Testing Laboratories, Inc. 418,340, Dec. 18, 1945. Republished July 27.
Electrical temperature measuring instruments and parts thereof. Illinois Testing Laboratories, Inc. 418,456-8, Dec. 25, 1945. Republished July 27.
Instruments; section liners; draftsmen's scales, etc., Draftsmen's. Keuffel & Esser Company. 68,650, re-renewed Apr. 21, 1948. O. G. July 27.
Lorgnettes and opera glasses, compasses and magnifying glasses, rules and rulers, etc. Wm. Filene's Sons Company. 267,970, Mar. 4, 1930. Republished July 27.
Measuring tapes, omnimeters, levels, etc. Keuffel & Esser Company. 68,653, re-renewed Apr. 21, 1948. O. G. July 27.
Mountings and spectacle frames, Eyeglass. A. F. Williams. 344,822, Apr. 6, 1937. Republished July 27.
Recording apparatus. Permutit Company. 244,307, renewed July 17, 1948. O. G. July 27.
Scales and drafting instruments. Keuffel & Esser Company. 68,652, re-renewed Apr. 21, 1948. O. G. July 27.
Slide-rules. Keuffel & Esser Company. 68,651, re-renewed Apr. 21, 1948. O. G. July 27.
Testing stands including an electric motor, etc. U. S. Electrical Motors, Inc. 397,763, Sept. 22, 1942. Republished July 27.
Timing apparatus. Walter Klode & Company, Inc. 422,955, Aug. 20, 1946. Republished July 27.

CLASS 27

Cases, Clock. De Luxe Clock & Mfg. Co., Inc. 247,209, renewed Sept. 25, 1948. O. G. July 27.
Clocks. William L. Gilbert Clock Corporation. 501,223, July 27; Serial No. 535,940, published Apr. 20, 1948.
Clocks. William L. Gilbert Clock Corporation. 501,234, July 27; Serial No. 535,951, published Apr. 20, 1948.
Time indicating device. A. E. Freel. 278,761, Dec. 30, 1930. Republished July 27.
Timers, Interval. National Pressure Cooker Company. 431,937, Aug. 12, 1947. Republished July 27.
Watches and parts thereof. S. A. Brac. 439,883, July 27; Serial No. 516,950, published Apr. 20, 1948.

Koch, John B.

American Optical Company, assignee: *See*—
Wells, Raymond L.

Appel, George C., assignor to Globe-Union Inc., Milwaukee, Wis. Combined battery vent plug and hydrometer. 150,328, July 27.

Arpels, Claude, New York, N. Y. Necklace or similar article. 150,329, July 27.

Atkinson, Alfred H., Minneapolis, Minn. Film developing hanger. 150,330, July 27.

Auer, Michael J., and T. E. Grade, New York, N. Y. Portable electric stove. 150,331, July 27.

Bardach, Paul, Providence, R. I. Link chain for a bracelet or similar article. 150,332, July 27.

Bardach, Paul, Providence, R. I. Link chain for a bracelet or similar article. 150,333, July 27.

Bardach, Paul, Providence, R. I. Link chain for a bracelet or similar article. 150,334, July 27.

Bardach, Paul, Providence, R. I. Link chain for a bracelet or similar article. 150,335, July 27.

Bardach, Paul, Providence, R. I. Link chain for a bracelet or similar article. 150,336, July 27.

Chernow, Michael, New York, N. Y. Link chain for a bracelet or similar article. 150,337, July 27.

Chernow, Michael, New York, N. Y. Link chain for a bracelet or similar article. 150,338, July 27.

Colonial Radio Corporation, assignee: *See*—
Ferar, Monte.

Continental Optical Company, Inc., assignee: *See*—
Lauber, John A.

Converted Rice, Inc., assignee: *See*—
Harwell, Gordon L.

Cunningham, Jack B., North Hollywood, Calif. Chair. 150,339, July 27.

Cunningham, Jack B., North Hollywood, Calif. Table. 150,340, July 27.

Dallas Engineering Company, assignee: *See*—
Mathews, Ollie Z.

Design Fabricators, Inc., assignee: *See*—
Jackson, George M.

E. A. Laboratories, Inc., assignee: *See*—
Hutcheson, Ray R.

Elk-Manster, Inc., assignee: *See*—
Herbster, George B.

Esson, Edwin, assignor to Locke Stove Company, Kansas City, Mo. Stove. 150,341, July 27.

Felver, Richard I., Pittsburgh, Pa., assignor to Standard Gas Equipment Corporation, Baltimore, Md. Handle for oven doors and the like. 150,342, July 27.

Felver, Richard I., Pittsburgh, Pa., assignor to Standard Gas Equipment Corporation, Baltimore, Md. Handle for oven doors and the like. 150,343, July 27.

Felver, Richard I., Pittsburgh, Pa., assignor to Standard Gas Equipment Corporation, Baltimore, Md. Condiment and clock unit for cooking stoves. 150,344, July 27.

Felver, Richard I., Pittsburgh, Pa., assignor to Standard Gas Equipment Corporation, Baltimore, Md. Oven control knob for gas stoves. 150,345, July 27.

Felver, Richard I., Pittsburgh, Pa., assignor to Standard Gas Equipment Corporation, Baltimore, Md. Burner knob for gas stoves. 150,346, July 27.

Ferar, Monte, Detroit, Mich., assignor to Colonial Radio Corporation, Buffalo, N. Y. Pick up arm for electrical phonographs. 150,347, July 27.

Ferar, Montgomery: *See*—
Sunberg, Carl W., and Ferar.

Ferar, Montgomery, Detroit, Mich., assignor to Florence Stove Company, Gardner, Mass. Gas cookstove. 150,348, July 27.

Ferar, Montgomery, Detroit, Mich., assignor to Florence Stove Company, Gardner, Mass. Gas cookstove. 150,349, July 27.

Ferar, Montgomery, Detroit, Mich., assignor to Florence Stove Company, Gardner, Mass. Combined lamp bracket and timer for cookstoves. 150,350, July 27.

Flato, Paul, assignor, by mesne assignments, to D. Lisner & Co., Inc., New York, N. Y. Pin or similar article. 150,351, July 27.

Flato, Paul, assignor, by mesne assignments, to D. Lisner & Co., Inc., New York, N. Y. Pendant or similar article. 150,352, July 27.

Florence Stove Company, assignee: *See*—
Ferar, Montgomery.

Gilmore, Burdette B., Pelham Manor, assignor to West Disinfecting Company, Long Island City, N. Y. Powdered soap dispenser or the like. 150,353, July 27.

Globe-Union Inc., assignee: *See*—
Appel, George C.

Glowiak, Stanley J., Fresno, Calif. Cigarette and cigar case. 150,354, July 27.

Golden, David M., Chicago, Ill. Lamp. 150,355, July 27.

Grade, Tullio E. *See*—
Auer, Michael J., and Grade.

Harwell, Gordon L., assignor to Converted Rice, Inc., Houston, Tex. Pin. 150,356, July 27.

Herbster, George B., assignor to Elk-Manster, Inc., Cleveland, Ohio. Combined air circulator and diffuser. 150,357, July 27.

Hobart Brothers Company, The, assignee: *See*—
Hobart, Edward A., and Flora.

Hobart, Edward A., and R. T. Flora, assignors to The Hobart Brothers Company, Troy, Ohio. Electric welder. 150,358, July 27.

Hobe, Sylvia, New York, N. Y. Brooch pin or similar article. 150,359, July 27.

Hutcheson, Ray R., assignor to E. A. Laboratories, Inc., Brooklyn, N. Y. Casing for heater fan unit. 150,360, July 27.

Jackson, George M., Lake Forest, assignor to Design Fabricators, Inc., Chicago, Ill. Ash tray. 150,361, July 27.

Jackson, George M., Lake Forest, assignor to Design Fabricators, Inc., Chicago, Ill. Ash tray. 150,362, July 27.

Jackson, George M., Lake Forest, assignor to Design Fabricators, Inc., Chicago, Ill. Ash tray. 150,363, July 27.
Jackson, George M., Lake Forest, assignor to Design Fabricators, Inc., Chicago, Ill. Ash tray. 150,364, July 27.
Johnson, Dan R., Los Angeles, Calif. Coffee table or similar article. 150,365, July 27.
Klein, Philip: *See*—
Simon, Jacob, and Klein.
Koch, John B., Detroit, Mich., assignor to American Blower Corporation, Wilmington, Del. Ventilating unit. 150,366, July 27.
Lauber, John A., assignor to Continental Optical Company, Inc., Rochester, N. Y. Bridge for eyeglasses. 150,367, July 27.
Lisner, D., & Co., Inc., assignee: *See*—
Plato Paul.
Locke Stove Company, assignee: *See*—
Esson, Edwin.
Mathews, Ollie Z., assignor to Dallas Engineering Company, Dallas, Tex. Pressure regulator for butane gas systems. 150,368, July 27.
Narey, Peter, North Little Rock, Ark. Ash tray. 150,369, July 27.
Peterson, Henry, Brooklyn, N. Y. Ring shank. 150,370, July 27.
Priess, John L., Chicago, Ill. Perfume dispenser. 150,371, July 27.
Sanders, Raymond S., Center, Tex. Combined toilet paper holder and tray. 150,372, July 27.
Schmidt, Herbert D.: *See*—
Stephenson, Charles E., and Schmidt.
Schmidt, Herbert D., Little Falls, N. J., assignor to R. D. Werner Co., Inc., New York, N. Y. Shower curtain ring. 150,373, July 27.
Schmidt, Herbert D., Little Falls, N. J., assignor to R. D. Werner Co., Inc., New York, N. Y. Shower curtain ring. 150,374, July 27.
Segger-Sunbeam Corporation, assignee: *See*—
Sunberg, Carl W., and Ferar.
Selrite, Inc., assignee: *See*—
Spence, Edmond J.
Simon, Jacob, Irvington, and P. Klein, Maplewood, N. J. Comb. 150,375, July 27.
Spence, Edmund J., assignor to Selrite, Inc., New York, N. Y. Curio shelf. 150,376, July 27.
Spence, Edmund J., assignor to Selrite, Inc., New York, N. Y. Wall cabinet. 150,377, July 27.
Spence, Edmund J., assignor to Selrite, Inc., New York, N. Y. Book shelf. 150,378, July 27.
Spence, Edmund J., assignor to Selrite, Inc., New York, N. Y. Magazine basket. 150,379, July 27.
Standard Gas Equipment Corporation, assignee: *See*—
Felver, Richard I.
Stephenson, Charles E., New York, N. Y., and H. D. Schmidt, Little Falls, N. J., assignors to R. D. Werner Co., Inc., New York, N. Y. Shower curtain ring. 150,380, July 27.
Stone, Randolph, Chicago, Ill. Merry-go-round. 150,381, July 27.
Sundberg, Carl W., and M. Ferar, Detroit, Mich., assignors to Seeger-Sunbeam Corporation, St. Paul, Minn. Refrigerator cabinet. 150,382, July 27.
Van Leuven, Karl, Jr., Hollywood, assignor to I. Yoakum, Los Angeles, Calif. Brassière. 150,383, July 27.
Von Frantzius, Peter, Chicago, Ill. Signal device. 150,384, July 27.
W. & F. Manufacturing Co., Inc., The, assignee: *See*—
Williams, Paul A.
Wells, Raymond L., Attleboro, assignor to American Optical Company, Southbridge, Mass. Spectacle frame or the like. 150,385, July 27.
Wells, Raymond L., Attleboro, assignor to American Optical Company, Southbridge, Mass. Spectacle frame or the like. 150,386, July 27.
Wells, Raymond L., Attleboro, assignor to American Optical Company, Southbridge, Mass. Spectacle frame or the like. 150,387, July 27.
Werner, R. D., Co., Inc., assignee: *See*—
Schmidt, Herbert D.
Stephenson, Charles E., and Schmidt.
West Disinfecting Company, assignee: *See*—
Fillmore, Burdette B.
Williams, Paul A., Ebenezer, assignor to The W. & F. Manufacturing Co., Inc., Buffalo, N. Y. Candle. 150,388, July 27.
Williams, Paul A., Ebenezer, assignor to The W. & F. Manufacturing Co., Inc., Buffalo, N. Y. Candle. 150,389, July 27.
Williams, Paul A., Ebenezer, assignor to The W. & F. Manufacturing Co., Inc., Buffalo, N. Y. Candle. 150,390, July 27.
Yoakum, Ina, assignee: *See*—
Van Leuven, Karl, Jr.
Zelle, William C., St. Louis, Mo. Pipe smoker's stand. 150,391, July 27.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 27TH DAY OF JULY, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Abbott, Winfield F., Ruislip, England, assignor to The Bristol Company, Waterbury, Conn. Electrical contact system. 2,445,816, July 27.
Abrams Instrument Company, assignee: *See*—
Moore, Milford B.
Accmatool Co., Inc., assignee: *See*—
Bentzman, Louis.
Adams, Nicholas M., Chicago, Ill., assignor to Wilson & Company, Inc. Compressing dehydrated foods. 2,445,752, July 27.
Adamson, Arthur P., Ballston Spa, N. Y., assignor to General Electric Company. Stator winding method and apparatus therefor. 2,445,986, July 27.
Adelson, David E., Berkeley, and H. Dannenberg, Berkeley Highlands, assignors to Shell Development Company, San Francisco, Calif. Compositions of polymeric plasticizers and organic plastic materials. 2,446,121, July 27.
Aerojet Engineering Corporation, assignee: *See*—
Mayer, Waldemar F.
Agriculture, United States of America as represented by the Secretary of, assignee: *See*—
Beckel, Arthur C., Belter, and Smith.
Fisher, Charles H., and Fein.
Hemmeter, George T.
Rehberg, Chessie E., and Fisher.
Swern, Daniel, and Findley.
Wall, Monroe E., and Kelley.
Aktiengesellschaft Fuer Technische Studien, assignee: *See*—
Salzmann, Fritz.
Aktieselskabet Brødrene Hartmann, assignee: *See*—
Jahn, Jens S.
Albertson, Noel F.: *See*—
Archer, Sydney, and Albertson.
Albin, Jeremiah W., Babylon, N. Y. Separable fastener. 2,446,070, July 27.
Alford, Harold W., Danvers, assignor to Sylvania Electric Products Inc., Salem, Mass. Electrical apparatus for gaseous discharge devices. 2,446,152, July 27.
Algin Corporation of America, assignee: *See*—
Le Gloahec, Victor C. E.
Aller, Willis P., assignor to The Sheffield Corporation, Dayton, Ohio. Size gauging device. 2,446,071, July 27.
Allied Chemical & Dye Corporation, assignee: *See*—
Engel, Karl H.
Jennings, William S., and Rowland.
Amalgamated Wireless (Australasia) Limited, assignee: *See*—
Robertson, David S.
Ambrose, Henry A., Penn Township, Allegheny County, assignor to Gulf Research & Development Company, Pittsburgh, Pa. Seating piston rings in internal-combustion engines. 2,445,901, July 27.
Amco Manufacturing Corporation, assignee: *See*—
Rockwell, Ronald J.
American Airlines, Inc., assignee: *See*—
Ammann, Charles E., and King.
American Car and Foundry Company, assignee: *See*—
Willoughby, Victor.
American Cyanamid Company, assignee: *See*—
Cook, Elmer W., and Thomas.
Kropa, Edward L.
Shepard, Norman A.
American Locomotive Company, assignee: *See*—
Sawyer, Robert T.
Weber, Theodore R.
American Viscose Corporation, assignee: *See*—
Nelson, Seddon C.
Amigo, Alfonso, Ealing, assignor of one-half to Ebonestos Industries Limited, London, England. Molding of boxes from laminations of felted fibrous material impregnated with synthetic resin. 2,446,039, July 27.
Ammann, Charles E., Yonkers, and R. W. King, Rockville Center, assignors to American Airlines, Inc., New York, N. Y. Selective signaling system. 2,446,037, July 27.
Andrews, P. L., Corporation, assignee: *See*—
Hoffman, Louis, and Dalmen.
Angier Corporation, assignee: *See*—
Forrest, Marshall W.
Anheuser, Alfred, West Allis, assignor to E. A. Anheuser, Milwaukee, Wis. File. 2,445,753, July 27.
Anheuser, Ernest A., assignee: *See*—
Anheuser, Alfred.
Applied Arts Corporation, assignee: *See*—
Hendricks, Cornelius.
Archer, Sydney, Albany, and N. F. Albertson, East Greenbush, assignors, by mesne assignments, to Winthrop-Stearns Inc., New York, N. Y. Preparation of leucine. 2,445,817, July 27.
Archibald, Francis M.: *See*—
Mottern, Henry O., and Archibald.
Arens, Valerian A., Portland, Mich. Combined bottle holder and heater. 2,445,930, July 27.
Armstrong, Robert T., Johnson City, Tenn., assignor to United States Rubber Company, New York, N. Y. Preparation of dialkenyl sulfides. 2,446,072, July 27.
Ashman, Claire, Woodside, Long Island, N. Y. Bath mit. 2,445,987, July 27.
Associated Development and Research Corporation, assignee: *See*—
Waliach, Irving D.
Attorney General of the United States, Vested in the: *See*—
Chanal, Lucien.
Automatic Electric Laboratories, Inc., assignee: *See*—
Henrikson, Oscar W., and Obergfell.
Laney, Virgil H.
McCreary, Harold J.
Ayres, Russell W., Evansville, Ind., assignor, by mesne assignments, to Seeger Refrigerator Company. Refrigerator construction with removable refrigerator unit. 2,445,988, July 27.
Babb, Maynard A., Elkins Park, and A. E. Hayes, Philadelphia, Pa., assignors to M. M. Bilofsky, Newark, N. J. Starting and operating unit and circuit for gaseous electric discharge devices. 2,445,989, July 27.
Backer, Lyle A.: *See*—
Wing, Arthur K., Jr., and Backer.
Badmaieff, Alexis, Indianapolis, Ind., assignor to Radio Corporation of America. Signal translating apparatus. 2,445,990, July 27.
Baker, Corwin W., Beverly, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Lasting machine. 2,445,845, July 27.
Baldwin Locomotive Works, The, assignee: *See*—
Fullerton, Herbert S.
Baller, Melvin D., Little Silver, N. J. Vacuum tube. 2,445,754, July 27.
Bannon, Joseph J., Jr., North Arlington, assignor to Tung-Sol Lamp Works, Inc., Newark, N. J. Manufacture of miniature thermionic devices. 2,445,755, July 27.
Barber-Colman Company, assignee: *See*—
Drake, Russell P.
Bardou, Jacques: *See*—
Bourret, René, and Bardou.
Barfod, Frederik, and E. O. Wirth, assignors to Bendix Aviation Corporation, South Bend, Ind. Fuel supply system. 2,445,846, July 27.
Barton, Hugh M., Jr.: *See*—
De Boisblanc, Desloude R., and Barton.
Battelle Development Corporation, assignee: *See*—
Pray, Henry A. H., Igelsrud, and Simard.
Bean, Frank R., assignor to F. A. Smith Manufacturing Company, Rochester, N. Y. Fluid operated switch assembly. 2,445,756, July 27.
Beckel, Arthur C., Peoria, P. A. Belter, Pekin, and A. K. Smith, Peoria, Ill., assignors to the United States of America as represented by the Secretary of Agriculture. Extraction from vegetable materials. 2,445,931, July 27.
Bedford, Burnice D., Scotia, N. Y., assignor to General Electric Company. Electric control system. 2,445,991, July 27.
Beggs, James E.: *See*—
McArthur, Elmer D., and Beggs.
Beggs, James E., Scotia, N. Y., assignor to General Electric Company. Electric discharge device for space resonant circuits. 2,445,992, July 27.
Beggs, James E., Scotia, N. Y., assignor to General Electric Company. Cathode structure. 2,446,393, July 27.
Behnke, William E., Florida, N. Y. Portable topping knife for use on onion crates. 2,445,818, July 27.
Belcher, Daniel, assignor to Bemis Bro. Bag Co., Minneapolis, Minn. Closing bag tube ends. 2,445,757, July 27.
Belcher, Wallace E., Jr., assignor to The Brown Instrument Company, Philadelphia, Pa. Recalibrating motor control system. 2,446,153, July 27.
Bell Aircraft Corporation, assignee: *See*—
Wells, Harold E.
Bell, Joseph D., San Francisco, Calif. Power mechanism. 2,445,819, July 27.
Bell, Joseph D., San Francisco, Calif. Engine drive. 2,445,902, July 27.

Bell Telephone Laboratories, Incorporated, assignee: *See*—
Swezey, Burdette S.
Tyrrell, Warren A.

Belter, Paul A.: *See*—
Beckel, Arthur C., Belter, and Smith.

Bemis Bro. Bag Co., assignee: *See*—
Belcher, Daniel.

Benda, Theodore R., Villa Park, Ill., assignor to Excel Incorporated. Hanger. 2,445,758, July 27.

Bendix Aviation Corporation, assignee: *See*—
Barfod, Frederik, and Wirth.
Chambers, Allan C.
Garey, John P.
House, Bryan E.
Keyworth, James C.
Price, Earl R.
Wisman, Franklin O.

Bennett-Feragen, Inc., assignee: *See*—
Bennett, Harold L.

Bennett, Harold L., assignor to Bennett-Feragen, Inc., South Bend, Ind. Starter testing apparatus. 2,446,039, July 27.

Benson, Ellen G. and R. E., Eden, N. Y. Toy. 2,445,994, July 27.

Benson, Richard E.: *See*—
Benson, Ellen G. and R. E.

Bentzman, Louis, assignor to Accmatool Co., Inc., New York, N. Y. Engraving machine. 2,445,903, July 27.

Bergstrom, Carl P., Millbury, assignor to Crompton & Knowles Loom Works, Worcester, Mass. Warp beam for looms. 2,445,932, July 27.

Berwick, John D., Alton, Ill., assignor to Olin Industries, Inc. Copper base alloys. 2,445,868, July 27.

Beste, Harold E., East Rutherford, assignor to Allen B. Du Mont Laboratories, Inc., Passaic, N. J. Controlled blocking tube oscillator. 2,445,933, July 27.

Beyer, Henry J., assignor to Ritter Company, Inc., Rochester, N. Y. Sanitary body rest for chairs. 2,445,869, July 27.

Biefeld, Lawrence P.: *See*—
White, Erven, Steinman, and Biefeld.

Bills, Lela, Dallas, Tex. Neck and ear protector. 2,446,122, July 27.

Bilofsky, Maxwell M., assignee: *See*—
Babb, Maynard A., and Hayes.

Bjorklund, Arvid, Minneapolis, Minn. Garbage cutting and flushing device. 2,446,073, July 27.

Blackmore, Robert B., Casper, Wyo. Reversible scarifier. 2,446,074, July 27.

Blair, Charles M., Jr., Webster Groves, Mo., assignor to Petrolite Corporation, Ltd., Wilmington, Del. Desalting mineral oils. 2,446,040, July 27.

Blair, George W., Mishawaka, Ind., assignor to United States Rubber Company, New York, N. Y. Preparation of rubber crumbs. 2,446,075, July 27.

Blanchard, Lloyd H., Worcester, Mass. Plastic molding press. 2,446,041, July 27.

Bloemers, Albert C., Holland, Mich. Milking machine. 2,445,904, July 27.

Bloomberg, Daniel J., Sherman Oaks, and W. O. Watson, North Hollywood, Calif., assignors to Radio Corporation of America. Motor control switching system and device therefor. 2,445,820, July 27.

Bodine, Albert G., Jr., Burbank, Calif. Method and apparatus for cutting into the surface of an article. 2,445,934, July 27.

Boedeker, Edward R.: *See*—
Oblad, Alex G., and Boedeker.

Bondi, Arnold A., New Orleans, La., assignor, by mesne assignments, to Shell Development Company, San Francisco, Calif. Production of greases. 2,445,935, July 27.

Bourret, René, Boulogne-sur-Seine, and J. Bardou, Paris, assignors to Societe d'Applications Mecaniques Pour L'Automobile, Boulogne, sur-Seine, France. Automatic die casting machine. 2,445,995, July 27.

Bowsher, Edward A. H., H. M. M. d'Assis-Fonseca, and H. J. Ward, assignors to Standard Telephones and Cables Limited, London, England. Electric signaling system. 2,445,759, July 27.

Boyd, Thomas, Springfield, Mass., assignor to Monsanto Chemical Company, St. Louis, Mo. Preparation of vinyl chloride. 2,446,123, July 27.

Boyd, Thomas, Springfield, Mass., assignor to Monsanto Chemical Company, St. Louis, Mo. Reaction of hydrogen halides with compounds having aliphatic unsaturation. 2,446,124, July 27.

Bradley, William E., Swarthmore, assignor, by mesne assignments, to Philco Corporation, Philadelphia, Pa. Frequency modulation detector circuit. 2,445,996, July 27.

Brewer, Noble E., Abilene, Kans. Condenser microphone. 2,445,821, July 27.

Briechle, Joseph, Floral Park, N. Y. Timing and positioning mechanism for dial feeding machines. 2,445,822, July 27.

Briggs & Stratton Corporation, assignee: *See*—
Jacobi, Edward N.

Bristol Company, The, assignee: *See*—
Abbott, Winfield F.

Brody, Arthur, Newark, N. J. Protective cover for book jackets. 2,445,871, July 27.

Brondos, Andrew, Jr.: *See*—
Kubin, Andrew and C., and Brondos.

Brouse, William H. D., assignor to Teleflex Limited, Toronto, Ontario, Canada. Equalizer for cable operated controls. 2,445,997, July 27.

Brown Instrument Company, The, assignee: *See*—
Belcher, Wallace E., Jr.
Wannamaker, William H., Jr.

Buckendale, Lawrence R., assignor to The Timken-Detroit Axle Company, Detroit, Mich. Power-transmitting mechanism. 2,445,760, July 27.

Budd Company, The, assignee: *See*—
Callender, Edwin M., Phair.
Hochreiter, Edward.
Weightman, William A.

Buffalo Forge Company, assignee: *See*—
Tucker, William C.

Burkett, John C., Toledo, Ohio. Mallet for preparing meat. 2,445,872, July 27.

Busby, Lewis L., Cheney, Wash. Rigid jaw wrench with insertable auxiliary socket. 2,445,905, July 27.

Butcosk, Richard A., New Orleans, La., assignor, by mesne assignments, to Shell Development Company, San Francisco, Calif. Waterproofing of lubricating greases. 2,445,936, July 27.

Cabes, Lucien A. B.: *See*—
Kruithof, Jacob, and Cabes.

Callender, Edwin M., Cynwyd, and R. S. Phair, Philadelphia, Pa., assignors to The Budd Company. Control system. 2,446,125, July 27.

Cameron, William P., New York, N. Y. Electric range. 2,446,063, July 27.

Campbell, Donald L., Shorthills, H. Z. Martin, Elizabeth, E. V. Murphee, and C. W. Tyson, Summit, N. J., assignors to Standard Oil Development Company. Separation and purification of gases. 2,446,076, July 27.

Carborundum Company, The, assignee: *See*—
Summers, William R., and Corse.

Cardinal Products Inc., assignee: *See*—
Schmitt, George P.

Carpenter, David E., Springfield, Mass., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Coil winding machine. 2,445,937, July 27.

Carter Carburetor Corporation, assignee: *See*—
Edelen, James L.

Casablancas High Draft Company Limited, assignee: *See*—
Noguera, Joseph.

Castle, William E., Fontana, Calif. Grommet setting implement. 2,445,761, July 27.

Cavanagh, Robert T., Toronto, Ontario, Canada, assignor to Allen B. Du Mont Laboratories, Inc., Passaic, N. J. Direct-current amplifier. 2,445,938, July 27.

Celanese Corporation of America, assignee: *See*—
Plunkett, Brian, and Fama.

Chambers, Allan C., assignor to Bendix Aviation Corporation, South Bend, Ind. Inertia-actuated switch. 2,445,873, July 27.

Chanal, Lucien, Annecy, France; vested in the Attorney General of the United States. Record engraver suspension for sound track registering machines. 2,445,762, July 27.

Cherba, Samuel: *See*—
Gronemeyer, Erich, and Cherba.

Chevigny, Paul G., New York, N. Y., assignor to Federal Telephone and Radio Corporation, Newark, N. J. Anode structure for an electron discharge device for ultra high frequencies. 2,445,763, July 27.

Chizmadia, John, Detroit, Mich. Flying toy helicopter. 2,445,906, July 27.

Christiansen, Christian, Swampscott, assignor to Rotary Machine Company, Inc., Lynn, Mass. Folding and lasting machine. 2,446,043, July 27.

Churchill, Merton E., Arcadia, Pa. Choker for trapped animals. 2,446,078, July 27.

Chuy, Nicholas: *See*—
Tsai, Herbert, and Chuy.

Civilian Production Administration, United States of America as represented by the Administrator of, assignee: *See*—
Demerec, Millislav.

Conn, C. G., Ltd., assignee: *See*—
Kent, Earl L.

Control Instrument Company, Inc., assignee: *See*—
Lehde, Henry.

Cook, Elmer W., New York, N. Y., and W. D. Thomas, Jr., Stamford, Conn., assignors to American Cyanamid Company, New York, N. Y. Metal salts of acyl phenol monosulfides. 2,445,939, July 27.

Copeland, Ralph L., Piedmont, Calif. Aileron-rudder tab linkage. 2,445,940, July 27.

Corning Glass Works, assignee: *See*—
Hyde, James F.

Corse, William A.: *See*—
Summers, William R., and Corse.

Crake, Wilfred S., Houston, Tex., assignor to Shell Development Company, San Francisco, Calif. Filter heater. 2,446,126, July 27.

Cramer, Richard R., Dayton, Ohio. Adjustable stool. 2,446,127, July 27.

Crompton & Knowles Loom Works, assignee: *See*—
Bergstrom, Carl P.

Crosby, Murray G., Riverhead, assignor to Press Wireless, Inc., New York, N. Y. Frequency-shift telegraph system. 2,446,077, July 27.

Curry, Joseph P., New Bedford, Mass. Manufacturing combs for comber machines. 2,446,079, July 27.

Curtis, Fount E., Milwaukee, Wis., assignor to United Shoe Machinery Corporation, Flemington, N. J. Platform type shoe. 2,445,847, July 27.

Cushman's Sons, Inc., assignee: *See*—
MacManus, John.

Daddona, Anthony J., assignor to Hardinge Brothers, Inc., Elmira, N. Y. Form tool fixture. 2,446,128, July 27.

D'Alelio, Gaetano F., Shaker Heights, Ohio, assignor to General Electric Company. Interpolymer of diallyl maleate and diethylene glycol maleate phthalate. 2,445,764, July 27.

Dalmen, August: *See*—
Hoffman, Louis, and Dalmen.

Dalton, William, Schenectady, N. Y. Automatic control for jet propelled rotors. 2,446,129, July 27.

Dannenberg, Hans: *See*—
Adelson, David E., and Dannenberg.

D'Assis-Fonseca, Harold M. M.: *See*—
Bowsher, Edward A. H., D'Assis-Fonseca, and Ward.

Davis, Elmer W., Newton Center, Mass. Writing implement. 2,446,044, July 27.

Davis Engineering Corporation, assignee: *See*—
Davis, Howard C., and Thompson.

Davis, Howard C., Elizabeth, and W. H. Thompson, Chatham, assignors to Davis Engineering Corporation, Elizabeth, N. J. Water still with deaerator. 2,445,907, July 27.

Dawson, Edward, New York, F. M. Watkins, Forest Hills, and C. N. Schuh, Jr., Bellerose, N. Y., assignors to The Sperry Corporation. Hydraulic remote operating system. 2,445,765, July 27.

Day, Dewey D., assignor to The Murray Company, Dallas, Tex. Combination drier and cleaner. 2,446,130, July 27.

De Boisblanc, Deslonde R., and H. M. Barton, Jr., Bartlesville, Okla., assignors to Phillips Petroleum Company. Radiation thermoplie and making the same. 2,445,874, July 27.

Deck, Philibert, Zurich, Switzerland. Combined clip and pin chain link for fabric stretching machines. 2,446,131, July 27.

De Flon, James G., Los Angeles, and G. W. Meyer, North Hollywood, assignors to The Fluor Corporation, Ltd., Los Angeles, Calif. Mechanical draft water-cooling tower. 2,445,908, July 27.

De Groote, Melvin, University City, and B. Keiser, Webster Groves, Mo., assignors to Petrolite Corporation, Ltd., Wilmington, Del. Composition of matter and making same. 2,446,045, July 27.

Demerec, Millislav, Cold Spring Harbor, Long Island, N. Y., assignor to the United States of America, as represented by the Administrator, Civilian Production Administration. Production of penicillin. 2,445,748, July 27.

Dennis, Gertrude B., Kansas City, Mo. Face powder and puff container. 2,446,080, July 27.

Derby, Palmer P., Boston, and W. M. Robertson, Wakefield, assignors to Raytheon Manufacturing Company, Newton, Mass. Apparatus for assembling parts of electron discharge devices. 2,445,766, July 27.

De Vries, Lyn H., San Jose, Calif. Child's garment. 2,445,909, July 27.

Dickerson, J. Edward, assignee: *See*—
Dickerson, Winifred S.

Dickerson, Winifred S., assignor of one-half to J. E. Dickerson, Atlanta, Ga. Brassière. 2,445,767, July 27.

Diehnelt, Walter, Menomonee Falls, Wis. Bottom board assembly for beehives. 2,446,081, July 27.

Dixon, Cecil A., assignor to Minister of Supply in His Majesty's Government of the United Kingdom of Great Britain and Northern Ireland, London, England. Incendiary projectile. 2,446,082, July 27.

Domestic Credit Corporation, assignee: *See*—
Sleeper, Paul H.

Dow Chemical Company, The, assignee: *See*—
Dreisbach, Robert R.
Reinhardt, Robert C.

Drake, Russell P., Caledonia, assignor to Barber-Colman Company, Rockford, Ill. Bobbin handling mechanism. 2,445,998, July 27.

Drake, Russell P., Caledonia, assignor to Barber-Colman Company, Rockford, Ill. Warp drawing machine. 2,445,999, July 27.

Dreisbach, Robert R., assignor to The Dow Chemical Company, Midland, Mich. Purification of readily polymerizable vinyl aromatic compounds by distillation. 2,445,941, July 27.

Dresser, Willis R.: *See*—
Waller, Fred, Dresser, and Swain.

Driver, Douglas L. A., assignor to Standard Telephones and Cables Limited, London, England. Manufacture of selenium products. 2,445,768, July 27.

Dubilier, William: *See*—
Rossi, Irving, and Dubilier.

Duke University, Incorporated, assignee: *See*—
Humm, Harold J.

Dumelin, Charles, Detroit, Mich. Toe coupling for artificial feet. 2,445,910, July 27.

Du Mont, Allen B., Laboratories, Inc., assignee: *See*—
Beste, Harold E.
Cavanagh, Robert T.
Owen, Robert P.

Duncan, Robert: *See*—
McLaurin, Thomas G., and Duncan.

Dunn, John: *See*—
Vroom, Robert C., and Dunn.

Dusinberre, George B., Wichita, Kans. Cane. 2,445,942, July 27.

Easterling, Lloyd M.: *See*—
Miller, Julius Z., and Easterling.

Ebonestos Industries Limited, assignee: *See*—
Amigo, Alfonso.

Edelen, James L., Kirkwood, assignor to Carter Carburetor Corporation, St. Louis, Mo. Condition responsive mounting for measuring instruments. 2,445,943, July 27.

Eisler, Charles, South Orange, N. J. Machine for flanging glass blanks. 2,446,000, July 27.

Electro Manganese Corporation, assignee: *See*—
Hammerquist, William L.

Elwell, Richard D., Lawrence, assignor to Equitable Paper Bag Co. Inc., Long Island City, N. Y. Bag. 2,446,001, July 27.

Emerson Electric Manufacturing Company, The, assignee: *See*—
Winkeler, Lawrence J.

Emery, Alfred H., Wappingers Falls, assignor to Standard Gage Company, Inc., Poughkeepsie, N. Y. Combined comparator and limit gauge. 2,445,875, July 27.

Engel, Karl H., Teaneck, N. J., assignor to Allied Chemical & Dye Corporation, New York, N. Y. Isolation of styrene by azeotropic distillation with picolines and lutidines. 2,445,944, July 27.

Enterprise Manufacturing Company of Pennsylvania, The, assignee: *See*—
Wormeck, Herbert A., and Hess.

Equitable Paper Bag Co. Inc., assignee: *See*—
Elwell, Richard D.

Evans, Theodore W., Oakland, assignor to Shell Development Company, San Francisco, Calif. Silver catalysts. 2,446,132, July 27.

Excel Incorporated, assignee: *See*—
Benda, Theodore R.

Fama, George: *See*—
Plunkett, Brian, and Fama.

Fausek, Arthur J. and I. F., Clayton, Mo. Contact member and electrode for arc furnaces. 2,446,002, July 27.

Fausek, Irwing F.: *See*—
Fausek, Arthur J. and I. F.

Federal Telephone and Radio Corporation, assignee: *See*—
Chevigny, Paul G.
Fiore, William.
Grieg, Donald D.
Labin, Emile.
Libby, Lester L., and Wallace.
Marchand, Nathan.
Skinker, Murray F.
Wing, Arthur K., Jr., and Backer.

Fehlberg, Ernest W., Walla Walla, Wash. Vehicle side draft hitch. 2,446,083, July 27.

Fein, Martin L.: *See*—
Fisher, Charles H., and Fein.

Findley, Thomas W.: *See*—
Swern, Daniel, and Findley.

Finn, Sidney J., Beverly, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Machine for pressing soles on shoes. 2,445,848, July 27.

Fiore, William, Brooklyn, assignor to Federal Telephone & Radio Corporation, New York, N. Y. Rectifier and assembly. 2,445,769, July 27.

Fischer, Earl K., Long Island City, assignor to Interchemical Corporation, New York, N. Y. Basic iron soap pigment. 2,445,770, July 27.

Fisher, Charles H.: *See*—
Rehberg, Chessie E., and Fisher.

Fisher, Charles H., Abington, Pa., and M. L. Fein, Riverside, N. J., assignors to the United States of America as represented by the Secretary of Agriculture. Acetylating triethyl citrate. 2,445,911, July 27.

Fleischer, Fred E.: *See*—
Pigott, Reginald J. S., and Fleischer.

Fluor Corporation, Ltd., The, assignee: *See*—
De Flon, James G., and Meyer.

Forrest, Marshall W., assignor to Angier Corporation, Framingham, Mass. Wrapping sheet for oil-slushed metal articles. 2,445,945, July 27.

Foster, Larry, Foundation, assignee: *See*—
Foster, Thomas J.

Foster, Thomas J., Ridgewood, assignor to Larry Foster Foundation, Montclair, N. J. Building constructions. 2,445,823, July 27.

Fremlin, John H., and C. Strachey, assignors to Standard Telephones and Cables Limited, London, England. Electron discharge device of the velocity modulation type. 2,445,771, July 27.

Frese, Joseph F., assignor to The Monitor Controller Company, Baltimore, Md. Inductance clip. 2,445,772, July 27.

Frey, Frederick E., Bartlesville, Okla., P. V. McKinney, Pittsburgh, Pa., and W. H. Wood, Cleveland, Ohio, assignors to Phillips Petroleum Company. Alkylating hydrocarbons. 2,445,824, July 27.

Frost, Walter, Rochdale, England. Cotton bale mixing and opening machine. 2,445,912, July 27.

Frost, William F., Stewart Manor, N. Y., assignor to The Sperry Corporation. Rate taking circuit. 2,445,773, July 27.

Fullerton, Herbert S., Merion, Pa., assignor to The Baldwin Locomotive Works. Apparatus for testing tubes by fluid pressure. 2,445,870, July 27.

Gardiner, Paul C., Scotia, N. Y., assignor to General Electric Company. High-frequency coupling device. 2,446,003, July 27.

Garey, John P., Elmira Heights, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind. Bobbin holder. 2,445,849, July 27.

Garnuch, Robert E., Houston, Tex. Internal-combustion rotary motor. 2,445,877, July 27.

General Aniline & Film Corporation, assignee: *See*—
Loessel, Edward H., and Risdon.

General Electric Company, assignee: *See*—
Adamson, Arthur P.
Bedford, Burnice D.
Beggs, James E.
D'Alelio, Gaetano F.
Gardiner, Paul C.
Hurd, Dallas T.
Kuyper, William W.
Marsden, James.
McArthur, Elmer D., and Beggs.
Porter, Richard W., and Linowiecki.
Seeley, Harold T.
Watts, Donald E., and Vahle.
Wellings, John G.

General Mills, Inc., assignee: *See*—
Salo, Paul W.
Witteoff, Harold.

Gibbs, Charles E., Middletown, Ohio. Storm door check. 2,446,004, July 27.

Gibson, Eleanor W., Detroit, Mich. Infant's feeding bib. 2,445,850, July 27.

Gollmar, Herbert A., Mount Lebanon, assignor, by mesne assignments, to Koppers Company, Incorporated, Pittsburgh, Pa. Recovery of phenols. 2,445,825, July 27.

Goodman Manufacturing Company, assignee: *See*—
Lindgren, Frank A.

Gorn, Elmer J., assignor to Raytheon Manufacturing Company, Newton, Mass. Picture receiver utilizing anomalous redirection from silver. 2,445,774, July 27.

Grady, John O., Arab, Ala. Knockdown carrier carton. 2,446,084, July 27.

Graham, David P.: *See*—
Peterson, Eric G., and Graham.

Gray, John E.: *See*—
Rentschler, Harvey C., Lilliendahl, and Gray.

Grieg, Donald D., Forest Hills, assignor to Federal Telephone and Radio Corporation, New York, N. Y. Pulse time modulation multiplex receiver. 2,445,775, July 27.

Gronemeyer, Erich, Pompton Plains, and S. Cherba, Totowa, N. J. Measuring device with distortable portioning means. 2,446,085, July 27.

Groslean, Harry W., and E. M. A. Sizer, Milwaukee, Wis., and A. Zinda, Portland, Oreg. Mud and snow hooks for vehicle tires. 2,445,913, July 27.

Grueneberg, Willard G.: *See*—
Grueneberg, William C. and W. G.

Grueneberg, William C. and W. G., Cincinnati, Ohio. Display structure with removable indicia-bearing inserts. 2,445,878, July 27.

Gulf Research & Development Company, assignee: *See*—
Ambrose, Henry A.
Pigott, Reginald J. S., and Fleischer.

Guthrie, Alvin W., Chicago, Ill. Cam-acting garment hanger. 2,445,851, July 27.

Guy, Herbert G., assignor to Koppers Company, Inc., Pittsburgh, Pa. Conditioned naphthalene. 2,445,776, July 27.

Hahn, Lewis F., Hatboro, Pa. Shielded spark plug. 2,445,777, July 27.

Hale, William J., Midland, Mich. Fuels for internal-combustion engines. 2,445,778, July 27.

Hall, George O., Murrysville, assignor to Hall Laboratories, Inc., Pittsburgh, Pa. Process of treating eggs. 2,445,879, July 27.

Hall Laboratories, Inc., assignee: *See*—
Hall, George O.
Tjoflat, Gerald B.

Hammerquist, William L., assignor to Electro Manganese Corporation, Knoxville, Tenn. Electrolyte purification in manganese electrowinning. 2,445,826, July 27.

Hammond Machinery Builders, Inc., assignee: *See*—
Krueger, Edward C.

Hansen, George E. H., Los Angeles, Calif., assignor to Radio Corporation of America. Picture sound record production. 2,445,827, July 27.

Hardinge Brothers, Inc., assignee: *See*—
Daddona, Anthony J.

Hardy, René, Lyon, France, assignor to International Standard Electric Corporation, New York, N. Y. Electromagnetic wave direction responsive apparatus. 2,445,779, July 27.

Hargett, Huston L.: *See*—
Hilton, Harold L. and H. C., and Hargett.

Harper, Glen W., Manhattan, Kans. Terminal and clamp therefor. 2,445,946, July 27.

Hartmann, Fred, St. Louis, Mo. Collapsible scaffold. 2,446,006, July 27.

Harvill, Tom R., and L. Wroblewski, U. S. Army, said Wroblewski now, by judicial change of name, Leonard Sperry. Teletype apparatus. 2,445,780, July 27.

Hathaway, Claude M., Denver, Colo., assignor to Hathaway Instrument Company. Electrical strain measuring apparatus. 2,445,880, July 27.

Hathaway Instrument Company, assignee: *See*—
Hathaway, Claude M.

Haven, Roger W., Winchester, assignor to Sylvania Electric Products Inc., Salem, Mass. Holder for tubular lamps. 2,446,154, July 27.

Hawthorne, Charles W., Conneautville, Pa., assignor to Morgan Construction Company, Worcester, Mass. Rotary shaft coupling. 2,446,133, July 27.

Hayes, Arnold E.: *See*—
Babb, Maynard A., and Hayes.

Hazeltine Research, Inc., assignee: *See*—
Rado, John A.

Heinsohn, Henry C., Jr., Northfield, assignor to Ventnor Boat Works, Inc., West Atlantic City, N. J. Variable angle gear casing. 2,445,828, July 27.

Hemmeter, George T., Berkeley, Calif., assignor to the United States of America as represented by the Secretary of Agriculture. Apparatus for peeling onions, including a conical jet of gas. 2,445,881, July 27.

Hendricks, Cornelius, assignor to Applied Arts Corporation, Grand Rapids, Mich. Ash receiver. 2,445,914, July 27.

Hendricks, Norva E., Scranton, Iowa. Driver's comfort. 2,446,006, July 27.

Henrikson, Oscar W., Chicago, and H. F. Obergfell, deceased, by A. Obergfell, executrix, River Forest, assignors to Automatic Electric Laboratories, Inc., Chicago, Ill. Mechanical impulse regenerator. 2,445,829, July 27.

Herbnick Manufacturing and Engineering Company, Incorporated, assignee: *See*—
Taal, Herbert, and Chuy.

Hermans, James, New York, N. Y. Combined comb and brush. 2,446,086, July 27.

Hess, Frederick P.: *See*—
Wormeck, Herbert A.

Hill, Russell A., Grosse Pointe, Mich. Sanding block. 2,446,134, July 27.

Hill, Thomas C.: *See*—
Kraemer, Robert W., Hill, and van Zelm.

Hilton, Harold L., Terrace Park, H. C. Hilton, Cincinnati, and H. L. Hargett, Madeira, Ohio, said Hargett assignor to said H. L. Hilton and said H. C. Hilton. Stacked article dispenser. 2,445,830, July 27.

Hilton, Henry C.: *See*—
Hilton, Harold L. and H. C., and Hargett.

Hobbs, Howard F., assignor to Hobbs Transmission Limited, Leamington Spa, England. Controlling variable speed gears. 2,446,087, July 27.

Hobbs, Howard F., assignor to Hobbs Transmission Limited, Leamington Spa, England. Power-transmission apparatus. 2,446,088, July 27.

Hobbs Transmission Limited, assignee: *See*—
Hobbs, Howard F.

Hochreiter, Edward, Cynwyd, assignor to The Budd Company, Philadelphia, Pa. Apparatus for stretch forming elongated articles. 2,445,089, July 27.

Hoffman, Louis, Brooklyn, and A. Dalmen, Jamaica, assignors to P. L. Andrews Corporation, Brooklyn, N. Y. Window cutting envelope machines. 2,445,831, July 27.

Hoffmann-La Roche, Inc., assignee: *See*—
Wenner, Wilhelm.

Holloway, John H., Green Bay, Wis. Connecting rod for internal-combustion engines. 2,446,090, July 27.

Holmes, Glenn E.: *See*—
Ostolaza, Frank, and Holmes.

Hook, Melvin S., Gurnee, assignor to Outboard, Marine & Manufacturing Company, Waukegan, Ill. Spark plug cover. 2,446,007, July 27.

Hoppes, Thomas O., Tamaqua, Pa. Combined tire chain applicator and mud lug. 2,445,947, July 27.

House, Bryan E., assignor to Bendix Aviation Corporation, South Bend, Ind. Sealing means. 2,445,882, July 27.

Hrdlicka, Edward J., Jr., Painesville, assignor to Hydraulic Equipment Company, Cleveland, Ohio. Control system for multiple hydraulic hoists. 2,445,781, July 27.

Huey, Homer D., Baltimore, and G. F. Towner, Joppa, assignors to The Glenn L. Martin Company, Baltimore, Md. Gun turret. 2,445,852, July 27.

Huey, Homer D., Baltimore, and G. F. Towner, Raspeburg, assignors to The Glenn L. Martin Company, Middle River, Md. Spent ammunition chute for gun turrets. 2,445,853, July 27.

Humm, Harold J., Beaufort, assignor to Duke University, Incorporated, Durham, N. C. Extracting gelose from seaweeds such as hypnea musciformis and other species of the genus hypnea. 2,446,091, July 27.

Hurd, Dallas T., Schenectady, N. Y., assignor to General Electric Company. Preparation of organoboron compounds. 2,446,008, July 27.

Hurley, Samuel C., Jr., Danville, Ill. Sizing bridge. 2,446,046, July 27.

Hyde, James F., assignor to Corning Glass Works, Corning, N. Y. Process for preparing methyl siloxanes. 2,446,135, July 27.

Hydraulic Equipment Company, assignee: *See*—
Hrdlicka, Edward J., Jr.

Hyman, Sidney, New York, N. Y. Combined wallet and cigarette case. 2,446,009, July 27.

I-T-E Circuit Breaker Company, assignee: *See*—
McCroskey, Donald W.

I. T. E. Circuit Breaker Company, assignee: *See*—
Scott, William M., Jr.

Igelsrud, Iver: *See*—
Pray, Henry A., Holden, Igelsrud, and Simard.

Interchemical Corporation, assignee: *See*—
Fischer, Earl K.

International Nickel Company, Inc., The, assignee: *See*—
Kihlgren, Theodore E., and Lacy.

International Standard Electric Corporation, assignee: *See*—
Hardy, René.
Kruithof, Jacob, and Cabes.
Lehmann, Gerard J.

Jacobi, Edward N., assignor to Briggs & Stratton Corporation, Milwaukee, Wis. Switch terminal guard. 2,445,949, July 27.

Jahn, Jens S., Copenhagen, assignor to Aktieselskabet Brødrene Hartmann, Kanalvej, Kongens Lyngby, Denmark. Machine for transferring a design to a cloth material. 2,446,010, July 27.

Jarmin, James B., assignor to Servis Equipment Company, Dallas, Tex. Earth handling machine. 2,446,136, July 27.

Jennings, William S., Richmond, and W. Rowland, Petersburg, Va., assignors to Allied Chemical & Dye Corporation. Conveyer switch. 2,445,950, July 27.

Johanson, Tage I.: *See*—
Melander, Karl H. A. and S., and Johanson.

Johnson, Charles J., Sacramento, and F. E. King, Woodland, Calif. Hydraulic motor with pistol grip handle and trigger actuated valve. 2,446,011, July 27.

Kahn, Louis M., Bronx, N. Y. Collar holding clasp. 2,446,012, July 27.

Karle, John D., Roselle Park, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Holder for surgical accessories. 2,446,155, July 27.

Karry, Angelo, Denver, Colo. Cutting board for steam tables. 2,445,915, July 27.

Kats, Julius, Bronx, and F. P. Majoros, Brooklyn, assignors to Superba Manufacturing Co., Inc., New York, N. Y. Bias tubing. 2,445,883, July 27.

Keiser, Bernhard: *See*—
De Groote, Melvin, and Keiser.

Kelley, Edward G.: *See*—
Wall, Monroe E., and Kelley.

Kellogg, Edward W., Indianapolis, Ind., assignor to Radio Corporation of America. Variable time sound recording method and system. 2,445,832, July 27.

Kent, Earle L., assignor to C. G. Conn, Ltd., Elkhart, Ind. Flash illuminated striped pattern direct reading stroboscope for wave frequency measurement. 2,446,047, July 27.

Kestenman Bros. Mfg. Co., assignee: *See*—
Valcourt, Louis E.

Keyworth, James C., assignor to Bendix Aviation Corporation, South Bend, Ind. Flow meter. 2,445,854, July 27.

Kihlgren, Theodore E., Scotch Plains, and C. E. Lacy, Westfield, N. J., assignors to The International Nickel Company, Inc., New York, N. Y. Producing welded joints. 2,445,951, July 27.

Kimball, Donald E., Cleveland Heights, Ohio. Eyeshield. 2,446,048, July 27.

King, Frank E.: *See*—
Johnson, Charles J., and King.

King, Rodney W.: *See*—
Ammann, Charles E., and King.

Knull, Raymond P.: *See*—
Peachey, Leroy S., and Knull.

Kolz, Frank F., Berkeley, Calif. Automatic freezer control and refrigerating system. 2,446,156, July 27.

Koppers Company, Inc., assignee: *See*—
Guy, Hubert G.

Koppers Company, Incorporated, assignee: *See*—
Gollmar, Herbert A.

Kortan, Joseph F., Cleveland, Ohio. Support. 2,445,749, July 27.

Kraemer, Robert W., Middle River, T. C. Hill, Parkville, and W. D. van Zelm, Ruxton, assignors to The Glenn L. Martin Company, Middle River, Md. Airplane wing flap and dive brake assembly. 2,445,833, July 27.

Kropa, Edward L., Old Greenwich, Conn., assignor to American Cyanamid Company, New York, N. Y. Copolymers of isopropenyl toluene and acrylate and producing same. 2,446,049, July 27.

Krueger, Edward C., Otsego, assignor to Hammond Machinery Builders, Inc., Kalamazoo, Mich. Chip truck for sawing and other machines. 2,446,137, July 27.

Kruithof, Jacob, and L. A. B. Cabes, Antwerp, Belgium, assignors to International Standard Electric Corporation, New York, N. Y. Electronic discharge tubes and circuits therefor. 2,445,782, July 27.

Kubin, Andrew, Westlake, C. Kubin, North Olmsted, and A. Brondos, Jr., Lakewood, assignors to The Reliable Spring & Wire Forms Company, Cleveland, Ohio. Inner tube tester. 2,446,050, July 27.

Kubin, Charles: *See*—
Kubin, Andrew and C., and Brondos.

Kuyper, William W., Schenectady, N. Y., assignor to General Electric Company. Combustion chamber drain arrangement. 2,446,013, July 27.

Labin, Emile, assignor to Federal Telephone and Radio Corporation, New York, N. Y. Transmission system. 2,445,783, July 27.

Lacy, Charles E.: *See*—
Kihlgren, Theodore E., and Lacy.

Lagergreen, Henning, Montgomery, N. Y. Sealing ring. 2,445,952, July 27.

Lait, Morris, Lynn, Mass. Boat rack means on automobiles. 2,446,002, July 27.

Lambert Brake Corporation, assignee: *See*—
Lambert, Homer T.

Lambert, Edward J., Quincy, Ill. Hoist frame. 2,446,093, July 27.

Lambert, Homer T., assignor to Lambert Brake Corporation, St. Joseph, Mich. Cam actuated clutch. 2,556,138, July 27.

Lambert, Le Roy, Jr., assignee: *See*—
Lancaster, Franklin A.

Lancaster, Franklin A., Lake Charles, assignor of one-half to L. Lambert, Jr., Leesville, La. Signal device. 2,445,953, July 27.

Lane, Guy M., and H. G. Thunder, assignors to Motor Products Corporation, Detroit, Mich. Ventilating window assembly and latch therefor. 2,445,954, July 27.

Lane, Guy M., and H. G. Thunder, assignors to Motor Products Corporation, Detroit, Mich. Upper pivot for ventilator panels. 2,445,955, July 27.

Laney, Virgil H., Fremont, Nebr., assignor to Automatic electric Laboratories, Inc., Chicago, Ill. Tape perforator. 2,445,834, July 27.

Lantz, Alpha P., Washington, D. C. Built-in ironing board. 2,445,956, July 27.

Larson, Algot, Bronx, assignor to Unique Balance Co., Inc., New York, N. Y. Stabilizer for double hung windows. 2,446,014, July 27.

Le Clair, William, Martinsdale, Mont. Gravity actuated dirigible headlight. 2,445,835, July 27.

Le Gloahec, Victor C. E., Rockland, Maine, assignor to Algin Corporation of America, New York, N. Y. Milk products and the like containing algin compound. 2,445,750, July 27.

Lehde, Henry, assignor to Control Instrument Company, Inc., Brooklyn, N. Y. Electrolytic concentration indicator. 2,446,015, July 27.

Lehmann, Gerard J., assignor to International Standard Electric Corporation, New York, N. Y. Cavity resonator electric wave generator. 2,445,784, July 27.

L'Eplattenier, Jean, La Chaux de Fonds, Switzerland. Watch timing apparatus. 2,445,016, July 27.

Leslie, John H., II, Winnetka, assignor to Stewart-Warner Corporation, Chicago, Ill. Control valve. 2,446,051, July 27.

Lessin, Maurice E., Bronx, N. Y. Knife rack. 2,446,016, July 27.

Lévy, Maurice M., London, W. C. 2, assignor to Standard Telephones and Cables Limited, London, England. Generating rectangular electrical impulses. 2,445,785, July 27.

Leyshon, William E.: *See*—
Lowry, Erwin F., Peacock, and Leyshon.

Libby, Lester L., East Orange, N. J., and F. C. Wallace, assignors to Federal Telephone and Radio Corporation, New York, N. Y. Direction finder collector unit. 2,445,786, July 27.

Lilienfeld, Julius E., St. Thomas, Virgin Islands. Method of and apparatus for plotting an ordered set of quantities. 2,445,787, July 27.

Lilliendahl, William C.: *See*—
Rentschler, Harvey C., Lilliendahl, and Gray.

Linde Air Products Company, The, assignee: *See*—
Lobosco, Roscoe R.

Lindgren, Frank A., La Grange, assignor to Good Manufacturing Company, Chicago, Ill. Slack or cuttings removing device for kerf-cutting machines. 2,445,957, July 27.

Lindstrom, Andrew E., Larkspur, Calif. Container dispenser. 2,445,958, July 27.

Linowiecki, Anthony G.: *See*—
Porter, Richard W., and Linowiecki.

Litman, Bernard, Wilkinsburg, assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Rotary amplifier. 2,445,788, July 27.

Lobosco, Roscoe R., Elizabeth, N. J., assignor to The Linde Air Products Company. Electrical regulating system. 2,445,789, July 27.

Lodge and Shipley Company, The, assignee: *See*—
Rosen, Oscar E.

Loessel, Edward H., and J. J. Risdon, Binghamton, assignors to General Aniline & Film Corporation, New York, N. Y. Comparator for color photographs. 2,446,052, July 27.

Lonne, Ingvar, Burbank, Calif. Mechanically operated razor. 2,445,790, July 27.

Lovell, Stanley P., Newtonville, Mass. Last. 2,445,791, July 27.

Lowry, Erwin F., Lynn, A. L. Peacock, Danvers, and W. E. Leyshon, assignors to Sylvania Electric Products Inc., Salem, Mass. Electrode. 2,446,157, July 27.

Lucas, Joseph, Limited, assignee: *See*—
Shaw, Frederick T.

Lunney, Edward J., Dayton, Ohio. Instrument for measuring the slopes of a curve. 2,445,792, July 27.

Luper, Harvey R., Portsmouth, Va. Tire pressure switch. 2,445,959, July 27.

Lyons, Barney J., Nashville, Tenn. Valve. 2,446,153, July 27.

MacManus, John, Yonkers, assignor to Cushman's Sons, Inc., New York, N. Y. Apparatus for handling bread. 2,445,884, July 27.

Majneri, Ludwig A., Grosse Pointe, assignor to The Warner Aircraft Corporation, Detroit, Mich. Fluid pressure control device. 2,445,855, July 27.

Majoros, Frank P.: *See*—
Katz, Julius, and Majoros.

Mallory, John M., Endicott, N. Y. Blood pressure stethoscope. 2,445,917, July 27.

Mapes, Leslie A., Palisade, N. J. Extensible conveyer. 2,445,960, July 27.

Marchand, Nathan, assignor to Federal Telephone and Radio Corporation, New York, N. Y. Rotary high-frequency switching circuit. 2,445,793, July 27.

Marinsky, Davis, assignee: *See*—
Morin, Louis H.

Marsden, James, Schenectady, N. Y., assignor to General Electric Company. Methyl silicone elastomers containing si-bonded vinyl radicals. 2,445,794, July 27.

Martin, Glenn L., Company, The, assignee: *See*—
Draemer, Robert W., Hill, and van Zelm.
Huey, Homer D., and Towner.

Martin, Homer Z.: *See*—
Campbell, Donald L., Martin, Murphree, and Tyson.

Master Rule Manufacturing Co., Inc., assignee: *See*—
Nicholson, Ragnar C., and Schneider.

Matarazzo, Stephen, Schenectady, N. Y. Adjustable cap. 2,446,053, July 27.

Matsuda, Masayoshi, Cleveland, Ohio. Vehicle stop and turn signal. 2,445,961, July 27.

Mattice, Harold E., Eureka, Calif. Supercharging and scavenging internal-combustion engine. 2,446,094, July 27.

Maxson, Clarence G., assignor to Ritter Company, Inc., Rochester, N. Y. Sanitary chair armrest. 2,445,970, July 27.

Mayer, Waldemar F., Los Angeles, assignor to Aerojet Engineering Corporation, Azusa, Calif. Rotary reaction motor. 2,445,856, July 27.

Maytag Company, The, assignee: *See*—
Smith, Thomas R.

McArthur, Elmer D., Schenectady, and J. E. Beggs, Scotia, N. Y., assignors to General Electric Company. Ultra-high frequency electric discharge device and cavity resonator apparatus therefor. 2,446,017, July 27.

McCreary, Harold J., Lombard, assignor to Automatic Electric Laboratories, Inc., Chicago, Ill. Magnetic frequency changer. 2,445,857, July 27.

McCrosky, Donald W., Lansdowne, assignor to I-T-E Circuit Breaker Company, Philadelphia, Pa. Unloading circuit. 2,445,836, July 27.

McCullough, Francis J., Chicago, Ill. Liquid temperaturizing vat. 2,446,054, July 27.

McGee, Jesse M., Oak Park, assignor to Roberts and Schaefer Company, Chicago, Ill. Apparatus for pneumatically separating relatively moist comminuted material. 2,446,140, July 27.

McKenzie, Thomas M., Jr., Hyattsville, Md. Air-cooled gas turbine. 2,445,837, July 27.

McKinney, Paul V.: *See*—
Frey, Frederick E., McKinney, and Wood.

McLaurin, Thomas G. and R. D., Montreal, Quebec, Canada. Machine for cleaning and separating flax or other fibrous plants. 2,446,055, July 27.

McMullen, Donald R., Detroit, Mich. All-steel high-pressure valve. 2,445,885, July 27.

McNair, Lyle W.: *See*—
Wilson, Golder P., McNair, and Waters.

Melander, Karl H. A., Göteborg, and G. E. Sävö, and T. I. Johnson, assignors to Sulfit Aktiebolaget Göta, Göta, Sweden. Treatment of waste sulfite liquor. 2,445,838, July 27.

Mell, Clifford W., Moorestown, N. J., assignor to Radio Corporation of America. Forming silver sulfide coatings. 2,445,962, July 27.

Merck & Co., Inc., assignee: *See*—
Peck, Robert L.

Mexican American Hat Company, assignee: *See*—
Ostolaza, Frank, and Holmes.

Meyer, George W.: *See*—
De Flon, James G., and Meyer.

Millendorf, Alfred J., Beacon, assignor, by mesne assignments, to The Texas Company, New York, N. Y. Hydrogenation of carbon oxides. 2,445,795, July 27.

Millendorf, Alfred J., Beacon, assignor to The Texas Company, New York, N. Y. Catalytic hydrogenation of carbon oxides. 2,445,796, July 27.

Miller, Gustaf E., Stratton, Nebr. Feed grinding mill of the rotary beater type. 2,446,095, July 27.

Miller, Julius Z., and L. M. Easterling, Clarksville, Tenn. Cowboy boot upper. 2,446,158, July 27.

Miller, Olen L., Washington, D. C. Core box cutter. 2,445,918, July 27.

Miller, Randall V.: *See*—
Newman, Albert M., and Miller.

Minister of Supply in His Majesty's Government of the United Kingdom of Great Britain and Northern Ireland, assignee: *See*—
Dixon, Cecil A.

Miskimen, Burt D., Columbus, Ohio. Garter construction. 2,446,018, July 27.

Mitchell, Edmund G., Godfrey, and De W. B. Timberman, Alton, Ill., assignors to Olin Industries, Inc. Laminated structure. 2,445,858, July 27.

Mitchell, William A., Buckland, Betchworth, England. Apparatus for cooking resins. 2,445,919, July 27.

Monitor Controller Company, The, assignee: *See*—
Frese, Joseph F.

Monsanto Chemical Company, assignee: *See*—
Boyd, Thomas.

Montgomery, Earle T., Columbus, assignor, by mesne assignments, to The National Clay Pipe Research Corporation, Logan, Ohio. Flexible joint construction for ceramic pipe. 2,445,963, July 27.

Moore, Harry W., Dayton, Ohio. Tractor drive. 2,445,797, July 27.

Moore, Milford B., assignor to T. Abrams, doing business as Abrams Instrument Company, Lansing, Mich. Automatic leveler. 2,446,096, July 27.

Moore, Thomas, Washington, D. C. Rigging insulation installation. 2,445,798, July 27.

Morgan Construction Company, assignee: *See*—
Hawthorne, Charles W.

Morin, Louis H., assignor of one-half to D. Marinsky, Bronx, N. Y. Apparatus for forming groups of die castings. 2,446,056, July 27.

Morin, Louis H., assignor of one-half to D. Marinsky, Bronx, N. Y. Plastic casting machine. 2,446,057, July 27.

Morris, Rupert C., Berkeley, and E. C. Shokal, Oakland, assignors to Shell Development Company, San Francisco, Calif. Organic sulfur-containing polymers. 2,445,799, July 27.

Mortlock, Alfred, assignor to Standard Telephones and Cables Limited, London, England. Electric frequency counting arrangement. 2,445,800, July 27.

Motor Products Corporation, assignee: *See*—
Lane, Guy M., and Thunder.

Mottern, Henry O., Hillside, and F. M. Archibald, Elizabeth, N. J., assignors, by mesne assignments, to Standard Oil Development Company. Distillation of alcohol from hydrolyzed mixtures of alkyl sulfates and sulfuric acid. 2,446,159, July 27.

Muller, Gertrude A., Fort Wayne, Ind., assignor to The Toidey Company, Gertrude A. Muller, Inc. Urine sampler attachment. 2,446,160, July 27.

Mulligan, Frederick A., Rosser, Manitoba, Canada. Mobile grain hopper. 2,445,886, July 27.

Murdock, Harold E., Oneida, Ill. Supporting rack for milk strainers. 2,445,939, July 27.

Murphee, Eger V.: *See*—
Campbell, Donald L., Martin, Murphree, and Tyson.

Murray Company, The, assignee: *See*—
Day, Dewey D.

Murray Corporation of America, The, assignee: *See*—
Polle, Henry D.

National Clay Pipe Research Corporation, The, assignee: *See*—
Montgomery, Earle T.

Nelson, Seddon C., Front Royal, Va., assignor to American Viscose Corporation, Wilmington, Del. Cutting apparatus. 2,446,097, July 27.

Newkirk, Elmer M., St. Joseph, Mo. Window platform. 2,445,860, July 27.

Newman, Albert M., and R. V. Miller, Los Angeles, Calif. Golf swing indicator. 2,445,839, July 27.

Niblack, Harley D., Denver, Colo. Massage table. 2,446,098, July 27.

Niblack, Harley D., Denver, Colo. Massage roller. 2,446,099, July 27.

Nichols, Harry J., Binghamton, N. Y. Detonating or impact fuse. 2,446,019, July 27.

Nicholson, Ragnar C., White Plains, and N. H. Schneider, assignors to Master Rule Manufacturing Co., Inc., New York, N. Y. Tape rule. 2,446,020, July 27.

Nitralloy Corporation, The, assignee: *See*—
Partiot, Maurice.

Noguera, Joseph, Prestwich, Manchester, assignor to Casablancas High Draft Company Limited, Salford, Manchester, England. Roller stand for spinning and preparing machines. 2,446,021, July 27.

Obergfell, Amanda, executrix: *See*—
Henrikson, Oscar W., and Obergfell.

Oblad, Alex G., and E. R. Boedeker, Dallas, Tex., assignors, by mesne assignments, to Socony-Vacuum Oil Company, Incorporated, New York, N. Y. Preparation of catalysts. 2,446,100, July 27.

Olin Industries, Inc., assignee: *See*—
Berwick, John D.
Mitchell, Edmund G., and Timberman.
Wilson, Golder P., McNair, and Waters.

Olson, Arthur A., Youngstown, Ohio. Combined building structure and heating system. 2,445,920, July 27.

Ostolaza, Frank, Florissant, and G. E. Holmes, assignors to Mexican American Hat Company, St. Louis, Mo. Head band connector. 2,445,921, July 27.

Ostolaza, Frank, Florissant, and G. E. Holmes, assignors to Mexican American Hat Company, St. Louis, Mo. Adjustable hat band. 2,445,922, July 27.

Outboard, Marine & Manufacturing Company, assignee: *See*—
Hook, Melvin S.

Owen, Robert P., assignor to Allen B. Du Mont Laboratories, Inc., Passaic, N. J. Cathode-ray power indicator. 2,445,964, July 27.

Owens-Corning Fiberglas Corporation, assignee: *See*—
White, Erven, Steinman, and Bielefeld.

Pachl, Stephen J., New Haven, Conn. Wire drawing block. 2,446,058, July 27.

Packwood, Hexa H., Baton Rouge, La. Power lawn mower with air filtering screen. 2,445,965, July 27.

Palm, George H., assignor to Stewart-Warner Corporation, Chicago, Ill. Control valve and vibrating flow indicator. 2,445,887, July 27.

Panzer, William C., Chicago, Ill. Ash receptacle closure with tilting means. 2,445,861, July 27.

Parsons, John B., Toledo, Ohio. Switch structure. 2,446,141, July 27.

Partiot, Maurice, Noroton, Conn., assignor to The Nitralloy Corporation. Electric resistance welding a laminated sheet metal structure. 2,445,801, July 27.

Paxman, Edward P., Colchester, England. Fuel injection device for internal-combustion engines. 2,445,923, July 27.

Peabody Engineering Corporation, assignee: *See*—
Peterson, Eric G., and Graham.
Vroom, Robert C., and Dunn.

Peachey, Leroy S., Kenosha, and R. P. Knull, Lake Geneva, Wis. Adjustable ring holder for spinning machines. 2,445,966, July 27.

Peacock, Arnold L.: *See*—
Lowry, Erwin F., Peacock, and Leyshon.

Peaker, Charles R., Union City, Conn., assignor to United States Rubber Company, New York, N. Y. Creaming of synthetic rubber latices. 2,446,101, July 27.

Peck, Robert L., Plainfield, assignor to Merck & Co., Inc., Rahway, N. J. Complex salts of streptomycin and preparing same. 2,446,102, July 27.

Peterson, Arthur L., Long Beach, Calif. Double-ended multiple jaw pliers. 2,446,022, July 27.

Peterson, Eric G., New York, and D. P. Graham, Westbury, assignors to Peabody Engineering Corporation, New York, N. Y. Gas heater. 2,446,059, July 27.

Petrolite Corporation, Ltd., assignee: *See*—
Blair, Charles M., Jr.
De Groote, Melvin, and Keiser.

Pettyjohn, Theodore, Crosby, and R. T. Stickel, Deerwood, Minn. Linoleum dispenser. 2,446,103, July 27.

Phair, Robert S.: *See*—
Callender, Edwin M., and Phair.

Philco Corporation, assignee: *See*—
Bradley, William E.

Phillips Petroleum Company, assignee: *See*—
De Boisblanc, Deslonde R., and Barton.
Frey, Frederick E., McKinney, and Wood.

Pigott, Reginald J. S., and F. E. Fleischer, assignors to Gulf Research & Development Company, Pittsburgh, Pa. Rotary gear pump. 2,445,967, July 27.

Pittsburgh Plate Glass Company, assignee: *See*—
Strain, Franklin.

Plunkett, Brian, and G. Fama, Cumberland, Md., assignors to Celanese Corporation of America. Web letoff mechanism. 2,446,104, July 27.

Pohl, Elsa, New York, N. Y. Adjustable baggage appliance for rolling movements. 2,446,023, July 27.

Polle, Henry D., assignor to The Murray Corporation of America, Detroit, Mich. Transmission. 2,445,968, July 27.

Polk, Louis F., assignor to The Sheffield Corporation, Dayton, Ohio. Crush-type grinding wheel truing device. 2,446,105, July 27.

Porter, Richard W., Schenectady, N. Y., and A. G. Linowiecki, Minneapolis, Minn., assignors to General Electric Company. Directive radio system. 2,446,024, July 27.

Powell, James T., Atoka, Tenn. Ratchet wrench with segmented socket and separable socket-receiving jaws. 2,445,969, July 27.

Pray, Henry A. H., and I. Igelsrud, Columbus, Ohio, and G. L. Simard, Stamford, Conn., assignors, by mesne assignments, to The Battelle Development Corporation, Columbus, Ohio. Chemical polishing of metal surfaces. 2,446,060, July 27.

Press Wireless, Inc., assignee: *See*—
Crosby, Murray G.

Price, Charles S., Hollis, N. Y. Bottle carrier. 2,446,161, July 27.

Price, Earl R., assignor to Bendix Aviation Corporation, South Bend, Ind. Power control unit for brakes 2,445,862, July 27.

Pye Limited, assignee: *See*—
Weighton, Donald.

Radio Corporation of America, assignee: *See*—
Badmaieff, Alexis.
Bloomberg, Daniel J., and Watson.
Hanson, George E. H.
Kellogg, Edward W.
Mell, Clifford W.
Turner, Willard H.

Rado, John A., Little Neck, N. Y., assignor, by mesne assignments, to Hazeltine Research, Inc., Chicago, Ill. Pulse generator. 2,445,888, July 27.

Ratliff, Rudolph E., Los Angeles, Calif. Hair curler. 2,445,924, July 27.

Rauch, Lawrence L., Princeton, N. J., assignor to Research Corporation, New York, N. Y. Multisignal transmission. 2,445,840, July 27.

Raytheon Manufacturing Company, assignee: *See*—
Derby, Palmer P., and Robertson.
Gora, Elmer J.

Reed, Robert S., Three Rivers, Mich. Concrete block molding machine. 2,446,061, July 27.

Rehberg, Chessie E., Glenside, and C. H. Fisher, Abington, Pa., assignors to the United States of America as represented by the Secretary of Agriculture. Acrylic esters of secondary alcohols. 2,445,925, July 27.

Reinhardt, Robert C., assignor to The Dow Chemical Company, Midland, Mich. Polymerizing. 2,445,970, July 27.

Reliable Spring & Wire Forms Company, The, assignee: *See*—
Kubin, Andrew and C., and Brendos.

Rentschler, Harvey C., East Orange, W. C. Lilliendahl, Mountain Lakes, and J. E. Gray, Newark, N. J., assignors to Westinghouse Electric Corporation, East Pittsburgh, Pa. Manufacture of thorium. 2,446,062, July 27.

Research Corporation, assignee: *See*—
Rauch, Lawrence L.

Rison, John J.: *See*—
Loessel, Edward H., and Risdon.

Ritter Company, Inc., assignee: *See*—
Beyer, Henry J.
Maxson, Clarence G.

Roberts and Schaefer Company, assignee: *See*—
McGee, Jesse M.

Robertshaw-Fulton Controls Company, assignee: *See*—
Strobel, Charles K.

Robertson, David S., assignor to Amalgamated Wireless (Australasia) Limited, Sydney, Australia. Phase shift oscillator. 2,446,106, July 27.

Robertson, Warren M.: *See*—
Derby, Palmer P., and Robertson.

Robinson, Joseph, New York, N. Y. Container closure. 2,445,802, July 27.

Robinson, Melvin A., Washington, D. C. Detachable shoe cleat. 2,445,926, July 27.

Rockwell, Ronald J., Cincinnati, Ohio, assignor, by mesne assignments, to Avco Manufacturing Corporation. Modulation system. 2,446,025, July 27.

Rogers, George D., Buffalo, Mo. Expanding hydraulic rivets by increments of internal pressure. 2,445,803, July 27.

Root, Carl H., Detroit, Mich. Hanger bracket for faucets. 2,446,142, July 27.

Rosen, Oscar E., Detroit, Mich., assignor to The Lodge and Shipley Company, Cincinnati, Ohio. Tracer control cutter or grinder. 2,445,971, July 27.

Rossi, Irving, West Orange, N. J., and William Dubilier, New Rochelle, N. Y. Thermoplastic belt. 2,445,889, July 27.

Rotary Machine Company, Inc., assignee: *See*—
Christiansen, Christian.

Rowland, Walter: *See*—
Jennings, William S., and Rowland.

Royster, George W., Portsmouth, Va. Measuring device for towing winches. 2,445,972, July 27.

Ruby, William, Fresno, Calif. Journal dresser. 2,446,026, July 27.

Rumbold, John S., Woodbridge, Conn., assignor to United States Rubber Company, New York, N. Y. Creaming of synthetic rubber latices. 2,446,107, July 27.

Salo, Paul W., Minneapolis, Minn., assignor to General Mills, Inc. Dehydration of corn. 2,446,162, July 27.

Salzmann, Fritz, assignor to Aktiengesellschaft Fuer Technische Studien, Zurich, Switzerland. Power plant working with a hot gaseous medium. 2,446,108, July 27.

Sarazin, Robert, Neuilly sur Seine, France. Machine for arc welding with continuous electrodes. 2,445,863, July 27.

Sävö, Göte E.: *See*—
Melander, Karl H. A., Sävö, and Johansen.

Sawyer, Robert T., Ho-Ho-Kus, N. J., assignor to American Locomotive Company, New York, N. Y. Rotary engine power plant. 2,445,973, July 27.

Scarry, Earl J., Denver, Colo. Surgeon's soap dispenser. 2,446,109, July 27.

Schermuly, Alfred J.: *See*—
Schermuly, Conrad D., A. J., and C.

Schermuly, Charles: *See*—
Schermuly, Conrad D., A. J., and C.

Schermuly, Conrad D., A. J., and C., Parkgate, Newdigate, assignors to The Schermuly Pistol Rocket Apparatus Limited, Parkgate, Newdigate, Surrey, England. Rocket. 2,446,110, July 27.

Schermuly Pistol Rocket Apparatus Limited, assignee: *See*—
Schermuly, Conrad D., A. J., and C.

Schmitt, George P., assignor to Cardinal Products Inc., New York, N. Y. Lighter. 2,445,890, July 27.

Schneider, Nathan H.: *See*—
Nicholson, Ragnar C., and Schneider.

Schuh, Charles N., Jr.: *See*—
Dawson, Edward, Watkins, and Schuh.

Schwartz, Alfred J. C., Evanston, Ill. Prostate massager. 2,445,974, July 27.

Scott, William M., Jr., Bryn Mawr, assignor to I. T. E. Circuit Breaker Company, Philadelphia, Pa. Arc chute. 2,446,027, July 27.

Seeger Refrigerator Company, assignee: *See*—
Ayres, Russell W.

Seeley, Harold T., Lansdowne, Pa., assigner to General Electric Company. Connecting system for alternating current circuits. 2,445,804, July 27.

Seidel, Frank, Detroit, Mich. Bookholder. 2,445,864, July 27.

Seiden, Hyman: *See*—
Wolfson, David, and Seiden.

Servis Equipment Company, assignee: *See*—
Jarmin, James B.

Shaw, Frederick T., assignor to Joseph Lucas Limited, Birmingham, England. Electrical plug and socket connections. 2,445,927, July 27.

Sheffield Corporation, The, assignee: *See*—
Aller, Willis F.
Polk, Louis F.

Shell Development Company, assignee: *See*—
Adelson, David E., and Dannenberg.
Bondi, Arnold A.
Butcosk, Richard A.
Crake, Wilfred S.
Evans, Theodore W.
Morris, Rupert C., and Shokal.

Shepard, Norman A., Stamford, Conn., assignor to American Cyanamid Company, New York, N. Y. Solubilized alkaryl sulfonate composition. 2,445,975, July 27.

Shokal, Edward C.: *See*—
Morris, Rupert C., and Shokal.

Simard, Gerald L.: *See*—
Pray, Henry A. H., Ingelsrud and Simard.

Simmon, Alfred, Jackson Heights, and L. L. Weisglass, New York, assignors to Simon Brothers, Inc., Long Island City, N. Y. Device for making test prints on color print material. 2,446,111, July 27.

Simmon, Alfred, Jackson Heights, and L. L. Weisglass, New York, assignors to Simon Brothers, Inc., Long Island City, N. Y. Making test prints on color print material. 2,446,112, July 27.

Simmon Brothers, Inc., assignee: *See*—
Simmon, Alfred, and Weisglass.

Singer Manufacturing Company, The, assignee: *See*—
Karle, John D.
Wood, Alfred R.

Sizer, Elmer M. A.: *See*—
Grosjean, Harry W., and Sizer, and Zinda.

Skinker, Murray F., Montclair, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y. Enclosed rectifier. 2,445,805, July 27.

Sleeper, Paul H., Albion, Mich., assignor to Domestic Credit Corporation, Chicago, Ill. Caster wheel rock. 2,445,865, July 27.

Smith, Allan K.: *See*—
Beckely, Arthur C., Belter, and Smith.

Smith, F. A., Manufacturing Company, assignee: *See*—
Bean, Frank R.

Smith, Graydon G., Lebanon, Pa. Tool. 2,446,143, July 27.

Smith, Thomas R., assignor to The Maytag Company, Newton, Iowa. Spring clutch drive. 2,446,064, July 27.

Snyder, Frederick D., Milton, Mass., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa. Induction motor braking system. 2,445,806, July 27.

Societe d'Applications Mecaniques Pour L'Automobile, assignee: *See*—
Bourret, René and Bardou.

Socony-Vacuum Oil Company, Incorporated, assignee: *See*—
Oblad, Alex G., and Boedeker.

Sola Electric Company, assignee: *See*—
Sola, Joseph G.

Sola, Joseph G., River Forest, assignor to Sola Electric Company, Chicago, Ill. Motor control system. 2,445,976, July 27.

Sommer, Albert, New York, N. Y. Method and apparatus for preparing in a gaseous medium pulverulent noncoalescent dispersions. 2,445,928, July 27.

Sperry Corporation, The, assignee: *See*—
Dawson, Edward, Watkins, and Schuh.
Frost, William F.
Varian, Russell H.

Sperry, Leonard, by change of name: *See*—
Harvill, Tom R., and Wroblewski.

Sperti Faraday Inc., assignee: *See*—
Von Voigtlander, Frederick.

Spiller, Herbert O., Wootton, Isle of Wight, assignor to J. Samuel White & Company Limited, Isle of Wight, Hampshire, England. Fastening device for detachably connecting together two relatively movable parts. 2,446,113, July 27.

Sponseller, William J., Salem, Ohio. Concrete finishing device. 2,446,028, June 27.

Standard Gage Company, Inc., assignee: *See*—
Emery, Alfred H.

Standard Oil Company, assignee: *See*—
Watson, Roger W.

Standard Oil Development Company, assignee: *See*—
Campbell, Donald L., Martin, Murphree, and Tyson.
Mottern, Henry O., and Archibald.

Standard Telephones and Cables Limited, assignee: *See*—
Bowsher, Edward A. H., D'Assis-Fonseca, and Ward.
Driver, Douglas L. A.
Fremlin, J. Heaver, and Strachey.
Levy, Maurice M.
Mortlock, Alfred.
Tomlin, Stanley G.

Stark, John L., Chicago, Ill. Tap wrench. 2,445,977, July 27.

Starke, Otto A., Ludington, Mich. Wrist watch strap bar. 2,446,065, July 27.

Staunt, Martin, Chicago, Ill. Dental hand piece. 2,445,891, July 27.

Steinman, Robert: *See*—
White, Erven, Steinman and Biefeld.

Stellin, Domnic V., Detroit, Mich. Socket head screw. 2,445,978, July 27.

Stenstrom, Alfred T., New York, N. Y. Electrode. 2,445,808, July 27.

Stewart-Warner Corporation, assignee: *See*—
Leslie, John H., II.
Palm, George H.
Tramontini, Vernon N.

Stickel, Ralph T.: *See*—
Pettyjohn, Theodore and Stickel.

Story, Fred D., Arkadelphia, Ark. Ratchet ventilator and automatic sash lock. 2,446,144, July 27.

Strachey, Christopher: *See*—
Fremlin, John H., and Strachey.

Strain, Franklin, Norton Center, Ohio, assigner to Pittsburgh Plate Glass Company, Allegheny County, Pa. Carbonate-haloformate of glycerol and producing same. 2,446,145, July 27.

Strassburg, Roger W., Minneapolis, Minn., assignor to United States Rubber Company, New York, N. Y. Preparation of esters. 2,446,114, July 27.

Strobel, Charles K., Pittsburgh, Pa., assignor to Robertshaw-Fulton Controls Company. Safety control for fuel burners. 2,445,841, July 27.

Sturgess, Wayne, Salem, Oreg. Projector slide viewer. 2,445,929, July 27.

Sulfit Aktiebolaget Göta, assignee: *See*—
Melander, Karl H. A., Skvö, and Johanson.

Summers, William B., Buffalo, and W. A. Corse, Snyder, assignors to The Carborundum Company, Niagara Falls, N. Y. Joint for abrasive belts or bands. 2,445,807, July 27.

Superba Manufacturing Co., Inc., assignee: *See*—
Katz, Julius, and Majoros.

Svendsen, Edward C., Mishawaka, Ind., assignor to United States Rubber Company, New York, N. Y. Creaming of synthetic rubber latices. 2,446,115, July 27.

Swain, Robert R.: *See*—
Waller, Fred, Dresser, and Swain.

Swern, Daniel, and T. W. Findley, Philadelphia, Pa., assignors to the United States of America, as represented by the Secretary of Agriculture. Amino fatty derivatives. 2,445,892, July 27.

Swezey, Burdette S., Floral Park, assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Timing device for telegraph circuit. 2,445,800, July 27.

Sylvania Electric Products Inc., assignee: *See*—
Alford, Harold W.
Hven, Roger W.
Lowry, Erwin F., Peacock, and Leyshon.

Talbert, Obrams, assignee: *See*—
Moore, Milford B.

Tate, Merse, Detroit, Mich. Mixing unit for refrigerators. 2,446,066, July 27.

Teleflex Limited, assignee: *See*—
Brouse, William H. D.

Texas Company, The, assignee: *See*—
Millendorf, Alfred J.

Thomas, M. & W., Co., assignee: *See*—
Thomas, William R., 3rd.

Thomas, William, San Francisco, Calif. Combination bevel. 2,446,067, July 27.

Thomas, William D., Jr.: *See*—
Cook, Elmer W., and Thomas.

Thomas, William R., 3rd, Bethlehem, Pa., assignor to M. & W. Thomas Co., New York, N. Y. Textile fabric. 2,445,751, July 27.

Thompson, Robert T., Oak Park, Ill., assignor to Zenith Radio Corporation. Coil mounting. 2,445,979, July 27.

Thompson, William H.: *See*—
Davis, Howard C., and Thompson.

Thunder, Harold G.: *See*—
Lane, Guy M., and Thunder.

Timberman, De Wilton B.: *See*—
Mitchell, Edmund G., and Timberman.

Timken-Detroit Axle Company, The, assignee: *See*—
Buckendale, Lawrence E.

Tjosat, Gerald B., Mount Lebanon, assignor to Hall Laboratories, Inc., Pittsburgh, Pa. Well drilling mud and process. 2,445,893, July 27.

Toledy Company, Gertrude A. Muller, Inc., The, assignee: *See*—
Muller, Gertrude A.

Tomlin, Stanley G., assignor to Standard Telephones and Cables Limited, London, England. Ultra high frequency electric oscillator. 2,445,810, July 27.

Towner, George F.: *See*—
Huey, Homer D., and Towner.

Tramontini, Vernon N., Indianapolis, Ind., assignor to Stewart-Warner Corporation, Chicago, Ill. Thermal time-delay switch. 2,446,029, July 27.

Trevino, Fidel, Los Angeles, Calif. Lawn edge trimmer. 2,445,842, July 27.

Troiel, Arthur E., assignor to Troiel Companies, Inc., Berkeley, Calif. Form for molding concrete piles. 2,445,894, July 27.

Troiel Companies, Inc., assignee: *See*—
Troiel, Arthur E.

Tsai, Herbert, and N. Chuy, assignors to Herbuick Manufacturing and Engineering Company, Incorporated, Detroit, Mich. Trap device for rodents. 2,445,980, July 27.

Tucker, William C., Kenmore, assignor to Buffalo Forge Company, Buffalo, N. Y. Work gauge support for shears. 2,446,146, July 27.

Tung-Sol Lamp Works, Inc., assignee: *See*—
Bannon, Joseph J., Jr.

Tunnard-Moore, Thomas C. P., Hendon Way, London, England. Plate clamp. 2,446,030, July 27.

Turner, Willard H., Los Angeles, Calif., assignor to Radio Corporation of America. Film marker. 2,445,843, July 27.

Tye, George D., New York, N. Y. Cuff holder. 2,446,117, July 27.

Tyrrell, Warren A., Fairhaven, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Coupling arrangement for use in wave transmission systems. 2,445,895, July 27.

Tyrrell, Warren A., Fairhaven, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Dielectric wave guide coupling arrangement for use in two-way signaling systems. 2,445,896, July 27.

Tyson, Charles W.: *See*—
Campbell, Donald L., Martin, Murphree, and Tyson.

Unique Balance Co., Inc., assignee: *See*—
Larson, Algot.

United Shoe Machinery Corporation, assignee: *See*—
Baker, Corwin W.
Curtis, Fount E.
Finn, Sidney J.

United States Rubber Company, assignee: *See*—
Armstrong, Robert T.
Blair, George W.
Peaker, Charles R.
Rumbold, John S.
Strassburg, Roger W.
Svendsen, Edward C.

Vahle, Julius, Jr.: *See*—
Watts, Donald E., and Vahle.

Valcourt, Louis E., East Providence, assignor to Kestenman Bros. Mfg. Co., Providence, R. I. Clasp for wristwatch bracelets and other linkages. 2,446,068, July 27.

Valenti, Mario C., Barcelona, Spain. Prosthetic foot for injured or short legs. 2,446,042, July 27.

Van Zelm, Willem D.: *See*—
Kraemer, Robert W., Hill, and van Zelm.

Varian, Russell H., Bellmore, N. Y., assignor to The Sperry Corporation. High-frequency tube structure. 2,445,811, July 27.

Ventnor Boat Works, Inc., assignee: *See*—
Heinsohn, Henry C., Jr.

Vitarama Corporation, The, assignee: *See*—
Waller, Fred, Dresser, and Swain.

Von Voigtlander, Frederick, Grass Lake Township, Jackson County, Mich., assignor, by mesne assignments, to Sperti Faraday Inc. Self-adapting connector. 2,445,981, July 27.

Vroom, Robert C., Montclair, and J. Dunn, Tenafly, N. J., assignors to Peabody Engineering Corporation, New York, N. Y. Fuel burner. 2,446,069, July 27.

Wall, Monroe E., Oreland, and E. G. Kelley, Whitemarsh, Pa., assignors to United States of America as represented by the Secretary of Agriculture. Purifying carotene contaminated with chlorophyll and xanthophyll. 2,446,116, July 27.

Wallace, Fred C.: *See*—
Libby, Lester L., and Wallace.

Wallach, Irving D., Port Washington, assignor to Associated Development and Research Corporation, New York, N. Y. Toy gun assembly. 2,445,812, July 27.

Wallach, Irving D., Port Washington, assignor to Associated Development and Research Corporation, New York, N. Y. Animated target. 2,445,844, July 27.

Waller, Fred, Huntington, N. Y., W. R. Dresser, Long Hill, Conn., and R. R. Swain, Huntington, assignors to The Vitarama Corporation, Long Island City, N. Y. Gunnery training apparatus. 2,445,982, July 27.

Walsh, Phillip J., San Francisco, Calif. Alternating current system. 2,445,897, July 27.

Walund, Ernest R. and M. E., Eureka, Calif. Wooden lath processing apparatus. 2,446,147, July 27.

Walund, Melvin E.: *See*—
Walund, Ernest R. and M. E.

Walworth, Clarence B., Jr., West Rocky Hill, Conn. Shaded pole motor. 2,445,813, July 27.

Wanamaker, William H., Jr., Flourtown, assignor to The Brown Instrument Company, Philadelphia, Pa. Electric proportioning control apparatus with reset. 2,446,163, July 27.

Ward, Hugh J.: *See*—
Bowsher, Edward A. H., D'Assis-Fonseca, and Ward.

Warner Aircraft Corporation, The, assignee: *See*—
Majneri, Ludwig A.

Waterman, Russell R., Lodi, Calif. Semicompound multiple expansion steam engine. 2,446,031, July 27.

Waters, Wade D.: *See*—
Wilson, Golder P., McNair, and Waters.

Watkins, Frederic M.: *See*—
Dawson, Edward, Watkins, and Schuh.

Watson, Roger W., assignor to Standard Oil Company, Chicago, Ill. Sulfurizing terpenes. 2,445,983, July 27.

Watson, Waldon O.: *See*—
Bloomberg, Daniel J., and Watson.

Watts, Donald E., and J. Vahle, Jr., Schenectady, N. Y., assignors to General Electric Company. High-frequency generating apparatus. 2,446,032, July 27.

Weber, Theodore R., Latrobe, Pa., assignor to American Locomotive Company, New York, N. Y. Journal box structure. 2,445,984, July 27.

Weightman, William A., Philadelphia, Pa., assignor to The Budd Company. Sheet metal working apparatus, especially for welding machines. 2,446,148, July 27.

Weighton, Donald, assignor to Pye Limited, Cambridge, England. Detector or frequency changer for radio frequency oscillations. 2,446,118, July 27.

Weisglass, Louis L.: *See*—
Simmon, Alfred, and Weisglass.

Weltings, John G., Rugby, England, assignor to General Electric Company. High reactance transformer. 2,446,033, July 27.

Wells, Harold E., Kenmore, assignor to Bell Aircraft Corporation, Wheatfield, N. Y. Aircraft control system. 2,446,149, July 27.

Wenner, Wilhelm, Upper Montclair, assignor to Hoffmann-La Roche, Inc., Roche Park, Nutley, N. J. Oxidation of barbituric acid to alloxan. 2,445,898, July 27.

Werner, Frank P., assignee: *See*—
Werner, Herbert J.

Werner, Herbert J., assignor of one-half to F. P. Werner, Chicago, Ill. Combined fluid-operated motor and pump. 2,445,985, July 27.

Westinghouse Electric Corporation, assignee: *See*—
Carpenter, David E.
Litman, Bernard.
Rentschler, Harvey C., Lilliendahl, and Gray.
Snyder, Frederick D.

White, Erven, R. Steinman, and L. P. Biefeld, Newark, assignors to Owens-Corning Fiberglas Corporation, Toledo, Ohio. Glass fiber reinforced plastics. 2,446,119, July 27.

White, J. Samuel, & Company Limited, assignee: *See*—
Spiller, Herbert O.

Williams, Max R., Baltimore, Md. Auxiliary independent carburetor. 2,446,034, July 27.

Williams, Otis C., Atlanta, Ga. Loom shuttle. 2,445,899, July 27.

Willoughby, Victor, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y. Spring unit. 2,446,164, July 27.

Willson Products, Inc., assignee: *See*—
Wiswesser, William J.

Wilson & Company, Inc., assignee: *See*—
Adams, Nicholas M.

Wilson, Golder P., Alton, Ill., L. W. McNair, Overland, Mo., and W. D. Waters, Alton, Ill., assignors to Olin Industries, Inc. Apparatus for electric resistance heating of moving metallic strips. 2,445,866, July 27.

Wing, Arthur K., Jr., Nutley, and L. A. Backer, Denville, N. J., assignors to Federal Telephone and Radio Corporation, New York, N. Y. Adjustable electrode support for electron discharge tubes. 2,445,814, July 27.

Winkeler, Lawrence J., assignor to The Emerson Electric Manufacturing Company, St. Louis, Mo. Inserting machine. 2,446,035, July 27.

Winthrop-Stearns Inc., assignee: *See*—
Archer, Sydney, and Albertson.

Wirth, Emil O.: *See*—
Barfod, Frederik, and Wirth.

Wisman, Franklin O., assignor to Bendix Aviation Corporation, South Bend, Ind. Power booster for aircraft control surfaces. 2,445,900, July 27.

Wiswesser, William J., near Stony Creek Mills, assignor to Wilson Products, Inc., Reading, Pa. Overlapping linkage engagement for model-forming shaped sheet pieces. 2,446,120, July 27.
Wittcoff, Harold, Minneapolis, Minn., assignor to General Mills, Inc. Hydroxyphosphatides. 2,445,948, July 27.
Wolfson, David, and H. Selden, Far Rockaway, Long Island, N. Y. Flexible antipicking blinders for poultry. 2,445,867, July 27.
Wood, Alfred R., Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J. Loop-taker mechanism for sewing machines. 2,446,150, July 27.
Wood, William H.: *See*—
Frey, Frederick E., McKinney, and Wood.
Wormeck, Herbert A., and F. P. Hess, assignors to The Enterprise Manufacturing Company of Pennsylvania, Philadelphia, Pa. Juicer. 2,446,151, July 27.
Wroblewski, Leonard: *See*—
Harvill, Tom R., and Wroblewski.
Youmans, Donna I., Los Angeles, Calif. Steel shapes for use in the construction of buildings. 2,445,815, July 27.
Zdanaitis, Violet: *See*—
Zdanaitis, Vit and V.
Zdanaitis, Vit and V., Fort Wayne, Ind. Bracket supported suspended chair. 2,446,036, July 27.
Zenith Radio Corporation, assignee: *See*—
Thompson, Robert T.
Zinda, Andrew: *See*—
Grosjean, Harry W., Sizer, and Zinda.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 27TH DAY OF JULY, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Airplane control system. J. D. McKellar. Re. 23,020, July 27.
Alkali metal salts, Treatment of. J. R. Bates. Re. 23,017, July 27.
Electric motor. J. W. Suydam. Re. 23,021, July 27.
High efficiency resonant circuit. W. W. Hansen. Re. 23,019, July 27.
Power transmitting mechanism. N. R. Brownyer. Re. 23,018, July 27.

LIST OF PLANT INVENTIONS

Peach tree. H. F. Smith. 803, July 27.
Peony variety. L. S. Hopkins. 804, July 27.

LIST OF DESIGN INVENTIONS

Air circulator and diffuser, Combined. G. B. Herbster. 150,337, July 27.
Ash tray. G. M. Jackson. 150,361–4, July 27.
Ash tray. P. Narey. 150,369, July 27.
Basket, Magazine. E. J. Spence. 150,379, July 27.
Battery vent plug and hydrometer, Combined. G. C. Appel. 150,328, July 27.
Brassière. K. Van Leuven, Jr. 150,383, July 27.
Bridge for eyeglasses. J. A. Lauber. 150,367, July 27.
Brooch pin or similar article. S. Hobe. 150,359, July 27.
Burner knob for gas stoves. R. I. Felver. 150,346, July 27.
Cabinet, Refrigerator. C. W. Sundberg and M. Ferar. 150,382, July 27.
Cabinet, Wall. E. J. Spence. 150,377, July 27.
Candle. P. A. Williams. 150,388, July 27.
Candle. P. A. Williams. 150,389–90, July 27.
Casing for heater fan unit. R. R. Hutcheson. 150,360, July 27.
Chain for a bracelet or similar article, Link. P. Bardach. 150,332–6, July 27.
Chain for a bracelet or similar article, Link. M. Chernow. 150,337–8, July 27.
Chair. J. B. Cunningham. 150,339, July 27.
Cigarette and cigar case. S. J. Glowiak. 150,354, July 27.
Coffee table or similar article. D. R. Johnson. 150,365, July 27.
Comb. J. Simon and P. Klein. 150,375, July 7.
Condiment and clock unit for cooking stoves. R. I. Felver. 150,344, July 27.
Curio shelf. E. J. Spence. 150,376, July 27.
Curtain ring, Shower. C. E. Stephenson and H. D. Schmidt. 150,380, July 27.
Dispenser or the like, Powdered soap. B. B. Gilmore. 150,353, July 27.
Electric stove, Portable. M. J. Auer and T. E. Grade. 150,331, July 27.
Gas cookstove. M. Ferar. 150,348–9, July 27.
Handle for oven doors and the like. R. I. Felver. 150,342–3, July 27.
Hanger, Film developing. A. H. Atkinson. 150,330, July 27.
Lamp. D. M. Golden. 150,355, July 27.
Lamp bracket and timer for cookstoves, Combined. M. Ferar. 150,350, July 27.
Merry-go-round. R. Stone. 150,381, July 27.
Necklace or similar article. C. Arpels. 150,329, July 27.
Oven control knob for gas stoves. R. I. Felver. 150,345, July 27.
Pendant or similar article. P. Fiato. 150,352, July 27.
Perfume dispenser. J. L. Priess. 150,371, July 27.
Pick up arm for electrical phonographs. M. Ferar. 150,347, July 27.
Pin. G. L. Harwell. 150,356, July 27.
Pin or similar article. P. Fiato. 150,351, July 27.
Pipe smoker's stand. W. C. Zelle. 150,391, July 27.
Pressure regulator for butane gas systems. O. Z. Mathews. 150,368, July 27.
Ring shank. H. Peterson. 150,370, July 27.
Shelf, Book. E. J. Spence. 150,378, July 27.
Shower curtain ring. H. D. Schmidt. 150,373–4, July 27.
Signal device. P. von Frantzius. 150,384, July 27.
Spectacle frame or the like. R. L. Wells. 150,385, July 27.
Spectacle frame or the like. R. L. Wells. 150,386–7, July 27.
Stove. E. Eason. 150,341, July 27.
Table. J. B. Cunningham. 150,340, July 27.
Toilet paper holder and tray, Combined. R. S. Sanders. 150,372, July 27.
Ventilating unit. J. B. Koch. 150,366, July 27.
Welder, Electric. E. A. Hobart and R. T. Flora. 150,358, July 27.

LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 27TH DAY OF JULY, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Acetylating tri-ethyl citrate. C. H. Fisher and M. L. Fein. 2,445,911, July 27.
Acrylic esters of secondary alcohols. C. E. Rehberg and C. H. Fisher. 2,445,925, July 27.
Adjustable cap. S. Matarasso. 2,446,053, July 27.
Aileron-rudder tab linkage. R. L. Copeland. 2,445,940, July 27.
Aircraft control system. H. E. Wells. 2,446,149, July 27.
Airplane wing flap and dive brake assembly. R. W. Kraemer, T. C. Hill, and W. D. van Zelm. 2,445,833, July 27.
Alloys, Copper base. J. D. Berwick. 2,445,868, July 27.
All-steel high-pressure valve. D. R. McMullen. 2,445,885, July 27.
Amino fatty derivatives. D. Swern and T. W. Findley. 2,445,802, July 27.
Amplifier, Direct-current. R. T. Cavanagh. 2,445,938, July 27.
Amplifier, Rotary. B. Litman. 2,445,788, July 27.
Anode structure for an electron discharge device for ultra high frequencies. P. G. Cherigny. 2,445,763, July 27.
Apparatus for assembling parts of electron discharge devices. P. P. Derby and W. M. Robertson. 2,445,766, July 27.
Apparatus for cooking resins. W. A. Mitchell. 2,445,919, July 27.
Apparatus for electric resistance heating of moving metallic strips. G. P. Wilson, L. W. McNair, and W. D. Waters. 2,445,866, July 27.
Apparatus for forming groups of die castings. L. H. Morin. 2,446,056, July 27.
Apparatus for handling bread. J. Mac Manus. 2,445,884, July 27.
Apparatus for peeling onions including a conical jet of gas. G. T. Hemmeter. 2,445,881, July 27.
Apparatus for pneumatically separating relatively moist comminuted material. J. M. McGee. 2,446,140, July 27.
Apparatus for stretch forming elongated articles. E. Hochreiter. 2,445,089, July 27.
Apparatus for testing tubes by fluid pressure. H. S. Fullerton. 2,445,876, July 27.
Arc chute. W. M. Scott, Jr. 2,446,027, July 27.
Armrest, Sanitary chair. C. G. Maxson. 2,445,870, July 27.
Ash receptacle closure with tilting means. W. C. Panzer. 2,445,861, July 27.
Bag. R. D. Elwell. 2,4456,001, July 27.
Bag tube ends, Closing. D. Belcher. 2,445,757, July 27.
Baggage appliance for rolling movements, Adjustable. E. Pohl. 2,446,023, July 27.
Bar: *See*—
  Wrist watch strap bar.
Belt, Thermoplastic. I. Rossi and W. Dubilier. 2,445,889, July 27.
Bevel, Combination. W. Thomas. 2,446,067, July 27.
Bib, Infant's feeding. E. W. Gibson. 2,445,850, July 27.
Blinders for poultry, Flexible antipicking. D. Wolfson and H. Seiden. 2,445,867, July 27.
Block: *See*—
  Wire drawing block.
Boat rack means on automobiles. M. Lait. 2,446,092, July 27.
Bobbin handling mechanism. R. P. Drake. 2,445,998, July 27.
Bobbin holder. J. P. Garey. 2,445,849, July 27.
Bookholder. F. Seidel. 2,445,864, July 27.
Boot upper, Cowboy. J. Z. Miller and L. M. Easterling. 2,446,158, July 27.
Bottle carrier. C. S. Price. 2,446,161, July 27.
Bottle holder and heater, Combined. V. A. Arens. 2,445,930, July 27.
Boxes from laminations of felted fibrous material impregnated with synthetic resin, Molding of. A. Amigo. 2,446,038, July 27.
Bracket supported suspended chair. V. and V. Zdanaitis. 2,446,036, July 27.
Braking system, Induction motor. F. D. Snyder. 2,445,806, July 27.
Brassière. W. S. Dickerson. 2,445,767, July 27.
Bridge, Sizing. S. C. Hurley, Jr. 2,446,046, July 27.
Building constructions. T. J. Foster. 2,445,823, July 27.
Building structure and heating system, Combined. A. A. Olson. 2,445,920, July 27.
Burner: *See*—
  Fuel burner.
Cam-acting garment hanger. A. W. Guthrie. 2,445,851, July 27.
Cam actuated clutch. H. T. Lambert. 2,446,138, July 27.
Cane. G. B. Dusinberre. 2,445,942, July 27.
Cap: *See*—
  Adjustable cap.
Carbonate-haloformate of glycerol and producing same. F. Strain. 2,446,145, July 27.
Carburetor, Auxiliary independent. M. R. Williams. 2,446,034, July 27.
Carrier: *See*—
  Bottle carrier.
Carton, Knockdown carrier. J. O. Grady. 2,446,084, July 27.
Caster wheel lock. P. H. Sleeper. 2,445,865, July 27.
Casting machine, Plastic. L. H. Morin. 2,446,057, July 27.
Catalytic hydrogenation of carbon oxides. A. J. Millendorf. 2,445,796, July 27.
Cathode-ray power indicator. R. P. Owen. 2,445,964, July 27.
Cathode structure. J. E. Beggs. 2,445,993, July 27.
Cavity resonator electric wave generator. G. J. Lehmann. 2,445,784, July 27.
Chair: *See*—
  Bracket supported suspended chair.
Check, Storm door. C. E. Gibbs. 2,446,004, July 27.
Chemical polishing of metal surfaces. H. A. H. Pray, I. Igelsrud, and G. L. Simard. 2,446,060, July 27.
Chip truck for sawing and other machines. E. C. Krueger. 2,446,137, July 27.
Choker for trapped animals. M. E. Churchill. 2,446,078, July 27.
Chute for gun turrets, Spent ammunition. H. D. Huey and G. F. Towner. 2,445,853, July 27.
Circuit: *See*—
  Frequency modulation detector circuit.
  Rate taking circuit.
  Rotary high-frequency switching circuit.
  Timing device for telegraph circuit.
  Unloading circuit.
Clamp: *See*—
  Plate clamp.
Clasp, Collar holding. L. M. Kahn. 2,446,012, July 27.
Clasp for wrist-watch bracelets and other linkages. L. E. Valcourt. 2,446,068, July 27.
Cleat, Detachable shoe. M. A. Robinson. 2,445,926, July 27.
Clip: *See*—
  Inductance clip.
Clip and pin chain link for fabric stretching machines, Combined. P. Deck. 2,446,131, July 27.
Closure, Container. J. Robinson. 2,445,802, July 27.
Clutch: *See*—
  Cam actuated clutch.
Coil mounting. R. T. Thompson. 2,445,979, July 27.
Collector unit, Direction finder. L. L. Libby and F. C. Wallace. 2,445,786, July 27.
Comb and brush, Combined. J. Hermans. 2,446,086, July 27.
Combs for comber machines, Manufacturing. J. P. Curry. 2,446,079, July 27.
Combustion chamber drain arrangement. W. W. Kuyper. 2,446,013, July 27.
Comparator and limit gauge, Combined. A. H. Emery. 2,445,875, July 27.
Comparator for color photographs. E. H. Loessel and J. J. Risdon. 2,446,052, July 27.
Complex salts of streptomycin and preparing same. R. L. Peck. 2,446,102, July 27.
Composition of matter and making same. M. De Groote and B. Keiser. 2,446,045, July 27.
Compositions of polymeric plasticizers and organic plastic materials. D. E. Adelson and H. Danuenberg. 2,446,121, July 27.
Concrete finishing device. W. J. Sponseller. 2,446,028, July 27.
Connecting rod for internal-combustion engines. J. H. Holloway. 2,446,090, July 27.
Connecting system for alternating current circuits. H. T. Seeley. 2,445,804, July 27.
Connector: *See*—
  Head band connector.
  Self-adapting connector.
Contact member and electrode for arc furnaces. A. J. and I. F. Fausek. 2,446,002, July 27.
Container: *See*—
  Face powder and puff container.
Container dispenser. A. E. Lindstrom. 2,445,958, July 27.
Control for jet propelled rotors, Automatic. W. Dalton. 2,446,129, July 27.

Control system. E. M. Callender and R. S. Phair. 2,446,125, July 27.
Control system for multiple hydraulic hoists. E. J. Hrdlicka, Jr. 2,445,781, July 27.
Control valve. J. H. Leslie, II. 2,446,051, July 27.
Control valve and vibrating flow indicator. G. H. Palm. 2,445,897, July 27.
Conveyer, Extensible. L. A. Mapes. 2,445,960, July 27.
Conveyer switch. W. S. Jennings and W. Rowland. 2,445,950, July 27.
Copolymers of isopropenyl toluene and acrylate and producing same. E. L. Kropa. 2,446,049, July 27.
Core box cutter. O. L. Miller. 2,445,918, July 27.
Counting arrangement, Electric frequency. A. Mortlock. 2,445,800, July 27.
Coupling: *See*—
  Rotary shaft coupling.
Coupling arrangement for use in two-way signaling systems, Dielectric wave guide. W. A. Tyrrell. 2,445,896, July 27.
Coupling arrangement for use in wave transmission systems. W. A. Tyrrell. 2,445,895, July 27.
Coupling device, High-frequency. P. C. Gardiner. 2,446,003, July 27.
Cover: *See*—
  Spark plug cover.
Cover for book jackets, Protective. A. Brody. 2,445,871, July 27.
Creaming of synthetic rubber latices. C. R. Peaker. 2,446,101, July 27.
Creaming of synthetic rubber latices. E. C. Svendsen. 2,446,115, July 27.
Crush-type grinding wheel truing device. L. F. Polk. 2,446,105, July 27.
Cuff holder. G. D. Tye. 2,446,117, July 27.
Curler, Hair. R. E. Ratliff. 2,445,924, July 27.
Current system, Alternating. P. J. Walsh. 2,445,897, July 27.
Cutter: *See*—
  Core box cutter.
Cutter or grinder, Tracer control. O. E. Rosen. 2,445,971, July 27.
Cutting and flushing device, Garbage. A. Bjorklund. 2,446,073, July 27.
Cutting apparatus. S. C. Nelson. 2,446,097, July 27.
Cutting board for steam tables. A. Karry. 2,445,915, July 27.
Cutting into the surface of an article, Method and apparatus for. A. G. Bodine, Jr. 2,445,934, July 27.
Dehydrated foods, Compressing. N. M. Adams. 2,445,752, July 27.
Dehydration of corn. P. W. Salo. 2,446,162, July 27.
Detector or frequency changer for radio-frequency oscillations. D. Weighton. 2,446,118, July 27.
Detonating or impact fuse. H. J. Nichols. 2,446,019, July 27.
Device for making test prints on color print material. A. Simmon and L. L. Weisglass. 2,446,111, July 27.
Dialkenyl sulfides, Preparation of. R. T. Armstrong. 2,446,072, July 27.
Die casting machine, Automatic. R. Bourret and J. Bardou. 2,445,995, July 27.
Directive radio system. R. W. Porter and A. G. Linowiecke. 2,446,024, July 27.
Dispenser: *See*—
  Container dispenser.
  Linoleum dispenser.
  Stacked article dispenser.
  Surgeon's soap dispenser.
Display structure with removable indicia-bearing inserts. W. C. and W. G. Grueneberg. 2,445,878, July 27.
Distillation of alcohol from hydrolysed mixtures of alkyl sulfates and sulfuric acid. H. O. Mottern and F. M. Archibald. 2,446,159, July 27.
Drier and cleaner, Combination. D. D. Day. 2,446,130, July 27.
Drive, Spring clutch. T. R. Smith. 2,446,064, July 27.
Driver's comfort. N. E. Hendricks. 2,446,006, July 27.
Earth handling machine. J. B. Jarmin. 2,446,136, July 27.
Eggs, Treating. G. O. Hall. 2,445,879, July 27.
Electric control system. B. D. Bedford. 2,445,991, July 27.
Electric discharge device for space resonant circuits. J. E. Beggs. 2,445,992, July 27.
Electric proportioning control apparatus with reset. W. H. Wannamaker, Jr. 2,446,163, July 27.
Electric resistance welding laminated sheet metal structure. M. Partiot. 2,445,801, July 27.
Electrical apparatus for gaseous discharge devices. H. W. Alford. 2,446,152, July 27.
Electrical contact system. W. F. Abbott. 2,445,816, July 27.
Electrical plug and socket connections. F. T. Shaw. 2,445,927, July 27.
Electrical regulating system. R. B. Lobosco. 2,445,789, July 27.
Electrical strain measuring apparatus. C. M. Hathaway. 2,445,880, July 27.
Electrode. E. F. Lowry, A. L. Peacock, and W. E. Leyshon. 2,446,157, July 27.
Electrode. A. T. Stenstrom. 2,445,808, July 27.
Electrolyte purification in manganese electrowinning. W. L. Hammerquist. 2,445,826, July 27.
Electrolytic concentration indicator. H. Lehde. 2,446,015, July 27.
Electromagnetic wave direction responsive apparatus. R. Hardy. 2,445,779, July 27.
Electron discharge device of the velocity modulation type. J. H. Fremlin and C. Strachey. 2,445,771, July 27.
Electronic discharge tubes and circuits therefor. J. Kruithof and L. A. B. Cabes. 2,445,782, July 27.
Engine: *See*—
  Supercharging and scavenging internal-combustion engine.
Engine drive. J. D. Bell. 2,445,902, July 27.
Engraving machine. L. Bentzman. 2,445,903, July 27.
Equalizer for cable operated controls. W. H. D. Brouse. 2,445,997, July 27.
Esters, Preparation of. R. W. Strassburg. 2,446,114, July 27.
Expanding hydraulic rivets by increments of internal pressure. G. D. Rogers. 2,445,803, July 27.
Extraction from vegetable materials. A. C. Beckel, P. A. Belter, and A. K. Smith. 2,445,931, July 27.
Eyeshield. D. E. Kimball. 2,446,048, July 27.
Fabric: *See*—
  Textile fabric.
Face powder and puff container. G. B. Dennis. 2,446,080, July 27.
Fastener: *See*—
  Separable fastener.
Fastening device for detachably connecting together two relatively movable parts. H. O. Spiller. 2,446,113, July 27.
Feed grinding mill of the rotary beater type. G. E. Miller. 2,446,095, July 27.
File. A. Anheuser. 2,445,753, July 27.
Filter heater. W. S. Crake. 2,446,126, July 27.
Fixture, Form tool. A. J. Daddona. 2,446,128, July 27.
Flash illuminated striped pattern direct reading stroboscope for wave frequency measurement. E. L. Kent. 2,446,047, July 27.
Flow meter. J. C. Keyworth. 2,445,854, July 27.
Fluid pressure control device. L. A. Majneri. 2,445,855, July 27.
Folding and lasting machine. C. Christiansen. 2,446,043, July 27.
Foot for injured or short legs, Prosthetic. M. C. Valenti. 2,446,042, July 27.
Frame: *See*—
  Hoist frame.
Freezer control and refrigerating system, Automatic. F. F. Kols. 2,446,156, July 27.
Frequency modulation detector circuit. W. E. Bradley. 2,445,996, July 27.
Fuel burner. R. C. Vroom and J. Dunn. 2,446,069, July 27.
Fuel injection device for internal-combustion engines. E. P. Paxman. 2,445,923, July 27.
Fuel supply system. F. Barfod and E. O. Wirth. 2,445,846, July 27.
Fuels for internal combustion engines. W. J. Hale. 2,445,778, July 27.
Garment, Child's. L. H. De Vries. 2,445,909, July 27.
Garter construction. B. D. Miskimen. 2,446,018, July 27.
Gas heater. E. G. Peterson and D. P. Graham. 2,446,059, July 27.
Gauging device, Size. W. F. Aller. 2,446,071, July 27.
Gear casing, Variable angle. H. C. Heinsohn, Jr. 2,445,828, July 27.
Gears, Controlling variable speed. H. F. Hobbs. 2,446,067, July 27.
Generator: *See*—
  Cavity resonator electric wave generator.
  Pulse generator.
Glass fiber reinforced plastics. R. White, R. Steinman, and L. P. Bielfeld. 2,446,119, July 27.
Golf swing indicator. A. M. Newman and R. V. Miller. 2,445,839, July 27.
Greases, Production of. A. A. Bondi. 2,445,935, July 27.
Greases, Water-proofing of lubricating. R. A. Butcosk. 2,445,936, July 27.
Guard, Switch terminal. E. N. Jacobi. 2,445,949, July 27.
Gunnery training apparatus. F. Waller, W. R. Dresser, and R. R. Swain. 2,445,982, July 27.
Hand piece, Dental. M. Staunt. 2,445,891, July 27.
Hanger: *See*—
  Cam-acting garment hanger.
Hanger. T. R. Benda. 2,445,758, July 27.
Hanger bracket for faucets. C. H. Root. 2,446,142, July 27.
Hat band, Adjustable. F. Ostolasa and G. E. Holmes. 2,445,922, July 27.
Head band connector. F. Ostolasa and G. E. Holmes. 2,445,921, July 27.
Headlight, Gravity actuated dirigible. W. Le Clair. 2,445,835, July 27.
Heater: *See*—
  Gas heater.
High-frequency generating apparatus. D. E. Watts and J. Vable, Jr. 2,446,032, July 27.

Hitch, Vehicle side draft. E. W. Fehlberg. 2,446,083, July 27.
Hoist frame. E. J. Lambert. 2,446,093, July 27.
Holder: *See*—
Bobbin holder. Cuff holder.
Holder for spinning machines, Adjustable ring. L. S. Peachey and R. P. Knull. 2,445,966, July 27.
Holder for surgical accessories. J. D. Karle. 2,446,155, July 27.
Holder for tubular lamps. R. W. Haven. 2,446,154, July 27.
Hooks for vehicle tires, Mud and snow. H. W. Grosjean, E. M. A. Sizer, and A. Zinda. 2,445,913, July 27.
Hopper, Mobile grain. F. A. Mulligan. 2,445,886, July 27.
Hydraulic remote operating system. E. Dawson, F. M. Watkins, and C. N. Schuh, Jr. 2,445,765, July 27.
Hydrocarbons, Alkylating. F. E. Frey, P. V. McKinney, and W. H. Wood. 2,445,824, July 27.
Hydrocracking of carbon oxides. A. J. Millendorf. 2,445,795, July 27.
Hydroxyphosphatides. H. Witteoff. 2,445,948, July 27.
Implement, Grommet setting. W. E. Castle. 2,445,761, July 27.
Implement, Writing. E. W. Davis. 2,446,044, July 27.
Indicator: *See*—
Cathode-ray power indicator. Golf swing indicator.
Electrolytic concentration indicator.
Inductance clip. J. F. Frese. 2,445,772, July 27.
Inertia-actuated switch. A. C. Chambers. 2,445,873, July 27.
Inserting machine. L. J. Winkeler. 2,446,035, July 27.
Instrument for measuring the slopes of a curve. E. J. Lunney. 2,445,792, July 27.
Internal-combustion rotary motor. R. K. Garnuch. 2,445,877, July 27.
Interpolymer of diallyl maleate and diethylene glycol maleate phthalate. G. F. D'Alelio. 2,445,764, July 27.
Iron soap pigment, Basic. E. K. Fischer. 2,445,770, July 27.
Ironing board, Built-in. A. P. Lants. 2,445,956, July 27.
Isolation of styrene by azeotropic distillation with picolines and lutidines. K. H. Engel. 2,445,944, July 27.
Joint construction for ceramic pipe, Flexible. E. T. Montgomery. 2,445,963, July 27.
Joint for abrasive belts or bands. W. B. Summers and W. A. Corse. 2,445,807, July 27.
Journal box structure. T. R. Weber. 2,445,984, July 27.
Journal dresser. W. Ruby. 2,446,026, July 27.
Juicer. H. A. Wormeck and F. P. Hess. 2,446,151, July 27.
Knife for use on onion crates, Portable topping. W. E. Behnke. 2,445,818, July 27.
Knife rack. M. E. Lesin. 2,446,016, July 27.
Laminated structure. E. G. Mitchell and D. B. Timberman. 2,445,858, July 27.
Last. S. P. Lovell. 2,445,791, July 27.
Lasting machine. C. W. Baker. 2,445,845, July 27.
Leucine, Preparation of. S. Archer and N. F. Albertson. 2,445,817, July 27.
Leveler, Automatic. M. B. Moore. 2,446,096, July 27.
Lighter. G. P. Schmitt. 2,445,890, July 27.
Linoleum dispenser. T. Pettyjohn and R. T. Stickel. 2,446,103, July 27.
Lock: *See*—
Caster wheel lock.
Loop-taker mechanism for sewing machines. A. R. Wood. 2,446,150, July 27.
Machine for arc welding with continuous electrodes. R. Sarasin. 2,445,863, July 27.
Machine for cleaning and separating flax or other fibrous plants. T. G. McLaurin and R. Duncan. 2,446,055, July 27.
Machine for flanging glass blanks. C. Eisler. 2,446,000, July 27.
Machine for pressing soles on shoes. S. J. Finn. 2,445,848, July 27.
Machine for transferring a design to a cloth material. J. S. Jahn. 2,446,010, July 27.
Magnetic frequency changer. H. J. McCreary. 2,445,857, July 27.
Mallet for preparing meat. J. C. Burkett. 2,445,872, July 27.
Marker, Film. W. H. Turner. 2,445,843, July 27.
Massage roller. H. D. Niblack. 2,446,099, July 27.
Massage table. H. D. Niblack. 2,446,098, July 27.
Massager, Prostate. A. J. C. Schwartz. 2,445,974, July 27.
Measuring device for towing winches. G. W. Royster. 2,445,972, July 27.
Measuring device with distortable portioning means. E. Gronemeyer and S. Cherba. 2,446,085, July 27.
Mechanical impulse regenerator. O. W. Henrikson and H. F. Obergfell. 2,445,829, July 27.
Metal salts of acyl phenol monosulfides. E. W. Cook and W. D. Thomas, Jr. 2,445,939, July 27.
Meter: *See*—
Flow meter.
Method of extracting gelose from seaweeds such as Hypnea musciformis and other species of the genus Hypnea. H. J. Humm. 2,446,091, July 27.
Methyl silicone elastomers containing Si-bonded vinyl radicals. J. Marsden. 2,445,794, July 27.
Methyl siloxanes, Preparing. J. F. Hyde. 2,446,135, July 27.
Microphone, Condenser. N. B. Brewer. 2,445,821, July 27.
Milk products and the like containing algin compound. V. C. E. Le Gloahec. 2,445,750, July 27.
Milking machine. A. C. Bloemers. 2,445,904, July 27.
Mineral oils, Desalting. C. M. Blair, Jr. 2,446,040, July 27.
Mit, Bath. C. Ashman. 2,445,987, July 27.
Mixing and opening machine, Cotton bale. W. Frost. 2,445,912, July 27.
Mixing unit for refrigerators. M. Tate. 2,446,066, July 27.
Modulation system. R. J. Rockwell. 2,446,025, July 27.
Molding concrete piles, Form for. A. B. Troisi. 2,445,894, July 27.
Molding machine, Concrete block. R. S. Reed. 2,446,061, July 27.
Motor: *See*—
Internal-combustion rotary motor. Rotary reaction motor. Shaded pole motor.
Motor and pump, Combined fluid-operated. H. J. Werner. 2,445,985, July 27.
Motor control switching system and device therefor. D. J. Bloomberg and W. O. Watson. 2,445,820, July 27.
Motor control system. J. G. Sola. 2,445,976, July 27.
Motor with pistol grip handle and trigger actuated valve, Hydraulic. C. J. Johnson and F. E. King. 2,446,011, July 27.
Mounting: *See*—
Coil mounting.
Mounting for measuring instruments, Condition responsive. J. L. Edelen. 2,445,943, July 27.
Multisignal transmission. L. L. Rauch. 2,445,840, July 27.
Naphthalene, Conditioned. H. G. Guy. 2,445,776, July 27.
Neck and ear protector. L. Bills. 2,446,122, July 27.
Organic sulfur-containing polymers. R. C. Morris and E. C. Shokal. 2,445,799, July 27.
Organoboron compounds, Preparation of. D. T. Hurd. 2,446,008, July 27.
Oscillator, Controlled blocking tube. H. E. Beste. 2,445,933, July 27.
Oscillator, Ultra high frequency electric. S. G. Tomlin. 2,445,810, July 27.
Overlapping linkage engagement for model-forming shaped sheet pieces. W. J. Wiswesser. 2,446,120, July 27.
Oxidation of barbituric acid to alloxan. W. Wenner. 2,445,810, July 27.
Penicillin, Production of. M. Demerec. 2,445,748, July 27.
Perforator, Tape. V. H. Laney. 2,445,834, July 27.
Phase shift oscillator. D. S. Robertson. 2,446,106, July 27.
Phenols, Recovery of. H. A. Gollmar. 2,445,825, July 27.
Picture receiver utilising anomalous reflection from silver. E. J. Gorn. 2,445,774, July 27.
Picture sound record production. G. B. H. Hanson. 2,445,827, July 27.
Piston rings in internal-combustion engines, Seating. H. A. Ambrose. 2,445,901, July 27.
Plastic molding press. L. H. Blanchard. 2,446,041, July 27.
Plate clamp. T. C. P. Tunnard-Moore. 2,446,030, July 27.
Platform, Window. E. M. Newkirk. 2,445,860, July 27.
Pliers. Double-ended multiple jaw. A. L. Peterson. 2,446,022, July 27.
Plotting an ordered set of quantities, Method of and apparatus for. J. E. Lilienfeld. 2,445,787, July 27.
Plug: *See*—
Shielded spark plug.
Polymerising. R. C. Reinhardt. 2,445,970, July 27.
Power booster for aircraft control surfaces. F. O. Wisman. 2,445,900, July 27.

Receiver, Ash. C. Hendricks. 2,445,914, July 27.
Receiver, Pulse time modulation multiplex. D. D. Grieg. 2,445,775, July 27.
Record engraver suspension for sound track registering machines. L. Chanal. 2,445,762, July 27.
Rectangular electrical impulses, Generating. M. M. Lévy. 2,445,785, July 27.
Rectifier, Enclosed. M. F. Skinker. 2,445,805, July 27.
Rectifier and assembly. W. Fiore. 2,445,769, July 27.
Refrigerator construction with removable refrigerator unit. R. W. Ayres. 2,445,988, July 27.
Rest for chairs, Sanitary body. H. J. Beyer. 2,445,869, July 27.
Rigging insulation installation. T. Moore. 2,445,798, July 27.
Ring: *See*—
Sealing ring.
Rocket. C. D., A. J., and C. Schermuly. 2,446,110, July 27.
Roller stand for spinning and preparing machines. J. Noguera. 2,446,021, July 27.
Rotary gear pump. E. J. S. Pigott and F. E. Fleischer. 2,445,967, July 27.
Rotary high-frequency switching circuit. N. Marchand. 2,445,793, July 27.
Rotary reaction motor. W. F. Mayer. 2,445,856, July 27.
Rotary shaft coupling. C. W. Hawthorne. 2,446,133, July 27.
Rubber crumbs, Preparation of. G. W. Blair. 2,446,075, July 27.
Rubber latices, Creaming of synthetic. J. S. Rumbold. 2,446,107, July 27.
Rule, Tape. R. C. Nicholson and N. H. Schneider. 2,446,020, July 27.
Safety control for fuel burners. C. K. Strobel. 2,445,841, July 27.
Sanding block. R. A. Hill. 2,446,134, July 27.
Scaffold, Collapsible. F. Hartmann. 2,446,005, July 27.
Scarifier, Reversible. R. B. Blackmore. 2,446,074, July 27.
Screen: *See*—
Power lawn mower with air filtering screen.
Screw, Socket head. D. V. Stellin. 2,445,978, July 27.
Sealing means. B. E. House. 2,445,882, July 27.
Sealing ring. H. Lagergren. 2,445,952, July 27.
Selective signaling system. C. E. Ammann and R. W. King. 2,446,037, July 27.
Selenium products, Manufacture of. D. L. A. Driver. 2,445,768, July 27.
Self-adapting connector. F. Von Voigtlander. 2,445,981, July 27.
Separable fastener. J. W. Albin. 2,446,070, July 27.
Separation and purification of gases. D. L. Campbell, H. Z. Martin, E. V. Murphree, and C. W. Tyson. 2,446,076, July 27.
Shaded pole motor. C. B. Walworth, Jr. 2,445,813, July 27.
Sheet metal working apparatus, especially for welding machines. W. A. Weightman. 2,446,145, July 27.
Shielded spark plug. L. F. Hahn. 2,445,777, July 27.
Shoe, Platform type. P. E. Curtis. 2,445,847, July 27.
Shuttle, Loom. O. C. Williams. 2,445,899, July 27.
Signal device. F. A. Lancaster. 2,445,953, July 27.
Signal translating apparatus. A. Badmaieff. 2,445,990, July 27.
Signaling system, Electric. E. A. H. Bowsher, H. M. M. D'Assis-Fonseca, and H. J. Ward. 2,445,759, July 27.
Silver catalysts. T. W. Evans. 2,446,132, July 27.
Silver sulfide coatings, Forming. C. W. Mell. 2,445,962, July 27.
Slack or cuttings removing device for kerf-cutting machines. F. A. Lindgren. 2,445,957, July 27.
Solubilized alkaryl sulfonate composition. N. A. Shepard. 2,445,975, July 27.
Sound recording method and system, Variable system. E. W. Kellogg. 2,445,832, July 27.
Spark plug cover. M. S. Hook. 2,446,007, July 27.
Spring unit. V. Willoughby. 2,446,164, July 27.
Stabilizer for double hung windows. A. Larson. 2,446,014, July 27.
Stacked article dispenser. H. L. Hilton, H. C. Hilton, and H. L. Hargett. 2,445,320, July 27.
Starter testing apparatus. H. L. Bennett. 2,446,036, July 27.
Starting and operating unit and circuit for gaseous electric discharge devices. M. A. Babb and A. E. Hayes. 2,445,980, July 27.
Stator winding method and apparatus therefor. A. P. Adamson. 2,445,986, July 27.
Steam engine, Semicompound multiple expansion. R. R. Waterman. 2,446,031, July 27.
Steel shapes for use in the construction of buildings. D. I. Youmans. 2,445,815, July 27.
Stethoscope, Blood pressure. J. M. Mallory. 2,445,917, July 27.
Stool, Adjustable. R. R. Cramer. 2,446,127, July 27.
Stop and turn signal, Vehicle. M. Matsuda. 2,445,961, July 27.
Supercharging and scavenging internal-combustion engine. H. E. Mattice. 2,446,004, July 27.
Support. J. F. Kortan. 2,445,749, July 27.
Support for electron discharge tubes, Adjustable electrode. A. K. Wing, Jr., and L. A. Backer. 2,445,814, July 27.
Surgeon's soap dispenser. E. J. Scarry. 2,446,100, July 27.
Switch: *See*—
Conveyer switch. Thermal time switch.
Inertia-actuated switch. Tire pressure switch.
Sanding switch.
Switch assembly, Fluid operated. F. R. Bean. 2,445,758, July 27.
Switch structure. J. B. Parsons. 2,446,141, July 27.
Table: *See*—
Massage table.
Tap wrench. J. L. Stark. 2,445,977, July 27.
Target, Animated. I. D. Wallach. 2,445,844, July 27.
Telegraph system, Frequency-shift. M. G. Crosby. 2,446,077, July 27.
Teletype apparatus. T. R. Harvill and L. Wroblewski. 2,445,780, July 27.
Terminal and clamp therefor. G. W. Harper. 2,445,946, July 27.
Terpenes, Sulfurizing. R. W. Watson. 2,445,983, July 27.
Test prints on color print material, Making. A. Simmon and L. L. Weinglass. 2,446,112, July 27.
Textile fabric. W. R. Thomas, 3rd. 2,445,751, July 27.
Thermal time delay switch. V. N. Tramontini. 2,446,029, July 27.
Thermionic devices, Manufacture of miniature. J. J. Bannon, Jr. 2,445,755, July 27.
Thorium, Manufacture of. H. C. Rentschler, W. C. Liliendahl, and J. E. Gray. 2,446,062, July 27.
Timing and positioning mechanism for dial feeding machines. J. Briechle. 2,445,822, July 27.
Timing device for telegraph circuit. R. S. Sweney. 2,445,809, July 27.
Tire chain applicator and mud lug, Combined. T. O. Hoppes. 2,445,947, July 27.
Tire pressure switch. H. R. Luper. 2,445,959, July 27.
Toe coupling for artificial feet. C. Dumelin. 2,445,910, July 27.
Tool. G. G. Smith. 2,446,143, July 27.
Toy. E. G. and R. E. Benson. 2,445,904, July 27.
Toy gun assembly. I. D. Wallach. 2,445,812, July 27.
Toy helicopter. J. Chimsadis. 2,445,908, July 27.
Tractor drive. H. W. Moore. 2,445,797, July 27.
Transformer, High reactance. J. G. Wellings. 2,446,033, July 27.
Transmission. H. D. Polle. 2,445,968, July 27.
Transmission system. E. Labin. 2,445,783, July 27.
Trap device for rodents. H. Tsai and N. Chuy. 2,445,990, July 27.
Trimmer, Lawn edge. F. Treviso. 2,445,842, July 27.
Tube: *See*—
Vacuum tube.
Tube structure, High-frequency. R. H. Varian. 2,445,811, July 27.
Tube tester, Inner. A. and C. Kubin, and A. Brondos, Jr. 2,446,050, July 27.
Tubing, Bias. J. Katz and F. P. Majoros. 2,445,883, July 27.
Turbine, Air-cooled gas. T. M. McKenzie, Jr. 2,445,837, July 27.
Turret, Gun. H. D. Hoey and G. F. Towner. 2,445,882, July 27.
Ultra-high frequency electric discharge device and cavity resonator apparatus therefor. E. D. McArthur and J. E. Beggs. 2,446,017, July 27.
Unloading circuit. D. W. McCready. 2,445,836, July 27.
Upper pivot for ventilator panels. G. M. Lane and H. G. Thunder. 2,445,955, July 27.

Urine sampler attachment. G. A. Muller. 2,446,160, July 27.

Vacuum tube. M. D. Baller. 2,445,754, July 27.

Valve: *See*—
All-steel high-gear valve. Control valve.

Valve. B. J. Lyons. 2,446,139, July 27.

Vat, Liquid temperaturizing. F. J. McCullough. 2,446,054, July 27.

Wallet and cigarette case, Combined. S. Hyman. 2,446,009, July 27.

Warp beam for looms. C. P. Bergstrom. 2,445,932, July 27.

Warp drawing machine. R. P. Drake. 2,445,999, July 27.

Waste sulfite liquor, Treatment of. K. H. A. Melander, G. E. Sävö, and T. I. Johanson. 2,445,838, July 27.

Watch timing apparatus. J. L'Eplattenier. 2,445,916, July 27.

Water-cooling tower, Mechanical draft. J. G. De Flon and G. W. Meyer. 2,445,908, July 27.

Water still with deaerator. H. C. Davis and W. H. Thompson. 2,445,907, July 27.

Web letoff mechanism. B. Plunkett and G. Fama. 2,446,104, July 27.

Welded joints, Producing. T. E. Kihlgren and C. E. Lacy. 2,445,951, July 27.

Well drilling mud and process. G. B. Tjoflat. 2,445,893, July 27.

Wheel truing device, Crush-type grinding. L. F. Polk. 2,446,105, July 27.

Winding machine, Coil. D. E. Carpenter. 2,445,937, July 27.

Window assembly and latch therefor, Ventilating. G. M. Lane and H. G. Thunder. 2,445,954, July 27.

Window cutting means for envelope machines. L. Hoffman and A. Dalmen. 2,445,831, July 27.

Wire drawing block. S. J. Pachl. 2,446,058, July 27.

Wooden lath processing apparatus. E. E. and M. E. Walund. 2,446,147, July 27.

Work gauge-support for shears. W. C. Tucker. 2,446,146, July 27.

Wrapping sheet for oil-slushed metal articles. M. W Forrest. 2,445,945, July 27.

Wrench: *See*—
Tap wrench.

Wrench with insertable auxiliary socket, Rigid jaw. L. L. Busby. 2,445,905, July 27.

Wrist watch strap bar. O. A. Starke. 2,446,065, July 27.

CLASSIFICATION OF PATENTS

ISSUED JULY 27, 1948

In view of the fact that the issue is being checked weekly by the Classification Division, the class and subclass in this list are correct as of this date. Where there is a discrepancy between the classification given in the patent head and the classification in this list, the classification of this list governs.

NOTE.—First number—class, second number—subclass, third number—patent number

2— 2: 2,446,006; 14: 2,446,048; 42: 2,445,767; 49: 2,445,850; 75: 2,445,909; 123: 2,446,117; 158: 2,445,967; 174: 2,446,122; 179: 2,445,922; 183: 2,445,921; 197: 2,446,053; 321: 2,446,018; 338: 2,445,980

U. S. GOVERNMENT PRINTING OFFICE: 1948

DECISIONS IN PATENT AND TRADE-MARK CASES

U. S. Court of Customs and Patent Appeals

ATLANTIC SEAFOOD PACKERS

v.

FLORIDA FRUIT CANNERS, INC.

Nos. 5383 and 5384. Decided March 2, 1948

[166 F.2d 586; 77 USPQ 96]

1. TRADE-MARKS—OPPOSITION—"SILVER MIST."
Where it appears from the evidence that the mark "Silver Mist" was used on canned shrimp, although there is no evidence of record as to the color of canned shrimp, *Held* that judicial notice may be taken that canned shrimp is not the color of silver.

2. SAME—SAME—"SILVER MIST" AND "SILVER NIP"—"GOLDEN MIST" AND "GOLDEN NIP."
In determining whether "Golden Mist" for orange juice and "Silver Mist" for grapefruit juice are confusingly similar to "Golden Nip" and "Silver Nip" for identical goods, *Held* that though the words "Golden" and "Silver" in "Golden Nip" and "Silver Nip" are merely descriptive of the goods upon which they are used, we should consider the marks in their entireties and the fact that they are sold, apparently in the same stores to those who, as a rule, considering the goods here involved, are not discriminating buyers.

3. SAME—SAME—SAME—VALIDITY OF OPPOSER'S MARKS NOT SUBJECT TO ATTACK.
Held that since this is an opposition proceedings, not a cancellation proceeding, the appellant who has disclaimed the words "Golden" and "Silver" may not attack the validity of the opposer's trade-marks.

4. SAME—SAME—SAME—CONFUSING SIMILARITY.
Although the words "Golden" and "Silver" may not be the dominant features of appellee's marks, *Held* that the terms "Mist" and "Nip" when used with the terms "Golden" and "Silver" are sufficiently similar so as to be likely to cause confusion or mistake in the mind of the public and to deceive purchasers as to the origin of the goods of the parties.

APPEAL from the Patent Office. Oppositions Nos. 23,205 and 23,206.

AFFIRMED.

Beckman Aitken for Atlantic Seafood Packers.

Mason, Fenwick, & Lawrence (*Edward G. Fenwick* of counsel) for Florida Fruit Canners, Inc.

HATFIELD, *J.*:

These are appeals in trade-mark opposition proceedings from the decision of the Commissioner of Patents, 69 USPQ 177, affirming the decisions of the Examiner of Interferences sustaining appellee's notices of opposition and holding that appellant was not entitled to the registrations of its marks hereinafter set forth. The cases were submitted on the same record and were briefed and argued together. Accordingly, we shall dispose of the two appeals in one decision.

Appellant filed its application for registration of the trade-mark "SILVER MIST" for use on "canned grapefruit juice" on October 2, 1943, under the Trade-Mark Act of February 20, 1905. Its application was amended January 19, 1944, in which amendment the word "SILVER" was disclaimed as descriptive apart from the mark as shown. In its application, appellant alleged that it had used its mark on its goods since September 20, 1943.

On October 2, 1943, appellant filed its application for the registration of the term "GOLDEN MIST," under the Trade-Mark Act of February 20, 1905, for use on canned and bottled orange juice, and it was alleged in the application that it had used its mark since September 20, 1943. In its application, appellant disclaimed the word "GOLDEN" as descriptive of the orange juice, apart from the mark as shown. In each of its applications, however, appellant reserved all common-law rights in its entire marks.

Appellee opposed the registration of appellant's marks, claiming that the marks were confusingly similar, under section 5 of the Trade-Mark Act of February 20, 1905, to appellee's mark "Silver Nip," registration No. 255,630, registered April 30, 1929, for use on "Grapefruit Juices for Making Nonalcoholic, Non-Cereal, Maltless Beverages," and its mark "Golden Nip," registration No. 279,725, registered January 20, 1931, for use on fruit juices for food purposes, particularly for orange juice extracted from fresh, fully ripened oranges.

The goods of each of the parties are sold in containers to the general public.

It appears from the record that L. Maxcy, Incorporated, and its predecessor, the Florida Fruit Canners, Incorporated, used its marks on its goods for approximately thirteen years prior to the adoption and use of appellant's marks; that appellee has expended large sums of money in advertising its goods and its trade-marks in newspapers, over the radio, on wall hangings, caps, book matches, and direct mail advertising throughout the United States; that from 1930 to June 30, 1944, it expended $33,000 in advertising its "Golden Nip" trade-mark for orange juice, and $102,000 in advertising its "Silver Nip" trade-mark for use on grapefruit juice; and that during that period of time, appellee sold nearly $2,000,000 worth of orange juice under its trade-mark "Golden Nip" and sold $5,000,000 worth of grapefruit juice under its trade-mark "Silver Nip."

Vol. 612 • No. 4 Tuesday, July 27, 1948 Price $16 per year

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $16.00 per annum, including annual index, $19.50; single numbers, 25 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 25 cents each; copies of TRADE-MARKS and DESIGNS at 10 cents each. Address orders to the Commissioner of Patents, Washington 25, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or TRADE-MARKS will be sent without cost on request to the Commissioner of Patents, Washington 25, D. C.

It was brought out by counsel for appellant on the cross-examination of W. H. Holloway, auditor of appellee, L. Maxcy, Incorporated, that the color of its orange juice was similar to the color as shown in appellee's Exhibit No. 6–F which appears to be golden in color, and that the color of its grapefruit juice is approximately the color of that shown in appellee's Exhibit No. 6–E which is not the color of silver but is somewhat yellow in color.

[1] It appears from the evidence introduced by appellant that it has used the trade-mark "SILVER MIST" since January 20, 1930, on canned shrimp, although there is no evidence of record as to the color of canned shrimp. We think it is a matter of which we may take judicial notice that canned shrimp is not the color of silver. Appellant has also used its trade-marks, "SILVER MIST" and "GOLDEN MIST," on containers for grapefruit juice and orange juice, respectively, since September 20, 1943.

On cross-examination, George C. Quint, a witness for appellant, who, at the time he testified, was manager of the Leesburg Canning Company, a division of the appellant company, formed in September 1943, and which company also used the trade-marks "SILVER MIST" on canned grapefruit juice, and "GOLDEN MIST" on canned orange juice, stated that approximately 104,000 cases of grapefruit juice under the trade-mark "SILVER MIST," and approximately 55,000 cases of orange juice under the trade-mark "GOLDEN MIST," were shipped by the Leesburg Canning Company since September 20, 1943. The witness testified that the orange juice which its company sold was definitely of a golden color and that the grapefruit juice was a blending of silver and mist color. On cross-examination he stated that mist has a color and that he would describe it as "a silvery, very light, gray." He further testified that the term "SILVER MIST" is intended to indicate a color such as silver or mist. The witness, however, stated that the term "SILVER MIST" was not the nearest or most perfect description of the color of his company's particular grapefruit juice.

The witness Paul H. Ploeger, one of the partners of the appellant company, testified that he considered the word "SILVER" to be descriptive of the color of grapefruit juice which his company sold.

Counsel for appellant also introduced into the record many trade-mark registrations containing the word "Gold" and "Golden," some of which were for oranges and grapefruit. In some of those trade-marks the term "Golden" was clearly not descriptive of the goods upon which that term was used. One of the registrations introduced into the record is "Golden Hill" for use on fresh citrus fruits, orange marmalade, and orange juice for food purposes. It was registered February 11, 1930, registration No. 267,116.

[2] It is the contention of counsel for appellant that the word "Golden" in the trade-mark "Golden Nip," and the word "Silver" in the trade-mark "Silver Nip," are merely descriptive of the goods upon which they are used; that such terms have become publici juris and that anyone may use such terms in a trade-mark, so long as the trade-mark in its entirety is not confusingly similar to marks previously used by others; and that appellant's "GOLDEN MIST" trade-mark and its "SILVER MIST" trade-mark are not confusingly similar to appellee's trade-marks "Golden Nip" and "Silver Nip" for use on identical goods.

We do not disagree with the contention of counsel for appellant that the words "Golden" and "Silver" in appellee's marks are merely descriptive of the goods upon which they are used by appellant. Nevertheless, we should consider the marks in their entireties and the fact that they are sold, apparently in the same stores, to those who, as a rule, considering the goods here involved, are not discriminating buyers, as was the case in our decision in the case of *Philip A. Hunt Company* v. *Eastman Kodak Company*, 31 CCPA (Patents) 852, 855, 140 F.2d 166, 60 USPQ 374, 561 O. G. 517, where it was held that "KODALITH" for use on "PHOTOGRAPHIC DEVELOPER" was not confusingly similar to "GRAPH-O-LITH" for use on goods possessing the same descriptive properties; that the suffix "LITH" was merely descriptive of the goods of the parties, and the prefixes "KODA" and "GRAPH-O" were sufficiently dissimilar so that confusion in trade would not likely occur. In that case we said, among other things, that

> It appears from the record that the goods of the parties are used by those possessing technical skill in the lithographic art; that they are sold to a discriminating class of purchasers; and that they are not, and are not likely to be, sold either to amateur photographers or to the general public.

[3] In the consideration of this case it should be understood that this is an opposition proceeding, not a cancellation proceeding brought by any prior user of the words "Golden" or "Silver." It may also be observed that appellant, who has disclaimed the words "GOLDEN" and "SILVER," may not attack the validity of appellee's trade-marks.

If confusion existed in the mind of the public because of the registration or use of marks confusingly similar to that of appellee, we should not allow appellant to add to the confusion by permitting the registration of marks which are confusingly similar to those of appellee.

It may be true that, if standing alone, the words "MIST" and "Nip" are not identical in appearance, meaning, or sound. It is true, however, that in consideration of the involved trade-marks we should not entirely excluded the words "Golden" and "Silver" but should, on the contrary, consider the marks in their entireties. *Skelly Oil Co.* v. *The Powerine Co.*, 24 CCPA (Patents) 790, 86 F.2d 752, 32 USPQ 51, 477 O. G. 766.

It appears from the record, and it is not seriously contended to the contrary, that appellee is not entitled to the exclusive use of the terms "Golden" and "Silver" in its trade-marks. However, although the words "Golden" and "Silver" may not be the dominant features of appellee's marks, we are of opinion that the terms "MIST" and "Nip," when used with the terms "Golden" or "Silver," are sufficiently similar so as to be likely to cause confusion or mistake in the mind of the public and to deceive purchasers as to the origin of the goods of the parties. See *Kenosha Full Fashioned Mills, Inc.* v. *Artcraft Hosiery Company*, 34 CCPA (Patents) 1081, 161 F.2d 751, 74 USPQ 29, 608 O. G. 530.

As we said in the case of *Skelly Oil Co.* v. *The Powerine Co.*, supra:

> A vast field of words, phrases and symbols is open to one who wishes to select a trade-mark to distinguish his product from that of another. Unquestionably in our ever-increasing complex business life, the trend of modern judicial decisions in trade-mark matters is to show little patience with the newcomer who in adopting a mark gets into the border line zone between an open field and one legally appropriated to another. As between a newcomer and one who by honest dealing has won favor with the public, doubts are always resolved against the former.

We have given careful consideration to all the arguments, as well as to the cases cited by counsel for appellant, but are of opinion that the tribunals of the Patent Office reached the right conclusion and, for the reasons hereinbefore stated, the decision of the Commissioner of Patents is affirmed.

AFFIRMED.

By reason of illness, O'CONNELL, *J.*, was not present at the argument of this case and did not participate in the decision.

U. S. Court of Customs and Patent Appeals

IN RE WILLIAM A. RAY

No. 5381. Decided April 6, 1948

[— F.2d —; 77 USPQ 375]

1. APPEAL TO COURT—NEW GROUND OF REJECTION BY BOARD—NO ERROR ASSIGNED.
   Where the Board of Appeals expressly rejected certain claims as not reading on the elected species, which was a new ground of rejection made pursuant to the provisions of rule 139 of the Patent Office, and appellant did not request that that ground of rejection be reconsidered by the Board or remanded to the Primary Examiner for further consideration and where in his appeal appellant assigned no error in the Board's rejection, *Held* that rejection is affirmed without consideration of its merits.
2. CLAIMS—BEING OF SUCH SIZE AND CONSTRUCTED IN SUCH MANNER—FUNCTIONAL.
   Where the reference patent completely anticipates the limitations of the appealed claim except the clause defining the conductors as "of such size and constructed in such manner" as to accomplish a certain result, *Held* that clause not a structural limitation for the reason that the structure is not defined in terms of what it is but of what it does.
3. PATENTABILITY—ACTUAL STRUCTURE ANTICIPATED—FUNCTIONAL DIFFERENTIATION.
   Where the actual structure recited in the claim is disclosed by the reference, *Held* that a statement of function cannot lend patentability to the claim.
4. SAME—THERMO-COUPLE.
   Certain claims for a thermo-couple structure *Held* properly rejected on the prior art.

APPEAL from the Patent Office. Serial No. 364,356.

AFFIRMED.

John Flam (*I. Richard Paris* of counsel) for Ray.

W. W. Cochran (*E. L. Reynolds*, of counsel) for the Commissioner of Patents.

JACKSON, *J.*:

Appellant has appealed from a decision of the Board of Appeals of the United States Patent Office affirming that of the Primary Examiner finally rejecting claims 7, 8, 18, 19, 29, and 31 to 33 inclusive of an application for a patent alleging new and useful improvements in a "Thermocouple Operated Control System." Seven claims were allowed.

The Examiner rejected all of the involved claims as unpatentable over the prior art which is as follows: Harrison, 1,863,373, June 14, 1932; Ray, 2,084,654, June 22, 1937; Alder, 2,186,948, January 16, 1940; Alfery, 2,305,585, December 22, 1942.

[1] The Board of Appeals expressly affirmed the rejection of the Examiner as to claims 29, 31, and 33. With respect to the other involved claims, the Board expressly rejected them as not reading on the elected species. That action was a new ground of rejection made pursuant to the provisions of rule 139 of the Rules of Practice in the United States Patent Office. Appellant did not request that that ground of rejection be reconsidered by the Board, nor did he ask that the case be remanded to the Primary Examiner for further consideration. In his appeal here, appellant assigned no error in the Board's rejection on the ground of not reading on the elected species, and, therefore, that rejection with respect to all of the appealed claims, with the exception of claims 29, 31, and 33, is affirmed without consideration of its merit. *In re Boyce*, 32 CCPA (Patents) 718, 114 F.2d 896, 63 USPQ 80, 568 O. G. 568, and the long list of authorities cited therein.

Claim 29 is considered illustrative of the subject matter of claims 29, 31, and 33 and reads as follows:

> 29. A thermocouple structure formed of two end conductors and an intermediate conductor, all three conductors being serially joined to form a pair of thermoelectric junctions, said end conductors being of thermoelectrically similar materials, and said intermediate conductor being of a material thermoelectrically dissimilar to that of the end conductors, both junctions thus formed being inserted in a flame and located at points in the flame that would have substantially the same temperature if the junctions be removed from the flame, said conductors being of such size and constructed in such a manner as to cause unequal temperatures to exist steadily at said points.

Appellant's application discloses several different arrangements of thermocouples intended to operate in a control system for fuel burning furnaces in accordance with the temperatures in the furnace. He shows a thermocouple composed of two different metals joined together at two junction points. When those points are maintained at different temperatures an electric current will be generated in the couple. The required difference in temperature between the two junctions is procured by subjecting the metal conductors forming the junctions to flame temperature or by the shielding effect of one conductor upon another or both, whether the couple is entirely in the flame or away from the flame. In the latter case the thermocouple is affected by radiant heat and the desired temperature differential effects are obtained by appropriately spacing the junctions from each other.

The Board held that the species elected for prosecution of this application is exemplified in the arrangement of Fig. 8 of the application. In that figure there are two members made of one metal, one member being larger in diameter than the other, the ends of which are joined by a member of differ-

ent metal. The members are joined at points which are within the flame of a burner. For the reason that one of the first mentioned two members is larger than the other, it conducts heat away from the flame more quickly than the member of lesser diameter, resulting, at the point where the wider diameter member meets the joining member, in a lower temperature than that of the other junction point. Other figures disclose an arrangement in which the junction points are kept at different temperatures and so locating them that one shields the other from heat.

The Harrison patent relates to the regulation of temperatures, gas pressures and mixtures, fuel quality, flame lengths and the like. It discloses a thermocouple located within the flame of a burner with both of its junctions spaced one above the other.

Since claims 29, 31 and 33 were each rejected as unpatentable over the Harrison reference by both tribunals below, it is not necessary to discuss the other references.

[2] With respect to claim 29, appellant does not challenge the statement of the Examiner that the patent to Harrison discloses a thermocouple of the type comprising end conductors of similar materials and the short intermediate conductor between the points is of a different material. We agree that the Harrison patent completely anticipates the limitations of claim 29 with the exception of the last clause "said conductors being of such size and constructed in such a manner as to cause unequal temperatures to exist steadily at said points." That clause, however, we do not deem a structural limitation for the reason that the structure is not defined in terms of what it is but of what it does. In the case of *General Electric Co.* v. *Wabash Appliance Corp. et al.*, 304 U. S. 364, the Supreme Court held that a claim should not be allowed when it discloses "nothing new except perhaps in functional terms." Accordingly we are of opinion that the rejection of claim 29 was proper.

As to claims 31 and 33, the Harrison patent clearly discloses all of the actual structure defined therein. In each of those claims a functional limitation occurs which is not shown in the Harrison patent. The thermocouple of that patent is made up of two end conductors and an intermediate conductor serially joined to form two junction points as is required by claim 31, and it appears to be conventional in forming a differential thermocouple therefor, that both end conductors are similar in material to each other with the intermediate conductor of a different substance. As heretofore noted, both junctions in the structure of the Harrison patent are located in the flame at points having the same temperature if the junctions were removed. That is conceded by appellant in his brief. Furthermore, it is clear from the drawing of the Harrison patent that the lower end conductor is placed between the upper end conductor and the root of the flame, thereby shielding the upper junction.

[3] The remaining portion of the claim, "to shield said other end conductor effectively and thereby reduce the temperature adjacent that junction which is formed by said other end conductor and the intermediate conductor," is obviously a statement of function and can not lend patentability to the claim because the actual structure recited therein is disclosed by the reference. *In re Griswold*, 33 CCPA (Patents) 799, 802, 152 F.2d 1014, 68 USPQ 176, 584 O. G. 171; *In re Stattmann*, 32 CCPA (Patents) 813, 146 F.2d 290, 64 USPQ 245, 571 O. G. 351; *In re Carr*, 28 CCPA (Patents) 1240, 1244, 120 F.2d 386, 49 USPQ 657, 530 O. G. 747.

[4] Claim 33 is similar to claim 31 with the exception of containing an additional statement that the end conductors are of the same cross-sectional arrangement. End conductors, having cross-sectional arrangement, are shown in the device of the Harrison patent, and that claim is met by that patent reference in the same manner as claim 31. Claim 33 has as a functional limitation, "thus serving to shield the other end conductor from the flame." Therefore, that claim is met by the Harrison reference in the same respect as claim 31.

For the reasons stated, the decision of the Board of Appeals is affirmed.

AFFIRMED.

By reason of illness, O'CONNELL, *J.*, was not present at the argument of this case and did not participate in the decision.

NOTICES

Extension of Time for Renewing Trade-Mark Registrations: Belgium

By the President of the United States of America

A PROCLAMATION

WHEREAS by the act of Congress approved July 17, 1946, 60 Stat. 568, the President is authorized, under the conditions prescribed in that act, to grant an extension of time for the fulfillment of the conditions and formalities for the renewal of trade-mark registrations prescribed by section 12 of the act authorizing the registration of trade-marks used in commerce with foreign nations or among the several States or with Indian tribes, and to protect the same, approved February 20, 1905, as amended (15 U. S. C. 92), by nationals of countries which accord substantially equal treatment in this respect to citizens of the United States of America:

NOW, THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, under and by virtue of the authority vested in me by the aforesaid act of July 17, 1946, do find and proclaim that with respect to trade-marks of nationals of Belgium registered in the United States Patent Office which have been subject to renewal on or after September 3, 1939, there has existed during several years since that date, because of conditions growing out of World War II, such disruption or suspension of facilities essential to compliance with the conditions and formalities prescribed with respect to renewal of such registrations by section 12 of the aforesaid act of February 20, 1905, as amended, as to bring such registrations within the terms of the aforesaid act of July 17, 1946; that Belgium accords substantially equal treatment in this respect to trade-mark proprietors who are citizens of the United States; and that accordingly the time within which compliance with conditions and formalities prescribed with respect to renewal of registrations under section 12 of the aforesaid act of February 20, 1905, as amended, may take place is hereby extended with respect to such registrations which expired after September 3, 1939, and before June 30, 1947, until and including December 31, 1948.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this 2nd day of July, in the year of our Lord nineteen hundred and forty-eight and of the Independence of the United States of America the one hundred and seventy-second.

[SEAL]

HARRY S. TRUMAN.

By the President:
G. C. MARSHALL,
Secretary of State.

Proclamation 2794—July 2, 1948.

Deferment of Trade-Mark Rule 4.4

The time for taking effect of Trade-Mark Rule 4.4 has been changed from July 1, 1948, to January 1, 1949, and old trade-mark rule 11 is in force until January 1, 1949, see Federal Register, July 1, 1948, page 3677.

THOMAS F. MURPHY,
Assistant Commissioner of Patents.

July 7, 1948.

Adjudicated Patents

(C. C. A. Ohio) Mayo patent, No. 2,322,041, for automobile vehicle heating apparatus, claims 1 to 5, 7 to 10, and 12 *Held* valid and infringed, claim 6 *Held* invalid. *Excel Auto Radiator Co.* v. *Bishop & Babcock Mfg. Co.*, 167 F.2d 962; 77 USPQ 520.

(D. C. Calif.) Finnerty patent, No. 2,415,790, for an emery wheel dresser, *Held* valid and infringed. *Finnerty et al.* v. *Wellen et al.*, 77 F. Supp. 508; 78 USPQ —.

Cancellation Notice

Tampa Importers, Inc., its assigns or legal representatives take notice:

A cancellation proceeding has been instituted by this Office upon the petition of Manuel A. Fernandes, 225 West 74th St., Los Angeles 3, Calif., to effect the cancellation of trade-mark registration of Tampa Importers, Inc., No. 334,671, dated May 12, 1936. The assignment records of this Office show a transfer of title to this registration to Harold W. Bonwit, Scarsdale, N. Y., who has been substituted for said Tampa Importers, Inc., to defend the registration concerned. The notice of such proceeding sent by registered mail to said Bonwit, at his address of record, Scarsdale, N. Y., having been returned by the post office undeliverable, notice is hereby given that unless said Tampa Importers, Inc., its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order, the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

THOMAS F. MURPHY,
Assistant Commissioner of Patents.

July 9, 1948.

Cancellation Notice

Ralph Galowin, his assigns or legal representatives, take notice:

A petition for cancellation having been filed in this Office by Stauffer Chemical Company, 636 California St., San Francisco, Calif., to effect the cancellation of trade-mark registration of Ralph Galowin, 2815 West 2d Street, Brooklyn, N. Y., No. 280,147, dated February 10, 1931, and the notice of such proceeding sent by registered mail to the said Galowin at the said address having been returned by the post office undeliverable, notice is hereby given that unless said Galowin, his assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the cancellation will be proceeded with as in the case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

THOMAS F. MURPHY,
July 6, 1948. *Assistant Commissioner of Patents.*

REGISTER OF PATENTS AVAILABLE FOR LICENSING OR SALE

(The "Groups" appearing after the patent abstracts are based on the Standard Industrial Classification Manual, Vol. I. Manufacturing Industries, Executive Office of the President, Bureau of the Budget)

Pat. 2,439,661. SYSTEM FOR TRUE AMPLITUDE MODULATION OF RADIO WAVES. Patented Apr. 13, 1948. The channel width required for the transmission of an amplitude-modulated wave is reduced by eliminating side bands so that only a wave of varying amplitude and single constant frequency remains. The modulated carrier frequency and a signaling current of the system are limited to remove a portion of the amplitude modulation from the currents. A discriminator, responsive to the limiting means, produces an output substantially proportional to the frequency deviation of the limited currents from the carrier frequency. A second source of carrier currents is modulated with the output current of the discriminator. The two currents of the modulators are combined in a mixer to the degree and phase relationship that a modulated current is produced unaccompanied by extraneous currents of side band frequencies. (Owner) D. B. Keever, Colfax, N. C. Group 36—61. Reg. No. 9,783.

Pat. 2,240,640. FLEXIBLE DOUBLE SKIRT PISTON. Patented May 6, 1941. Piston has a concave head with a dome in the center, an upper skirt, and a lower skirt of slightly smaller diameter. Horisontal fins on interior of dome catch and retain oil from crankcase for cooling piston head. The space between piston head and upper skirt forms an annularly extending oil-receiving chamber having ducts leading to wrist pin bearings in lower skirt. The lower edge of upper skirt is interiorly beveled, while top edge of lower skirt is inwardly tapered. On down stroke of piston, beveled edge of upper skirt scrapes oil from cylinder wall and introduces it into the oil chamber. This oil lubricates wrist pin bearings and cylinder wall, and also aids in cooling piston head. (Owners) Edward J. Ducate, Edward J. Dee, and Orville H. Wilkinson. Address correspondence to John B. Traylor, 825 First National Bank Bldg., Denver 2, Colo. Group 35—69. Reg. No. 9,784.

Pat. 2,068,300. AEROPLANE. Patented Jan. 19, 1937. The purpose of this patent is to improve the lift drag ratio of this plane by eliminating structural resistance without hampering maneuverability. Briefly described, this is done by enclosing all bracing and controls within the wings, fuselages, and control surfaces so that the fuselage serves primarily as a direction fin area shaped so as to lessen drag. Other features include retractable landing wheels, the elimination of the conventional type of radiator which occupies the nose of the fuselage by arranging the radiator surface to exactly coincide with the external skin of the wing surface, etc. (Owner) James V. Martin, Martin Development Co., Rochelle Park, N. J. Group 37—21. Reg. No. 9,785.

Pat. 2,231,524. OCEANPLANE. Patented Feb. 11, 1941. Group 37—21. Reg. No. 9,786.

Pat. 2,365,205. WAVE RIDING SPEED VESSEL. Patented Dec. 19, 1944. Group 37—21. Reg. No. 9,787.

These two patents relate principally to the wing structure of twin-hull flying boats especially adapted to withstand the pounding of waves in rough water. Trussing is enclosed within the main wing, as already described in Patent 2,068,300. The wings house multideck structures which provide space for passengers and cargo as well as storage room for heavy cargo. In Patent 2,231,524 the main wing includes a protected passageway to permit crew and passengers to pass from one body float interior to the other. A trackway is supported adjacent the upper wall of the passageway and extends to above a pair of hatchways so that a traveling motorized tackle can be moved along the trackway to lower cargo down either of the hatchways. Patent 2,365,205 shows a main wing having a substantially straight central portion and upwardly bent wing tips to raise ends of the wings above the crest of the waves. Many other features are included in both patents. (Owner) James V. Martin, Martin Development Co., Rochelle Park, N. J.

Pat. 2,439,742. DISTORTABLE CIRCLE TIRE. Patented Apr. 13, 1948. Rim and tire combination is made up of an outer distortable tread clamped to smaller distortable hoops arranged at right angles, the smaller hoops spacing the tread from the wheel rim. The smaller hoops comprise multiple strips of rubber bonded to hickory enclosed within an envelope made of rubber. The tire is made up of several flexible tread hoops having a plastic or hickory filler. The assembly is held together by an interfitting lug and pin arrangement. The construction allows the maximum distortion of the smaller hoops to be obtained in compression, tension, and twisting movements. The adjacent bearing surfaces which contact the hoops are flat so that re-curving of the hoops under flexing is prevented. (Owner) James V. Martin, Martin Development Co., Rochelle Park, N. J. Groups 25—99; 30—11; 37—21; 38—31. Reg. No. 9,788.

2,436,715. ANTISKID TIRE CHAIN. Patented Feb. 24, 1948. Consists of a pair of side chains with connecting cross chains which are held tightly by locking means over tread of tire. The outer side chain is a closed circle. Inner side chain is open, to pass over treads, and carries a loop at one end. A cross chain is connected to other end of inner side chain by a bent-bar connecter which locks in loop when cross chain is pulled through the loop. Cross chain is locked by latchet means to outer chain. (Owner) George Everline, 64½ East Franklin St., Hagerstown, Md. Group 32—49. Reg. No. 9,789.

Pat. 2,439,623. SUPPORT FOR VEHICLES. Patented Apr. 13, 1948. Attachment for side of a truck supports and holds rods, pipes, tubes, etc. in a vise-like manner and permits sidewise loading or unloading of such material. It consists of a bracket having a lower fixed arcuate jaw and an upper removable jaw. A pair of threaded rods surrounded by coil springs have their lower ends hinged to lower jaw so that they may be swung downwardly to out-of-way position or upwardly to upright position to receive upper jaw. Wing nuts on rods are tightened to force jaws into resilient clamping relation. The rods are

slid sidewise into lateral U-shaped openings in lugs in upper jaw so that it is necessary only to loosen wing nuts to permit removal of upper jaw. (Owner) Thomas G. Howells, 34 Ella St., Girard, Ohio. Groups 33—59; 38—22. Reg. No. 9,790.

Pat. 2,434,866. TYPEWRITER PAPER GUIDE. Patented Jan. 20, 1948. An auxiliary paper guide prevents carbon copies being typed from encircling the platen. An upwardly inclined plate (of plastic or the like) is supported parallel to the platen roll by side arms having clamp ends for attachment to the side arms of the shiftable paper-guiding frame. When in position, lower edge of plate extends to top of platen roll and guides under sheets upward as they are rolled up. May be manufactured as part of typewriter or attached to old machine. Modifications shown. (Owner) Benjamin Rubin, 4723 North Franklin St., Philadelphia 20, Pa. Groups 25—99; 33—73; 35—72; 39—81. Reg. No. 9,791.

Pat. 2,439,681. APPARATUS FOR LAYING ROLL ROOFING. Patented Apr. 13, 1948. By means of this apparatus a roll of roofing material may be automatically fed onto roof smoothly in overlap strip lengths. Carriage comprises a chassis beam having an axle section on which the roll is supported. Chassis beam has a rotatable tread wheel at fore end and a presser arm at other end for holding material on roof as it is unrolled. Axle has a detachable spur walking gear and a movable guide collar for rolls of required lengths. A track rail is removably secured on roof in spaced parallel relation to carriage. An extension on axle carries a detachable guide member and track runner which couple slidably to track rail. (Owner) E. W. Ankney, R. F. D. 2, Acme, Pa. Groups 29—32; 35—69. Reg. No. 9,792.

Pat. 2,094,948. APPARATUS FOR DIVIDING OR COMBINING STREAMS OF FLUENT MATERIALS. Patented Oct. 5, 1937. Apparatus has several sections in which the ducts of one section communicate with any number of ducts in adjacent sections. As an example, in an apparatus for dividing an airstream laden with powdered coal to supply two fuel burners: A main conduit carrying coal dust is divided by equally spaced transverse partitions. The ducts formed are alternately connected to a second conduit leading to one burner and to a third conduit leading to another burner, ensuring a substantially equal supply to each burner. The ducts may be of any shape. The apparatus is equally applicable to liquid or gaseous fuel burners, as a sampling device, or apparatus that requires a stream of material to be mixed, divided, etc. (Owners) Thomas Frederick Hurley and Robert Dickinson. Address correspondence to Glascock, Downing & Seebold, National Press Bldg., 14th and F Sts., N. W., Washington, D. C. Group 35—69. Reg. No. 9,793.

Pat. 2,403,525. CATTLE GUTTER GUARD. Patented July 9, 1946. A guard works automatically to prevent cow in a stall from stepping backward into gutter. Is easily placed in gutter by means of a hand bracket. Comprises an adjustable sectional base, and a striking yoke pivotally supported by the base and automatically operated by a treadle. When cow steps backward on treadle, its weight depresses the treadle and the striking yoke flies upward, striking the cow and causing it to move into stall. Blow is cushioned by a leaf spring fitted to yoke. Designed to help keep dairy cows in clean and healthy condition. (Owner) Albert Hardrath, Greenwood, Wis. Groups 33—49; 35—22—69. Reg. No. 9,794.

Pat. 2,439,735. ELECTRICAL CONTROL SYSTEM. Patented Apr. 13, 1948. Several systems to automatically control the phase relationship of two or more motor-driven mechanisms remotely located from each other are described in this patent. Broadly stated, each of several stations (in a television system, for example) has a motor-driven rotary disk operated at a speed which corresponds to a signal received from a source of alternating current. Photoelectric cells controlled by the signals effect momentary changes in the speed of any one of the motors to maintain or synchronize the position of each of the disks in step with the other. (Owner) John H. Homrighous, 1029 Wenonah Ave., Oak Park, Ill. Group 36—61. Reg. No. 9,795.

The following five patents relating to automobile headlights are owned by Grover C. Singer, P. O. Box 447, Brownsville, Tex.

Pat. 2,398,968. ELECTRIC LAMP. Patented Apr. 23, 1946. Especially intended as an automobile headlight, the bulb and base of this lamp are transparent and integrally formed. The base has an axial passage closed by a plug carrying lead-in wires with filaments supported on their inner ends and contact prongs on their outer ends. Group 34—81. Reg. No. 9,796.

Pat. 2,398,969. ELECTRIC LAMP. Patented Apr. 23, 1946. A lamp for automobiles comprising an integral transparent bulb and base, the latter having an axial passage closed by a fused plug, the inner face of which serves as a reflector. In this lamp the bulb carries on its inner face reflecting material. If desired, the reflecting material may be applied in triangular-shaped sections. Group 34—81. Reg. No. 9,797.

Pat. 2,398,970. ELECTRIC LAMP. Patented Apr. 23, 1946. Herein the base and globe of the lamp are provided with reflective material on their inner sides. Also the end of the globe is provided peripherally with a ring-shaped reflecting surface. There is a suggestion also of softening the direct rays from the lamp filaments by providing a central reflector on the inner side of the end or face of the globe. The lamp is intended for use on automobiles or as a spot light. Group 34—81. Reg. No. 9,798.

Pat. 2,398,971. ELECTRIC LAMP. Patented Apr. 23, 1946. Designed for use as an automobile headlight of the sealed beam type in which the rear of the bulb has a stem in which is sealed a plug carrying the lead-in wires supporting the filaments. The latter surround a reflector directing the light rays laterally. Said rays are received on a reflecting coating on the inner surface of the bulb and directed forwardly in soft non-blinding beams. Group 34—81. Reg. No. 9,799.

Pat. 2,438,684. ELECTRIC LAMP. Patented Mar. 30, 1948. A mounting ring for an automobile headlight of the sealed beam type comprising a thickened ring having relatively thin flanges, embracing the periphery of the globe where the side wall meets the top. The inner surfaces of said flanges may be silvered. If desired, the side wall of the globe may be provided with corrugations and the corresponding flange of the mounting ring formed to embrace them. There are also provided on the ring perforated tongues which serve as means for securing the lamp to a fixed support. Group 34—81. Reg. No. 9,800.

Pat. 2,314,635. RAKE. Patented Mar. 23, 1943. Rake is useful for cutting radial runners of Bermuda and other grasses. Single edge razor blades forming the tines of the rake are removably clamped between adjacent pairs of a series of blocks in rake head. The abutting faces of the blocks are rabbeted to receive the shouldered rear edges of the blades. The blocks are positioned and held between a flexible front strip and a rigid backing strip. When a pair of bolts extending through opposite ends of the strips and the end blocks are tightened, the front strip is sprung into slight curvature and the blades tightly clamped between the blocks. (Owner) Lonnie A. Seldomridge, 1700 East Carson St., Torrance, Calif. Group 33—52. Reg. No. 9,801.

Pat. 2,283,390. EGG HOLDING DEVICE. Patented May 19, 1942. Holder for a hot boiled egg facilitates removal of egg meat without burning fingers. It consists of an oval receptacle of rubber or other resilient material formed of a pair of cup-sections hinged at the rim with a handle at each end. In use, receptacle is closed to envelop opposite ends of egg, and egg cut transversely at center. When opened, each cup grips its half of egg by vacuum and friction to prevent shell from turning while meat is removed. Shell is ejected by flexing dome of cups. (Owner) Lonnie A. Seldomridge, 1700 East Carson St., Torrance, Calif. Groups 30—52; 34—99; 40. Reg. No. 9,802.

Dedicated Patent

The following patent has been dedicated to the free use of the people in the territory of the United States by the owners, Edward R. McGovran, of Hyattsville, Md., and Wilbur A. Gersdorff, of McLean, Va.

Pat. 2,441,433. INSECTICIDES. Patented May 11, 1948. (Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757.) Pyrethrum and 1,3 diphenoxypropane incorporated in a carrier such as kerosene, kaolin, or water form an insecticide harmless to human beings and domestic animals, but highly toxic to insects. The insecticide may be applied as a spray, dust, or in any other way and used without injury to household furniture, farm equipment, buildings, etc. Group 28—33.

BULLETIN OF DECISIONS OF PATENT OFFICE ON TRADE-MARKS

RENDERED DURING JUNE, 1948

YOUNG v. LEVER BROTHERS COMPANY, Cancellation No. 4592.

In a decision rendered June 1, 1948 (169 Ms. Dec. 800, 77 USPQ 538), *Commissioner Kingsland* reversed the action of the Examiner of Interferences, who had sustained the petition of Young, of Philadelphia, Pa., to cancel the registration of the trade-mark "LUX PEARLS," No. 413,331, issued to Lever Brothers Company, of Cambridge, Mass., the word "PEARLS" being disclaimed apart from the mark, and the goods to which the mark is applied being described in the registration as soap in finely divided pearl-like form. Petitioner relied upon prior ownership and use of the notation "PEARL" and "PEARL BORAX" for soap, as well as on renewed registration No. 57,309 for the notation "PEARL" in association with the words "BORAX SOAP."

After noting that the Examiner properly ruled that petitioner has established prior use of the word "PEARL" as associated with the words "BORAX SOAP," it was held that there can be little doubt that the word "PEARL" as applied to soap flakes has for all practical purposes a descriptive connotation and is used by respondent in that way, although even if the descriptive character of the word "PEARLS" as applied to respondent's soap powder were open to doubt, all such doubt should be decided in favor of the respondent in view of the prominent trade-mark use of the word "LUX."

It was further held that the word "PEARLS" as applied to respondent's soap products is certainly a term so commonly used to describe articles of this kind as to practically reduce its trade-mark significance to a minimum, so that it follows that the word "LUX" is the outstanding feature of respondent's registration No. 413,331 and that the subordinate word "PEARLS" was properly disclaimed by the respondent as unregistrable matter.

EX PARTE THE MASTER ELECTRIC COMPANY, Serial No. 471,267.

In a decision rendered June 3, 1948 (169 Ms. Dec. 813, 77 USPQ 542), *Assistant Commissioner Daniels* reversed the action of the Examiner of Trade-Marks who had refused to register to The Master Electric Company, of Dayton, Ohio, a composite mark consisting of the word "MASTER" appearing in a panel within a generally octagonal design as a trade-mark for electric generators and parts thereof, gas and gasoline engine driven generator sets, electric motors, electric switches and voltage regulating units, under the Trade-Mark Act of 1905.

After noting that the refusal to register is based on a prior registration of a third party under the act of 1905, it was held that while the word forming part of applicant's composite mark must be considered quite similar to that shown by the reference it is not identical, and the goods of the reference, while also involving electrical products, are neither identical nor ordinarily used in the same establishments.

After noting that the record discloses that applicant is the owner of prior registrations under the act of 1905 of marks also involving this same word both alone and displayed on an octagonal background, and is also the owner of other subsequent registrations which include the word and the octagonal background, the goods including some of those mentioned in the present application, it was held that the additional products set out in this application are so similar to the others as to be regarded as constituting a natural expansion of applicant's business, so that, on the specific circumstances disclosed by the record presented, any doubt as to right to registration should be resolved in applicant's favor.

BABS CREATIONS v. EMMETT M. KING, Oppositions Nos. 24,894 and 24,895.

In a decision rendered June 3, 1948 (169 Ms. Dec. 809, 77 USPQ 540), *Assistant Commissioner Daniels* affirmed the actions of the Examiner of Trade-Mark Interferences sustaining the oppositions of Babs Creations, of New York, N. Y., to the registration by Emmett M. King, of New York, N. Y., under the Trade-Mark Act of 1905, of the marks "Forever Amber" and the French equivalent "Toujours Amber" each applied to perfume, cologne, toilet water, rouge, lipstick, and face powder, "Amber" being disclaimed. The notice of opposition alleged prior use and ownership by opposer of the trade-mark "Forever Yours" on cosmetic products and sets up ownership of registration of this mark under the Trade-Mark Act of 1905, registration No. 380,382, registered by opposer's alleged predecessor, for perfumes, face powder, lipsticks, face creams, lotions and hair tonics.

After noting that similarity of the goods is conceded, it was held that the only questions for decision are whether or not opposer's proof of title to such registration was sufficient and whether or not the marks are confusingly similar within the meaning of section 5 of the Trade-Mark Act of 1905.

It was held that under section 10 of the Trade-Mark Act of 1905 certified copies of assignments are competent and adequate prima facie evidence of such assignments, and sufficient to show title to the registrations involved, and that since applicant offered no evidence to rebut this prima facie showing the proof of opposer's title to the registration referred to must be accepted as adequate.

It was held that applicant's motives in selecting a mark are ordinarily immaterial, and that even

though descriptive or disclaimed portions of a mark cannot be wholly disregarded, it must be considered that in this case "Forever" or its French equivalent would be regarded by the public as the conspicuous or significant feature of the mark, so that taken in their entireties the marks are confusingly similar within the meaning of the confusion-in-trade clause of section 5 of the Trade-Mark Act of 1905.

WELLS LAMONT CORPORATION v. BLUE RIDGE OVERALLS COMPANY, Opposition No. 24,599.

In a decision rendered June 4, 1948 (169 Ms. Dec. 804, 77 USPQ 542), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Mark Interferences sustaining the opposition of Wells Lamont Corporation, of Chicago, Ill., to the application, under the Trade-Mark Act of 1905, of Blue Ridge Overalls Company, of Baltimore, Md., to register a mark comprising the words "BIG BOMBER" printed on an arcuate panel in association with a representation of an airplane, as a trade-mark for overalls, namely, bib overalls, waistband overalls, coveralls (combination pants and jackets), and overall jackets. Opposer relied upon ownership and prior use of the trade-mark "BROWN BOMBER" shown in its registration No. 377,222, under the act of 1905, for work gloves of combined leather and fabric.

It was held that the Examiner of Interferences was right in ruling that work gloves and overalls must be considered to have the same descriptive properties.

It was held that the Examiner of Interferences was right in ruling that the marks of the parties are confusingly similar within the meaning of section 5 of the Trade-Mark Act of 1905.

It was held that the prima facie showing of ownership attributed to the registration relates not only to the registration date but to the filing date of the application therefor.

It was held that the Examiner of Interferences was right in holding that opposer has established priority both by its registration and the stipulated testimony.

NANCY ANN DRESSED DOLLS (NANCY ANN STORYBOOK DOLLS, INC., ASSIGNEE, SUBSTITUTED) v. DOMENICK IPPOLITO, Opposition No. 24,574.

In a decision rendered June 4, 1948 (169 Ms. Dec. 814, 77 USPQ 545), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Interferences sustaining the opposition of Nancy Ann Dressed Dolls (Nancy Ann Storybook Dolls, Inc., Assignee, Substituted), of San Francisco, Calif., to the application of Domenick Ippolito, of Glendale, Calif., to register, under the Trade-Mark Act of 1905, as a trade-mark for dolls a mark comprising the words "Nursery Rhymes."

It was held that while none of opposer's marks as such appear to resemble "Nursery Rhymes" either in sound, appearance or meaning, the Examiner of Interferences correctly found as alleged by opposer that the expression "NURSERY RHYMES" is a descriptive or generic designation of an entire line of dolls sold by opposer, and that opposer and its customers are entitled to use of such descriptive designation to identify this line of goods even though any use of the term in connection therewith has been oral and they have never actually applied it to their goods.

After noting that in addition to finding that opposer was entitled to maintain its opposition for the foregoing reasons, and the Examiner of Interferences proceeded ex parte to consider applicant's mark and to refuse it on the ground of its descriptiveness, in response to applicant's contentions that the words are not descriptive of the goods and that neither the Examiner of Interferences nor this Office on appeal has authority to make such ex parte ruling in such a matter, it was held that there can be little question as to the correctness of the holding that the term is descriptive and that as to the right of the Examiner to consider this ex parte issue with reference to applicant's mark there can be no question but that it is not only the Examiner's right but his duty to consider this in an appropriate case.

NANCY ANN DRESSED DOLLS (NANCY ANN STORYBOOK DOLLS, INC., ASSIGNEE, SUBSTITUTED) v. DOMENICK IPPOLITO), Opposition No. 24,875.

In a decision rendered June 4, 1948 (169 Ms. Dec. 818, 77 USPQ 547), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Mark Interferences sustaining the opposition of Nancy Ann Dressed Dolls (Nancy Ann Storybook Dolls, Inc., Assignee, Substituted), of San Francisco, Calif., to the application of Domenick Ippolito, of Glendale, Calif., to register the word "TOYLAND" as a trade-mark for dolls under the Trade-Mark Act of 1905.

It was held that the Examiner was right in ruling that certain marks set up by the opposer are not confusingly similar to that of applicant.

In response to applicant's contention that the notice of opposition did not set up descriptiveness as one of the grounds of opposition, and that therefore the Examiner should not have considered this, it was held that it seems apparent that this is one of the grounds upon which opposer relied and that the action of the Examiner in treating the pleadings as raising this issue is considered proper.

It was held that "TOYLAND" dolls appear to be the same as "toy department" dolls, and as such, clearly descriptive of the goods.

It was further held, to avoid possible further question as to the pleadings, that it is also found ex parte and apart from the opposer's right to sustain the opposition that the mark is merely descriptive of the goods, so that applicant is not entitled to the registration for which he has made application.

EX PARTE NATIONAL RECREATION ASSOCIATION, INC., Serial No. 495,449.

In a decision rendered June 7, 1948 (169 Ms. Dec. 822, 77 USPQ 632), *Assistant Commissioner Daniels*

affirmed the action of the Examiner of Trade-Marks refusing to register to National Recreation Association, Inc., of New York, N. Y., the notation "The Playground" under the Trade-Mark Act of 1905 as a trade-mark for a weekly magazine.

It was held that the contents of the periodical referred to deal with playground supervision and activities and that the mark is accordingly clearly descriptive.

In response to applicant's argument that this mark was formerly registered under the act of 1905, and that that registration was permitted to expire through inadvertence, it was held that whatever may have been the interpretation of the law at the time the earlier registration was allowed, under presently controlling decisions it cannot be registered under that act.

In response to applicant's contention that the Trade-Mark Act of 1946 contemplates registration of such marks, it was held that whether this mark might or might not be registrable under the Trade-Mark Act of 1946, and in accordance with the procedure for registration set up therein, is not material here, since this application was filed and refused registration under the act of 1905.

EX PARTE HALTER'S PRETZELS, INC., Serial No. 487,046.

In a decision rendered June 7, 1948 (169 Ms. Dec. 820, 77 USPQ 631), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Marks refusing to register to Halter's Pretzels, Inc., of Canton, Ohio, the word "tem-tee" as a trade-mark under the act of 1905 for potato chips, salted popcorn, cheese flavored popcorn, pretzels, pretzel sticks, and cheese sticks, in view of a prior registration, No. 235,366, of the word "TEMPTY" for cocoa syrup for milk beverages, and in view of certain other registrations.

It was held that both applicant's products and the cocoa syrup of the reference are concededly sold in grocery stores and to the same class of purchasers, so that they must accordingly be held to be goods of the same descriptive properties.

It was held that "TEMPTY" and "tem-tee" are admittedly similar and that while applicant contends that they are specifically different they are certainly extremely similar in both sound, appearance, and, apparently in meaning.

After noting that applicant has submitted a consent by the owner of the reference referred to, it was held that in view of the similarity of both the marks and the goods, such consent cannot entitle applicant to the registration.

The other registrations cited by the Examiner were held to be equally pertinent.

After noting that applicant's counsel has submitted certain affidavits tending to indicate nonuse or abandonment of these other registrations, it was held that the showing is not considered complete, and that while it should have been made before the Examiner of Trade-Marks, these affidavits have been considered.

It was held that if applicant's mark were considered registrable over registration No. 235,366 it would be desirable to remand the matter to the Examiner for consideration of this point and to permit applicant to attempt to make a further showing of such alleged abandonment, but that no useful purpose would be served in taking such action at this time, since the registration must, in any event, be refused without reference to that question.

EX PARTE SPERRY GYROSCOPE COMPANY, INC., Serial No. 471,886.

In a decision rendered June 8, 1948 (169 Ms. Dec. 823, 77 USPQ 634), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Marks refusing the application of Sperry Gyroscope Company, Inc., of Brooklyn, N. Y., to register the word "ECHO BOX," as a trade-mark for high-frequency electrical testing apparatus for use in monitoring high frequency radio equipment, under the Trade-Mark Act of March 19, 1920.

It was held that it being apparent from this record that an "ECHO BOX" is the generic name of the apparatus for which registration is sought, by those who use and deal with it, the phrase is, as found by the Examiner of Trade-marks, incapable of functioning as a trade-mark.

LEHN & FINK PRODUCTS CORPORATION v. WYETH INCORPORATED, Opposition No. 24,936.

In a decision rendered June 8, 1948 (169 Ms. Dec. 825, 77 USPQ 633), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Mark Interferences sustaining the opposition of Lehn & Fink Products Corporation, of Bloomfield, N. J., to the application of Wyeth Incorporated, of Philadelphia, Pa., to register the word "AMPHOCILLIN" under the Trade-Mark Act of 1905 as a trade-mark for combined dosage penicillin and aluminum hydroxide gel. Opposer alleged ownership and prior use of the trade-mark "AMPHYL," and of registration thereof, No. 307,869, for antiseptic and disinfectant preparation recommended for germicidal and sterilizing uses; as a personal deodorant and after-shaving lotion; for use in douching, irrigations, and personal hygiene generally; in cases of skin irritations, rashes, itches, burns, sunburns, sore throat, ringworm of the foot, stings and insect bites, and as an antiseptic agent in cutting oils and greases in engineering and industrial plants generally.

It was held that opposer's registration, in the absence of evidence to the contrary, is prima facie evidence of its ownership and use of the mark on the products referred to.

It was held that the goods of both parties are considered to be medicinal preparations, and to have the same descriptive properties, since the fact that one is for internal use and the other for external use is of no consequence.

It was held that the marks must be considered confusingly similar within the meaning of the act, both in sound and in appearance.

EX PARTE CHARLES SHELDON, Serial No. 475,702.

In a decision rendered June 9, 1948 (169 Ms. Dec. 833, 77 USPQ 636), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Marks refusing to register to Charles Sheldon, of Springfield, Mass., the words "AMERICAN GIRL PHILHARMONIC," as a trade-mark under the act of 1905, for scripts for radio broadcasts issued from time to time, in Class 38, Prints and Publications, on the ground of lack of proper trade-mark use and in view of a previously registered trade-mark, "The American Girl," for a publication, registration No. 214,946, renewed.

After referring to the specimens submitted consisting of letter-size sheets of paper, upon which appear the words "AMERICAN GIRL PHILHARMONIC" together with an address and telephone number, it was held that the Examiner was right in ruling that the use of the mark on such letterheads is insufficient to show trade-mark use, since the specimens show clearly that the words are not used as a trade-mark, but fall within the definition of a trade name rather than being a trade-mark authorized to be registered in the United States Patent Office.

As to the refusal to register on the ground of the previous registration of "The American Girl," it was held that the two marks are obviously similar.

In response to applicant's contention that his goods constitute a publication, it was held that while this may be questioned, if the goods do constitute a print or publication, they clearly have the same descriptive properties as those of the reference cited, the fact that these publications may appeal to a different group of customers and may differ radically in price being immaterial, so that refusal of the mark on the reference cited by the Examiner is therefore necessary.

EDWARD MCROSKEY MATTRESS COMPANY v. MILWAUKEE BEDDING COMPANY, Opposition No. 24,401.

In a decision rendered June 9, 1948 (169 Ms. Dec. 828, 77 USPQ 638), *Assistant Commissioner Murphy* affirmed the action of the Examiner of Trade-Mark Interferences sustaining the opposition of Edward McRoskey Mattress Company, of San Francisco, Calif., to the application of Milwaukee Bedding Company, of Milwaukee, Wis., for registration of the mark "MOR-FLEX" for use upon cotton felt in bales and bats, and holding applicant not entitled to the registration sought. Opposer relied upon its mark "AIRFLEX" shown in registrations Nos. 226,624 and 383,018 for products therein described as mattresses, bedsprings, pillows, couches, pads and cushions, and in addition to the recited products, has pleaded use of its mark upon upholstery.

In response to opposer's contention that it should have been entitled to amend the notice of opposition more than thirty days after the publication of the mark sought to be registered to add another item sold under its mark and to present evidence concerning sales of this item, it was held that the Examiner's ruling denying opposer's motion to amend and granting applicant's motion to strike to the extent of refusing to consider the testimony offered relative to the use of opposer's mark on goods held not properly included in the pleadings was correct.

It was held that the goods of the parties appear clearly to be goods of the same descriptive properties as contemplated by the act.

It was held that the similarities of the two marks outweigh the differences, that the differences in the first syllables "Mor" and "Air" are not sufficient to avoid the likelihood of confusion resulting from the concurrent use of the two marks, and that any doubt which there may be as to this likelihood of confusion should be resolved against the newcomer.

EX PARTE ELIZABETH ARDEN SALES CORPORATION, Serial No. 484,076.

In a decision rendered June 10, 1948 (169 Ms. Dec. 835, 77 USPQ 640), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Marks refusing to register to Elizabeth Arden Sales Corporation, of New York, N. Y., as a trade-mark under the act of 1905, the word "PAT-A-KAKE" for creamy powder foundation to be patted on the skin, "KAKE" being disclaimed, in view of a prior registration, No. 350,402, of the word "PAN-CAKE" for a cosmetic in the nature of a solidified cream used for a make-up base.

After noting that much of applicant's argument refers to the so-called suggestive nature of the mark and attacks the mark of the reference on the ground of descriptiveness, it was held that the latter is not subject to attack in this proceeding.

After further noting that both points are brought up to indicate a difference in the meaning between the marks, it was held that whether or not there is a basis for such argument, there is no doubt as to the correctness of the Examiner's action in holding that in this case the similarities of sound and appearance are sufficient to indicate a likelihood of confusion, so that the marks are confusingly similar within the meaning of section 5 of the Trade-Mark Act of 1905, and registration was therefore properly refused.

EX PARTE ELIZABETH ARDEN SALES CORPORATION, Serial No. 495,945.

In a decision rendered June 10, 1948 (169 Ms. Dec. 836, 77 USPQ 641), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Marks refusing to register to Elizabeth Arden Sales Corporation, of New York, N. Y., as a trade-mark for creamy powder foundation to be patted on the skin, under the act of 1905, the word "PAT-A-KAKE," displayed in a slightly curved form over a design, with the words "Elizabeth Arden" appearing below the design, also displayed in a somewhat curved form, "KAKE" being disclaimed.

Referring to the refusal on the ground of a reference similar to that involved in Serial No. 484,076, supra, it was held that, as to the word "PAT-A-

KAKE," the comments in the decision as to Serial No. 484,076, supra, apply.

Referring to the refusal to register because of the refusal of applicant to disclaim the words "Elizabeth Arden," admittedly the name of an individual, and which the Examiner held was not displayed in a distinctive manner, it was held that an examination of the drawing and specimens shows that the name "Elizabeth Arden," while written in script and printed so that the words give a slightly curved appearance, is merely a normal use of such name on a product, and cannot be considered as distinctively displayed.

EX PARTE SIMMONS-BOARDMAN PUBLISHING CORPORATION, Serial No. 495,412.

In a decision rendered June 16, 1948 (169 Ms. Dec. 838, 77 USPQ 660), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Marks refusing to register to Simmons-Boardman Publishing Corporation, of Wilmington, Del., and New York, N. Y., the words "LOCOMOTIVE CYCLOPEDIA" as a trade-mark under the act of March 19, 1920, for a cyclopedia published triennially.

After noting that applicant concedes that the title of a book is not a trade-mark and cannot be registered, it was held that "LOCOMOTIVE CYCLOPEDIA" must be considered a title rather than a trade-mark for a series of cyclopedias of locomotives, even though a series of such volumes have and may be published.

SNOWHITE GARMENT MFG. CO. *v.* BURLINGTON MILLS, INC., Cancellation No. 4711.

In a decision rendered June 16, 1948 (169 Ms. Dec. 839, 77 USPQ 661), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Interferences dismissing the petition of Snowhite Garment Mfg. Co., of Milwaukee, Wis., to cancel under section 2 of the Trade-Mark Act of March 19, 1920, a registration of Burlington Mills, Inc., of Burlington, Wis. The registration sought to be canceled comprises the word "Sno-White," registered January 31, 1939, under the Trade-Mark Act of March 19, 1920, on an application filed October 31, 1938, for white felt and white faced felt ironing board pads and covers, and also for white felt and white faced felt sold in yardage, in Class 50, Merchandise Not Otherwise Classified. The petition for cancellation alleges prior use by petitioner of "Snowhite" as a trade-mark for nurses' uniforms and capes, hospital and professional garments, covers for dental chairs, ironing board covers and shower curtains, and relies upon such use as negativing registrant's right to registration under the bona fide use clause of section 1(*b*) of the act of 1920.

It was held that petitioner failed to sustain the burden of proof of showing use of its mark on ironing board covers, shower curtains and chair covers since about 1932, so that its sale of these products cannot be considered as indicating that registrant was not a bona fide user of the mark during the critical one year period prior the filing of its application.

After noting that there is no question of petitioner's use of the mark on the garments referred to beginning long prior to any use by the registrant and continuing up to the time of taking testimony in this proceeding, in response to petitioner's contention that such garments and registrant's white felt ironing board covers are goods having the same descriptive properties, it was held that the Examiner of Interferences was right in ruling that such goods differ in their essential characteristics, possess an entirely different trade appeal, and that the respective goods are unrelated in their respective fields of use.

It was held that arguments with respect to the use of the word as part of petitioner's corporate name are not pertinent in a proceeding of this character under the Trade-Mark Act of 1920, particularly in view of the fact that the goods have been found to possess different descriptive properties.

EX PARTE I. SCHNEIERSON & SONS, INC., Serial No. 471,960.

In a decision rendered June 17, 1948 (169 Ms. Dec. 847, 77 USPQ 664), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Marks refusing to register to I. Schneierson & Sons, Inc., of New York, N. Y., under the Trade-Mark Act of February 20, 1905, the words "CREPE DIVINE" as a trade-mark for ladies' chemises, princess slips, bloomers, step-ins, nightgowns and ladies' uniforms for work purposes, and children's chemises, princess slips, bloomers, step-ins and nightgowns of a textile fabric, the word "CREPE" being disclaimed, in view of a prior registration, No. 285,154, which discloses the words "Divine Form," displayed within the outline of an elongated diamond shaped border for ladies', women's and misses' undergarments namely, brassières, step-in underdrawers, girdles, panties and bandeaux.

It was held that there can be no question as to the similarity of the goods.

After noting that "CREPE" admittedly has no trade-mark significance, as it is merely the name of a fabric, it was held that, comparing these marks as a whole, they must be regarded as confusingly similar within the meaning of section 5 of the Trade-Mark Act of 1905, and the fact that the reference includes an additional word and is displayed within an outline cannot distinguish these marks.

EX PARTE I. SCHNEIERSON & SONS, INC., Serial No. 487,482.

In a decision rendered June 17, 1948 (169 Ms. Dec. 848, 77 USPQ 665), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Marks refusing to register to I. Schneierson & Sons, Inc., of New York, N. Y., a mark comprising the word "THRIFTEX," under the Trade-Mark Act of 1905, as a trade-mark for ladies' chemises, panties, slips, bloomers, pajamas, step-ins, dresses, housecoats, gowns, nightgowns, and ladies' uniforms for work purposes, and children's chemises, panties, slips, bloomers, pajamas, step-ins, dresses, housecoats, gowns and nightgowns of a textile fabric, in view of two prior registrations registered under the Trade-Mark Act of 1905.

After noting that the one considered most similar is a registration of "Thrif-Tees-" as a trade-mark for corsets, corselettes, brassières, girdles, underdrawers, bandeaux, panties, envelope chemises, vests, bloomers, petticoats, slips, and garter belts, registered prior to any date claimed by applicant, and accepting the applicant's contention that "thrift" has been commonly used on various products, including products similar to those under consideration, and as applied to such goods is of a highly suggestive nature, it was held that as used with the suffixes involved in this application and registration examination of the marks in their entireties as presented must lead to the conclusion that they are so similar as to be confusingly similar within the meaning of the act.

RAYMOND LABORATORIES, INC., *v.* DUART MANUFACTURING CO., LTD., Opposition No. 24,297.

In a decision rendered June 17, 1948 (169 Ms. Dec. 843, 77 USPQ 662), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Interferences sustaining the opposition of Raymond Laboratories, Inc., of St. Paul, Minn., to the application of Duart Manufacturing Co., Ltd., of San Francisco, Calif., to register under the act of 1905 the notation "Ray .Du" as a trade-mark for hair rinse, and denying applicant's motion to remand for further testimony. Opposer relied upon its prior use of a number of marks, including, among others which need not be considered for the purposes of this appeal, "NEW RAY," "COLD RAY," "RAY FLUFF," "THUR-RAY" and "RAYETTE," upon various products used in beauty parlors, including hair rinses, and which are concededly goods of the same descriptive properties as applicant's hair rinse.

In response to applicant's contention that the marks do not bear such near resemblance as to be likely to cause confusion in trade, it was held that the Examiner of Interferences correctly found that in sound and appearance, their resemblance rather than their differences predominate to the extent that the confusion in trade would be likely by their concurrent use on goods as closely related as those here involved.

In response to applicant's arguments as to the common use of the syllable "Ray" in the trade-marks of others for hair toilet preparations it was held that it is not believed these registrations can have any pertinence, and that in view of other findings involved it must be found that they are irrelevant.

In response to applicant's contention that the word "Ray" is merely descriptive of the products of either party, it was held that the word "Ray" as such is not involved, and no basis is perceived for regarding either applicant's or opposer's marks as descriptive rather than arbitrary or fanciful.

In response to the applicant's arguments that the products of the parties are distributed through different trade channels, it was held that since the goods obviously have the same descriptive properties the difference in sales methods is not sufficient to indicate that there is not likelihood of confusion.

In response to applicant's contention that it adopted the mark in good faith, it was held that this may be assumed, but there is no reason to believe that the public would have knowledge of applicant's reasons for adopting its mark.

With respect to applicant's motion to remand for further testimony it was held that the foregoing appears to dispose of any necessity for such action.

DESMOND'S, INC., *v.* SAMALTO HOSIERY MILLS, Opposition No. 25,180.

In a decision rendered June 23, 1948 (169 Ms. Dec. 849, 78 USPQ 26), *Assistant Commissioner Daniels* reversed the action of the Examiner of Interferences who had sustained the opposition of Desmond's, Inc., of Los Angeles, Calif., to the registration of Samalto Hosiery Mills, of Perkasie, Pa., of the word "VELVETONE," as a trade-mark for hosiery, under the Trade-Mark Act of February 20, 1905. Opposer relied upon its ownership and prior use, as prima facie evidence by its registration No. 253,336, of the trade-mark "VELVASHEEN" for negligee and dress broadcloth shirts.

After noting that both marks are of a highly suggestive nature as applied to the goods of the respective parties, it was held that if applied to identical goods they might be considered as confusingly similar within the meaning of section 5 of the Trade-Mark Act of 1905, although even this is not free from doubt, so that, in view of this doubt, and in view of the specific differences between the goods, it appears upon the record presented that there is little likelihood of confusion between two such highly suggestive marks as applied to the goods here involved.

It was further held, in view of applicant's offer, that it is required that prior to and as a condition of any allowance of applicant's mark, an amendment be filed limiting the goods included in the application to women's hosiery.

AYERST, MCKENNA & HARRISON, LIMITED, *v.* VITAMIN-ERG CO., INC., Opposition No. 24,740.

In a decision rendered June 25, 1948 (169 Ms. Dec. 852, 78 USPQ 27), *Assistant Commissioner Daniels* reversed the action of the Examiner of Interferences who had dismissed the opposition of Ayerst, McKenna & Harrison, Limited, of New York, N. Y., to the application of Vitamin-Erg Co., Inc., of New York, N. Y., for registration of the notation "Emodex" as a trade-mark for use upon a laxative containing cascara sagrada. Opposer alleged prior use and ownership of the mark "EMMENOPLEX"

for use on orally active estrogenic placental hormones and vitamin B complex in dosage form.

It was held that the Examiner was right in ruling that the record clearly shows that as between the parties the opposer is here the prior user and the only questions for consideration therefore relate to the likelihood of confusion in trade.

It was held that despite specific differences, the goods are undoubtedly goods of the same descriptive properties, and the fact that one must be obtained on a physician's prescription is not sufficient to outweigh the similarities in appearance, spelling and sound of the two marks, so that considering the marks in their entireties and the character of the goods, concurrent use of the two marks on the goods of the parties will be likely to lead to confusion in the trade.

EX PARTE CONTINENTAL SCREW COMPANY, Serial No. 489,855.

In a decision rendered June 20, 1948 (169 Ms. Dec. 858, 78 USPQ —), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Trade-Marks refusing to register to Continental Screw Company, of New Bedford, Mass., under the act of February 20, 1905, on the ground that it is descriptive and incapable of functioning as a trade-mark, a mark stated in applicant's brief to consist in a series of letters made up of fanciful designs for use on threaded fastenings, screws, threaded bolts, and threaded rods in Class 13, and assembled in form to spell out the word "TAP," a disclaimer having been filed in which it was stated that no exclusive claim is made to the word "TAP" nor "representation of taps" excepting in the combination as shown.

It was held that the goods being "taps" or "tap screws," the word "TAP" is merely descriptive thereof and unregistrable, since presenting a word which is merely descriptive of the goods in a fanciful form does not permit registration thereof.

It was further held that if any significance is to be attributed to the display of the "taps," a representation of the goods themselves is also merely descriptive, for while they are not displayed with complete accuracy the fanciful designs making up the letters are obviously "taps."

It was also held that it is to be noted that every feature of the mark has been disclaimed.

LIBBEY-OWENS-FORD GLASS COMPANY v. PLASTRON, INC., Opposition No. 24,098.

In a decision rendered June 29, 1948 (169 Ms. Dec. 859, 78 USPQ —), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Interferences dismissing the opposition of Libbey-Owens-Ford Glass Company, of Toledo, Ohio, to the application of Plastron, Inc., of New York, N. Y., to register, under the Trade-Mark Act of 1905, a mark comprising the word "Plastron" as a trade-mark for shower curtains, made of plastic film. Opposer alleged that it and its predecessors has owned and used the trade-mark "PLASKON" for synthetic resins and plastic materials, including coating compounds and impregnating compositions of the urea-formaldehyde, phenol-formaldehyde, melamine-formaldehyde and other types as well as adhesives and molding compounds.

After noting that no question exists as to opposer's priority of use of its mark on the products mentioned, it was held that it is clear from the record that neither opposer's plastic material nor the articles made therefrom are in any way associated with or connected with shower curtains or similar products so that the Examiner was correct in finding that the goods of the parties possess different descriptive properties, and that no probable damage within the meaning of the Trade-Mark Act of 1905 may be inferred.

R. B. SEMLER, INCORPORATED, v. EBEN R. FRENCH, Opposition No. 25,049.

In a decision rendered June 29, 1948 (169 Ms. Dec. 861, 78 USPQ —), *Assistant Commissioner Daniels* affirmed the action of the Examiner of Interferences dismissing the notice of opposition of R. B. Semler, Incorporated, of New Canaan, Conn., to the application of Eben R. French, of Tacoma, Wash., to register, under the act of February 20, 1905, the word "KremazenE" as a trade-mark for a mixture of ingredients having therapeutic value and used for the relief of itching and other discomforts of eczema, psoriasis, seborrhoea, athlete's foot, chilblains, ringworm, forest poisoning, jungle itch, insect bites, and other forms of skin and scalp irritations, the compound being a counter-irritant stimulant, antiseptic, parasiticide and fungicide. Opposer relied upon its ownership and prior use of the trade-mark "KREML" registered under the act of 1905 as a trade-mark for hair tonic and shampoo.

It was held that there is no question of opposer's ownership of the trade-mark "KREML" and its use of that mark for the products stated above long prior to any date claimed by applicant.

As to the similarity of the goods it was held that while there may be specific differences between the purposes for which opposer's "KREML" products are sold, and many of the purposes for which applicant's product is stated to be used, certain other uses are identical and for the purposes of this proceeding, the goods of the parties will be considered to be the same.

In response to opposer's contentions that the first four letters of applicant's mark are the same as the first four letters of its own mark, and that the balance of applicant's mark would be considered as a conventionalized suffix or ending for such a mark, it was held that applicant has not included opposer's mark in its entirety in the mark sought to be registered, and that considering them in their entireties there are substantial differences in both sound and appearance, so that, taken as a whole, applicant's mark cannot be considered as closely resembling opposer's trade-mark, and therefore the Examiner was right in ruling that concurrent use of these marks is unlikely to result in confusion.

TRADE-MARKS

OFFICIAL GAZETTE, JULY 27, 1948

[VOL. 612. NO. 4]

ACT OF 1905

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication. As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Marks published for opposition under the act of 1946 follow the 1905 publications.

CLASS 1

RAW OR PARTLY PREPARED MATERIALS

Ser. No. 508,587. DOW CORNING CORPORATION, Midland, Mich. Filed Sept. 6, 1946.

DC

FOR MIXTURES CONTAINING AND CONSISTING OF ORGANOSILICON POLYMERS WHICH CURE TO ELASTOMERS OF RUBBERY CHARACTER, COMPOSITIONS CONTAINING AND CONSISTING OF ORGANOSILICON POLYMERS WHICH CURE TO RESINOUS POLYMERS.

Claims use since February 1945.

Ser. No. 523,631. JAMES VICK'S SEEDS, INC., Philadelphia, Pa. Filed June 5, 1947. Under 10-year proviso.

JAMES VICKS

FOR VEGETABLE AND FLOWER SEEDS, BULBS, AND PLANTS, AND SOIL.

Claims use since 1850.

CLASS 4

ABRASIVE, DETERGENT, AND POLISHING MATERIALS

Ser. No. 504,669. GEORGE FURNHOLM, doing business as The Paos Laboratories, Minneapolis, Minn. Filed June 27, 1946.

PAOS

FOR DETERGENT FOR THE HANDS.

Claims use since Mar. 16, 1945.

Ser. No. 506,460. HENRY H. MANCHESTER, doing business as Southern Sales Service, San Diego, Calif. Filed July 29, 1946.

CRISILITE

FOR SPARK PLUG CLEANING ABRASIVE.

Claims use since July 1, 1934.

CLASS 5

ADHESIVES

Ser. No. 523,558. ADHESIVE PRODUCTS CORPORATION, New York, N. Y. Filed June 4, 1947.

GRIPTEX

FOR ADHESIVE CEMENTS CONTAINING NATURAL OR SYNTHETIC RUBBER.

Claims use since June 1, 1944.

Ser. No. 524,807. GOODLOE E. MOORE COMPANY, Danville, Ill. Filed June 25, 1947.

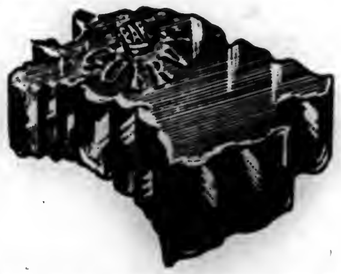
Applicant disclaims the word "Bond." The stippling is for shading purposes only.

FOR HEAVY PASTE CONSISTENCY WATER PROOF ADHESIVE.

Claims use since June 4, 1947.

CLASS 6

CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS



Ser. No. 492,858. E. D. ROBERTS, doing business as Modern Drug Products, Atlanta, Ga. Filed Dec. 7, 1945.

Kopital

FOR LAXATIVE AND ANTACID.

Claims use since Feb. 10, 1945.

Ser. No. 505,911. GREGOIRE OVSIANICO, Paris, France. Filed July 19, 1946.

The word "Paris" is disclaimed apart from the mark as shown. The mark consists of the words "Guervil" and "Paris" on a fanciful representation of the map of France in perspective. The lining appearing on the drawing is for shading only. The representation of the map of France is disclaimed apart from the mark shown.

FOR PERFUMES.

Claims use since Apr. 1, 1946.

Ser. No. 506,654. E. I. DU PONT DE NEMOURS AND COMPANY, Wilmington, Del. Filed Aug. 1, 1946.

MILBAN

FOR CHEMICAL COMPOUNDS USED AS AN ANTI-MILDEW AGENT FOR THE TREATMENT OF TEXTILES, PAPER, ROPE, SIZING MATERIALS, ADHESIVES, PAINTS AND CERTAIN OTHER MATERIALS.

Claims use since Oct. 18, 1943.

Ser. No. 512,776. CHARLES D. HARRIS, doing business as The Magic Products Co., Baltimore, Md. Filed Nov. 18, 1946.

No claim is made to the words "No More Trouble."

FOR DEPILATORY POWDER.

Claims use since Sept. 20, 1946.

Ser. No. 514,966. THE MASTER MECHANICS CO., Cleveland, Ohio. Filed Dec. 28, 1946.

NYHOL

FOR PHENOLIC DERIVATIVE LIQUID USED AS AN ANTI-FUNGUS AND MOLD COMPOUND.

Claims use since February 1940.

Ser. No. 515,655. CALIFORNIA SPRAY-CHEMICAL CORPORATION, Wilmington, Del., and Richmond, Calif. Filed Jan. 13, 1947.

SUPERTONE

FOR PLANT AND HORTICULTURAL PARASITICIDES, INSECTICIDES, SPRAYS, FUNGICIDES, AND HORMONES.

Claims use since Nov. 27, 1946.

Ser. No. 515,998. BEST & CO. INC., New York, N. Y. Filed Jan. 20, 1947. Under 10-year proviso.

Best & Co.

FOR TOILET WATER, PERFUME, PERFUME EXTRACTS, TOILET LOTIONS; HAIR TONIC, HAIRDRESSING, HAIR RESTORER (A HAIR PREPARATION EITHER A LIQUID OR A SALVE, FOR MASSAGING INTO THE SCALP), HAIR DYE, HAIR SHAMPOO, HAIR LACQUER, HAIR POMADE; LOOSE OR COMPACT FACE POWDER, TOILET POWDER, SACHETS (IN POWDER, CREAM AND LIQUID FORM); FACE CREAM, COLD CREAM, VANISHING CREAM, NIGHT CREAM, NECK AND THROAT CREAM, FRECKLE CREAM; ASTRINGENT, MAKE-UP BASES (CAKE, CREAM AND LIQUID), FACE, LIP AND NAIL ROUGE; BEAUTY CLAY; DENTIFRICES, MOUTH WASHES; NAIL BLEACH, NAIL POLISH (IN CAKE, CREAM AND LIQUID FORM), PREPARATION FOR REMOVING THE CUTICLE, NAIL POLISH REMOVER, NAIL WHITENER STICK, NAIL BUFFING POWDER; HAND CREAM AND LOTION; UNDERARM DEODORANT, DEPILATORIES, LEG MAKE-UP; SUN TAN OIL AND LOTIONS; EYEDROPS, EYEBROW PENCILS, EYEBROW AND EYELASH GROWER (IN PASTE AND LIQUID FORM), EYE SHADOW, MASCARA; BATH, SMELLING AND REDUCING SALTS, BATH OIL AND BUBBLE BATH.

Claims use since 1882.

Ser. No. 518,296. HOY CHEMICAL COMPANY, St. Louis, Mo. Filed Feb. 28, 1947.

The words "Checks Odors Instantly" are disclaimed.

FOR GENERAL INDUSTRIAL AND HOUSEHOLD DEODORANTS.

Claims use since Feb. 6, 1947.

Ser. No. 520,283. LABORATORIOS DE PRODUCTOS DE BELLEZA, IRENNE DARIE S. A., Habana, Cuba. Filed Apr. 7, 1947.

COLIBRI

FOR PERFUMES, PERFUME BASES EXTRACTED FROM FLOWERS, COLOGNES, MOUTH WASH, AND TOILET WATER, TINCTURES FOR THE HAIR, PASTE AND LIQUIDS FOR THE NAILS, SKIN AND TISSUE CREAM, FACE POWDER, TALCUM POWDER, BATH SALTS, PERFUMED OILS, DEPILATORIES, DEODORANT, DENTRIFICES, LIP-STICKS, EYEBROW STICK, EYELASH STICKS, ROUGE, RED PAINT FOR LADIES, BRILLIANTINES, POMADE AND OILS FOR THE HAIR, COLD-CREAM, SHAMPOO, MAKE-UP PASTE, POMADE IN LIQUID FORM FOR DRESSING EYES AND EYEBROWS.

Claims use since Nov. 15, 1945.

Ser. No. 521,638. DERMETICS, INC., New York, N. Y. Filed May 1, 1947.

DERMETICS

FOR TOILET PREPARATIONS—NAMELY, OILS AND BLENDS OF OILS FOR APPLICATION TO THE SKIN, CREAMS AND LOTIONS FOR APPLICATION TO THE SKIN, ASTRINGENTS, FACE POWDERS, SKIN ROUGES, LIPSTICKS AND LIP ROUGES, AND BREATH AND BODY DEODORANTS.

Claims use since May 31, 1946.

Ser. No. 524,624. ROBINSON, WAGNER CO., INC., New York, N. Y. Filed June 21, 1947.

LIQUILAN

FOR LIQUID LANOLIN.

Claims use since Apr. 1, 1947.

CLASS 8

SMOKERS' ARTICLES, NOT INCLUDING TOBACCO PRODUCTS

Ser. No. 525,369. NATIONAL CARBON COMPANY, INC., New York, N. Y. Filed July 1, 1947.

Krene

FOR TOBACCO POUCHES.

Claims use since May 1946.

CLASS 11

INKS AND INKING MATERIALS

Ser. No. 524,731. THE SHERWIN-WILLIAMS COMPANY, Cleveland, Ohio. Filed June 24, 1947. Under 10-year proviso.

SHERWIN-WILLIAMS

FOR PRINTING INKS, LITHOGRAPHING INKS; AND PIGMENTS, DYES, DYESTUFFS, DRY COLORS, OILS AND VARNISHES FOR MANUFACTURE OF PRINTING AND LITHOGRAPHING INKS.

Claims use since 1903.

CLASS 12

CONSTRUCTION MATERIALS

Ser. No. 507,988. MCCORMICK & BAXTER CREOSOTING CO., Portland, Oreg. Filed Aug. 24, 1946.

The word "Creo-Flr" is disclaimed apart from the mark.

FOR RAILROAD TIES, DRESSED TIMBERS AND POLES.

Claims use since October 1945.

Ser. No. 521,463. PERMAFLEX PRODUCTS CO., Philadelphia, Pa. Filed Apr. 28, 1947.

Perma-flex

FOR PLASTIC ASPHALTIC COMPOUNDS PREPARED IN LIQUID AND PASTE FORM FOR PATCHING, CAULKING, AND SURFACING FLOORS, DRIVES, AND WALKS AND AS PRE-FORMED TILES FOR SURFACING FLOORS, DRIVES, AND WALKS.

Claims use since Jan. 1, 1929.

CLASS 13

HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES

Ser. No. 516,745. THE G. W. VANDERVORT COMPANY, Portsmouth, Ohio. Filed Jan. 31, 1947.

VANCAST

FOR CAST IRON SOIL PIPE AND FITTINGS.

Claims use since Jan. 18, 1947.

Ser. No. 518,650. BAND-IT COMPANY, Denver, Colo. Filed Mar. 7, 1947.

The applicant hereby disclaims exclusive rights in the word "Clamps," the representation of the goods, and a representation of the world or the Western Hemisphere per se. The applicant does not disclaim the representation of a band or clamp squeezing the world.

FOR INDUSTRIAL PRESSURE CLAMPS AND PARTS THEREOF, SUCH CLAMPS BEING ADAPTED FOR USE ON PIPES, TANKS, HOSES, AND THE LIKE.

Claims use since Dec. 1, 1937, as to "Band-It"; and since August 1939 as to the rest of the mark.

Ser. No. 523,536. THE WM. POWELL COMPANY, Cincinnati, Ohio. Filed June 4, 1947.

POWELL

FOR VALVES—NAMELY, AIR VALVES, ANGLE VALVES, ANTI-FREEZING VALVES, AUTOMATIC VALVES, BALANCED VALVES, BALL CHECK VALVES, BLOW OFF VALVES, BOILER VALVES, BONNET VALVES, BRONZE VALVES, BUTTER-FLY VALVES, BY-PASS VALVES, CAST STEEL VALVES, CHECK VALVES, COMPOSITION DISC VALVES, CROSS VALVES, DASH POT VALVES, DISK VALVES, GATE VALVES, GEAR OPERATED VALVES, GLOBE VALVES, IRON VALVES, LEVER OPERATED VALVES, LUBRICATED VALVES, MARINE SERVICE VALVES, MONEL METAL VALVES, NEEDLE VALVES, NON-RETURN VALVES, PLUG COCKS, PLUG TYPE VALVES, QUICK OPENING VALVES, RADIATOR VALVES, REGRINDING VALVES, SAFETY VALVES, SCREW DOWN TYPE VALVES, SIGHT FEED OIL VALVES, STEEL VALVES, STOP CHECK VALVES, SPRING ACTING VALVES, SWING CHECK VALVES, UNION VALVES, WHISTLE VALVES, Y VALVES; VALVE PARTS, VIZ, BODIES, BOLTS, BOLT PINS, BONNETS, BONNET RINGS, BONNET YOKES, BUMPER PLUGS, CAPS, CAP SCREWS, DISK CARRIERS, DISC HOLDERS, DISC SPREADERS, DISC LOCK NUTS, DISC VALVE ELEMENTS, GLANDS, GUIDE COLLARS, HINGE PINS, LEVERS, LINKS, LOCK NUT KEYS, PACKING NUTS, PACKING RINGS, PLUGS, SEAT RINGS, SIDE PLUGS, STEMS, STUFFING BOX SPUDS, STUFFING BOX STUDS, THRUST PLATES, METAL WASHERS, YOKES, YOKE ARMS, YOKE STEM BUSHINGS; AND VALVE FITTINGS, VIZ., BUSHINGS, CAPS, CHAIN GUIDES, COUPLINGS, CROSS FITTINGS, ELBOWS, EXPANSION JOINTS, EXPANSION SLEEVES, FLANGES, FUSIBLE PLUGS, HAND WHEELS, LOCK NUTS, NIPPLES, PLUGS, REDUCTION FITTINGS, RETURN BENDS, SPROCKET WHEELS, SWING JOINTS, SWIVEL COUPLINGS, T's, TEMPLETS, UNIONS AND Y FITTINGS.

Claims use since Oct. 1, 1846.

CLASS 14

METALS AND METAL CASTINGS AND FORGINGS

Ser. No. 509,534. REPUBLIC STEEL CORPORATION, Cleveland, Ohio. Filed Sept. 21, 1946. Under section 5b of the act of 1905 as amended in 1920.

BERGER

FOR BLACK STEEL, GALVANIZED STEEL, RUST-RESISTING ANTICORROSIVE IRON, AND IRON, STEEL, AND ALLOY-STEEL METAL SHEETS.

Claims use since Aug. 19, 1946.

Ser. No. 517,101. ALL-STATE WELDING ALLOYS CO., INC., White Plains, N. Y. Filed Feb. 7, 1947.

ALL-STATE LOTEMP

Exclusive rights to the words "Lo Temp" are disclaimed, apart from the mark as shown.

FOR WELDING ALLOYS.

Claims use since Sept. 20, 1946.

CLASS 15

OILS AND GREASES

Ser. No. 496,400. THE OSTER MANUFACTURING COMPANY, Cleveland, Ohio. Filed Feb. 11, 1946. Under section 5b of the act of 1905, as amended in 1920.

OSTER

FOR CUTTING OILS.

Claims use since Oct. 10, 1920.

CLASS 16

PAINTS AND PAINTERS' MATERIALS

Ser. No. 501,631. L. BONNAL ET COMPAGNIE, Bordeaux, France. Filed May 8, 1946.

The expression "email synthetique," the English translation of which is "synthetic enamel," and the expression "sec en 3 heures," the English translation of which is "dry in 3 hours," are hereby disclaimed apart from the mark as shown in the drawing, as are also the picturizations representing the process of applying the goods.

FOR READY-MIXED PAINTS COMPRISING COLORS, LACQUERS, VARNISHES, DRIER FOR APPLICATION TO WOODEN, METALLIC, AND WALL SURFACES, PUTTIES FOR STOPPING HOLES, CRACKS, OR GROOVES, AND FOR WINDOW PANES, AND WAXES FOR POLISHING FURNITURE AND WOODWORK.

Claims use since Nov. 21, 1935.

Ser. No. 522,838. GOODLOE E. MOORE COMPANY, Danville, Ill. Filed May 22, 1947.

TUFF-COTE

Applicant disclaims the word "Cote" separate and apart from the mark as shown.

FOR LIQUID FLOOR AND WALL COVERING MATERIAL OF THE PAINT TYPE.

Claims use since Apr. 5, 1947.

CLASS 17

TOBACCO PRODUCTS

Ser. No. 516,552. LARUS & BROTHER COMPANY, INC., Richmond, Va. Filed Jan. 29, 1947.

The Adventure Kit of
FAMOUS BLENDS

No claim is made to the words "Kit" and "Blends."

FOR TOBACCO AND TOBACCO PRODUCTS—NAMELY, SMOKING TOBACCO, CHEWING TOBACCO, CIGARS, CIGARETTES, AND SNUFF.

Claims use since Dec. 13, 1946.

Ser. No. 519,542. SALVADOR RODRIGUES, INC., Tampa, Fla. Filed Mar. 25, 1947.

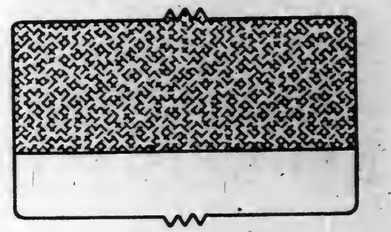
CHARLES THE GREAT

FOR CIGARS.

Claims use since 1890.

CLASS 21

ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES



Ser. No. 471,267. THE MASTER ELECTRIC COMPANY, Dayton, Ohio. Filed June 15, 1944.

MASTER

FOR ELECTRIC GENERATORS AND PARTS THEREOF, GAS AND GASOLINE ENGINE DRIVEN GENERATOR SETS, ELECTRIC MOTORS, ELECTRIC MOTOR GENERATOR SETS, CONTROL AND INSTRUMENT PANELS, ELECTRIC SWITCHES AND VOLTAGE REGULATING UNITS.

Claims use since June 1, 1936, April 6, 1943, June 1, 1936, May 1, 1942, January 1, 1944, May 16, 1944, and January 17, 1944, respectively.

Ser. No. 506,659. FIRST INDUSTRIAL CORPORATION, Freeport, Ill. Filed Aug. 1, 1946.

The drawing is lined for the color orange.

FOR ELECTRIC SWITCHES, MECHANICAL ACTUATOR MECHANISMS FOR ELECTRIC SWITCHES, HOUSINGS FOR ELECTRIC SWITCHES, OVERLOAD AND OVERHEAT PROTECTORS FOR ELECTRIC MOTORS, CIRCUIT CONTROLLING PROTECTORS FOR ELECTRICAL APPARATUS, APPLIANCES, AND POWER TRANSLATING DEVICES, AND PARTS OF EACH OF THE FOREGOING.

Claims use since Aug. 30, 1945.

Ser. No. 514,757. GENERATOR-IGNITION SALES CO., Oakland, Calif. Filed Dec. 24, 1946.

"Genico"

FOR REBUILT ELECTRIC GENERATORS, ARMATURES, STARTER DRIVES AND FUEL PUMPS FOR INTERNAL COMBUSTION ENGINES, AND STORAGE BATTERIES.
Claims use since Jan. 2, 1938.

CLASS 22

GAMES, TOYS, AND SPORTING GOODS

Ser. No. 480,293. THE LIONEL CORPORATION, New York, N. Y. Filed Feb. 27, 1945.

LION-EDS

FOR ANIMAL PULL TOYS, TOY ANIMALS, TOY WAGONS AND TOY ROCKING HORSES.
Claims use since Nov. 1, 1944.

Ser. No. 490,440. THE METAL ARTS COMPANY, Pasadena, Calif. Filed Oct. 24, 1945.

WHIMSIE BLOCKS

Applicant disclaims any right to the word "Blocks" apart from the mark.
FOR TOY WAGONS CONTAINING TOY BUILDING BLOCKS.
Claims use since June 6, 1945.

Wilson's

SPI-TOX

Applicant claims ownership of registration No. 378,873.

FOR INSECTICIDES.

Claims use since December 1937.

Ser. No. 537,330. MALLINCKRODT CHEMICAL WORKS, St. Louis, Mo. Filed Oct. 9, 1947.

Quenate

FOR AGRICULTURAL FUNGICIDES CONTAINING 8-HYDROXYQUINOLINE BENZOATE.

Claims use since Sept. 19, 1947.

Ser. No. 539,174. DONALD D. KENYON, doing business as Kondon Manufacturing Company, Minneapolis, Minn. Filed Oct. 27, 1947. Under section 2f of the act of 1946.

KONDON'S

Applicant claims ownership of registrations Nos. 57,512, 29,832, and 38,348.

FOR NOSE AND THROAT DROPS, NASAL JELLY, AND NASAL JELLY WITH EPHEDRINE.

Claims use since 1889.

Ser. No. 539,451. THE STANDARD ULTRAMARINE CO., Huntington, W. Va. Filed Oct. 29, 1947.

LIBERTY BLUE

No claim is made to the exclusive use of the word "Blue" apart from the mark shown. Applicant claims ownership of registrations Nos. 128,527 and 121,349.

FOR LAUNDRY BLUES.

Claims use since Dec. 28, 1917.

Ser. No. 539,463. WHITMOYER LABORATORIES, INC., Myerstown, Pa. Filed Oct. 29, 1947.

Protosep

FOR COMPOSITION HAVING MEDICINAL PROPERTIES FOR FEEDING TO POULTRY AS AN AID IN CONTROL OF COCCIDIOSIS, THE COMPOSITION BEING IN LIQUID FORM, DRY FORM, OR PELLET FORM CONTAINING OTHER INGREDIENTS COMMONLY USED IN POULTRY FEED.

Claims use since Mar. 22, 1934.

Ser. No. 540,191. INTERNATIONAL MINERALS AND CHEMICAL CORPORATION, Chicago, Ill. Filed Nov. 5, 1947.

The trade-mark, in part, is a representation of a Triceratops, and the border of the mark is lined for the color red.

FOR DEFLUORINATED PHOSPHATE FOR USE AS PLANT AND ANIMAL FOOD SUPPLEMENTS.

Claims use since July 8, 1947.

Ser. No. 542,043. THE MOREY MERCANTILE COMPANY, Denver, Colo. Filed Nov. 22, 1947.

Solitaire

Applicant claims ownership of registration No. 102,141.

FOR GLOSS STARCH.

Claims use since Aug. 7, 1914.

Ser. No. 544,122. SHARP & DOHME, INCORPORATED, Philadelphia, Pa. Filed Dec. 11, 1947.

PURIPROIDS

FOR BIOLOGICAL IMMUNOGENIC PREPARATION FOR HUMAN USE.

Claims use since Nov. 19, 1947.

Ser. No. 544,329. CUTTER LABORATORIES, Berkeley, Calif. Filed Dec. 15, 1947.

FOLIX-B

The letter "B" is disclaimed apart from the mark shown.

FOR TABLETS FOR TREATMENT OF ANEMIA.

Claims use since September 1947.

Ser. No. 544,745. MINNIE A. LOUX, Bennington, Vt. Filed Dec. 18, 1947.

MINNIE'S
QUICK HEALING
OINTMENT

No claim is made to the words "Quick Healing Ointment" apart from the mark shown.
FOR OINTMENT FOR THE TREATMENT OF SORES, CUTS, BOILS, PILES AND OTHER EXTERNAL IRRITATIONS.
Claims use since May 1, 1911.

Ser. No. 545,928. ABBOTT LABORATORIES, North Chicago, Ill. Filed Jan. 2, 1948.

ACIDORIDE

FOR ACIDIFYING AGENT INTENDED FOR TREATMENT OF ACHLORHYDRIA OR HYPOCHLORHYDRIA.
Claims use since Dec. 17, 1947.

Ser. No. 545,952. CIBA PHARMACEUTICAL PRODUCTS, INC., Summit, N. J. Filed Jan. 2, 1948.

BUCCALETS

FOR PREPARATIONS CONTAINING ACTIVE HORMONAL COMPOUNDS IN THE FORM OF TABLETS, PILLS, LOZENGES, CACHETS, CAPSULES, PASTILLES, BONBONS, FOR ABSORPTION BY THE ORAL MUCOSA IN HORMONAL (TESTICULAR, OVARIAN, AND ADRENAL) DEFICIENCIES AND CONDITIONS IN WHICH A CONTINUED SUPPLY OF THE HORMONE IS DESIRABLE.
Claims use since Sept. 23, 1947.

Ser. No. 545,953. CIBA PHARMACEUTICAL PRODUCTS, INC., Summit, N. J. Filed Jan. 2, 1948.

BUCLETS

FOR PREPARATIONS CONTAINING ACTIVE HORMONAL COMPOUNDS IN THE FORM OF TABLETS, PILLS, LOZENGES, CACHETS, CAPSULES, PASTILLES, BONBONS, FOR ABSORPTION BY THE ORAL MUCOSA IN HORMONAL (TESTICULAR, OVARIAN, AND ADRENAL) DEFICIENCIES AND CONDITIONS IN WHICH A CONTINUED SUPPLY OF THE HORMONE IS DESIRABLE.
Claims use since Sept. 23, 1947.

Ser. No. 546,935. LYNN ROBERT AKERS, doing business as Choelstra Co., New Orleans, La. Filed Jan. 14, 1948.

CHOELSTRA

FOR PREPARATION CONTAINING CHOLESTRIN, LECITHIN, CARBON TETRACHLORIDE, AND ETHYL ALCOHOL, FOR USE IN THE REMOVAL OF DANDRUFF AND TO INVIGORATE THE SCALP AND HAIR.
Claims use since Dec. 1, 1947.

Ser. No. 547,785. STAUFFER CHEMICAL COMPANY, San Francisco, Calif. Filed Jan. 22, 1948.

MAGNETIC

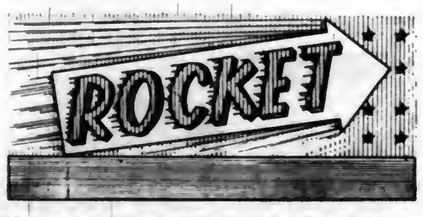
Applicant claims ownership of registrations Nos. 299,638 and 351,145.
FOR SULPHUR, INSECTICIDES AND FUNGICIDES.
Claims use since Feb. 3, 1932.

Ser. No. 547,939. REJANE, INC., New York, N. Y. Filed Jan. 24, 1948.

COLIBRI

FOR PERFUMES, TOILET WATERS, EAU DE COLOGNE, LIPSTICK, FACE POWDER, ROUGE, AND FACE AND HAND CREAMS.
Claims use since January 1947.

Ser. No. 548,764. G. D. SEARLE & Co., Chicago, Ill. Filed Feb. 4, 1948.



Ruphyllin

FOR PREPARATION USED IN THE TREATMENT OF CARDIOVASCULAR DISEASE.
Claims use since Jan. 2, 1948.

CLASS 9

EXPLOSIVES, FIREARMS, EQUIPMENTS, AND PROJECTILES

Ser. No. 537,653. G. BACKES FIREWORKS COMPANY, Meriden, Conn. Filed Oct. 13, 1947.

The drawing is lined for the colors red and blue.
FOR ROLLS OF PAPER CAPS FOR CAP PISTOLS.
Claims use since Aug. 26, 1947.

CLASS 10

FERTILIZERS

Ser. No. 530,405. INTERNATIONAL MINERALS AND CHEMICAL CORPORATION, Chicago, Ill. Filed Aug. 4, 1947. Under section 2f of the act of 1946.

PREMIUM PRODUCER

Applicant claims ownership of registration No. 231,120.
FOR FERTILIZERS.
Claims use since February 1925.

Ser. No. 535,381. CALIFORNIA SPRAY-CHEMICAL CORPORATION, Wilmington, Del., and Richmond, Calif. Filed Sept. 23, 1947.

Applicant disclaims the words "Scientific Pest Control" apart from the mark.
FOR FERTILIZERS.
Claims use since June 3, 1946.

CLASS 11

INKS AND INKING MATERIALS

Ser. No. 497,513. UNDERWOOD CORPORATION, New York, N. Y. Filed Nov. 7, 1947. Under section 2f of the act of 1946.

Distinctive

FOR TYPEWRITER RIBBON AND CARBON PAPER.
Claims use since Dec. 31, 1906.

CLASS 12

CONSTRUCTION MATERIALS

Ser. No. 527,910. THE AMERICAN ROLLING MILL COMPANY, Middleton, Ohio, now by change of name Armco Steel Corporation. Filed July 5, 1947. Under section 2f of the act of 1946.

PIPE-ARCH

The word "Pipe" is disclaimed apart from the mark as shown.
FOR FERROUS METAL CULVERTS AND PARTS THEREFOR—NAMELY, PLATES, BOLTS AND ATTACHMENTS SOMETIMES SOLD AS UNITS AND SOMETIMES ASSEMBLED AS FINISHED CULVERTS.
Claims use since December 1938.

Ser. No. 528,933. KIMBERLY-CLARK CORPORATION, Neenah, Wis. Filed July 19, 1947.

PYROGARD

FOR THERMAL AND ACOUSTICAL INSULATION MATERIAL FORMED OF WOOD PULP AND HAVING A PAPER COVER SHEET RESISTANT TO FIRE AND WATER.
Claims use since July 1, 1947.

Ser. No. 535,541. J. F. KURFEES PAINT COMPANY, Louisville, Ky. Filed Sept. 24, 1947. Under section 2f of the act of 1946.

LEAK-SEAL

Applicant claims ownership of registrations Nos. 147,867 and 150,682.
FOR ASBESTOS ROOF CEMENT IN PASTE FORM FOR PATCHING ROOFS.
Claims use since Oct. 2, 1917.

Ser. No. 535,558. J. F. KURFEES PAINT COMPANY, Louisville, Ky. Filed Sept. 24, 1947. Under section 2f of the act of 1946.

KURFEES

Applicant claims ownership of registrations Nos. 143,856 and 360,163.
FOR ASBESTOS ROOF CEMENT IN PASTE FORM, ROOFERS' PITCH OR LAP CEMENT AND CAULKING COMPOUNDS.
Claims use since Jan. 1, 1907.

Ser. No. 535,566. J. F. KURFEES PAINT COMPANY, Louisville, Ky. Filed Sept. 24, 1947. Under section 2f of the act of 1946.

KURFEES

Applicant claims ownership of registrations Nos. 360,163 and 143,856.
FOR ASBESTOS ROOF CEMENT IN PASTE FORM, ROOFERS' PITCH OR LAP CEMENT AND CAULKING COMPOUNDS.
Claims use since Feb. 12, 1938.

Ser. No. 537,734. RUTLAND FIRE CLAY COMPANY, Rutland, Vt. Filed Oct. 13, 1947. Under section 2f of the act of 1946.

NO-TAR-IN

Applicant claims ownership of registration No. 215,917.
FOR ASBESTOS AND ASPHALT CEMENT PREPARATION FOR REPAIRING AND RENEWING OLD ROOFS.
Claims use since June 15, 1925.

CLASS 13

HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES

Ser. No. 494,027. THE CHICAGO FAUCET COMPANY, Chicago, Ill. Filed July 22, 1947.

CHICAGO

FOR FAUCETS AND PARTS THEREOF—NAMELY, METAL VALVES, STEMS, AND HANDLES.
Claims use since April 1928.

Ser. No. 508,894. COOK ELECTRIC COMPANY, Chicago, Ill. Filed Nov. 14, 1947.

JETFLEX

FOR BELLOWS OF METAL.
Claims use since Aug. 15, 1946.

Ser. No. 528,227. PHEOLL MANUFACTURING COMPANY, Chicago, Ill. Filed July 9, 1947.

Applicant disclaims the use of the words "Chicago," "Mfg." and "Co." and the representation of the goods except as shown in the mark.
FOR SCREWS, BOLTS, NUTS, METAL WASHERS, AND RIVETS.
Claims use since Jan. 3, 1923.

Ser. No. 529,517. THE WOOSTER BRASS COMPANY, Wooster, Ohio. Filed July 25, 1947.

TRUMPET

FOR BEVERAGE DISPENSING FAUCETS.
Claims use since May 20, 1947.

CLASS 14

METALS AND METAL CASTINGS AND FORGINGS

Ser. No. 529,441. DANFORTH ANCHORS, Berkeley, Calif. Filed July 25, 1947. Under section 2f of the act of 1946.

DANFORTH

FOR SHIPS ANCHORS.
Claims use since Jan. 2, 1939.

Ser. No. 536,973. THE YOUNGSTOWN SHEET AND TUBE COMPANY, Youngstown, Ohio. Filed Oct. 6, 1947. Under section 2f of the act of 1946.

Applicant claims ownership of registration No. 333,286.
FOR BARS, PLATES, HOT-ROLLED STRIP, COLD-ROLLED STRIP, HOT-ROLLED SHEETS, COLD-ROLLED SHEETS, BACK PLATE, TIN PLATE, TERNE PLATE, WIRE RODS, AND WIRE.
Claims use since Feb. 13, 1935.

Ser. No. 537,535. WHEELING STEEL CORPORATION, Wheeling, W. Va. Filed Oct. 10, 1947.

Ductilite

Applicant claims ownership of registration No. 257,552.
FOR SHEET AND STRIP METAL.
Claims use since May 1934.

CLASS 16

PAINTS AND PAINTERS' MATERIALS

Ser. No. 534,947. TRUE-TAG PAINT COMPANY, Memphis, Tenn. Filed Sept. 18, 1947.

Super-Heat

FOR ASPHALT PAINTS AND STACK AND BOILER PAINTS.
Claims use since May 1, 1900.

CLASS 17

TOBACCO PRODUCTS

Ser. No. 529,776. D. EMIL KLEIN CO., INC., New York, N. Y. Filed July 28, 1947.

HALL-MARK

FOR CIGARS, CIGARETTES, AND CHEROOTS.
Claims use since Aug. 4, 1904.

Ser. No. 542,122. GRADIAZ, ANNIS & CO., INC., Tampa, Fla. Filed Nov. 24, 1947.

FOR CIGARS.
Claims use since Jan. 1, 1900.

CLASS 21

ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES

Ser. No. 503,898. GLAS-COL APPARATUS COMPANY, Terre Haute, Ind., assignor to Glas-Col Apparatus Company, Inc., Terre Haute, Ind. Filed Aug. 1, 1947. Under section 2f of the act of 1946.

GLAS-COL

FOR ELECTRICAL HEATING MANTLES AND HEATERS FOR USE ON APPARATUS AND ARTICLES MADE OF GLASS, METAL OR OTHER MATERIALS, SAID MANTLES AND HEATERS COMPRISING ELECTRICAL RESISTANCE ELEMENTS SEWED INTO A FIREPROOF FABRIC JACKET OR ENVELOPE.
Claims use since November 1939.

Ser. No. 516,328. THE SWARTZBAUGH MANUFACTURING COMPANY, Toledo, Ohio. Filed Sept. 4, 1947. Under section 2f of the act of 1946.

roasterette

FOR ELECTRIC FOOD ROASTERS.
Claims use since Sept. 1, 1937.

Ser. No. 519,623. BUCKEYE TOOLS CORPORATION, Dayton, Ohio. Filed Sept. 29, 1947.

ACE CYCLE TOOLS by BUCKEYE

Applicant makes no claim to the words "Cycle" and "Tools" apart from the mark as a whole. Applicant claims ownership of registrations Nos. 395,087 and 404,732.
FOR ELECTRICALLY OPERATED PORTABLE TOOLS—NAMELY, GRINDERS, SANDERS, DRILLS, SCREW DRIVERS, BUFFERS, POLISHERS, WIRE BRUSHES, AND NUT RUNNERS.
Claims use since Feb. 28, 1947.

Ser. No. 520,481. TUTTLE & KIPT, INC., Chicago, Ill. Filed Oct. 1, 1947.

FOR ELECTRICAL HEATING UNITS OF THE RESISTANCE WIRE COIL TYPE FOR ELECTRIC RANGES.
Claims use since Jan. 15, 1947.

Ser. No. 527,539. RELIABLE ELECTRIC COMPANY, Chicago, Ill. Filed July 5, 1947.

Reliable

Applicant claims ownership of registration No. 156,601.
FOR ELECTRICAL LINE AND CONDUIT FITTINGS AND FIXTURES—NAMELY, WIRE AND CABLE CONNECTORS, BIMETAL SEPARATORS, CLAMPS, SPLICES, ADAPTERS, DEAD-ENDS, SLEEVES, HOOKS, HANGERS, GRIPS, CABLE INSULATING COMPOUND, TERMINALS, TELEPHONE STATION PROTECTORS, ARRESTERS, FUSE BLOCKS, WIRE, DISCHARGE BLOCKS, ARRESTER AND PROTECTOR

CARBONS, FUSES, TELEPHONE INSIDE WIRING CONNECTING BLOCKS, TERMINAL BOXES AND STRIPS, MAIN DISTRIBUTING FRAMES FOR TERMINATING AND CROSS CONNECTING OUTSIDE TELEPHONE PLANT AND SWITCHBOARD CABLES, LINE TERMINAL AND PROTECTOR FANNING STRIPS, WALL TYPE DISTRIBUTING FRAMES FOR TERMINATING AND CROSS CONNECTING OUTSIDE TELEPHONE PLANT AND SWITCHBOARD CABLES, RESETTING PANEL, AND SQUEEZE SLEEVES.
Claims use since Dec. 6, 1909.

Ser. No. 527,914. DAZOR MANUFACTURING CORP., St. Louis, Mo. Filed July 5, 1947.

DAZOR *Floating* FIXTURE

The words "Floating Fixture" are disclaimed. Applicant claims ownership of registration No. 386,849.
FOR ELECTRICAL LIGHTING FIXTURES, AND BRACKETS AND STANDS FOR THE SUPPORT OF ELECTRIC LAMPS AND MICROPHONES.
Claims use since Mar. 15, 1938.

Ser. No. 532,893. WESTINGHOUSE ELECTRIC CORPORATION, East Pittsburgh, Pa. Filed Aug. 29, 1947.

Life-Line

FOR ELECTRIC MOTORS.
Claims use since Apr. 16, 1946.

Ser. No. 532,943. LOUISVILLE ELECTRIC MANUFACTURING COMPANY, Louisville, Ky. Filed Aug. 30, 1947.

PIONEER

Applicant claims ownership of registration No. 151,533.
FOR ELECTRICAL MOTORS AND VARIOUS TYPES OF PORTABLE ELECTRICALLY-DRIVEN TOOLS—NAMELY, DRILLS, GRINDERS, HACK SAWS, AND SCREW DRIVERS.
Claims use since July 7, 1921.

Ser. No. 533,156, S. G. FRANTZ CO., INC., New York, N. Y. Filed Sept. 3, 1947.

ISODYNAMIC

FOR MAGNETIC SEPARATORS FOR REMOVING MAGNETICALLY SUSCEPTIBLE PARTICLES FROM LIQUIDS AND/OR DRY STREAMS.
Claims use since Mar. 13, 1936.

Reg. No. 539,246. WESIX ELECTRIC HEATER CO., San Francisco, Calif. Filed Oct. 27, 1947.

NORTHWESIX

Applicant claims ownership of registration No. 169,966.
FOR ELECTRIC HEATERS—NAMELY, INDIVIDUAL SPACE HEATERS AND WATER HEATERS OF THE TANK TYPE AND IMMERSION TYPE.
Claims use since July 1, 1926.

Ser. No. 539,581. UNIVERSAL ELECTRIC CORPORATION, Owosso, Mich. Filed Oct. 30, 1947.

FOR ELECTRIC MOTORS.
Claims use since Sept. 15, 1943.

Ser. No. 542,628. MINUET LAMP INDUSTRIES, INC., Chicago, Ill. Filed Nov. 28, 1947.

FOR ELECTRIC LAMPS.
Claims use since Dec. 5, 1945.

CLASS 22

GAMES, TOYS, AND SPORTING GOODS

Ser. No. 534,123. JAMES HEDDON'S SONS, Dowagiac, Mich. Filed Sept. 11, 1947.

President

FOR FISHING RODS.
Claims use since January 1928.

Ser. No. 536,893. HALL-SMITH CO., Seattle, Wash. Filed Oct. 6, 1947.

ROUND ROBIN

FOR GAME SCORING BOARDS.
Claims use since Feb. 15, 1945.

CLASS 24

LAUNDRY APPLIANCES AND MACHINES

Ser. No. 535,374. THE AMERICAN LAUNDRY MACHINERY COMPANY, Cincinnati, Ohio. Filed Sept. 23, 1947. Under section 2f of the act of 1946.

no-effort

FOR LAUNDRY MACHINERY, PARTICULARLY HANDKERCHIEF PRESSES AND HANDKERCHIEF FLUFFERS AND PARTS THEREOF.
Claims use since June 28, 1940.

Ser. No. 535,375. THE AMERICAN LAUNDRY MACHINERY COMPANY, Cincinnati, Ohio. Filed Sept. 23, 1947.

ZARMITE

Applicant claims ownership of registrations Nos. 332,582 and 356,490.
FOR LAUNDRY MACHINERY, PARTICULARLY FOOT POWER PRESSING MACHINES AND PARTS THEREOF FOR PRESSING OR IRONING WEARING APPAREL.
Claims use since May 31, 1939.

CLASS 25

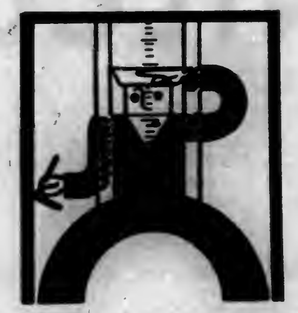
LOCKS AND SAFES

Ser. No. 531,319. DIEBOLD, INCORPORATED, Canton, Ohio. Filed Aug. 14, 1947.

STA-GARD

FOR DAYLIGHT VAULT DOOR PERSONNEL PROTECTIVE LOCKS.
Claims use since July 1934.

CLASS 26



MEASURING AND SCIENTIFIC APPLIANCES

Ser. No. 513,817. FISCHER & PORTER COMPANY, Hatboro, Pa. Filed Oct. 11, 1947.

FLOWRATOR

Applicant claims ownership of registration No. 324,483.
FOR FLUID FLOW INDICATING AND RECORDING INSTRUMENTS; FLOW CONTROLLERS FOR AUTOMATICALLY MAINTAINING AT A PREDETERMINED GIVEN VALUE THE RATE OF FLOW OF A FLUID, OR THE RATIO OF FLOWS OF FLUIDS IN SEPARATE LINES, THE APPARATUS FUNCTIONING THROUGH COORDINATION IN A RECORDING INSTRUMENT OF A SETTING OF THE PREDETERMINED VALUE AND THE AIR PRESSURE IN A DIAPHRAGM VALVE REGULATOR; AND TOTALIZERS OR INTEGRATORS WHICH MEASURE OR COUNT THE TOTAL FLOW OF A FLUID IN A GIVEN PERIOD OF TIME BASED UPON VARIATIONS OF THE FLOW RATE DURING THAT TIME.
Claims use since Oct. 21, 1946.

Ser. No. 513,818. FISCHER & PORTER COMPANY, Hatboro, Pa. Filed Oct. 11, 1947.

No claim is made to the representation of the metering tube and float apart from the mark as shown.
FOR FLUID FLOW INDICATING AND RECORDING INSTRUMENTS; FLOW CONTROLLERS FOR AUTOMATICALLY MAINTAINING AT A PREDETERMINED GIVEN VALUE THE RATE OF FLOW OF A FLUID, OR THE RATIO OF FLOWS OF FLUIDS IN SEPARATE LINES, THE APPARATUS FUNCTIONING THROUGH COORDINATION IN A RECORDING INSTRUMENT OF A SETTING OF THE PREDETERMINED VALUE AND THE AIR PRESSURE IN A DIAPHRAGM VALVE REGULATOR; AND TOTALIZERS OR INTEGRATORS WHICH MEASURE OR COUNT THE TOTAL FLOW OF

A FLUID IN A GIVEN PERIOD OF TIME BASED UPON VARIATIONS OF THE FLOW RATE DURING THAT TIME.
Claims use since 1940.

Ser. No. 513,819. FISCHER & PORTER COMPANY, Hatboro, Pa. Filed Oct. 11, 1947.

No claim is made to the metering tube and float apart from the mark shown. Applicant claims ownership of registration No. 324,483.
FOR FLUID FLOW INDICATING AND RECORDING INSTRUMENTS; FLOW CONTROLLERS FOR AUTOMATICALLY MAINTAINING AT A PREDETERMINED GIVEN VALUE THE RATE OF FLOW OF A FLUID, OR THE RATIO OF FLOWS OF FLUIDS IN SEPARATE LINES, THE APPARATUS FUNCTIONING THROUGH COORDINATION IN A RECORDING INSTRUMENT OF A SETTING OF THE PREDETERMINED VALUE AND THE AIR PRESSURE IN A DIAPHRAGM VALVE REGULATOR; AND TOTALIZERS OR INTEGRATORS WHICH MEASURE OR COUNT THE TOTAL FLOW OF A FLUID IN A GIVEN PERIOD OF TIME BASED UPON VARIATIONS OF THE FLOW RATE DURING THAT TIME.
Claims use since 1940 as to the saluting figure, and since Oct. 21, 1946 as to the mark as shown.

Ser. No. 536,828. NILSSON GAGE CO., INC., Poughkeepsie, N. Y. Filed Oct. 4, 1947.

NILCO

Applicant claims ownership of registration No. 426,977.
FOR FLUSH PIN GAUGES, FIXED SNAP GAUGES, PROFILE GAUGES, TEMPLATE GAUGES, CONCENTRICITY GAUGES, ALIGNMENT GAUGES, LENGTH GAUGES, WIDTH GAUGES, PLUG GAUGES, RING GAUGES, LOCATION GAUGES, AND DEPTH GAUGES.
Claims use since Mar. 1, 1946.

CLASS 29

BROOMS, BRUSHES, AND DUSTERS

Ser. No. 512,076. JOHN HUDSON MOORE, INC., New York, N. Y. Filed Aug. 6, 1947. Under section 2f of the act of 1946.

LONDON HOUSE

Applicant claims ownership of registrations Nos. 366,608 and 381,182.
FOR HAIR BRUSHES, SHAVING BRUSHES, HAND BRUSHES, BATH BRUSHES, SHAMPOO BRUSHES, TOOTH BRUSHES, AND TOILET BRUSHES.
Claims use since Feb. 26, 1938.

CLASS 32

FURNITURE AND UPHOLSTERY

Ser. No. 504,821. THE COLUMBUS SHOW CASE COMPANY, Columbus, Ohio. Filed Nov. 18, 1947.

COLUMBIA

Applicant claims ownership of registration No. 247,650.
FOR MERCHANDISE DISPLAY CASES AND PARTS THEREOF—NAMELY, SHOW CASES, WALL CASES, WOOD-FRAME AND FRAMELESS GLASS CASES, COUNTERS, COUNTER SHOW CASES, TABLES, MAGAZINE RACKS, BAKERY CASES AND SHOW-CASE FIXTURES.
Claims use since June 1, 1946.

Ser. No. 523,298. UNION TOOL COMPANY, Orange, Mass. Filed Sept. 17, 1947.

UNION

Applicant claims ownership of registration No. 153,886.
FOR DISPLAY CABINETS FOR TOOLS.
Claims use since 1908.

Ser. No. 532,898. ACME VENETIAN BLIND CO., Chicago, Ill. Filed Aug. 30, 1947.

ACME
ACME

FOR VENETIAN WINDOW BLINDS.
Claims use since Jan. 15, 1947.

Ser. No. 534,586. AIRCUBE, INC., New York, N. Y. Filed Sept. 16, 1947.

PILOT

FOR AIR-FILLED PILLOWS AND CUSHIONS.
Claims use since Sept. 12, 1947.

Ser. No. 535,779. ACME SCREEN COMPANY, INC., Dallas, Tex. Filed Sept. 26, 1947.

AC-KA-ME

FOR VENETIAN BLINDS.
Claims use since Mar. 1, 1921.

CLASS 35

BELTING, HOSE, MACHINERY PACKING, AND NONMETALLIC TIRES

Ser. No. 527,255. THE PURE OIL COMPANY, Chicago, Ill. Filed July 5, 1947. Under section 2f of the act of 1946.

YALE

Applicant claims ownership of registration No. 374,048.
FOR RUBBER TIRES AND TUBES.
Claims use since October 1931.

Ser. No. 529,982. THE GOODYEAR TIRE & RUBBER COMPANY, Akron, Ohio. Filed July 30, 1947. Under section 2f of the act of 1946.

ALL WEATHER

Applicant claims ownership of registration No. 159,835.
FOR TIRES.
Claims use since July 1916.

Ser. No. 531,669. PAUL E. HAWKINSON CO., Minneapolis, Minn. Filed Aug. 18, 1947. Under section 2f of the act of 1946.

HAWKINSON

FOR TIRE PATCHES.
Claims use since 1922.

Ser. No. 531,850. CHAS. A. SCHIEREN COMPANY, New York, N. Y. Filed Aug. 19, 1947. Under section 2f of the act of 1946.

Chas. A. Schieren Company

Applicant claims ownership of registrations Nos. 24,707, 61,577, 112,564 and 208,381.
FOR BELTING FOR POWER-TRANSMISSION PURPOSES.
Claims use since 1908.

Ser. No. 533,574. E. F. HOUGHTON & CO., Philadelphia, Pa. Filed Sept. 5, 1947.

VIX-SYN

Applicant claims ownership of registrations Nos. 226,957 and 291,994.
FOR MOLDED OR SHAPED WASHERS, MECHANICAL PACKINGS, OR MECHANICAL SEALS FABRICATED FROM RUBBER-LIKE PLASTIC.
Claims use since Apr. 23, 1943.

Ser. No. 534,670. THE PEP BOYS, MANNY, MOE & JACK, Philadelphia, Pa. Filed Sept. 16, 1947. Under section 2f of the act of 1946.

CORNELL

Applicant claims ownership of registrations Nos. 270,251, 311,241, 326,700, 389,601, and 392,205.
FOR VEHICLE TIRES AND INNER TUBES CONSTRUCTED OF RUBBER AND RUBBERIZED FABRIC.
Claims use since Feb. 9, 1929.

CLASS 36

MUSICAL INSTRUMENTS AND SUPPLIES

Ser. No. 511,538. C. G. CONN, LTD., Elkhart, Ind. Filed July 11, 1947.

STANOPLE

FOR CYMBALS.
Claims use since 1936.

CLASS 37

PAPER AND STATIONERY

Ser. No. 532,385. ARTHUR E. NEUMANN, Chicago, Ill. Filed Aug. 25, 1947.

FIREFLY

FOR WRITING PAPER, ENVELOPES, PENCILS, PENS, AND BLANK GUMMED LABELS.
Claims use since Aug. 15, 1947.

CLASS 38

PRINTS AND PUBLICATIONS

Ser. No. 486,736. ARCADY FARMS MILLING COMPANY, Chicago, Ill. Filed Nov. 19, 1947.

ARCADY Farm NEWS

No exclusive right to the words "Farm News" is claimed apart from the mark.
FOR PUBLICATION ISSUED PERIODICALLY CONTAINING ARTICLES AND INFORMATION OF INTEREST TO AGRICULTURISTS.
Claims use since June 25, 1945.

Ser. No. 503,425. THE CHRISTIAN SCIENCE PUBLISHING SOCIETY, Boston, Mass. Filed Sept. 12, 1947. Under section 2f of the act of 1946.

The Diary of Snubs, Our Dog—

FOR COMIC STRIP IN DAILY NEWSPAPERS.
Claims use since June 4, 1923.

Ser. No. 521,928. RAND MCNALLY AND COMPANY, Chicago, Ill. Filed Oct. 7, 1947.

FOR BOOKS, PARTICULARLY CHILDREN'S BOOKS.
Claims use since Mar. 28, 1947.

Ser. No. 538,022. CHARLES E. MERRILL CO., INC., Columbus, Ohio. Filed Oct. 16, 1947.

Filed July 1, 1947. Serial No. 525,419. PUBLISHED APRIL 6, 1948. Class 4.

439,939. COMBINATION ELECTRIC NURSING BOTTLE WARMERS AND NURSING BOTTLE STERILIZERS. SANIT-ALL PRODUCTS CORPORATION, Greenwich, Ohio.
Filed July 4, 1947. Serial No. 526,295. PUBLISHED APRIL 27, 1948. Class 21.

ACT OF 1920

These registrations are not subject to opposition.

439,940. (CLASS 1. RAW OR PARTLY PREPARED MATERIALS.) ARISTON, INCORPORATED, New York, N. Y. Filed Sept. 8, 1944. Serial No. 473,972.

FOR CUT FLOWERS.
Claims use since Aug. 29, 1944.

439,941. (CLASS 1. RAW OR PARTLY PREPARED MATERIALS.) AKTIEBOLAGET IGGESUNDS BRUK, Iggesund, Sweden. Filed Nov. 28, 1944. Serial No. 476,944.

LINEN

FOR CHEMICAL WOOD PULP AND MECHANICAL PULP USED IN THE MAKING OF PAPER, SYNTHETIC FABRICS, MOULDED ARTICLES, AND FIGURE TOYS.
Claims use since Oct. 20, 1934.

439,942. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) COMMANDER MANUFACTURING CO., Chicago, Ill. Filed Nov. 23, 1945, Serial No. 492,034.

MULTI-DRILL

FOR MULTIPLE SPINDLE DRILL HEAD FOR A DRILL PRESS OR OTHER DRILLING MACHINE.
Claims use since Oct. 25, 1945.

439,943. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) JOHN L. WHITE, doing business as K-JAX, Dallas, Tex. Filed Aug. 26, 1946. Serial No. 508,079.

"ROTO-PEIN"

FOR PEINING TOOL HOLDING ATTACHMENT FOR ELECTRIC HAND DRILLS.
Claims use since Dec. 1, 1943.

439,944. (CLASS 6. CHEMICALS, MEDICINES, AND PHARAMACEUTICAL PREPARATIONS.) THE BENGAL COMPANY, New York, N. Y. Filed Oct. 7, 1946. Serial No. 510,374.

MOTH-PRUF
TRADE MARK

FOR MOTH-PROOFING SOLUTIONS.
Claims use since Jan. 5, 1945.

439,945. (CLASS 31. FILTERS AND REFRIGERATORS.) ELGIN SOFTENER CORPORATION, Elgin, Ill. Filed Feb. 24, 1947. Serial No. 517,979.

DOUBLE CHECK

FOR PRESSURE FILTERS AND GRANULAR BASE EXCHANGE WATER SOFTENERS.
Claims use since Jan. 1, 1938.

439,946. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) JOHN F. LORINE, doing business as The Fortune Chemical Co., Philadelphia, Pa. Filed May 1, 1947. Serial No. 521,668.

SWABS - ON

FOR PREPARATION FOR THE TREATMENT OF ATHLETES FOOT.
Claims use since Mar. 12, 1947.

439,947. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) W. R. BROWN CORPORATION, Chicago, Ill. Filed May 24, 1947. Serial No. 522,962.

FOR PAINT SPRAYERS AND SPRAY GUNS.
Claims use since 1925.

439,948. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) HARVARD LOCK COMPANY, Reading, Pa., and New York, N. Y. Filed July 3, 1947. Serial No. 525,841.

HARVARD

FOR BOAT HOOKS.
Claims use since 1938.

ACT OF 1946, PRINCIPAL REGISTER

501,128. MECHANICAL PENCILS, PARTS THEREOF, AND LEADS THEREFOR. W. A. SHEAFFER PEN COMPANY, Fort Madison, Iowa.
Filed July 5, 1947. Serial No. 439,297. PUBLISHED APRIL 20, 1948. Class 37.

501,129. HEATING EQUIPMENT—NAMELY, RADIATOR-TYPE HEAT EXCHANGER UNITS FOR HEATING THE AIR IN CABINS OF AIRCRAFT BY EXCHANGE OF HEAT FROM ENGINE EXHAUST GASES. THE GARRETT CORPORATION (AIRESEARCH MANUFACTURING COMPANY DIVISION), Los Angeles, Calif.
Filed July 5, 1947. Serial No. 465,360. PUBLISHED FEBRUARY 10, 1948. Class 34.

501,130. VACUUM BOTTLES AND HEAT-INSULATED RECEPTACLES—NAMELY, PORTABLE HEAT-INSULATED FOOD AND BEVERAGE CONTAINERS OF SUBSTANTIALLY BOTTLE OR JUG FORM, INCLUDING AN INNER FRANGIBLE CONTAINER AND AN OUTER PROTECTIVE JACKET HEAT AND/OR SHOCK-INSULATED FROM THE FRANGIBLE CONTAINER. Carboverter

FOR CYLINDER AND TANK CONVERTERS FOR SOLID CARBON DIOXIDE.

Claims use since May 11, 1931.

Reg. No. 343,530. Registered Feb. 23, 1937. CROWN CAN COMPANY, Philadelphia, Pa., a corporation of Pennsylvania. Republished by registrant.

CROWN

FOR METAL CANS.

Claims use since on or about Aug. 14, 1936.

Reg. No. 371,659. Registered Oct. 3, 1939. THOMAS M. ROYAL & CO., Philadelphia, Pa., a corporation of Pennsylvania. Republished by registrant.

Flavotainer

FOR PAPER BAGS FOR PACKAGING OF FOODS.

Claims use since Feb. 15, 1939.

Reg. No. 394,488. Registered Apr. 7, 1942. HODGMAN RUBBER COMPANY, Framingham, Mass., a corporation of Massachusetts. Republished by registrant.

Coolapak
REFRIGERATOR BAG

The words "Refrigerator Bag" are disclaimed.

FOR REFRIGERATOR BAGS.

Claims use since Oct. 21, 1941.

CLASS 3

BAGGAGE, ANIMAL EQUIPMENTS, PORTFOLIOS, AND POCKETBOOKS

Reg. No. 327,930. Registered Sept. 10, 1935. BUSCARLET GLOVE COMPANY, INC., New York, N. Y., a corporation of New York. Republished by registrant.

KISLAV

FOR LEATHER HANDBAGS AND POCKETBOOKS.

Claims use since Sept. 1, 1934.

Reg. No. 417,756. Registered Nov. 13, 1945. PICHEL INC., New York, N. Y., a corporation of New York. Republished by registrant.

VELVASUEDE

FOR LADIES' HANDBAGS.

Claims use since June 14, 1945.

Reg. No. 431,285. Registered July 15, 1947. WM. FILENE'S SONS COMPANY, Boston, Mass., a corporation of Massachusetts. Republished by registrant.

YANKEE TRIPPER

FOR SUITCASES, TRUNKS, TRAVELING BAGS, AND HAND BAGS.

Claims use since Nov. 8, 1946.

CLASS 4

ABRASIVE, DETERGENT, AND POLISHING MATERIALS

Reg. No. 49,035. Registered Jan. 23, 1906. THE ELECTRO SILICON CO., New York, N. Y., a corporation of New York. Republished by registrant.

FOR PREPARATION FOR CLEANSING AND POLISHING METALS AND GLASS.

Claims use since 1867.

Reg. No. 131,100. Registered May 4, 1920. THE ELECTRO SILICON CO., New York, N. Y., a corporation of New York. Republished by registrant.

ESCO

FOR A PREPARATION FOR CLEANING AND POLISHING METALS AND GLASS.

Claims use since August 1918.

Reg. No. 210,428. Registered Mar. 16, 1926. B. A. RAILTON CO., Chicago, Ill., a corporation of Illinois. Republished by registrant.

BARCO

FOR LIQUID PASTE AND POWDER, SOAPS AND CLEANSERS—NAMELY, CHIPS, LAUNDRY, POWDER, AND TOILET.

Claims use since 1914.

Reg. No. 230,882. Registered Aug. 9, 1927. INTERNATIONAL CHEMICAL COMPANY, Chicago, Ill., a corporation of Illinois. Republished by registrant.

SHAVOLENE

FOR PREPARATION FOR SHAVING, NOT A SOAP, TO BE APPLIED BEFORE SHAVING.
Claims use since Apr. 15, 1926.

Reg. No. 318,342. Registered Oct. 23, 1934. OLD DUTCH INDUSTRIAL PRODUCTS CO. INC., Newark, N. J., a corporation of New Jersey. Republished by registrant.

FOR SHOE POLISH.
Claims use since April 1933.

Reg. No. 328,864. Registered Oct. 8, 1935. BUSCARLET GLOVE COMPANY, INC., New York, N. Y., a corporation of New York. Republished by registrant.

KISLAV

FOR GLOVE LAUNDRY SOAP.
Claims use since Mar. 1, 1935.

Reg. No. 384,351. Registered Jan. 14, 1941. ROLAND E. DERBY, doing business as The Derby Company, Lawrence, Mass. Republished by registrant.

DERCOSOL

FOR NON-EXPLOSIVE SOLVENT FOR CLEANING YARNS AND TEXTILE FIBERS AND FABRICS AND THE LIKE.
Claims use since early in March 1940.

Reg. No. 408,191. Registered July 25, 1944. OLD DUTCH INDUSTRIAL PRODUCTS CO. INC., Kearny, N. J., a corporation of New Jersey. Republished by registrant.

SUEDE ACE

The word "Suede" is disclaimed.
FOR SHOE DRESSINGS.
Claims use since October 1942.

Reg. No. 417,893. Registered Nov. 20, 1945. OLD DUTCH INDUSTRIAL PRODUCTS CO., INC., Harrison, N. J., a corporation of New Jersey. Republished by registrant.

FOR SHOE POLISH, SHOE DRESSING AND SHOE WAXES.
Claims use since February 1944.

Reg. No. 419,641. Registered Feb. 26, 1946. CHARLES OF THE RITZ, INC., New York, N. Y., a corporation of Delaware. Republished by registrant.

Charles of the Ritz

The word "Ritz" is disclaimed.
FOR TOILET SOAPS.
Claims use since May 1943.

CLASS 5

ADHESIVES

Reg. No. 209,310. Registered Feb. 23, 1926. NASHUA GUMMED AND COATED PAPER COMPANY, Nashua, N. H., a corporation of Massachusetts. Republished by registrant.

itstix

FOR GUMMED PAPER TAPE.
Claims use since on or about July 1, 1925.

Reg. No. 379,568. Registered July 16, 1940. NASHUA GUMMED AND COATED PAPER COMPANY, Nashua, N. H., a corporation of Massachusetts. Republished by registrant.

TAPAK

FOR GUMMED PAPER TAPE IN BUNDLES OR CONTAINERS.
Claims use since on or about May 1926.

Reg. No. 410,939. Registered Dec. 26, 1944. ARGUS, INCORPORATED, Ann Arbor, Mich., a corporation of Michigan. Republished by registrant.

UV-101

FOR ADHESIVE OPTICAL CEMENT AND A CATALYST CONSISTING OF A CHEMICAL COMPOSITION FOR USE AS A SETTING ACCELERATOR FOR ADHESIVE OPTICAL CEMENT, USUALLY SOLD TOGETHER FOR CONJOINT USE.
Claims use since June 13, 1944.

CLASS 6

CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS

Reg. No. 44,708. Registered July 18, 1905. ALKALOL COMPANY, Taunton, Mass. Republished by Alkalol Company, Taunton, Mass., a corporation of Massachusetts.

ALKALOL

FOR ALKALINE ANTISEPTIC WASH.
Claims use since November 1896.

Reg. No. 157,669. Registered Aug. 15, 1922. THE P. W. DRACKETT & SONS COMPANY, Cincinnati, Ohio, now by change of name The Drackett Chemical Company. Republished by The Drackett Company, Cincinnati, Ohio, a corporation of Ohio.

DRANO

FOR A CHEMICAL FOR CLEANSING DRAINS, SINKS, WASHBOWLS, ETC.
Claims use since January 1921.

Reg. No. 181,314. Registered Mar. 18, 1924. H. T. DEWEY & SONS CO., New York, N. Y., a corporation of New York. Republished by registrant.

The word "Emulsion" is disclaimed.
FOR EMULSION OF COD-LIVER OIL AND PORT WINE WITH GLYCEROPHOSPHATE OF LIME FOR THE TREATMENT OF COUGHS, COLDS, AND LUNG TROUBLES, AND FOR USE AS A TONIC.
Claims use since April 1923.

Reg. No. 226,718. Registered Apr. 19, 1927. HYMAN HUBSCHMAN, Brooklyn, N. Y. Republished by Charles of the Ritz, Inc., New York, N. Y., a corporation of Delaware.

RitzCarlton

FOR PERFUMES, TOILET WATERS, HAIR TONICS, FACE LOTIONS, FACE POWDERS, LIP STICKS, ROUGES, LIP POMADES, HAIR WASHES, SHAMPOOS, BRILLIANTINES, HAIR-DRESSINGS, HAND LOTIONS, FACIAL CREAMS, TOOTH PASTES, MASSAGING CREAMS, TOILET-ARTICLE NOVELTIES CONTAINING PERFUME, TOILET WATERS, FACE POWDERS, LIP STICKS, ROUGE, AND TOILET CREAMS.
Claims use since Sept. 1, 1926.

Reg. No. 236,377. Registered Dec. 13, 1927. REED & CARNRICK, Jersey City, N. J., a corporation of New Jersey. Republished by registrant.

Nephritin

FOR PREPARATION FOR DISEASES OF THE KIDNEYS, COMPRISING THE PRIMARY SUBSTANCE FROM THE CELLS OF THE CORTEX AND THE CONVOLUTED TUBULES OF THE KIDNEYS.
Claims use since July 26, 1911.

Reg. No. 252,361. Registered Feb. 5, 1929. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

"COUNTRY CLUB"

FOR MALT TONIC ESPECIALLY ADAPTED FOR THE WEAK, SICK, AND CONVALESCENT.
Claims use since Feb. 17, 1928.

Reg. No. 286,349. Registered Jan. 14, 1930. WILLIAM C. NALLE, Washington, D. C., assignor to Health Products Corporation of Newark, N. J., a corporation of New Jersey. Republished by White Laboratories, Inc., Newark, N. J., a corporation of New Jersey.

Dillard's Aspergum

FOR CHEWING GUM CONTAINING ASPIRIN.
Claims use since on or about May 28, 1928.

Reg. No. 266,381. Registered Jan. 14, 1930. PHILADELPHIA SEED CO., Philadelphia, Pa., a corporation of Pennsylvania. Republished by registrant.

PURGRAIN PIGEON GRIT

The words "Pigeon Grit" are disclaimed.
FOR HEALTH CONDITIONER AND TONIC FOR POULTRY.
Claims use since Feb. 1, 1929.

Reg. No. 267,352. Registered Feb. 18, 1930. WM. FILENE'S SONS COMPANY, Boston, Mass., a corporation of Massachusetts. Republished by registrant.

Filene's

FOR IODINE PENCILS, DISINFECTANTS, BAY RUM, RUBBING ALCOHOL GLYCERIN AND ROSE WATER, WITCH HAZEL, PEROXIDE, DEODORANTS, EPSOM SALTS, PERFUMES, FACE CREAMS, FACE POWDERS, ROUGE, LIPSTICKS, TOOTH PASTES, FACE LOTIONS, TALCS, BATH SALTS, DUSTING POWDERS, FOOT PREPARATIONS, HAIR PREPARATIONS, BORIC SOLUTION.
Claims use since Jan. 1, 1928.

Reg. No. 274,132. Registered Aug. 19, 1930. HEALTH PRODUCTS CORPORATION, Newark, N. J. Republished by White Laboratories, Inc., Newark, N. J., a corporation of New Jersey.

Whites

FOR COD-LIVER-OIL CONCENTRATE.
Claims use since February 1930.

Reg. No. 324,936. Registered June 4, 1935. INTRAVENOUS PRODUCTS CO. OF AMERICA, INC., New York, N. Y. Republished by Endo Products, Inc., Richmond Hill, N. Y., a corporation of New York.

ENDO

FOR INTRAVENOUS SOLUTIONS PUT UP IN AMPOULE FORM TO BE USED FOR VARIOUS PHARMACEUTICALS AND DRUG MEDICATION FOR ORAL, INTRAMUSCULAR, INTRAVENOUS, SUBCUTANEOUS, EXTERNAL AND NEEDLE APPLICATIONS, AND ALL THE OTHER ITEMS LISTED IN THE REGISTRATION.
Claims use since June 1, 1916.

Reg. No. 336,383. Registered July 7, 1936. HERMAN B. LAYMON, Spencer, Ind. Republished by registrant.

BROMO CHASER

The word "Bromo" is disclaimed.
FOR MEDICINAL PREPARATION IN POWDER FORM FOR THE RELIEF OF HEADACHES AND THE LIKE.
Claims use since on or about Feb. 20, 1936.

Reg. No. 346,786. Registered June 8, 1937. BURROUGHS WELLCOME & CO. (U. S. A.), INC., New York, N. Y., a corporation of New York. Republished by registrant.

'FERAD'

FOR MEDICINAL PREPARATION TO BE USED IN THE TREATMENT OF ANAEMIC CONDITIONS.
Claims use since December 1936.

Reg. No. 356,426. Registered Apr. 26, 1938. HERMAN B. LAYMON, Spencer, Ind. Republished by registrant.

Gon

FOR LIQUID PREPARATION FOR CORRECTION OF UNPLEASANT BREATH.
Claims use since on or about June 15, 1937.

Reg. No. 357,790. Registered June 14, 1938. MALLINCKRODT CHEMICAL WORKS, St. Louis, Mo., a corporation of Missouri. Republished by registrant.

FOR ACETIC ANHYDRIDE, ACETONE, ACID ACETIC, AND ALL THE OTHER ITEMS NAMED IN THE ORIGINAL REGISTRATION EXCEPT ACID MOLYBDIC.
Claims use since Apr. 27, 1932.

Reg. No. 359,179. Registered Aug. 9, 1938. MALLINCKRODT CHEMICAL WORKS, St. Louis, Mo., a corporation of Missouri. Republished by registrant.

FOR ACETPHENETIDIN (ACETOPHENETIDINUM), ACID ACETYLSALICYLIC (ACIDUM ACETYLSALICYLICUM), AND ALL OTHER ITEMS NAMED IN THE ORIGINAL REGISTRATION.
Claims use since Sept. 25, 1937.

Reg. No. 377,570. Registered May 7, 1940. WHITE LABORATORIES, INC., Newark, N. J. Republished by Pharmaco, Inc., Newark, N. J., a corporation of Delaware.

CHOOZ

FOR PREPARATION TO AID DIGESTION.
Claims use since Dec. 5, 1939.

Reg. No. 391,716. Registered Nov. 18, 1941. SELRODO PRODUCTS, INC., Seattle, Wash. Republished by Stansbury Chemical Company, Seattle, Wash., a corporation of Washington.

Selrodo

FOR PREPARATION USED FOR THE TREATMENT OF SYMPTOMS OF BRONCHIAL ASTHMA AND HAY FEVER.
Claims use since May 14, 1941.

Reg. No. 397,193. Registered Aug. 25, 1942. PURITAN CHEMICAL COMPANY, Atlanta, Ga., a corporation of Georgia. Republished by registrant.

DRIER-OUTER

The word "Drier" is disclaimed.
FOR DEVICE CONTAINING CHEMICALS FOR USE IN ABSORBING MOISTURE AND AS A DEODORIZER.
Claims use since December 1941.

Reg. No. 399,245. Registered Dec. 22, 1942. THE DRACKETT COMPANY, Cincinnati, Ohio, a corporation of Ohio. Republished by registrant.

Drāno

FOR CHEMICAL FOR CLEANSING DRAINS, SINKS, WASHBOWLS, ETC.
Claims use since on or about Apr. 3, 1923.

Reg. No. 399,607. Registered Jan. 19, 1943. BURROUGHS WELLCOME & CO. (U. S. A.) INC., New York, N. Y., a corporation of New York. Republished by registrant.

BOROFAX

FOR BORATED OINTMENT CONTAINING 10% OF BORIC ACID IN A SOOTHING EMOLLIENT BASE TO BE USED AS AN APPLICATION FOR ABRASIONS, CHAPPING, AND CHAFING, AND FOR INFLAMED EYELIDS OR TO ALLAY IRRITATION AFTER THE REMOVAL OF FOREIGN PARTICLES FROM THE EYE.
Claims use since Apr. 1, 1907.

Reg. No. 399,608. Registered Jan. 19, 1943. BURROUGHS WELLCOME & CO. (U. S. A.) INC., New York, N. Y., a corporation of New York. Republished by registrant.

SKETOFAX

FOR PRODUCT INTENDED FOR USE AS AN INSECTIFUGE TO PREVENT THE ATTACKS OF MOSQUITOES, GNATS, SANDFLIES, ETC.
Claims use since Dec. 1, 1920.

Reg. No. 399,974. Registered Feb. 9, 1943. THE NORITO CO., Chicago, Ill., a corporation of Illinois. Republished by registrant.

NORITO

FOR MEDICAL PREPARATIONS FOR THE TREATMENT OF RHEUMATISM, SCIATICA, AND NEURITIS.
Claims use since July 2, 1942.

Reg. No. 408,289. Registered Aug. 1, 1944. OLD DUTCH INDUSTRIAL PRODUCTS CO., INC., Kearny, N. J., a corporation of New Jersey. Republished by registrant.

BLACKACE

The word "Black" is disclaimed.
FOR LEATHER DYES.
Claims use since October 1937.

Reg. No. 409,932. Registered Oct. 31, 1944. OLD DUTCH INDUSTRIAL PRODUCTS CO., INC., Kearny, N. J., a corporation of New Jersey. Republished by registrant.

SUEDE ACE

The word "Suede" is disclaimed.
FOR SHOE DYES.
Claims use since October 1942.

Reg. No. 413,595. Registered May 1, 1945. KENTUCKY COLOR & CHEMICAL CO., Louisville, Ky., a corporation of Kentucky. Republished by registrant.

TOMAHAWK

FOR INSECTICIDES.
Claims use since Mar. 15, 1944.

Reg. No. 420,719. Registered Apr. 30, 1946. CHARLES OF THE RITZ, INC., New York, N. Y., a corporation of Delaware. Republished by registrant.

Charles of the Ritz

The word "Ritz" is disclaimed.
FOR PERFUMES, TOILET WATERS, COMPACT MAKE-UP, LIPSTICKS, ROUGE, MASCARA, EYEBROW PENCILS, PERFUMED SACHETS IN POWDER FORM, CLEANSING CREAMS, SKIN LOTIONS, HAND LOTIONS, FACE POWDER, DEODORANT, BRILLIANTINE, HAIR TONIC, LEG MAKE-UP, HAIR LOTIONS, COLOGNES, AND SHAMPOOS.
Claims use since May 1943.

Reg. No. 421,409. Registered June 4, 1946. BURROUGHS WELLCOME & CO. (U. S. A.) INC., New York, N. Y., a corporation of New York. Republished by registrant.

'AVICAP'

FOR POLYVITAMIN PRODUCT CONTAINING SIX ESSENTIAL VITAMINS (A, D, B_1, B_2, C AND NICOTINIC ACID AMIDE) ENCAPSULATED IN GELATIN.
Claims use since May 1, 1942.

Reg. No. 423,842. Registered Sept. 10, 1946. BURROUGHS WELLCOME & CO. (U. S. A.) INC., New York, N. Y., a corporation of New York. Republished by registrant.

PROTOGEST

FOR PROTEIN HYDROLYSATE CONTAINING THE ESSENTIAL AMINO-ACIDS AND OTHER SUBSTANCES DERIVED FROM PROTEIN; INTENDED FOR USE AS A DIETARY SOURCE OF AMINO-ACIDS FOR NUTRITIVE AND THERAPEUTIC PURPOSES.
Claims use since Dec. 27, 1945.

Reg. No. 425,166. Registered Nov. 5, 1946. PURITAN CHEMICAL COMPANY, Atlanta, Ga., a corporation of Georgia. Republished by registrant.

Odor-Out

The word "Odor" is disclaimed.
FOR CHEMICAL PREPARATION FOR ABSORBING DISAGREEABLE ODORS.
Claims use since Jan. 3, 1944.

Reg. No. 426,394. Registered Dec. 24, 1946. BURROUGHS WELLCOME & Co. (U. S. A.) INC., New York, N. Y., a corporation of New York. Republished by registrant.

B. W. & Co.

FOR STROPHANTHUS TINCTURE, BISMUTH SUBSALICYLATE WITH CHLOROBUTANOL IN OIL, SOLUTIONS OF DIGOXIN AND "HAZELINE" WITCH HAZEL.
Claims use since 1884.

Reg. No. 428,698. Registered Apr. 1, 1947. MECOS, INC., New Orleans, La., a corporation of Louisiana. Republished by registrant.

Wylon

FOR HAIR DRESSING MASSAGE CREAM, MUD PACKS, PRESSING OIL, SCALP PREPARATIONS, SHAMPOO, DEODORANT CREAM, HAIR POMADE, BRILLIANTINE HAIR CREAM, WAVE SETTING JELLY, HAIR OIL, VANISHING CREAM, SKIN CREAM, CLEANSING COLD CREAM, TALCUM POWDER, SACHET POWDER, FACE AND HAND LOTION.
Claims use since Nov. 1, 1939.

CLASS 7

CORDAGE

Reg. No. 114,264. Registered Dec. 5, 1916. MT. VERNON-WOODBERRY MILLS, INC., Baltimore, Md., a corporation of Maryland. Republished by registrant.

FOR COTTON ROPE.
Claims use since 1905.

Reg. No. 129,995. Registered Mar. 16, 1920. MT. VERNON-WOODBERRY MILLS, INC., Baltimore, Md., a corporation of Maryland. Republished by registrant.

WOODBERRY

FOR COTTON TWINE.
Claims use since 1866.

Reg. No. 186,103. Registered July 1, 1924. MT. VERNON-WOODBERRY MILLS, INC., Baltimore, Md., a corporation of Maryland. Republished by registrant.

PARK

FOR COTTON TWINE.
Claims use since November 1922.

Reg. No. 186,104. Registered July 1, 1924. MT. VERNON-WOODBERRY MILLS, INC., Baltimore, Md., a corporation of Maryland. Republished by registrant.

MT. VERNON

FOR COTTON TWINE.
Claims use since about 1890.

Reg. No. 411,360. Registered Jan. 16, 1945. THE DUPLAN CORPORATION, New York, N. Y., a corporation of Delaware. Republished by registrant.

ETNATEX

FOR CORDS MADE PARTLY OR TOTALLY OF FIREPROOF MATERIAL SUCH AS GLASS FIBRES, AND WHICH ARE USED TO JOIN PARTS OF MACHINERY SUCH AS AEROPLANES, OR USED IN ANY PLACE WHERE ORDINARY CORDS MIGHT BE IGNITED BY SPARKS.
Claims use since May 24, 1943.

Reg. No. 415,128. Registered July 10, 1945. MT. VERNON-WOODBERRY MILLS, INC., Baltimore, Md., a corporation of Maryland. Republished by registrant.

FOR TWINE, PARTICULARLY SEINE TWINE.
Claims use since May 1932.

CLASS 8

SMOKERS' ARTICLES, NOT INCLUDING TOBACCO PRODUCTS

Reg. No. 300,816. Registered Feb. 7, 1933. SMOKADOR MANUFACTURING CO., INC., Bloomfield, N. J., a corporation of Delaware. Republished by registrant.

FLEXADOR

FOR ASH RECEIVERS OF NON-PRECIOUS METAL.
Claims use since Sept. 30, 1932.

CLASS 12

CONSTRUCTION MATERIALS

Reg. No. 209,108. Registered Feb. 16, 1926. W. H. LOOMIS TALC CORPORATION, Gouverneur, N. Y., a corporation of New York. Republished by registrant.

LOOMITE

FOR SPECIAL TALC USED PRIMARILY IN WATERPROOFING AND STRENGTHENING CONCRETE.
Claims use since July 15, 1925.

Reg. No. 317,319. Registered Sept. 18, 1934. THE CHAS. TAYLOR SONS CO., Cincinnati, Ohio, a corporation of Ohio. Republished by registrant.

P.B. SILLIMANITE RAMMING MIX

The words "Ramming Mix" are disclaimed.
FOR ALUMINUM SILICATE REFRACTORIES USED FOR THE CONSTRUCTION OF ALL TYPES OF INDUSTRIAL FURNACES SUCH AS GLASS FURNACES, ELECTRIC FURNACES, ETC.
Claims use since Sept. 1, 1929.

Reg. No. 407,172. Registered May 28, 1944. THE CHAS. TAYLOR SONS CO., Cincinnati, Ohio, a corporation of Ohio. Republished by registrant.

The name "Taylor" is disclaimed.
FOR REFRACTORY CEMENTS, RAMMING MIXES, BRICKS AND BLOCKS.
Claims use since November 1940.

Reg. No. 407,173. Registered May 23, 1944. THE CHAS. TAYLOR SONS CO., Cincinnati, Ohio, a corporation of Ohio. Republished by registrant.

The words "Taylor Sillimanite" are disclaimed.
FOR REFRACTORY CEMENTS, RAMMING MIXES, BRICKS AND BLOCKS.
Claims use since 1925.

Reg. No. 412,917. Registered Apr. 3, 1945. THE CHAS. TAYLOR SONS CO., Cincinnati, Ohio, a corporation of Ohio. Republished by registrant.

The word "Sillimanite" and the surname "Taylor" is disclaimed.
FOR REFRACTORY CEMENTS, REFRACTORY RAMMING MIXES, REFRACTORY BRICKS AND REFRACTORY BLOCKS.
Claims use since November 1940.

CLASS 13

HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES

Reg. No. 190,125. Registered Oct. 7, 1924. THE D. A. EBINGER SANITARY MFG. CO., Columbus, Ohio. Republished by Ebco Manufacturing Company, a firm, Columbus, Ohio, assignor to The Ebco Manufacturing Company, a corporation of Ohio.

EBCO

The drawing is lined for red.
FOR URINALS, CLOSETS, VENTILATED CLOSETS, DRINKING FOUNTAINS, LAVATORIES, WASH SINKS, SHOWERS, SHOWER COMPARTMENTS, STEEL CLOSETS, KITCHEN SINKS, WATER COOLERS, CLOSET SEATS, CLOSET BOWLS, LAUNDRY TRAYS, AND CLOSET FLUSH VALVES.
Claims use since 1916.

Reg. No. 216,283. Registered Aug. 10, 1926. CALUMET STEEL COMPANY, Chicago, Ill. Republished by Borg-Warner Corporation, Chicago, Ill., a corporation of Illinois.

ANKORITE

FOR METALLIC FENCE POSTS.
Claims use since Sept. 28, 1918.

Reg. No. 217,262. Registered Aug. 31, 1926. AMERICAN CAST IRON PIPE COMPANY, Birmingham, Ala., a corporation of Georgia. Republished by registrant.

MONO-CAST.

The word "Cast" is disclaimed.
FOR CENTRIFUGALLY-CAST HOLLOW BODIES—NAMELY, CAST-IRON PIPE WITH OR WITHOUT BELL AND SPIGOT ENDS.
Claims use since Feb. 15, 1926.

Reg. No. 267,398. Registered Feb. 18, 1930. WM. FILENE'S SONS COMPANY, Boston, Mass., a corporation of Massachusetts. Republished by registrant.

Filene's

FOR DRINKING CUPS, MUGS, CHALICES, PORRINGERS, URNS, BASINS, FUNNELS, PLATTERS, TEAPOTS, TEA KETTLES, COFFEE POTS, MUSTARD POTS, SUGAR BOWLS, PITCHERS, CRUMBERS, CANDY COMPOTES, VEGETABLE DISHES, BREAD PLATES, MADE OF NON-PRECIOUS METALS.
Claims use since on or about Jan. 1, 1928.

Reg. No. 281,396. Registered Mar. 17, 1931. AMERICAN CAST IRON PIPE COMPANY, Birmingham, Ala., a corporation of Georgia. Republished by registrant.

MONOLOY

FOR CAST HOLLOW BODIES—NAMELY, PIPE OR TUBES WITH OR WITHOUT BELL AND SPIGOT ENDS.
Claims use since Oct. 9, 1930.

Reg. No. 288,068. Registered Oct. 20, 1931. AMERICAN CAST IRON PIPE COMPANY, Birmingham, Ala., a corporation of Georgia. Republished by registrant.

ACIPCO

FOR HOLLOW CAST METAL BODIES—NAMELY, CAST IRON PIPES AND FITTINGS HAVING PLAIN OR FLANGED ENDS, AND WITH OR WITHOUT BELL AND SPIGOT ENDS.
Claims use since on or about March 1906.

Reg. No. 333,562. Registered Mar. 24, 1936. A. L. HANSEN MFG. CO., Chicago, Ill., a corporation of Illinois. Republished by registrant.

HANSCO

FOR MACHINE STAPLES.
Claims use since Nov. 6, 1935.

Reg. No. 338,616. Registered Sept. 8, 1936. CALUMET STEEL COMPANY, Chicago, Ill. Republished by Borg-Warner Corporation, Chicago, Ill., a corporation of Illinois.

GOLD CROWN

FOR STEEL FENCE POSTS.
Claims use since Mar. 25, 1936.

Reg. No. 341,915. Registered Dec. 29, 1936. AMERICAN CAST IRON PIPE COMPANY, Birmingham, Ala., a corporation of Georgia. Republished by registrant.

DOUBLEX SIMPLEX

FOR CAST IRON PIPE.
Claims use since Jan. 1, 1930.

Reg. No. 376,489. Registered Mar. 26, 1940. A. L. HANSEN MFG. CO., Chicago, Ill., a corporation of Illinois. Republished by registrant.

VEST-KIT

The word "Kit" is disclaimed.
FOR MACHINE STAPLES.
Claims use since Sept. 15, 1939.

Reg. No. 422,954. Registered Aug. 20, 1946. WALTER, KIDDE & COMPANY, INC., New York, N. Y., and Belleville, N. J., a corporation of New York. Republished by registrant; present location, Belleville, N. J.

FOR METALLIC PULLEY COVERS AND HAND OR PNEUMATICALLY OPERATED VALVES FOR CONTROLLING THE RELEASE OF FLUID PRESSURE MEDIA FROM CONTAINERS.
Claims use since on or about Dec. 1, 1940.

CLASS 14

METALS AND METAL CASTINGS AND FORGINGS

Reg. No. 111,553. Registered July 25, 1916. H. BOKER & CO. INC., New York, N. Y., a corporation of New York. Republished by registrant.

GIBRALTAR

FOR SHEET METAL.
Claims use since about 1908.

Reg. No. 125,257. Registered Apr. 22, 1919. TAYLOR-WHARTON IRON AND STEEL COMPANY, High Bridge, N. J., a corporation of New Jersey. Republished by registrant.

TISCO

FOR MANGANESE STEEL AND MANGANESE STEEL IN CAST, FORGED, AND ROLLED FORM.
Claims use since Jan. 23, 1906.

Reg. No. 246,056. Registered Aug. 28, 1928. VANADIUM CORPORATION OF AMERICA, Bridgeville, Pa., a corporation of Delaware. Republished by registrant, present location, New York, N. Y.

The word "Brand" is disclaimed.
FOR ALLOYS, AND ESPECIALLY ALLOYS CONTAINING VANADIUM, SILICON, CHROMIUM, ALUMINUM, MANGANESE, TUNGSTEN, MOLYBDENUM, TITANIUM, ZIRCONIUM, AND CADMIUM.
Claims use since Jan. 30, 1928.

Reg. No. 257,188. Registered May 28, 1929. TAYLOR-WHARTON IRON AND STEEL COMPANY, High Bridge, N. J., a corporation of New Jersey. Republished by registrant.

TIMANG

FOR IRON OR STEEL ALLOYS.
Claims use since on or about Nov. 1, 1928.

Reg. No. 307,759. Registered Oct. 31, 1933. TAYLOR-WHARTON IRON AND STEEL COMPANY, High Bridge, N. J., a corporation of New Jersey. Republished by registrant.

TW

FOR CARBON AND ALLOY STEELS PARTICULARLY MANGANESE STEEL IN CAST, FORGED, AND ROLLED FORM.
Claims use since Apr. 5, 1933.

Reg. No. 315,748. Registered Aug. 7, 1934. FRANK FOUNDRIES CORPORATION, Moline, Ill., a corporation of Iowa. Republished by registrant.

Frankite

FOR FERROUS AND NONFERROUS METAL ALLOY CASTINGS, ROUGH AND PARTLY FINISHED, COMPRISING GEARS, SPROCKETS, CLUTCH PARTS, FORMING DIES, STAMPING DIES, EXHAUST MANIFOLDS, STOKER TUYERES, STOKER CHAIN LINKS, CYLINDER LINERS FOR SLEEVES, GRID CASTINGS FOR USE IN THE SALT INDUSTRY, NOSE RINGS FOR KILNS USED IN THE LIME AND CEMENT INDUSTRY, BUBBLE CAPS, MANIFOLDS, PUMP LINERS, CONDENSER PARTS, TRAPS, RELIEF VALVES USED IN THE OIL INDUSTRY INCLUDING OIL REFINERIES, FOOD HANDLING EQUIPMENT, GRAIN GRINDING PLATES, SAND PUMPS, CEMENT GRINDING PLATES, MINING CAR WHEELS, CRANE WHEELS, CAST BRAKE DRUMS, AND MANIFOLDS, BURNER PARTS, VALVES, PUMPS AND COMPRESSOR PARTS USED IN THE PAPER INDUSTRY.
Claims use since Sept. 1, 1928.

Reg. No. 318,685. Registered Oct. 30, 1934. INGERSOLL STEEL AND DISC CO., Chicago, Ill. Republished by Borg-Warner Corporation, Chicago, Ill., a corporation of Illinois.

ING A CLAD

FOR LAMINATED STEEL SHEETS.
Claims use since Apr. 1, 1934.

Reg. No. 344,309. Registered Mar. 16, 1937. VANADIUM CORPORATION OF AMERICA, Bridgeville, Pa., a corporation of Delaware. Republished by registrant, present location, New York, N. Y.

GRAINAL

FOR ALLOYS TO BE ADDED TO FERROUS AND NON-FERROUS METALS AND ALLOYS FOR CONTROLLING THE GRAIN SIZE OF THE METALS OR ALLOYS.
Claims use since Oct. 23, 1936.

Reg. No. 350,787. Registered Oct. 5, 1937. VANADIUM CORPORATION OF AMERICA, Bridgeville, Pa., a corporation of Delaware. Republished by registrant, present location, New York, N. Y.

ALSIFER

FOR FERRO-ALLOYS CONTAINING ALUMINUM AND SILICON.
Claims use since Feb. 20, 1928.

Reg. No. 356,152. Registered Apr. 12, 1938. VANADIUM CORPORATION OF AMERICA, Bridgeville, Pa., a corporation of Delaware. Republished by registrant, present location, New York, N. Y.

GRAPHIDOX

FOR DEOXIDIZING AND GRAPHITIZING ALLOY FOR CAST IRON.
Claims use since Nov. 22, 1937.

Reg. No. 393,118. Registered Jan. 27, 1942. R. G. LE TOURNEAU, INC., Stockton, Calif., and Peoria, Ill., a corporation of California. Republished by registrant, present location, Stockton, Calif.

TOURNAWELD

FOR WELDING RODS.
Claims use since July 1, 1941.

Reg. No. 398,880. Registered Dec. 1, 1942. H. BOKER & CO., INC., New York, N. Y., a corporation of New York. Republished by registrant.

TWIN MO

FOR STEEL BARS, STEEL RODS, AND STEEL DRILL RODS.
Claims use since July 10, 1941.

Reg. No. 420,579. Registered Apr. 23, 1946. NATIONAL-STANDARD COMPANY, Niles, Mich., a corporation of Michigan. Republished by registrant.

NS

FOR STEEL STRIPS.
Claims use since Mar. 1, 1945.

Reg. No. 421,813. Registered June 18, 1946. H. BOKER & CO., INC., New York, N. Y., a corporation of New York. Republished by registrant.

KINITE

FOR FERRO ALLOYS.
Claims use since Oct 15, 1918.

Reg. No. 421,814. Registered June 18, 1946. H. BOKER & CO., INC., New York, N. Y., a corporation of New York. Republished by registrant.

KOMPITE

FOR COMPOSITE METAL CASTINGS.
Claims use since on or about Apr. 1, 1923.

CLASS 15

OILS AND GREASES

Reg. No. 264,371. Registered Nov. 26, 1929. UNION OIL COMPANY OF CALIFORNIA, Los Angeles, Calif. Republished by Sunset Oil Company, Los Angeles, Calif., a corporation of California.

SUNSET

FOR LUBRICATING OILS, WAXES, AND GREASES.
Claims use since Sept. 1, 1914.

Reg. No. 333,343. Registered Mar. 17, 1936. HARTOL PRODUCTS CORPORATION, New York, N. Y. Republished by Hartol Petroleum Corporation, New York, N. Y., a corporation of New Jersey.

HARTOL PRODUCTS

The word "Products" is disclaimed.
FOR GASOLINE AND MOTOR FUEL OILS AND MOTOR LUBRICATING OILS.
Claims use since 1923.

CLASS 16

PAINTS AND PAINTERS' MATERIALS

Reg. No. 170,778. Registered July 24, 1923. GODFREY L. CABOT, INC., Boston, Mass., a corporation of Massachusetts. Republished by registrant.

AUK

FOR CARBON BLACK.
Claims use since October 1916.

Reg. No. 306,189. Registered Sept. 12, 1933. O'BRIEN VARNISH COMPANY, South Bend, Ind. Republished by The O'Brien Corporation, South Bend, Ind., a corporation of Indiana.

T. T. O.

FOR CLEAR VARNISHES, READY MIXED PAINTS, VARNISH ENAMELS, READY MIXED FLAT WALL PAINT, AND READY MIXED ENAMEL UNDER COAT.
Claims use since Nov. 15, 1932.

Reg. No. 329,284. Registered Oct. 22, 1935. UNITED STATES GYPSUM COMPANY, Chicago, Ill., a corporation of Illinois. Republished by registrant.

TEXOLITE

FOR PAINT IN PASTE FORM AND ART COLORS.
Claims use since May 1933.

Reg. No. 331,435. Registered Jan. 7, 1936. TNEMEC COMPANY, INC., Kansas City, Mo., a corporation of Missouri. Republished by registrant.

TNEMETANK

FOR READY MIXED PAINT.
Claims use since July 1934.

Reg. No. 381,809. Registered Oct. 8, 1940. CALIFORNIA FLAXSEED PRODUCTS COMPANY, Los Angeles, Calif., a corporation of California. Republished by registrant.

FOR FLAT WASHABLE WALL PAINT.
Claims use since Apr. 30, 1940.

Reg. No. 381,810. Registered Oct. 8, 1940. CALIFORNIA FLAXSEED PRODUCTS COMPANY, Los Angeles, Calif., a corporation of California. Republished by registrant.

WEATHERIZED

FOR FLAT WASHABLE WALL PAINT.
Claims use since Apr. 30, 1940.

Reg. No. 382,971. Registered Nov. 19, 1940. TRUE-TAGG PAINT COMPANY, Memphis, Tenn., a corporation of Tennessee. Republished by registrant.

All of the wording on the drawing is disclaimed except the word "Paintosis."
FOR PAINTS IN PASTE AND READY MIXED FORMS AND VARNISHES.
Claims use since Apr. 30, 1940.

Reg. No. 386,038. Registered Mar. 25, 1941. THE GENERAL WATERPROOFING COMPANY, Warren, Ohio. Republished by The General Waterproofing Corporation, Warren, Ohio, a corporation of Ohio.

Plugit GUARANTEED

The word "Guaranteed" is disclaimed.
FOR WATERPROOFING AND CEMENT PAINT.
Claims use since Feb. 1, 1932.

CLASS 19

VEHICLES

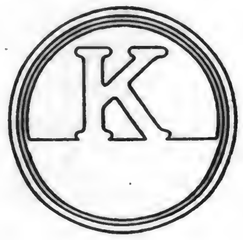
Reg. No. 267,400. Registered Feb. 18, 1930. WM. FILENE'S SONS COMPANY, Boston, Mass., a corporation of Massachusetts. Republished by registrant.

Filene's

FOR BICYCLES, BABY CARRIAGES, GO-CARTS.
Claims use since on or about Jan. 1, 1928.

Reg. No. 387,159. Registered May 6, 1941. R. G. LE TOURNEAU, INC., Peoria, Ill., and Stockton, Calif., a corporation of California. Republished by registrant, present location, Stockton, Calif.

TOURNATRAILER



FOR TRAILER TRUCKS.
Claims use since Nov. 5, 1938.

Reg. No. 404,899. Registered Dec. 28, 1943. R. G. LE TOURNEAU, INC., Peoria, Ill., a corporation of California. Republished by registrant, present location, Stockton, Calif.

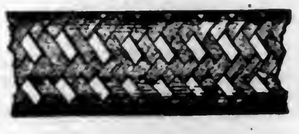
TOURNATRUCK

FOR TRAILER TRUCKS.
Claims use since on or about May 1, 1942.

Reg. No. 426,527. Registered Dec. 31, 1946. WALTER KIDDE & COMPANY, INC., New York, N. Y., and Belleville, N. J., a corporation of New York. Republished by registrant, present location, Belleville, N. J.

FOR MOBILE UNITS FOR FIRE EXTINGUISHING EQUIPMENT—NAMELY, AUTOMOTIVE CHASSIS FOR MOUNTING THEREON OF MODERN FIRE FIGHTING APPARATUS, AND TRAILERS FOR CARRYING FIRE FIGHTING APPARATUS AND ADAPTED TO BE ATTACHED TO AUTOMOTIVE VEHICLES.
Claims use since on or about Oct. 15, 1942.

CLASS 21



ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES

Reg. No. 162,306. Registered Dec. 12, 1922. THE MEAD ELECTRIC SIGNAL COMPANY, Cleveland, Ohio. Republished by The Autocall Company, Shelby, Ohio, a corporation of Ohio.

Tele-Call

FOR ELECTRICALLY OPERATED CODE SENDERS OR TRANSMITTERS OF SIGNALS USED IN AUTOMATIC CODE SIGNALLING, ELECTRIC BELLS OF THE SINGLE-STROKE, VIBRATING AND COMBINATION TYPES.
Claims use since Apr. 8, 1912.

Reg. No. 182,166. Registered Apr. 1, 1924. AMERICAN ELECTRICAL HEATER COMPANY, Detroit, Mich., a corporation of Michigan. Republished by registrant.

The drawing is lined for gold and yellow. No claim is made to the representation of a section of cord covering.
FOR ELECTRICAL CONDUCTOR CORDS.
Claims use since about March 1916.

Reg. No. 217,895. Registered Sept. 14, 1926. THE ARROW ELECTRIC COMPANY, Hartford, Conn. Republished by The Arrow-Hart and Hegeman Electric Company, Hartford, Conn., a corporation of Connecticut.

The words "Off," "High," "Med.," and "Low" are disclaimed, also, the representation of a switch. The shading indicates the color black and the rings are silver white.
FOR ROTARY SNAP SWITCHES.
Claims use since August 1923.

Reg. No. 267,134. Registered Feb. 11, 1930. WM. FILENE'S SONS COMPANY, Boston, Mass., a corporation of Massachusetts. Republished by registrant.

Filene's

For ELECTRIC LAMPS (TABLE, BRIDGE, AND FLOOR), FLASHLIGHTS, BATTERIES.
Claims use prior to Jan. 1, 1928.

Reg. No. 287,126. Registered Sept. 15, 1931. ALTORFER BROS. COMPANY, East Peoria, Ill., a corporation of Illinois. Republished by registrant, present location, Peoria, Ill.

ABC

FOR ELECTRIC POWER UNITS FOR THE OPERATION OF ELECTRICALLY DRIVEN BEATERS, KNIVES, MIXERS, SLICERS, SHREDDERS, CHIPPERS, CHOPPERS, SIEVES AND ROLLERS, JUICE EXTRACTORS, GRINDERS, DROPPERS, AND WATER JACKETS.
Claims use since on or about Oct. 8, 1930.

Reg. No. 287,127. Registered Sept. 15, 1931. ALTORFER BROS. COMPANY, East Peoria, Ill., a corporation of Illinois. Republished by registrant, present location, Peoria, Ill.

ABC Electrotable

FOR ELECTRIC POWER UNITS FOR THE OPERATION OF ELECTRICALLY DRIVEN BEATERS, KNIVES, MIXERS, SLICERS, SHREDDERS, CHIPPERS, CHOPPERS, SIEVES AND ROLLERS, JUICE EXTRACTORS, GRINDERS, DROPPERS, AND WATER JACKETS.
Claims use since on or about Oct. 8, 1930.

Reg. No. 351,332. Registered Oct. 26, 1937. WEBSTER ELECTRIC COMPANY, Racine, Wis. Republished by Webster Electric Company, Racine, Wis., a corporation of Delaware.

SYMPHOTONE

FOR SOUND REPRODUCTION EQUIPMENT, COMPRISING A SUITABLE HOUSING, AN ELECTRIC AMPLIFIER, ONE OR MORE ELECTRIC LOUD SPEAKERS, AN ELECTRIC PHONOGRAPH INCLUDING DRIVING MEANS, TURNTABLE AND PICK-UP, A MICROPHONE AND SUITABLE CONTROLLING DEVICES WHEREBY MUSIC OR OTHER SOUND MAY BE REPRODUCED AND/OR AMPLIFIED.
Claims use since June 3, 1936.

Reg. No. 369.450. Registered July 25, 1939. WEBSTER ELECTRIC COMPANY, Racine, Wis. Republished by Webster Electric Company, Racine, Wis., a corporation of Delaware.

WEBSTER Teletalk

FOR INTERCOMMUNICATING SOUND AMPLIFYING AND TRANSMITTING SYSTEMS AND PARTS THEREOF, COMPRISING SPEAKERS, AMPLIFIERS, MICROPHONES, INTERCONNECTING CIRCUITS, AND ENERGIZING DEVICES WHEREBY CONVERSATION AT EITHER POINT MAY BE HEARD AT THE OTHER POINT OF COMMUNICATION.
Claims use since Nov. 15, 1936.

Reg. No. 369,978. Registered Aug. 8, 1939. GIBSON ELECTRIC REFRIGERATOR CORPORATION, Greenville, Mich. Republished by Gibson Refrigerator Company, Greenville, Mich., a corporation of Michigan.

KOOKALL

FOR ELECTRIC RANGES.
Claims use since on or about Feb. 15, 1939.

Reg. No. 375,677. Registered Feb. 27, 1940. THE THOMPSON ELECTRIC COMPANY, Cleveland, Ohio., a corporation of Ohio. Republished by registrant.

T&E

FOR FIXTURES FOR ADJUSTABLE HANGING ELECTRIC LAMPS—NAMELY, LAMP HANGERS, LAMP SHOCK ABSORBERS, BRACKETS, MOUNTINGS, ADAPTERS, SWING ADAPTERS, RADIAL ADJUSTMENT ADAPTERS, PULLEYS, SHEAVE HOUSINGS, CLAMPS, SWIVEL FITTINGS, CONDUIT FITTINGS, LOCK BOXES, AND LAMP SUSPENSION ACCESSORIES.
Claims use since Feb. 7, 1939.

Reg. No. 379,845. Registered July 30, 1940. U. S. ELECTRICAL MOTORS, INC., Los Angeles, Calif., a corporation of California. Republished by registrant.

LUBRIFLUSH

FOR ELECTRIC MOTORS.
Claims use since Aug. 26, 1939.

Reg. No. 391,273. Registered Oct. 28, 1941. U. S. ELECTRICAL MOTORS, INC., Los Angeles, Calif., a corporation of California. Republished by registrant.

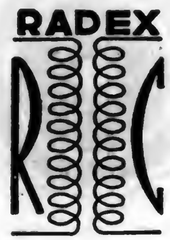
UNIBASE

FOR ELECTRIC MOTORS.
Claims use since on or about May 1, 1941.

Reg. No. 392,352. Registered Dec. 23, 1941. HERMAN B. LAYMON, Spencer, Ind. Republished by registrant.

TWENTY GRAND

FOR FLASH LIGHT BATTERIES.
Claims use since Apr. 2, 1941.



Reg. No. 393,822. Registered Mar. 3, 1942. U. S. ELECTRICAL MOTORS, INC., Los Angeles, Calif., a corporation of California. Republished by registrant.

Flexiform

FOR ELECTRIC MOTORS.
Claims use since on or about Sept. 2, 1941.

Reg. No. 408,622. Registered Aug. 22, 1944. RADEX CORPORATION, Chicago, Ill., a corporation of Illinois. Republished by registrant.

RADEX

FOR UNIVERSAL SIGNAL GENERATORS FOR TESTING RADIO RECEIVING SETS AND TRANSMITTERS; A. C. SIGNAL TRACERS, AND ALL THE OTHER ITEMS NAMED IN THE REGISTRATION.
Claims use since Mar. 1, 1940.

Reg. No. 422,408. Registered July 23, 1946. THE CLEVELAND HEATER COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

REX

FOR ELECTRIC WATER HEATERS AND ACCESSORIES THEREFOR.
Claims use since on or about Sept. 15, 1930.

Reg. No. 427,807. Registered Feb. 25, 1947. WALTER KIDDE & COMPANY, INC., New York, N. Y., and Belleville, N. J., a corporation of New York. Republished by registrant, present location, Belleville, N. J.

FOR FLAME ACTUATED ELECTRIC APPARATUS FOR CLOSING OF FIRE ALARM CIRCUITS, FIRE DETECTING APPARATUS COMPRISING ELECTRICALLY ACTUATED ALARM AND INDICATING APPARATUS TO INDICATE THE PRESENCE AND LOCATION OF FIRE UPON THE ACTUATION OF A HEAT RESPONSIVE MECHANISM INCLUDED IN THE ELECTRICAL SYSTEM, AND ELECTRICALLY OPERATED FIRE ALARM APPARATUS.
Claims use since on or about Aug. 15, 1942.

Reg. No. 429,051. Registered Apr. 15, 1947. THE THOMPSON ELECTRIC COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

DIS-CO-LO

FOR LOWERING ELECTRICAL LAMP HANGERS.
Claims use since Apr. 18, 1946.

Reg. No. 430,830. Registered June 24, 1947. WEBSTER ELECTRIC COMPANY, Racine, Wis., a corporation of Delaware. Republished by registrant.

Telehome

FOR INTER-COMMUNICATING SOUND AMPLIFYING AND TRANSMITTING SYSTEMS COMPRISING SPEAKERS, AMPLIFIERS, MICROPHONES, INTERCONNECTING CIRCUITS, AND ENERGIZING DEVICES WHEREBY CONVERSATION AT EITHER POINT MAY BE HEARD AT THE OTHER POINT OF COMMUNICATION.
Claims use since Aug. 26, 1946.

CLASS 22

GAMES, TOYS, AND SPORTING GOODS

Reg. No. 60,676. Registered Feb. 19, 1907. THE DRAPER AND MAYNARD COMPANY, Plymouth, N. H. Republished by Sport Products Inc., Cincinnati, Ohio, a corporation of Ohio.

FOR STRIKING-BAGS AND APPLIANCES USED IN CONNECTION THEREWITH, BOXING AND FENCING GLOVES, INDIAN CLUBS, DUMB-BELLS, MEDICINE-BALLS, EXERCISERS, AND BALLS, BASES, GOALS, BATS, STICKS, RACKETS, RACKET-PRESSES, RACKET-COVERS, NETS, MARKERS, CENTER-IRONS, BLADDERS, CARRIERS, MASKS, MITTS, AND PROTECTORS FOR USE IN CONNECTION WITH THE GAMES OF BASE-BALL, INDOOR BASE-BALL, FOOT-BALL, BASKET-BALL, TETHER-BALLS, HAND-BALL, VOLLEY-BALL, TENNIS, GOLF, HOCKEY, AND POLO.
Claims use since on or about Oct. 1, 1900.

Reg. No. 313,018. Registered May 15, 1934. DUNLOP TIRE AND RUBBER CORPORATION, Buffalo, N. Y., a corporation of New York. Republished by registrant.

GOLD CUP

The drawing is lined for the color gold.
FOR GOLF BALLS.
Claims use since Nov. 14, 1933.

Reg. No. 334,024. Registered Apr. 14, 1936. GEORGE WEINBRENNER, Detroit, Mich. Republished by registrant.

WILLS HI-TEMPERED DICE

The words "Hi-Tempered Dice" are disclaimed.
FOR DICE.
Claims use since June 29, 1935.

Reg. No. 414,052. Registered May 22, 1945. SOUTHWEST HANDLE & MFG. CO., Little Rock, Ark. Republished by Southwest Manufacturing Company, Little Rock, Ark., a corporation of Arkansas.

Arkansas TRAVELER

The word "Arkansas" is disclaimed.
FOR BASEBALL BATS.
Claims use since July 1, 1944.

CLASS 23

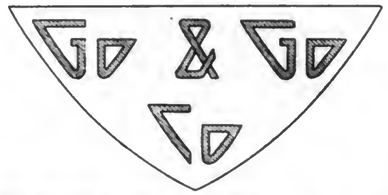
CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF

Reg. No. 96,269. Registered Apr. 14, 1914. GALESBURG COULTER-DISC CO., Galesburg, Ill. Republished by Borg-Warner Corporation, Chicago, Ill., a corporation of Illinois.

FOR DISCS; DISC COLTERS; DISC PLOWS; DISC BLADES FOR AGRICULTURAL IMPLEMENTS, INCLUDING HARROW-DISCS, PLOW DISCS, CULTIVATOR DISCS, FLAT AND CURVED GRAIN-DRILL DISCS; COMPLETE ROLLING-COLTERS, ROLLING-COLTER BLADES, AND GANG AND FURROW WHEELS.
Claims use since Nov. 10, 1913.

Reg. No. 114,950. Registered Jan. 16, 1917. THE CROWN CORK AND SEAL CO., OF BALTIMORE CITY, Baltimore, Md. Republished by Crown Cork & Seal Company, Inc., Baltimore, Md., a corporation of New York.

ORIOLE



FOR BOTTLE OPENERS.
Claims use since May 1915.

Reg. No. 120,758. Registered Mar. 5, 1918. MCQUAY-NORRIS MFG. CO., St. Louis, Mo. Republished by McQuay-Norris Manufacturing Co., St. Louis, Mo., a corporation of Delaware.

Superoyl

FOR ENGINE, PUMP, AND COMPRESSOR OIL RINGS MADE OF METAL.
Claims use since June 5, 1917.

Reg. No. 125,432. Registered May 20, 1919. GODDARD & GODDARD COMPANY, Detroit, Mich., a corporation of Michigan. Republished by registrant.

The drawing is lined for shading.
FOR PROFILE-CUTTERS, MILLING-CUTTERS, SIDE MILLS, END MILLS, SHELL END MILLS, ANGULAR CUTTERS, METAL-SLITTING SAWS, SPOT-FACERS, COUNTERBORES, REAMERS, AND INSERTED-TOOTH CUTTERS.
Claims use since July 9, 1917.

Reg. No. 127,916. Registered Dec. 16, 1919. THE CROWN CORK AND SEAL COMPANY OF BALTIMORE CITY, Baltimore, Md. Republished by Crown Cork & Seal Company, Inc., Baltimore, Md., a corporation of New York.

DIXIE

FOR BOTTLE-CAPPING MACHINES, BOTTLE-FILLING MACHINES, AND BOTTLE FILLING AND CAPPING MACHINES.
Claims use since about December 1917.

Reg. No. 128,469. Registered Jan. 6, 1920. NATIONAL TWIST DRILL & TOOL CO., Detroit, Mich., a corporation of Michigan. Republished by registrant.

The words "Twist Drill & Tool Co." are disclaimed.
FOR COUNTERBORING TOOLS, SAWS, SPOT-FACERS, TWIST DRILLS, REAMERS, AND MILLING CUTTERS.
Claims use since 1911.

Reg. No. 131,178. Registered May 4, 1920. LUMMUS COTTON GIN COMPANY, Columbus, Ga., a corporation of Georgia. Republished by registrant.

FOR COTTON-GIN, COTTON-LINTERS, AND ALL THE OTHER ITEMS NAMED IN THE REGISTRATION EXCEPT SINGLE-BOX SCREW-PRESSES WITH TRAMPERS AND PACKING RAMS; SINGLE-BOX FRICTION-DRIVE SELF-TRAMPING TEXAS PRESSES WITH FRICTION-DRIVES, BASKET-FEEDERS, STEAM-TRAMPERS, AND FRACTION-TRAMPERS.
Claims use since 1885.

Reg. No. 133,575. Registered Aug. 3, 1920. BOKER CUTLERY & HARDWARE COMPANY, INC., New York, N. Y. Republished by H. Boker & Co., Inc., New York, N. Y., a corporation of New York.

RED-INJUN

FOR RAZORS.
Claims use since on or about Nov. 1, 1902.

Reg. No. 161,406. Registered Nov. 14, 1922. BENEKE & KROPF MANUFACTURING COMPANY, Chicago, Ill. Republished by Borg-Warner Corporation, Chicago, Ill., a corporation of Illinois.

RAYFIELD

FOR CARBURETORS, THERMOSTATIC CONTROLS FOR INTERNAL-COMBUSTION ENGINES, COOLING SYSTEMS FOR HYDROCARBON ENGINES, AND DASH CONTROLS FOR CARBURETORS.
Claims use since Aug. 1, 1910.

Reg. No. 203,764. Registered Sept. 22, 1925. THE WHEELER-SCHEBLER CARBURETOR CO., Indianapolis, Ind. Republished by Borg-Warner Corporation, Chicago, Ill., a corporation of Illinois.

SCHEBLER

FOR CARBURETORS.
Claims use since December 1903.

Reg. No. 211,099. Registered Apr. 6, 1926. THE ACME SHEAR COMPANY, Bridgeport, Conn., a corporation of Connecticut. Republished by registrant.

CRUCIBLE BRAND

The word "Brand" is disclaimed.
FOR SCISSORS AND SHEARS.
Claims use since Nov. 21, 1923.

Reg. No. 221,755. Registered Dec. 7, 1926. H. BOKER & CO., INC., New York, N. Y., a corporation of New York. Republished by registrant.

Trimrite

FOR HAIR CLIPPERS MADE OF BASE METAL.
Claims use since Apr. 13, 1926.

Reg. No. 221,758. Registered Dec. 7, 1926. H. BOKER & CO., INC., New York, N. Y., a corporation of New York. Republished by registrant.

BarBerette

FOR HAIR CLIPPERS MADE OF BASE METAL.
Claims use since Apr. 13, 1926.

Reg. No. 232,741. Registered Sept. 13, 1927. NASHUA PACKAGE SEALING CO. INC., Nashua, N. H., a corporation of Massachusetts. Republished by registrant.

NATIONAL

FOR MACHINES FOR MOISTENING, SERVING, OR APPLYING ADHESIVE OR GUMMED TAPE, LABELS, AND THE LIKE STRIP MATERIAL AND PACKAGE SEALING OR LABELING MACHINES AND DEVICES UTILIZING ADHESIVE OR GUMMED STRIP MATERIAL.
Claims use since on or about Jan. 15, 1913.

Reg. No. 251,466. Registered Jan. 8, 1929. MECHANICS MACHINE COMPANY, Rockford, Ill., assignor to Mechanics Universal Joint Company, Rockford, Ill, a corporation of Illinois. Republished by Borg-Warner Corporation, Chicago, Ill., a corporation of Illinois.

MECHANICS

FOR UNIVERSAL JOINTS AND CHANGE-SPEED TRANSMISSIONS.
Claims use since 1913.

Reg. No. 267,867. Registered Mar. 4, 1930. WM. FILENE'S SONS COMPANY, Boston, Mass., a corporation of Massachusetts. Republished by registrant.

Filene's

FOR CIGAR CUTTERS, TABLE KNIVES, GLASS KNIVES, TOOL SETS, CONSISTING OF A HAMMER, SCREW DRIVER, CHISEL, PLANE, BIT, BIT STOCK, GIMLET, SAW, RULER AND A SQUARE, POCKET EMERGENCY TOOL SETS, CONSISTING OF A SMALL CASE CONTAINING A JACK-KNIFE WITH THE FOLLOWING ARTICLES TO BE INSERTED IN ONE END, FILE, CHISEL, SCREW DRIVER, AWL, GIMLET AND BOTTLE OPENER, JACK KNIVES, CARVING SETS, ICE PICKS, CORKSCREWS, SPOONS, FORKS, MESS-KITS, ALL OF NON-PRECIOUS METALS.
Claims use since on or about Jan. 1, 1928.

Reg. No. 278,344. Registered Dec. 16, 1930. THE ACME SHEAR COMPANY, Bridgeport, Conn., a corporation of Connecticut. Republished by registrant.

Puritan

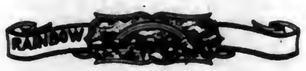
FOR SCISSORS AND SHEARS.
Claims use since Jan. 9, 1923.

Reg. No. 282,645. Registered Apr. 28, 1931. INGERSOLL STEEL AND DISC CO., Galesburg, Ill. Republished by Borg-Warner Corporation, Chicago, Ill., a corporation of Illinois.

FOR HARROW DISCS; CLUTCH DISCS; FRICTION DISCS; COULTER DISCS; SAW BLADES; AND MEAT CUTTER KNIVES.
Claims use since November 1926.

Reg. No. 301,244. Registered Feb. 21, 1933. NASHUA PACKAGE SEALING CO. INC., Nashua, N. H., a corporation of Massachusetts. Republished by registrant.

THE SHIPPER



FOR MACHINES AND TOOLS FOR MOISTENING, SERVING, OR APPLYING ADHESIVE OR GUMMED TAPE, WRAPPERS, LABELS, AND THE LIKE SHEET OR STRIP MATERIAL; AND PACKAGE AND CONTAINER SEALING, SECURING, WRAPPING, OR LABELLING AND LIKE MACHINES, AND DEVICES UTILIZING SUCH MATERIAL.
Claims use since October 1926.

Reg. No. 301,245. Registered Feb. 21, 1933. NASHUA PACKAGE SEALING CO. INC., Nashua, N. H., a corporation of Massachusetts. Republished by registrant.

TAY-PER

FOR MACHINES AND TOOLS FOR MOISTENING, SERVING, OR APPLYING ADHESIVE OR GUMMED TAPE, WRAPPERS, LABELS, AND THE LIKE SHEET OR STRIP MATERIAL; AND PACKAGE AND CONTAINER SEALING, SECURING, WRAPPING, OR LABELLING AND LIKE MACHINES AND DEVICES UTILIZING SUCH MATERIAL.
Claims use since February 1932.

Reg. No. 317,039. Registered Sept. 11, 1934. H. BOKER & CO., INC., New York, N. Y., a corporation of New York. Republished by registrant.

FOR SCYTHES, SICKLES, SHEARS, GRASS SHEARS, AND HEDGE SHEARS.
Claims use since Dec. 22, 1933.

Reg. No. 336,814. Registered July 21, 1936. H. BOKER & CO., INC., New York, N. Y., a corporation of New York. Republished by registrant.

VALLEY FORGE

FOR ARTICLES OF CUTLERY—NAMELY, POCKET KNIVES, TABLE KNIVES, FORKS, RAZOR BLADES, SCISSORS, SHEARS, CARVING SETS, POULTRY SHEARS, PLIERS, CORKSCREWS, PIE SERVERS, PARING KNIVES, UTILITY KNIVES, SPOONS, HAIR CLIPPERS, NAIL NIPPERS, SHEEP SHEARS; GARDEN TOOLS SUCH AS: HEDGE SHEARS, GRASS SHEARS, PRUNING SHEARS, GRASS HOOKS, SCYTHES, MADE OF BASE METAL.
Claims use since June 1, 1916.

Reg. No. 336,864. Registered July 21, 1936. THE IMPERIAL BRASS MANUFACTURING COMPANY, Chicago, Ill., a corporation of Illinois. Republished by registrant.

FOR BENDING TOOLS, PINCH-OFF TOOLS, TUBE CUTTERS, BURNISHING TOOLS, FLARING TOOLS, AND ALL THE OTHER ITEMS NAMED IN THE REGISTRATION EXCEPT: COMBUSTION ENGINE MANIFOLDS, OIL SIGHT FEEDS, OIL PUMPS, AND HAND AIR PUMPS.
Claims use since July 7, 1924.

Reg. No. 336,867. Registered July 21, 1936. THE IMPERIAL BRASS MANUFACTURING COMPANY, Chicago, Ill., a corporation of Illinois. Republished by registrant.

IMPERIAL

FOR BENDING TOOLS, PINCH-OFF TOOLS, TUBE CUTTERS, BURNISHING TOOLS, FLARING TOOLS, SWEDGING TOOLS, AND ALL THE OTHER ITEMS NAMED IN THE REGISTRATION.
Claims use since Jan. 24, 1905.

Reg. No. 341,554. Registered Dec. 15, 1936. R. G. LE TOURNEAU, INC., Stockton, Calif., a corporation of California. Republished by registrant.

CARRYALL

FOR GRADING AND EARTH WORKING EQUIPMENT—NAMELY, AN EARTH SCRAPING, COLLECTING, AND TRANSPORTING IMPLEMENT.
Claims use since Apr. 1, 1932.

Reg. No. 351,556. Registered Nov. 2, 1937. NASHUA PACKAGE SEALING CO. INC., Nashua, N. H., a corporation of Massachusetts. Republished by registrant.

NATIONAL PACKAGE SEALER

The words "Package" and "Sealer" are disclaimed.
FOR MACHINES AND TOOLS FOR MOISTENING, SERVING OR APPLYING ADHESIVE OR GUMMED TAPE, WRAPPERS, LABELS, AND THE LIKE SHEET OR STRIP MATERIAL, AND PACKAGE AND CONTAINER SEALING, SECURING, WRAPPING, OR LABELING AND LIKE MACHINES AND DEVICES UTILIZING SUCH MATERIAL.
Claims use since on or about Jan. 15, 1915.

Reg. No. 351,794. Registered Nov. 9, 1937. NASHUA PACKAGE SEALING CO. INC., Nashua, N. H., a corporation of Massachusetts. Republished by registrant.

PAKAGER

FOR MACHINES AND TOOLS FOR MOISTENING, SERVING, OR APPLYING ADHESIVE OR GUMMED TAPE, WRAPPERS, LABELS, AND THE LIKE SHEET OR STRIP MATERIAL; AND PACKAGE AND CONTAINER SEALING, SECURING, WRAPPING, OR LABELING, AND LIKE MACHINES AND DEVICES UTILIZING SUCH MATERIAL.
Claims use since on or about Mar. 11, 1937.

Reg. No. 359,370. Registered July 9, 1940. HERMAN B. LAYMON, Spencer, Ind. Republished by registrant.

THIN-JIM

The word "Thin" is disclaimed.
FOR SAFETY RAZOR BLADES.
Claims use since Jan. 25, 1940.

Reg. No. 371,743. Registered Oct. 3, 1939. THE F. E. MYERS & BRO. COMPANY, Ashland, Ohio, a corporation of Ohio. Republished by registrant.

Ejecto

FOR PUMPS.
Claims use since Jan. 1, 1937.

Reg. No. 382,474. Registered Oct. 29, 1940. H. BOKER & CO., INC., New York, N. Y., a corporation of New York. Republished by registrant.

FOR KNIVES, FORKS, SCISSORS, SHEARS, SPOONS, RAZORS, AND HAIR CLIPPERS, ALL MADE OF NON-PRECIOUS METAL.
Claims use since about 1870.

Reg. No. 389,382. Registered Aug. 5, 1941. NASHUA PACKAGE SEALING CO. INC., Nashua, N. H., a corporation of Massachusetts. Republished by registrant.

THRIFTY FIFTY

FOR MACHINES AND TOOLS FOR MOISTENING, SERVING OR APPLYING ADHESIVE OR GUMMED TAPE, WRAPPERS, LABELS, AND THE LIKE SHEET OR STRIP MATERIAL; AND PACKAGE AND CONTAINER SEALING, SECURING, WRAPPING, OR LABELLING, AND LIKE MACHINES AND DEVICES UTILIZING SUCH MATERIAL.
Claims use since Sept. 20, 1940.

Reg. No. 402,672. Registered Aug. 10, 1943. DEMPSTER BROTHERS, INCORPORATED, Knoxville, Tenn., a corporation of Tennessee. Republished by registrant.

The Original BUCKETRUX

The words "The original" are disclaimed.
FOR HOISTING UNITS, DESIGNED FOR INSTALLATION ON ANY STANDARD MOTOR TRUCK CHASSIS AND CAPABLE OF PICKING UP, CARRYING AND DUMPING DROP-BOTTOM AND OTHER DETACHABLE BUCKETS AND CONTAINERS, AND DETACHABLE BUCKETS AND CONTAINERS.
Claims use since November 1940.

Reg. No. 402,782. Registered Aug. 10, 1943. R. G. LE TOURNEAU, INC., Stockton, Calif., and Peoria, Ill., a corporation of California. Republished by registrant, present location Stockton, Calif.

TILTDOZER

FOR GRADING AND EARTH WORKING EQUIPMENT—NAMELY, PUSH GRADERS.
Claims use since Mar. 22, 1943.

Reg. No. 404,772. Registered Dec. 21, 1943. R. G. LE TOURNEAU, INC., Stockton, Calif., and Peoria, Ill., a corporation of California. Republished by registrant, present location Stockton, Calif.

TOURNAPULL

FOR TRACTORS.
Claims use since Oct. 24, 1938.

Reg. No. 407,985. Registered July 11, 1944. R. G. LE TOURNEAU, INC., Stockton, Calif., and Peoria, Ill., a corporation of California. Republished by registrant, present location Stockton, Calif.

TOURNALIFT

FOR SELF PROPELLED HOIST TRUCKS.
Claims use since June 1, 1943.

Reg. No. 422,171. Registered July 9, 1946. RITE-WAY PRODUCTS COMPANY, Chicago, Ill., a corporation of Delaware. Republished by registrant.

RITE-WAY

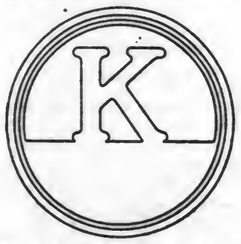
FOR VACUUM TYPE MILKING MACHINES AND PARTS THEREOF AND VACUUM PUMPS.
Claims use since January 1926.

Reg. No. 422,653. Registered Aug. 6, 1946. RITE-WAY PRODUCTS COMPANY, Chicago, Ill., a corporation of Delaware. Republished by registrant.

ROTO-MATIC

FOR NOTARY VACUUM PUMPS.
Claims use since May 21, 1945.

Reg. No. 422,692. Registered Aug. 6, 1946. G. W. GRIFFIN CO., Franklin, N. H., a corporation of New Hampshire. Republished by registrant.



FOR HACK SAW BLADES.
Claims use since Jan. 9, 1940.

Reg. No. 424,892. Registered Oct. 29, 1946. RITE-WAY PRODUCTS COMPANY, Chicago, Ill., a corporation of Delaware. Republished by registrant.

MICRO-THREAD

FOR PULSATORS FOR MILKING MACHINES.
Claims use since May 26, 1945.

Reg. No. 424,894. Registered Oct. 29, 1946. WALTER KIDDE & COMPANY, INC., New York, N. Y., and Belleville, N. J., a corporation of New York. Republished by registrant, present location, Belleville, N. J.

FOR FIXED FIRE DETECTING AND EXTINGUISHING APPARATUS COMPRISING A SET OF CONDUITS LEADING FROM PROTECTED COMPARTMENTS OR SPACES TO A CENTRALLY LOCATED TERMINAL CABINET, A FAN FOR DRAWING SMOKE FROM FIRE IN ANY OF THE COMPARTMENTS OR SPACES, AN ELECTRIC EYE FOR DETECTING SMOKE IN THE CABINET AND FOR GIVING AN ALARM, AN INDICATOR FOR INDICATING THE LOCATION OF THE COMPARTMENT OR SPACE FROM WHICH THE SMOKE IS DRAWN, VALVES FOR RELEASING FIRE EXTINGUISHING MEDIUM THROUGH THE SAME CONDUIT FOR EXTINGUISHMENT OF THE FIRE, THE ENTIRE APPARATUS SOLD AS A UNIT.
Claims use since on or about Sept. 1, 1943.

Reg. No. 428,215. Registered Mar. 11, 1947. R. G. LE TOURNEAU, INC., Stockton, Calif., and Peoria, Ill., a corporation of California. Republished by the registrant, present location, Stockton, Calif.

LETOURNEAU

LET

EQUIPMENT

The words "Le Tourneau Equipment" are disclaimed.
FOR EARTH WORKING, CONSTRUCTION, AND INDUSTRIAL EQUIPMENT — NAMELY, SCRAPERS, SHEEPS FOOT ROLLERS, PUSH GRADERS, BULLDOZING MACHINES, PUSH DOZERS, PORTABLE CRANES, POWER CONTROL UNITS (WINCHES), SUBSURFACE RIPPERS, MOBILE HOUSE FORMS, AND TRACTORS, AND COMBINED TRACTOR AND IMPLEMENT UNITS—NAMELY, SELF-PROPELLED SCRAPERS, SELF-PROPELLED PORTABLE CRANES, AND SELF-PROPELLED LOAD HAULING TRUCKS.
Claims use since Nov. 13, 1940.

Reg. No. 430,275. Registered June 10, 1947. R. G. LE TOURNEAU, INC., Stockton, Calif., a corporation of California. Republished by registrant.

TOURNALAYER

FOR PORTABLE HOUSE FORM ASSEMBLY, TOGETHER WITH A TRACTOR-DRAWN LIFTING AND TRANSPORT TRAILER THEREFOR.
Claims use since Feb. 26, 1946.

CLASS 24

LAUNDRY APPLIANCES AND MACHINES

Reg. No. 127,572. Registered Nov. 18, 1919. ALTORFER BROS. COMPANY, Peoria, Ill., a corporation of Illinois. Republished by registrant.

SUPER

FOR LAUNDRY WASHING MACHINES.
Claims use since Aug. 1, 1917.

Reg. No. 215,158. Registered July 13, 1926. ALTORFER BROS. COMPANY, East Peoria, Ill., a corporation of Illinois. Republished by registrant, present location, Peoria, Ill.

Double A

FOR CLOTHES OR LAUNDRY WASHING MACHINES.
Claims use since June 1, 1925.

Reg. No. 244,349. Registered July 17, 1928. ALTORFER BROS. COMPANY, East Peoria, Ill., a corporation of Illinois. Republished by registrant, present location, Peoria, Ill.

Companion

FOR LAUNDRY WASHING MACHINES.
Claims use since Nov. 15, 1927.

Reg. No. 257,700. Registered June 18, 1929. ALTORFER BROS. COMPANY, East Peoria, Ill., a corporation of Illinois. Republished by registrant, present location, Peoria, Ill.

Apartment

FOR LAUNDRY WASHING MACHINES.
Claims use since Dec. 1, 1928.

Reg. No. 268,399. Registered Mar. 11, 1930. ALTORFER BROS. COMPANY, East Peoria, Ill., a corporation of Illinois. Republished by registrant, present location, Peoria, Ill.

Playmayd

FOR LAUNDRY WASHING MACHINES.
Claims use since Oct. 1, 1929.

Reg. No. 313,760. Registered June 5, 1934. ALTORFER BROS. COMPANY, East Peoria, Ill., a corporation of Illinois. Republished by registrant, present location, Peoria, Ill.

ABC

FOR LAUNDRY WASHING MACHINES.
Claims use since Jan. 1, 1912.

Reg. No. 341,386. Registered Dec. 8, 1936. THE AMERICAN LAUNDRY MACHINERY COMPANY, Norwood Station, Cincinnati, Ohio, a corporation of Ohio. Republished by registrant.

NOTRUX

FOR CENTRIFUGAL EXTRACTORS, SAID EXTRACTORS BEING SEPARATE LAUNDRY DEVICES FOR EFFECTING THE REMOVAL OF LIQUIDS FROM FABRICS AND THE LIKE.
Claims use since Nov. 22, 1935.

Reg. No. 384,968. Registered Feb. 11, 1941. ALTORFER BROS. COMPANY, Peoria, Ill., a corporation of Illinois. Republished by registrant.

CLEANSILATOR

FOR LAUNDRY WASHING MACHINES.
Claims use since on or about July 2, 1940.

CLASS 26

MEASURING AND SCIENTIFIC APPLIANCES

Reg. No. 267,970. Registered Mar. 4, 1930. WM. FILENE'S SONS COMPANY, Boston, Mass., a corporation of Massachusetts. Republished by registrant.

Filene's

FOR LORGNETTES AND OPERA GLASSES, COMPASSES AND MAGNIFYING GLASSES, RULES AND RULERS, MEASURING CUPS, MOTION PICTURE MACHINES, PEWTER MEASURES.
Claims use since on or about Jan. 1, 1928.

Reg. No. 344,823. Registered Apr. 6, 1937. ARTHUR F. WILLIAMS, St. Paul, Minn. Republished by Wils-Edge Corporation, St. Paul, Minn., a corporation of Minnesota.

Wilsedge

FOR EYEGLASS MOUNTINGS AND SPECTACLE FRAMES.
Claims use since Sept. 15, 1936.

Reg. No. 397,763. Registered Sept. 22, 1942. U. S. ELECTRICAL MOTORS, INC., Los Angeles, Calif., a corporation of California. Republished by registrant.

TESTOMETER

FOR TESTING STANDS INCLUDING AN ELECTRIC MOTOR DRIVEN VARIABLE RATIO TRANSMISSION AND EQUIPPED WITH CLUTCHING MEANS FOR TESTING THE OPERATION OF EQUIPMENT SUCH AS AIRPLANE GENERATORS UNDER VARYING SPEED CONDITIONS.
Claims use since on or about July 1, 1941.

Reg. No. 418,340. Registered Dec. 18, 1945. ILLINOIS TESTING LABORATORIES, INC., Chicago, Ill., a corporation of Illinois. Republished by registrant.

PYROLANCE

FOR ELECTRICAL TEMPERATURE MEASURING INSTRUMENTS AND PARTS THEREOF.
Claims use since on or about January 1926.

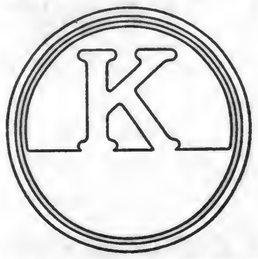
Reg. No. 418,456. Registered Dec. 25, 1945. ILLINOIS TESTING LABORATORIES, INC., Chicago, Ill., a corporation of Illinois. Republished by registrant.

PYROLL

FOR ELECTRICAL TEMPERATURE MEASURING INSTRUMENTS AND PARTS THEREOF.
Claims use since on or about February 1934.

Reg. No. 418,457. Registered Dec. 25, 1945. ILLINOIS TESTING LABORATORIES, INC., Chicago, Ill., a corporation of Illinois. Republished by registrant.

PYROPROD



FOR ELECTRICAL TEMPERATURE MEASURING INSTRUMENTS AND PARTS THEREOF.
Claims use since on or about December 1926.

Reg. No. 418,458. Registered Dec. 25, 1945. ILLINOIS TESTING LABORATORIES, INC., Chicago, Ill., a corporation of Illinois. Republished by registrant.

PYROPOINT

FOR ELECTRICAL TEMPERATURE MEASURING INSTRUMENTS AND PARTS THEREOF.
Claims use since on or about April 1934.

Reg. No. 422,955. Registered Aug. 20, 1946. WALTER KIDDE & COMPANY, INC., New York, N. Y., and Belleville, N. J., a corporation of New York. Republished by registrant, present location Belleville, N. J.

FOR TIMING APPARATUS ADAPTED FOR INSTALLATION IN FIRE EXTINGUISHING SYSTEMS AND OPERABLE THEREBY, FOR THE PURPOSE OF PROVIDING FOR OR CAUSING DELAY BETWEEN THE GIVING OF AN ALARM AND THE DISCHARGE OF FIRE EXTINGUISHING MEDIUM.
Claims use since on or about Sept. 1, 1943.

CLASS 27

HOROLOGICAL INSTRUMENTS

Reg. No. 278,761. Registered Dec. 30, 1930. ALBERT E. FREEL, doing business as Freel Research Laboratories, Owensboro, Ky. Republished by registrant, present location, Tallahassee, Fla.

Timometer

FOR TIME INDICATING DEVICE IN THE NATURE OF A CLOCK.
Claims use since June 30, 1930.

Reg. No. 431,937. Registered Aug. 12, 1947. NATIONAL PRESSURE COOKER COMPANY, Eau Claire, Wis., a corporation of Wisconsin. Republished by registrant.

Presto Timer

The word "Timer" is disclaimed.
FOR INTERVAL TIMERS TO GIVE AN AUDIBLE SIGNAL AT THE EXPIRATION OF A PREDETERMINED TIME, FOR INNUMERABLE PURPOSES.
Claims use since Nov. 8, 1945.

CLASS 28

JEWELRY AND PRECIOUS-METAL WARE

Reg. No. 409,917. Registered Oct. 31, 1944. STEIN AND ELLBOGEN CO., Chicago, Ill., a corporation of Illinois. Republished by registrant.

SECO

FOR RINGS AND NECKLACES.
Claims use since about Jan. 1, 1908.

CLASS 29

BROOMS, BRUSHES, AND DUSTERS

Reg. No. 267,269. Registered Feb. 18, 1930. WM. FILENE'S SONS COMPANY, Boston, Mass., a corporation of Massachusetts. Republished by registrant.

Filene's

FOR FUR BRUSHES, SHOE BRUSHES, HAIR BRUSHES, HAT BRUSHES, WHISK BROOMS, CLOTHES BRUSHES, TOOTH BRUSHES, SHAVING BRUSHES, EYEBROW BRUSHES, NAIL BRUSHES, COMPLEXION BRUSHES, SHAMPOO BRUSHES, AND BONNET BRUSHES.
Claims use since on or about Jan. 1, 1928.

CLASS 30

CROCKERY, EARTHENWARE, AND PORCELAIN

Reg. No. 77,411. Registered Apr. 5, 1910. WESTERN STONEWARE COMPANY, Portland, Maine, and Monmouth, Ill., a corporation of Maine. Republished by registrant, present location, Monmouth, Ill.

FOR STONEWARE, CROCKERY, AND EARTHENWARE.
Claims use since Apr. 18, 1901.

CLASS 31

FILTERS AND REFRIGERATORS

Reg. No. 431,688. Registered July 29, 1947. BORG-WARNER CORPORATION, Chicago, Ill., a corporation of Illinois. Republished by registrant.

HANDEFROSTER

FOR REFRIGERATOR PARTS AND ACCESSORIES—NAMELY, A VESSEL, BASIN, OR SIMILAR RECEPTACLE, FOR RECEIVING DRIP FROM REFRIGERANT COILS AND THE LIKE IN AUTOMATIC REFRIGERATORS.
Claims use since on or about Oct. 24, 1938.

CLASS 32

FURNITURE AND UPHOLSTERY

Reg. No. 258,534. Registered July 9, 1929. LEON L. BEAN, Freeport, Maine. Republished by L. L. Bean, Inc., Freeport, Maine, a corporation of Maine.

BEAN

FOR CAMP MATTRESSES, FOLDING COTS, AND FOLDING CAMP STOOLS.
Claims use since September 1919.

Reg. No. 293,657. Registered May 3, 1932. HODGMAN RUBBER COMPANY, Framingham, Mass., a corporation of Massachusetts. Republished by registrant.

Fun-Flote

The word "Flote" is disclaimed.
FOR PNEUMATIC MATTRESSES.
Claims use since May 1931.

CLASS 33

GLASSWARE

Reg. No. 243,989. Registered July 3, 1928. ILLINOIS GLASS COMPANY, Alton, Ill. Republished by Owens-Illinois Glass Company, Toledo, Ohio, a corporation of Ohio.

Presto

FOR GLASS JARS AND GLASSES.
Claims use since about Mar. 1, 1927.

Reg. No. 355,185. Registered Mar. 8, 1938. CROWN CORK & SEAL COMPANY, INC., Baltimore, Md., a corporation of New York. Republished by registrant.

CROWN

FOR GLASS JARS.
Claims use since on or about Aug. 10, 1937.

CLASS 34

HEATING, LIGHTING, AND VENTILATING APPARATUS

Reg. No. 209,581. Registered Feb. 23, 1926. COKAL STOKER CORPORATION, Chicago, Ill. Republished by American Coal Burner Company, Chicago, Ill., a corporation of Illinois.

COMBUSTIKATOR

FOR COAL FURNACES.
Claims use since June 18, 1925.

Reg. No. 222,802. Registered Jan. 11, 1927. COKAL STOKER CORPORATION, Chicago, Ill. Republished by American Coal Burner Company, Chicago, Ill., a corporation of Illinois.

PULVERZONE

FOR DEVICES FOR FEEDING FUEL TO FURNACES.
Claims use since on or about June 10, 1926.

Reg. No. 336,341. Registered June 30, 1936. THE IMPERIAL BRASS MANUFACTURING COMPANY, Chicago, Ill., a corporation of Illinois. Republished by registrant.

IMPERIAL

FOR ACCUMULATORS, DEHYDRATORS, EVAPORATORS AND PARTS THEREOF, WELDING TORCHES, SOLDERING TORCHES, AND ALL THE OTHER ITEMS NAMED IN THE REGISTRATION.
Claims use since Feb. 20, 1916.

Reg. No. 392,603. Registered Jan. 6, 1942. MAJESTIC MANUFACTURING CO., St. Louis, Mo., a corporation of Missouri. Republished by registrant.

Majestic

FOR COAL, OIL AND GAS RANGES, STOVES, HEATERS, GRILLS, OVENS, GRIDDLES, AND COUNTER COOKING APPLIANCES—NAMELY, COUNTER STOVES, HEATERS, GRILLS, OVENS, AND GRIDDLES.
Claims use since Apr. 14, 1941.

Reg. No. 392,604. Registered Jan. 6, 1942. MAJESTIC MANUFACTURING CO., St. Louis, Mo., a corporation of Missouri. Republished by registrant.

Stylined

FOR COAL, OIL AND GAS RANGES, STOVES, HEATERS, GRILLS, OVENS, GRIDDLES AND COUNTER COOKING APPLIANCES—NAMELY, COUNTER STOVES, HEATERS, GRILLS, OVENS, AND GRIDDLES.
Claims use since Apr. 14, 1941.

CLASS 36

MUSICAL INSTRUMENTS AND SUPPLIES

Reg. No. 368,454. Registered June 20, 1939. WEBSTER ELECTRIC COMPANY, Racine, Wis. Republished by Webster Electric Company, Racine, Wis., a corporation of Delaware.

CINAUDIO

FOR ELECTRIC SOUND REPRODUCTION EQUIPMENT, COMPRISING SUITABLE HOUSING FOR PHONOGRAPH TURNTABLE AND DRIVING MEANS, PICK-UP, AMPLIFIER AND SPEAKER, FOR USE WITH A SLIDE FILM PROJECTOR FOR THE DISSEMINATION OF INFORMATION BY SOUND AND VISION.
Claims use since Jan. 28, 1935.

CLASS 37

PAPER AND STATIONERY

Reg. No. 96,995. Registered May 12, 1914. B. D. RISING PAPER COMPANY, Housatonic, Mass. Republished by Rising Paper Company, Housatonic, Mass., a corporation of Massachusetts.

FINANCE

FOR FLAT WRITING PAPER.
Claims use since Jan. 1, 1901.

Reg. No. 123,449. Registered Nov. 12, 1918. JOSEPH PARKER & SON COMPANY, New Haven, Conn., a corporation of West Virginia. Republished by registrant.

Treasury

FOR BLOTTING PAPER.
Claims use since 1860.

Reg. No. 123,635. Registered Nov. 19, 1918. JOSEPH PARKER & SON COMPANY, New Haven, Conn., a corporation of West Virginia. Republished by registrant.

West Rock Mill

FOR BLOTTING PAPER.
Claims use since 1840.

Reg. No. 123,921. Registered Dec. 17, 1918. JOSEPH PARKER & SON COMPANY, New Haven, Conn., a corporation of West Virginia. Republished by registrant.

COMMERCIAL

FOR BLOTTING PAPER.
Claims use since 1869.

Reg. No. 207,579. Registered Jan. 5, 1926. ANNA E. RILEY, doing business as Ace Art Company, Reading, Mass. Republished by Ace Art Company, Reading, Mass., a corporation of Massachusetts.

NUACE

FOR CORNER MOUNTS FOR PHOTOGRAPHS.
Claims use since Jan. 1, 1924.

Reg. No. 231,597. Registered Aug. 23, 1927. NASHUA PACKAGE SEALING CO. INC., Nashua, N. H., a corporation of Massachusetts. Republished by registrant.

NATIONAL

FOR DEVICES FOR MOISTENING AND/OR SERVING ADHESIVE OR GUMMED TAPE, LABELS, AND THE LIKE STRIP MATERIAL, PARTICULARLY FOR USE ON COUNTERS, DESKS, ETC. FOR PACKAGE SEALING AND LABELING PURPOSES.
Claims use since on or about Jan. 15, 1915.

Reg. No. 232,193. Registered Sept. 6, 1927. NASHUA PACKAGE SEALING CO., INC., Nashua, N. H., a corporation of Massachusetts. Republished by registrant.

NATIONAL PACKAGE SEALER

The words "Package Sealer" are disclaimed.
FOR DEVICES FOR MOISTENING AND/OR SERVING ADHESIVE OR GUMMED TAPE, LABELS AND THE LIKE STRIP MATERIAL, PARTICULARLY FOR USE ON COUNTERS, DESKS, ETC. FOR PACKAGE SEALING AND LABELING PURPOSES.
Claims use since on or about Jan. 15, 1915.

Reg. No. 261,640. Registered Sept. 17, 1929. THE CHILCOTE COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

FIBREX

FOR PHOTOGRAPHIC MOUNTS OF PAPER AND CARDBOARD.
Claims use since on or about Jan. 7, 1928.

Reg. No. 265,727. Registered Jan. 7, 1930. RISING PAPER COMPANY, Housatonic, Mass., a corporation of Massachusetts. Republished by registrant.

RISING

FOR PAPER, MORE PARTICULARLY BOND PAPER, LEDGER PAPER, WRITING PAPER, PRINTING PAPER, ANNOUNCEMENT PAPER, BOOK PAPER, COVER PAPER, INDEX PAPER, AND OTHER BRISTOLS.
Claims use since 1900.

Reg. No. 279,436. Registered Jan. 13, 1931. THE CHILCOTE COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

MASTER MOUNTINGS

The word "Mountings" is disclaimed.
FOR MOUNTS OF PAPER AND CARDBOARD FOR PHOTOGRAPHS AND PICTURES.
Claims use since about May 20, 1929.

Reg. No. 279,437. Registered Jan. 13, 1931. THE CHILCOTE COMPANY, Cleveland, Ohio, a corporation of Ohio. Republished by registrant.

DURCOTE

FOR MOUNTS OF PAPER AND CARDBOARD FOR PHOTOGRAPHS AND PICTURES.
Claims use since about Feb. 1, 1917.

Reg. No. 300,437. Registered Jan. 17, 1933. NASHUA PACKAGE SEALING CO. INC., Nashua, N. H., a corporation of Massachusetts. Republished by registrant.

FOR CHAMPAGNE WINES.
Claims use since Sept. 3, 1940.

Reg. No. 392,915. Registered Jan. 20, 1942. THE TAYLOR WINE COMPANY, Hammondsport, N. Y., a partnership. Republished by registrant.

The label and all notations on the drawing are disclaimed except "Taylor's," "The Taylor Wine Company," and "TWCo."
FOR VERMOUTH WINES.
Claims use since Oct. 12, 1940.

Reg. No. 392,916. Registered Jan. 20, 1942. THE TAYLOR WINE COMPANY, Hammondsport, N. Y., a partnership. Republished by registrant.

The word "Quality" is disclaimed.
FOR WINES.
Claims use since Sept. 3, 1940.

Reg. No. 392,917. Registered Jan. 20, 1942. THE TAYLOR WINE COMPANY, Hammondsport, N. Y., a partnership. Republished by registrant.

The label and all wording on the drawing are disclaimed except "Taylor's," "The Taylor Wine Company," and "TWCo."
FOR VERMOUTH WINES.
Claims use since Oct. 12, 1940.

Reg. No. 396,512. Registered July 21, 1942. THE TAYLOR WINE COMPANY, Hammondsport, N. Y., a partnership. Republished by registrant.

The words "Finest Cuvee," "New York State," and "Sparkling Burgundy Wine" are disclaimed.
FOR WINE.
Claims use since Sept. 16, 1941.

CLASS 48

MALT BEVERAGES AND LIQUORS

Reg. No. 32,494. Registered Feb. 14, 1899. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

FOR BOTTLED BEER.
Claims use since on or about Mar. 1, 1898.

Reg. No. 85,531. Registered Feb. 20, 1912. THE WEST END BREWING CO., Utica, N. Y., a corporation of New York. Republished by registrant.

FOR BEER, ALE, PORTER, HALF AND HALF, AND BROWN STOUT.
Claims use since on or about May 1, 1890.

Reg. No. 105,969. Registered Sept 7, 1915. AMERICAN BREWING CO., New Orleans, La., a corporation of Louisiana. Republished by registrant.

The word "Lager" is disclaimed.
FOR LAGER-BEER.
Claims use since 1906.

Reg. No. 115,080. Registered Jan. 23, 1917. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

FOR BEER.
Claims use since Mar. 1, 1898.

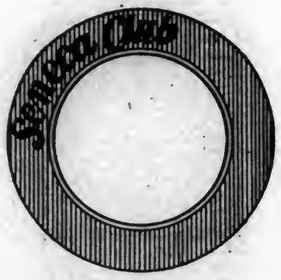
Reg. No. 115,081. Registered Jan. 23, 1917. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

FOR BEER.
Claims use since July 8, 1895.

Reg. No. 234,125. Registered Oct. 18, 1927. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

FOR MALT CEREAL BEVERAGES.
Claims use since Nov. 9, 1897.

Reg. No. 249,079. Registered Nov. 6, 1928. THE WEST END BREWING CO., Utica, N. Y., a corporation of New York. Republished by registrant.



The drawing is lined to indicate the color red.
FOR NONALCOHOLIC, CEREAL, MALT BEVERAGES.
Claims use since June 1, 1919.

Reg. No. 287,995. Registered Oct. 20, 1931. SENECA FOOD PRODUCTS CORPORATION, Utica, N. Y., a corporation of New York. Republished by registrant.

FOR NON-ALCOHOLIC CEREAL MALT BEVERAGE CONTAINING LESS THAN ONE HALF OF ONE PER CENT ALCOHOL BY VOLUME.
Claims use since February 1928.

Reg. No. 304,285. Registered June 27, 1933. SENECA FOOD PRODUCTS CORPORATION, Utica, N. Y., a corporation of New York. Republished by registrant.

The drawing is lined for the color red.
FOR MALT BEVERAGES, WITH NOT MORE THAN THE LEGAL ALCOHOLIC CONTENT.
Claims use since February 1928.

Reg. No. 305,003. Registered July 25, 1933. THE WEST END BREWING CO., Utica, N. Y., a corporation of New York. Republished by registrant.

Utica Club

FOR MALT BEVERAGES WITH NOT MORE THAN THE LEGAL ALCOHOLIC CONTENT—NAMELY, BEER, ALE, STOUT, BOCK, PILSENER, WUERZBURGER, AND PORTER, STOCK ALE, INDIA PALE ALE, SPARKLING ALE, AND LAGER BEER.
Claims use since June 1, 1919.

Reg. No. 305,004. Registered July 25, 1933. THE WEST END BREWING CO., Utica, N. Y., a corporation of New York. Republished by registrant.

The drawing is lined for the color red.
FOR MALT BEVERAGES WITH NOT MORE THAN THE LEGAL ALCOHOLIC CONTENT—NAMELY, BEER, ALE, STOUT, BOCK, PILSENER, WUERZBURGER, AND PORTER, STOCK ALE, INDIA PALE ALE, SPARKLING ALE AND LAGER BEER.
Claims use since June 1, 1919.

Reg. No. 305,005. Registered July 25, 1933. SENECA FOOD PRODUCTS CORPORATION, Utica, N. Y., a corporation of New York. Republished by registrant.

FOR MALT BEVERAGES WITH NOT MORE THAN THE LEGAL ALCOHOLIC CONTENT—NAMELY, BEER, ALE, STOUT, BOCK, PILSENER, WUERZBURGER, AND PORTER, EXPORT BEER, STOCK ALE, INDIA PALE ALE, SPARKLING ALE AND LAGER BEER.
Claims use since February 1928.

Reg. No. 309,309. Registered Jan. 9, 1934. WAUSAU BREWING COMPANY, Wausau, Wis., a corporation of Wisconsin. Republished by registrant.

Adel Bräu

The word "Bräu" is disclaimed.
FOR BEER.
Claims use since June 3, 1933.

Reg. No. 315,117. Registered July 17, 1934. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

The drawing is lined for red. The word "Special" is disclaimed.
FOR MALT BEVERAGES WITH NOT MORE THAN THE LEGAL ALCOHOLIC CONTENT.
Claims use since Dec. 29, 1921.

Reg. No. 317,831. Registered Oct. 9, 1934. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

The drawing is lined for red. The word "Stout" is disclaimed.
FOR STOUT.
Claims use since Feb. 26, 1934.

Reg. No. 317,832. Registered Oct. 9, 1934. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

The drawing is lined for the color red. The word "Porter" is disclaimed.
FOR PORTER.
Claims use since Feb. 28, 1934.

Reg. No. 317,833. Registered Oct. 9, 1934. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

The drawing is lined for the color red. The word "Ale" is disclaimed.
FOR ALE.
Claims use since Feb. 28, 1934.

Reg. No. 317,990. Registered Oct. 9, 1934. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

Goetz

FOR MALT BEVERAGES CONTAINING NOT MORE THAN THE LEGAL ALCOHOLIC CONTENT.
Claims use since June 1, 1890.

Reg. No. 320,970. Registered Jan. 15, 1935. THE GERMAN BREWING CO., Cumberland, Md. Republished by The Queen City Brewing Company, Cumberland, Md., a corporation of Maryland.

The words "Old German" are disclaimed.
FOR MALT BEVERAGES.
Claims use since on or about Oct. 3, 1934.

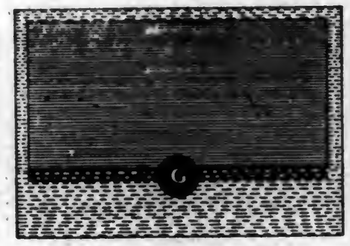
Reg. No. 324,017. Registered May 7, 1935. AMERICAN BREWING COMPANY, New Orleans, La., a corporation of Louisiana. Republished by registrant.

The drawing is lined for the colors red, blue, and yellow. The words "Special" and "Lager" are disclaimed.
FOR BEER.
Claims use since Mar. 1, 1934.

Reg. No. 328,131. Registered Sept. 17, 1935. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

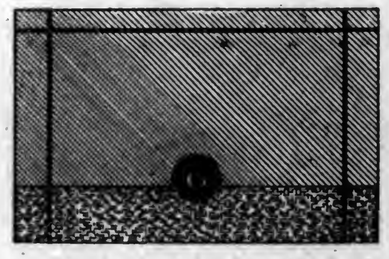
The drawing is lined for the colors yellow, gold, and red. The word "Pale" and the representation of the label are disclaimed.
FOR MALT BEVERAGES WITH NOT MORE THAN THE LEGAL ALCOHOLIC CONTENT.
Claims use since April 1931.

Reg. No. 350,600. Registered Aug. 23, 1938. MOUNT CARBON MANUFACTURING AND SUPPLY COMPANY, Pottsville, Pa., a corporation of Delaware. Republished by registrant.



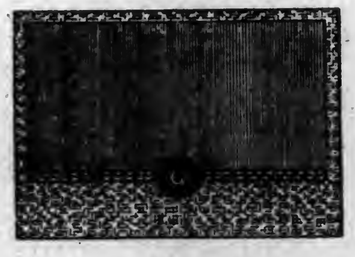
FOR BEER.
Claims use since February 1938.

Reg. No. 371,548. Registered Sept. 26, 1939. THE WEST END BREWING COMPANY, Utica, N. Y., a corporation of New York. Republished by registrant.



FOR BEER AND ALE.
Claims use since May 10, 1939.

Reg. No. 385,061. Registered Feb. 11, 1941. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.



The drawing is lined for the colors blue and silver.
FOR BEER.
Claims use since Aug. 12, 1940.

Reg. No. 385,062. Registered Feb. 11, 1941. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

The drawing is lined for the colors green and gold.
FOR BEER.
Claims use since June 15, 1940.

Reg. No. 385,063. Registered Feb. 11, 1941. M. K. GOETZ BREWING COMPANY, St. Joseph, Mo., a corporation of Missouri. Republished by registrant.

The drawing is lined for the colors red, gold and silver.
FOR BEER.
Claims use since Mar. 7, 1940.

Reg. No. 413,664. Registered May 8, 1945. G. HEILEMAN BREWING COMPANY, La Crosse, Wis., a corporation of Wisconsin. Republished by registrant.

Old Style Junior

The words "Old Style" are disclaimed.
FOR BEER AND MALT BEVERAGES WITH NOT MORE THAN LEGAL ALCOHOLIC CONTENT.
Claims use since Feb. 19, 1940.

CLASS 49

DISTILLED ALCOHOLIC LIQUORS

Reg. No. 312,611. Registered May 1, 1934. SOCIETE ANONYME LES FILS DE P. BARDINET, Cauderan, near Bordeaux, France. Republished by Bardinet, Ltd., New York, N. Y., a corporation of New York.

FOR RUM.
Claims use since Nov. 17, 1894.

Reg. No. 312,616. Registered May 1, 1934. SOCIETE ANONYME LES FILS DE P. BARDINET, Cauderan, near Bordeaux, France. Republished by Bardinet, Ltd., New York, N. Y., a corporation of New York.

BARDINET

The drawing is lined for the color red.
FOR RUM, ALCOHOLIC CORDIALS AND OTHER POTABLE DISTILLED LIQUORS.
Claims use since Nov. 17, 1894.

Reg. No. 313,314. Registered May 22, 1934. SOCIETE ANONYME LES FILS DE P. BARDINET, Cauderan, near Bordeaux, France. Republished by Bardinet, Ltd., New York, N. Y., a corporation of New York.

NEGRITA

FOR RUM.
Claims use since November 1894.

Reg. No. 398,197. Registered Oct. 13, 1942. STITZEL-WELLER DISTILLERY, Shively, Ky., a corporation of Kentucky. Republished by registraut.

MONDAMIN

FOR WHISKEY.
Claims use since Apr. 22, 1942.

CLASS 50

MERCHANDISE NOT OTHERWISE CLASSIFIED

Reg. No. 117,422. Registered July 10, 1917. THE CROWN CORK AND SEAL COMPANY OF BALTIMORE CITY, Baltimore, Md. Republished by Crown Cork & Seal Company, Inc., Baltimore, Md., a corporation of New York.

FOR CLOSURES FOR BOTTLES AND THE LIKE.
Claims use since Jan. 4, 1917.

Reg. No. 267,988. Registered Mar. 4, 1930. WM. FILENE'S SONS COMPANY, Boston, Mass., a corporation of Massachusetts. Republished by registrant.

Filene's

FOR COAT HANGERS, TROUSERS HANGERS, SKIRT HANGERS, PENNANTS, TIE RACKS, SHOE TREES, BLACKBOARDS.

Claims use since on or about Jan. 1, 1928.

Reg. No. 395,389. Registered May 26, 1942. RUBBER PRODUCTS, INC., Chicago, Ill., a corporation of Illinois. Republished by registrant.

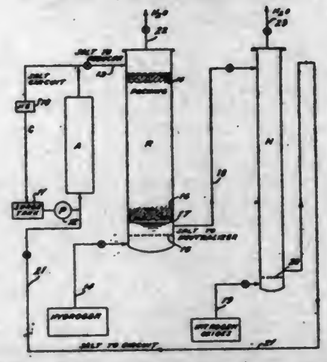
RUBBERLITE

FOR RUBBER FORMS, SIMULATING PARTS OF THE HUMAN ANATOMY, USED IN THE DISPLAY OF WEARING APPAREL.

Claims use since July 1936.

REISSUES

JULY 27, 1948



23,017

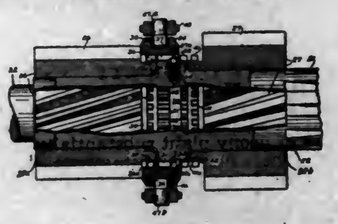
TREATMENT OF ALKALI METAL SALTS

John R. Bates, Swarthmore, Pa., assignor to Houdry Process Corporation, Wilmington, Del., a corporation of Delaware

Original No. 2,375,761, dated May 15, 1945, Serial No. 559,226, October 18, 1944. Application for reissue May 11, 1946, Serial No. 669,013

15 Claims. (Cl. 252—71)

1. In a process of treating a salt mixture consisting principally of alkali metal nitrate and nitrite which has been maintained in circulation in an indirect heat exchange system and in which the melting point has increased as a result of such use, the steps comprising contacting said molten mixture with a reducing agent under such conditions that the melting point of the mixture is decreased, and returning the molten mixture for indirect heat exchange.



23,018

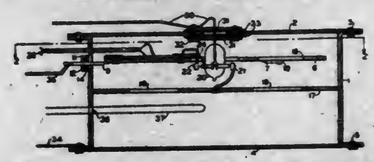
POWER-TRANSMITTING MECHANISM

Nelson R. Brownyer, Birmingham, Mich., assignor to The Timken-Detroit Axle Company, Detroit, Mich., a corporation of Ohio

Original No. 2,398,407, dated April 16, 1946, Serial No. 544,716, July 13, 1944. Application for reissue April 15, 1947, Serial No. 741,514

23 Claims. (Cl. 192—48)

1. In a multiple power transmitting assembly, a pair of relatively axially movable speed change clutch members mounted for relative rotation about a common axis and operable to transmit torque in both directions of rotation when they are coupled together; axial clutch teeth on each of said members; flat ends on said teeth disposed in a plane normal to said common axis and joining their working faces along sharp, non-chamfered edges; and said clutch members having predetermined clearances between said teeth when intermeshed; the clutch teeth of one member being set back from the end thereof, whereby said members, when said flat tooth ends are engaged, are disposed in telescoping relationship; means for forcing said members into engagement; the shapes and areas of said teeth ends and said clearances being of such relative proportions that, when said members are forced into engagement under predetermined pressure in a normal speed changing operation, the ends of said teeth will abut and slide relatively in frictional engagement in a common plane normal to said axis and prevent any appreciable tendency to intermesh until synchronization of the teeth is substantially complete.



23,019

HIGH EFFICIENCY RESONANT CIRCUIT

William W. Hansen, Garden City, N. Y., assignor to The Board of Trustees of the Leland Stanford Junior University, Stanford University, Calif., a corporation of California

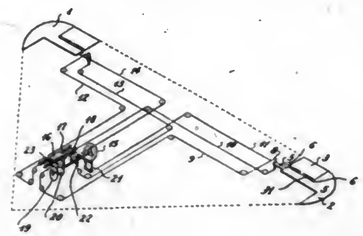
Original No. 2,251,569, dated August 5, 1941, Serial No. 249,194, January 4, 1939, which is a division of Serial No. 92,787, July 27, 1936. Application for reissue May 11, 1942, Serial No. 442,437

19 Claims. (Cl. 250—27.5)

1. Means for producing high electron velocities, comprising a substantially closed conducting member providing a chamber therein, means for setting up a confined high-frequency standing electromagnetic field within said chamber resonant at the natural frequency of said member, means for introducing electrons into said chamber in such position that said field will accelerate said electrons during their passage through said member, and means for reversing the direction of travel of said electrons for passage in the reverse direction through said chamber while retaining said electrons in proper phasal relation with said standing field such that the electrons will continue to absorb energy therefrom, said electrons leaving said chamber when a desired high velocity has been attained.

23,020

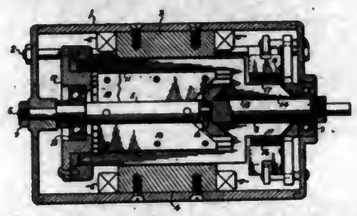
AIRPLANE CONTROL SYSTEM



John Donald McKellar, Long Beach, Calif., assignor to Northrop Aircraft, Inc., Hawthorne, Calif., a corporation of California

Original No. 2,173,538, dated September 19, 1939, Serial No. 162,494, September 4, 1937. Application for reissue March 20, 1946, Serial No. 655,776

9 Claims. (Cl. 244—13)



1. In a tailless airplane, a fuselage, a wing surface at each side thereof, a movable control unit

in each wing comprising a portion of the trailing edge of the wing and extending forwardly therefrom, means to simultaneously move said control units upwardly or downwardly or to simultaneously move one of said control units upwardly and the other downwardly or vice versa, a pair of superposed control surfaces at and extending forwardly of the trailing edge of each of said control units, each control surface of each of said pairs being movably mounted on a control unit in respect to the other to permit the upper control surface to be moved upwardly and the lower control surface downwardly in respect to the control unit on which said control surfaces are mounted, air passageways in the upper control surface of

each of said pair of control surfaces to permit airflow through said surfaces to preserve laminar flow over the upper surfaces of the wings when said upper control surfaces are elevated, means to separate one of said pair of control surfaces independently of the other or to separate both of said pairs simultaneously, the parts operating whereby either independent or simultaneous directional, lateral and longitudinal control of said airplane is obtained and permitting the imposition of a drag upon the airplane to increase its sinking speed without causing either directional control or the stalling of the airplane wing tips.

23,021
ELECTRIC MOTOR
Joseph W. Suydam, Blue Point, N. Y.
Original No. 2,418,607, dated April 8, 1947, Serial No. 547,704, August 2, 1944. Application for reissue March 26, 1948, Serial No. 17,261
8 Claims. (Cl. 171—252)

5. An electric motor construction, comprising an outer casing, field magnets located in the casing, electrical conductors and connections whereby said field magnets are energized, said casing having an axial shaft member comprising two aligned portions, one portion being secured at the end to said casing and held stationary, the second axial shaft portion being rotary, said casing having a bearing for the end of the said rotary axial portion, conductor bars arranged to move by and near the field magnet poles, each conductor bar having an L-shaped end extension arranged upon said rotary axial shaft portion, insulating material and clamping devices adapted to connect the said L-shaped ends of said bars and said rotary axial shaft portion, said stationary axial shaft supporting a bearing located near its end and secured to the casing, a mounting conducting ring constructed to receive the ends of said conductor bars in mutual electrical contact, said ring having rotary engagement with said bearing on said stationary shaft portion, said L-shaped ends of the conductor bars being arranged to form the commutator of the motor, brushes constructed and arranged to bear upon and supply electric current to the said commutator, said stationary axial shaft portion having a lengthwise and diametrical passage, a magnetizable body passing through said passage, and means for securing said body in said passage.

PLANT PATENTS

GRANTED JULY 27, 1948

Owing to the fact that almost all of the illustrations of the plant patents are in colors, it is not practicable to print a cut of the drawing.

803
PEACH TREE
Henry Frank Smith, Dover, Ark., assignor to Stark Bro's Nurseries and Orchards Company, Louisiana, Mo., a corporation of Missouri
Application May 14, 1947, Serial No. 747,934
1 Claim. (Cl. 47—62)

A new and distinct variety of peach tree, characterized as to novelty by its early ripening season, approximately eighteen days before its parent variety, substantially as described.

804
PEONY VARIETY
Lewis S. Hopkins, Canton, Mo.
Application September 11, 1944, Serial No. 554,062
1 Claim. (Cl. 47—60)

A variety of peony plant substantially as herein disclosed, characterized by its strong sweet rose scented fragrance and exceptional keeping qualities as a cut flower and the non-fading quality of its double blossom.

PATENTS

GRANTED JULY 27, 1948

2,445,748
PRODUCTION OF PENICILLIN
Milislav Demerec, Cold Spring Harbor, N. Y., assignor to the United States of America as represented by the Administrator, Civilian Production Administration
No Drawing. Application September 16, 1946, Serial No. 697,380
2 Claims. (Cl. 195—36)

1. A process for the production of penicillin which comprises inoculating a growth medium with a fungus mutant produced by X-ray irradiation of *Penicillium chrysogenum* with 50,000 to 100,000 roentgen units, then agitating and aerating said medium at a temperature between 20° and 25° C. for about 4 to 12 days, and recovering penicillin from the resulting fungus growth.

2,445,749
SUPPORT
Joseph F. Kortan, Cleveland, Ohio
Application February 6, 1946, Serial No. 645,760
2 Claims. (Cl. 248—47)

1. A collapsible support for Christmas trees including a central block of sufficient size to form a support for Christmas trees of various sizes, said block having an opening and two pairs of edges with the edges of each pair being disposed opposite to each other, means extending through said opening for securing the tree to said block, at least two pairs of arms with the arms in each pair being arranged in alignment with each other and with the opposite edges of the central block and the inner edge of one arm of each pair being pivotally secured to the lower face of said block at one of its edges and the other arm of each of said pairs being pivotally secured to lower face of said block at the opposite edge to provide a frame which is adapted to be disposed on a level support and in which the arms may be collapsed toward each other when the central block is elevated from said support, and means for preventing tilting movement of said tree including a substantially flat brace and a hinge having a pair of flanges associated with each arm, one of the flanges of each hinge being secured to the upper face of the arm with which it is associated at a position spaced inwardly from the outer edge of said arm and its other flange being secured to the inner face of one of said braces at its outer edge so that each brace will lie substantially flat against the arm to which it is attached when the parts are in a collapsed position, and each of said braces being of sufficient length to engage said tree, said braces being arranged in pairs with the free ends of each pair extending toward each other when said braces are moved into engagement with said tree and each of said braces having an arcuate-shaped end to engage said tree over a large circumferential area, and the braces that are hingedly mounted on each pair of aligned arms being of the same length but of a length different from the braces pivotally mounted on the other pair of aligned arms so that one pair of braces will engage the tree at a level different than the other set of braces.

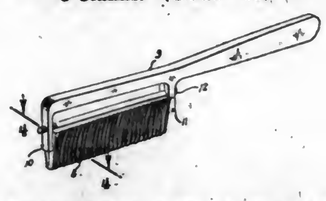
2,445,750
MILK PRODUCTS AND THE LIKE CONTAINING ALGIN COMPOUND
Victor Charles Emile Le Gloahec, Rockland, Maine, assignor to Algin Corporation of America, New York, N. Y., a corporation of Delaware
No Drawing. Original application February 19, 1943, Serial No. 476,488. Divided and this application June 18, 1945, Serial No. 600,230
3 Claims. (Cl. 99—136)

3. An ice-cream mix containing as a stabilizer the complex compound alkalino-calco-alginate by reaction in an aqueous medium of algin with an ionizable calcium salt and with an alkaline alkali metal compound to satisfy the acid functions of the algin molecule partially with calcium and partially with alkali metal, said compound having in aqueous solution a pH of at least 7 and the proportion of calcium (calculated as metal) to algin (calculated as pure algin) in said compound being from 3.1 to 3.5 per cent. by weight of said algin.

2,445,751
TEXTILE FABRIC
William R. Thomas, 3rd, Bethlehem, Pa., assignor to M. & W. Thomas Co., New York, N. Y., a partnership
No Drawing. Application August 25, 1945, Serial No. 612,726
7 Claims. (Cl. 139—426)

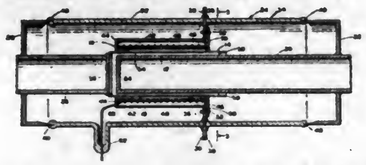
1. An unbalanced textile fabric containing a multiplicity of yarns extending in one direction in woven relation with a multiplicity of less closely spaced yarns extending in another direction, the number of ends per inch of the more closely spaced yarns being several times the number of ends per inch of the less closely spaced yarns, a multiplicity of said less closely spaced yarns being composed of two strands, each of which strands is from about 20 to about 150 denier and is twisted in the same direction as the other to provide a normal crepe twist and which strands are twisted together by as much as approximately 15 to approximately 40 turns to the inch inversely in relation to the denier magnitude of said strands to provide a composite yarn having distinct surface roughness, said fabric being stable against normal handling, free of grinning and without appreciable crepe effect.

2,445,752
COMPRESSING DEHYDRATED FOODS
Nicholas M. Adams, Chicago, Ill., assignor to Wilson & Company, Inc., a corporation of Delaware
Application April 7, 1944, Serial No. 529,931
9 Claims. (Cl. 99—171)



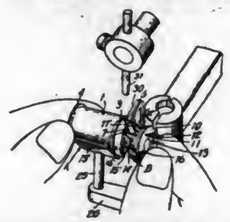
1. The method of packaging compressed dehydrated food material having a substantial tendency to expand slowly to a limited degree after compression, which comprises first compressing the material within a cylindrical sleeve having a thin wall and an outer diameter slightly less than the inner diameter of a predetermined container having substantially rigid walls, the amount of compression being of the order of 1500

lbs. per square inch, then extruding the material from the sleeve after the compressing in a block



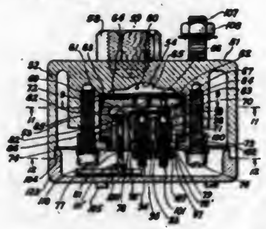
into the predetermined container, and sealing the same.

2,445,753
FILE
Alfred Anheuser, West Allis, Wis., assignor to Ernest A. Anheuser, Milwaukee, Wis.
Application March 25, 1944, Serial No. 528,089
3 Claims. (Cl. 29—78)



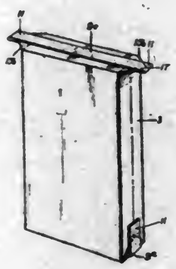
2. A file comprising: a pair of bar-like sections arranged back to back by folding a flat bar on its longitudinal center line with the exterior of the fold rounded on a small radius, said sections being reduced in thickness at least adjacent to said fold; and file teeth on the outer faces of said sections extending transversely thereacross and continuously around the small radius fold.

2,445,754
VACUUM TUBE
Melvin D. Baller, Little Silver, N. J.
Application June 19, 1943, Serial No. 491,466
5 Claims. (Cl. 250—27.5)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



1. A vacuum tube comprising a generally cylindrical glass envelope closed by metal ends, said envelope housing an electrode assembly comprising cylindrical anode, grid, and cathode electrodes disposed coaxially of the envelope with the anode at the center and the cathode at the outside, the anode being supported by an anode lead-in extending from said anode through one of the metal ends of the envelope, and a grid lead-in extending from the grid in opposite direction through the opposite metal end of the envelope, and means supporting the cathode including a metal annulus disposed transversely of the envelope and dividing the aforesaid cylindrical glass envelope into two portions the adjacent ends of which are sealed to the opposite faces of the annulus, said cathode being secured to the inside portion of the annulus, and the outside portion of the annulus constituting an external connection for the cathode.

2,445,755
MANUFACTURE OF MINIATURE THERMIONIC DEVICES
Joseph J. Bannon, Jr., North Arlington, N. J., assignor to Tung-Sol Lamp Works, Inc., Newark, N. J., a corporation of Delaware
Application July 1, 1943, Serial No. 493,027
7 Claims. (Cl. 219—10)

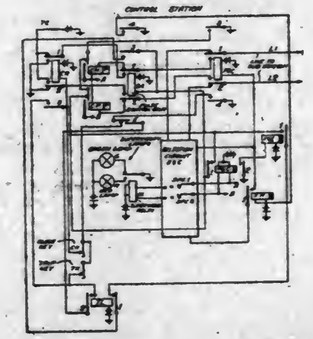


1. A means for facilitating the precision alinement and spacing of the sealing-in part and the grid-plate part of a miniature radio tube comprising a standard pivotally mounted for swinging movements toward and away from an electric welder and alined holding devices carried by said standard for supporting in precision alinement and spacing relation said parts while effecting the welding of terminal connections between the parts the alined holders comprising a V-shaped member for holding the grid-plate part and a narrow arcuate holder having an arcuate groove for the reception of a button sealing-in part at right angles to the axis of the V member.

2,445,756
FLUID OPERATED SWITCH ASSEMBLY
Frank Robert Bean, Rochester, N. Y., assignor to F. A. Smith Manufacturing Company, Rochester, N. Y.
Application June 21, 1944, Serial No. 541,349
17 Claims. (Cl. 200—83)

1. A fluid operated switch assembly comprising a casing providing a chamber for connection to a source of variable fluid pressure, a head member closing said chamber, a flexible diaphragm dividing said chamber into a pressure compartment and a switch compartment, said diaphragm being mechanically stressed toward said pressure compartment, a switch assembly within said switch compartment and having a switch arm movable to closed and open positions and operatively connected to said diaphragm for movement to open position upon reversal of said diaphragm, and a loading assembly engaging and urging said switch arm to closed position and exerting a loading pressure on said diaphragm when the same is reversed to minimize the differential between the fluid pressures for reversal and return of said diaphragm and for opening and closing of said switch assembly.

2,445,757
METHOD OF CLOSING BAG TUBE ENDS
Daniel Belcher, Minneapolis, Minn., assignor to Bemis Bro. Bag Co., Minneapolis, Minn., a corporation of Missouri
Original application January 15, 1943, Serial No. 472,493. Divided and this application June 6, 1946, Serial No. 674,714
7 Claims. (Cl. 93—35)



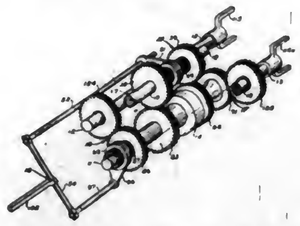
2. The method of closing and sealing an open end of a flexible walled tubular bag body, which consists in pressing the walls of the bag end into flatwise relation with the edge walls intucked between the side walls, retaining the contiguous edges of the flattened side walls in flatwise relation, outwardly bending the side walls along fold lines disposed in substantially parallel relation to the edge walls whereby portions of the intucked edge walls are unfolded to substantially right angular relation to the median plane of the bag body, engaging the marginal edge of the central portion of each edge wall and folding said wall portions into flatwise relation with their respective edge walls and whereby portions of the edge and side walls are folded along diagonal fold lines to bring together the marginal edges of each edge wall and also the edges of the folded side wall portions, and subsequently folding a strip of sealing tape over all of the marginal edges of the side and edge walls and adhering it thereto, thereby to seal the bag end against leakage.

2,445,758
HANGER
Theodore R. Benda, Villa Park, Ill., assignor to Excel Incorporated, a corporation of Illinois
Application April 27, 1945, Serial No. 590,528
9 Claims. (Cl. 248—61)

1. A hanger for supporting cables to messenger strands, comprising: a thin easily bendable strap having a pair of side slits, one near each of the longitudinal edges, and an end slit near one end of the strap joining the side slits to form an elongated tongue joined at one end to the strap, the other end being free, the tongue extending nearly the full length of the strap so that its ends are near the strap ends.

2,445,759
ELECTRIC SIGNALING SYSTEM
Edward Albert Henry Bowsher, Harold Mountjoy Muschamp d'Assis-Fonseca, and Hugh Jennings Ward, London, England, assignors to Standard Telephones and Cables Limited, London, England, a British company
Application April 19, 1945, Serial No. 589,245
In Great Britain March 31, 1944
Section 1, Public Law 690, August 8, 1946
Patent expires March 31, 1964
6 Claims. (Cl. 177—353)

5. In a remote control and supervisory system comprising a control station and a substation on a party line, with means for the transmission of electric pulses of short duration alternately from the control station to the substation and from the substation to the control station, and for operating a control magnet at the substation by the transmission of an electric pulse of longer duration, the combination with said control magnet of a circuit comprising a plurality of relay contacts, a plurality of relays for controlling said contacts, relay means controlled by said impulses and having contacts arranged to prevent operation of said plurality of relays during receipt of impulses of short duration, said relay means being effective on receipt of an impulse of long duration to cause operation of said plurality of



relays to close certain of said relay contacts in the control magnet circuit, means operative on cessation of said pulse of long duration to transmit a short supervisory pulse to the control station, means at the control station operated by said supervisory pulse to cause operation of an indicating device and operative on cessation of said supervisory pulse to cause the transmission of a second pulse of long duration, means at the substation responsive to said second pulse to cause said plurality of relays to close all the relay contacts in said control magnet circuit, means controlled by the operation of said control magnet to change the nature of the next supervisory pulse to be transmitted from the substation, and means operative on cessation of said second pulse to transmit said supervisory pulse to operate said indicating device.

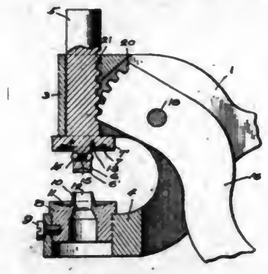
2,445,760

POWER-TRANSMITTING MECHANISM

Lawrence R. Buckendale, Detroit, Mich., assignor to The Timken-Detroit Axle Company, Detroit, Mich., a corporation of Ohio

Application March 13, 1943, Serial No. 479,086
14 Claims. (Cl. 74—327)

1. In a power transmitting mechanism, a housing; an input shaft and an idler shaft journalled in said housing for rotation about spaced parallel axes located in a common vertical plane; a pair of spaced, parallel output shafts journalled in said housing and having their axes disposed in a common horizontal plane which intersects said vertical plane intermediate the axes of said input and idler shafts to provide a substantially parallelogrammatic mounting of side shafts in the housing; a multiple speed gear mechanism for transmitting power from said input shaft to said idler shaft including a differential gear assembly on the idler shaft within said housing; and a gear on each output shaft in constant mesh with an independently driven gear element of said differential assembly for transmitting power from said idler shaft simultaneously to said output shafts.



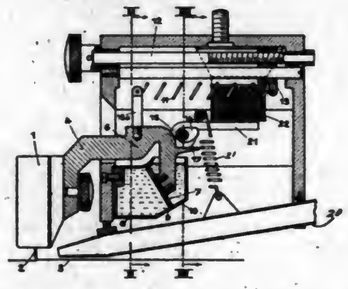
2,445,761

GROMMET SETTING IMPLEMENT

William E. Castle, Fontana, Calif.

Application September 10, 1945, Serial No. 615,481
2 Claims. (Cl. 218—25)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. A machine for inserting and setting grommets in fabric material, comprising an upper setting member, a die punch integral with said upper setting member, a lower setting member, a lower tubular cutting die upstanding from and integral with said lower setting member and adapted to receive the die punch, said dies and members being in axial alignment, said punch having radially movable means to releasably hold a grommet therearound and said lower setting member having an annular groove adapted to receive a grommet washer, means to move said upper punch and upper setting member relatively to said lower die and lower setting member whereby said punch and die will cut a hole in the fabric material placed therebetween, said



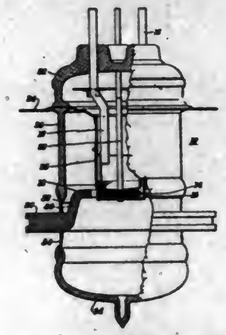
punch will carry the grommet to setting position and release the same, and said setting members will set said grommet and washer around the hole while said punch and die have relative movement, and a circular groove between said punch and said upper setting member to receive said lower die after the hole is cut and while the grommet and washer are being set.

2,445,762

RECORD ENGRAVER SUSPENSION FOR SOUND TRACK REGISTERING MACHINES

Lucien Chanal, Annecy, France; vested in the Attorney General of the United States

Application October 27, 1942, Serial No. 463,573
In Switzerland November 8, 1941
6 Claims. (Cl. 274—24)



1. In a sound track registering machine, a record engraver suspension device, comprising an engraver tool carrier, a frame adapted to be attached to a tone arm, a bearing in said frame adapted to pivotally suspend said carrier in said frame, the axis of said bearing being substantially parallel to the surface of the record, means for counteracting the reaction caused by the cutting stress exerted on said engraver tool carrier, damping means operatively connected between said frame and said carrier, said damping means comprising a container and disc movable therein, the walls of said container forming a throttled passage around the disc, of varying cross sectional area along the path of movement of the disc to produce varying damping effects depending upon the extent of deviations of the engraver tool carrier from its normal position with respect to the plane of the record in such a manner that the damping effects on the carrier decrease gradually with increasing deviations from said normal position, thereby preventing initiation of pendular vibrations.

2,445,763

ANODE STRUCTURE FOR AN ELECTRON DISCHARGE DEVICE FOR ULTRA HIGH FREQUENCIES

Paul Georges Chevigny, New York, N. Y., assignor to Federal Telephone and Radio Corporation, Newark, N. J., a corporation of Delaware

Application December 24, 1942, Serial No. 470,060
4 Claims. (Cl. 250—27.5)

1. A vacuum tube, including a cathode, a grid surrounding said cathode, a substantially ring-shaped anode surrounding said grid, glass envelope means surrounding said electrodes, said ring-shaped anode having an integral annular extension protruding outside of said envelope, an annular knife-edge on said extension projecting into and forming a seal with the envelope, and an integral anode section shaped to have a point of inflection connecting the ring-shaped anode with its annular extension and longitudinally displacing said annular extension and said knife-edge from said grid.

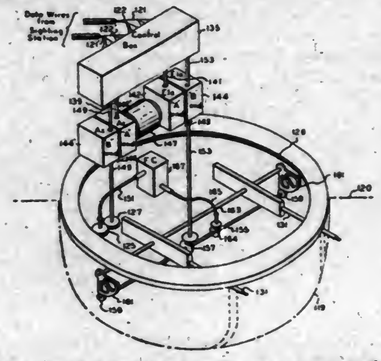
2,445,764

INTERPOLYMER OF DIALLYL MALEATE AND DIETHYLENE GLYCOL MALEATE PHTHALATE

Gaetano F. D'Alelio, Shaker Heights, Ohio, assignor to General Electric Company, a corporation of New York

No Drawing. Original application October 31, 1939, Serial No. 302,174. Divided and this application November 12, 1946, Serial No. 709,103
2 Claims. (Cl. 260—45.4)

1. A composition comprising the product of polymerization of a polymerizable mixture containing diallyl maleate and diethylene glycol maleate phthalate, said materials being copolymerizable.



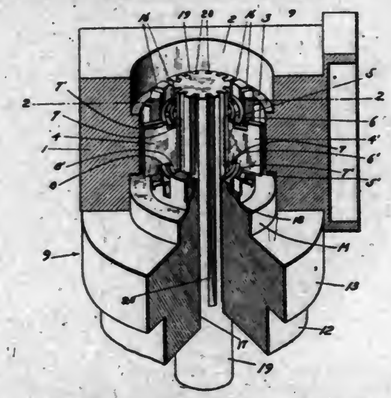
2,445,765

HYDRAULIC REMOTE OPERATING SYSTEM

Edward Dawson, New York, Frederic M. Watkins, Forest Hills, and Charles N. Schuh, Jr., Bellerose, N. Y., assignors to The Sperry Corporation, a corporation of Delaware

Application December 27, 1941, Serial No. 424,612
13 Claims. (Cl. 89—37.5)

9. In a positional control system having a controlling object and a controlled object, a variable speed drive for actuating the controlled object, a controller for said drive having its output governing the speed of said variable speed drive and having a composite input responsive in part to the difference of position between the controlling and controlled objects, and a degenerative velocity feedback connection from the variable speed drive to said input, including means for causing the feedback to gradually decay whereby such velocity term disappears as a steady speed of said drive is reached.

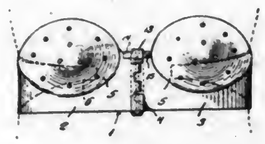


10. A control mechanism for a gun comprising a source of control signal corresponding to a desired orientation of said gun, control means responsive to said desired orientation signal for driving said gun into correspondence with said desired orientation signal, means for producing a signal having components corresponding respectively to the actual orientation and actual velocity of said gun, and means responsive to a predetermined amount of non-correspondence between said two signals for preventing firing of said gun.

2,445,766

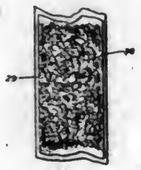
APPARATUS FOR ASSEMBLING PARTS OF ELECTRON DISCHARGE DEVICES

Palmer P. Derby, Boston, and Warren M. Robertson, Wakefield, Mass., assignors to Raytheon Manufacturing Company, Newton, Mass., a corporation of Delaware



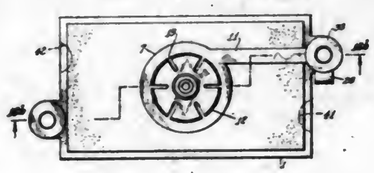
Application March 28, 1944, Serial No. 528,442
4 Claims. (Cl. 113—99)

1. An apparatus for assembling the component parts of the anode of an electron-discharge de-



vice comprising: a central member having a plurality of splines defining a plurality of slots extending longitudinally thereof; and a cylindrical member concentric with said central member; said cylindrical member having a plurality of slots extending longitudinally thereof; the slots of said cylindrical member, throughout their major extent, being directly opposite, in register with, and radially spaced from the slots of said central member.

2,445,767
BRASSIÈRE
Winifred S. Dickerson, Atlanta, Ga., assignor of one-half to J. Edward Dickerson, Atlanta, Ga.
Application October 5, 1945, Serial No. 620,590
2 Claims. (Cl. 2—42)

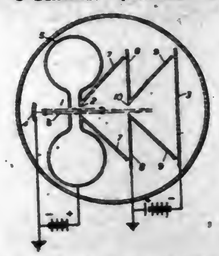


1. A brassière and supporting means therefor consisting of two main portions, each portion comprising a hollow substantially conoidal member, a resilient curved tapered clasping member integrally formed with said conoidal member and extending outwardly, rearwardly and then inwardly from the outermost edge portion of the main brassière portion, and a plurality of ears extending inwardly from the inner edge of each of said main portions, the ears on one main portion being interfitting with the ears on the other portion and a pintle extending through a bore in the interfitting ears, and thereby hingedly connecting the two main portions, and a channel-shaped clasp pivotally connected to the innermost edge portion of one of the main portions and adapted to engage the adjacent innermost edge portion of the other main portion to prevent hinge movement of the two brassière portions in relation to each other.

2,445,768
MANUFACTURE OF SELENIUM PRODUCTS
Douglas Louis Ashton Driver, London, England, assignor to Standard Telephones and Cables Limited, London, England, a British company
Application May 30, 1945, Serial No. 596,697
In Great Britain May 5, 1944
Section 1, Public Law 690, August 8, 1946
Patent expires May 5, 1964
3 Claims. (Cl. 154—46M)

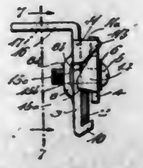
2. A sheet of felt formed of selenium fibres loosely matted together.

2,445,769
RECTIFIER AND ASSEMBLY
William Fiore, Brooklyn, N. Y., assignor to Federal Telephone & Radio Corporation, New York, N. Y., a corporation of Delaware
Application November 6, 1942, Serial No. 464,748
3 Claims. (Cl. 175—366)



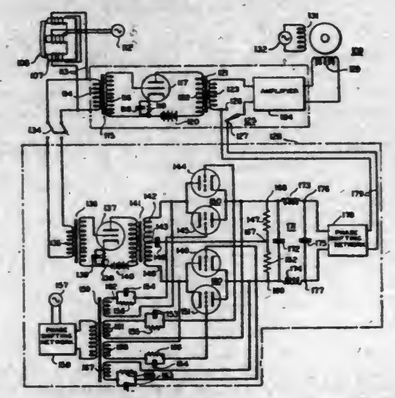
2. A dry disc rectifier including a base plate having a central aperture therethrough, and provided with an apertured mounting ear extending from one edge thereof, a layer of rectifying material coating said plate over the greater portion of the surface of at least one side thereof, a counter-electrode covering substantially all said rectifying layer, a generally circular conducting plate arranged in contact with said counter-electrode and covering only a limited area thereof surrounding said central aperture, said contact plate being provided with a central aperture registering with the central aperture in said base plate and having an integrally formed relatively narrow connection strip extending to said mounting ear, the end of said connection strip being apertured to register with the aperture in said mounting ear, a circular radially-split spring member provided with a raised central boss and a hole therethrough registering with said aperture in said base plate and covering a substantial portion of said contact plate, and fastening means extending through all registering central holes and apertures of the individual members recited, whereby said spring member forces said contact plate against said counter-electrode over substantially the entire area of said contact plate, so as to reduce contact resistance between said counter-electrode and said contact plate, and whereby the electrical circuit to said counter-electrode is independent of said spring member, and an integral metallic path without intermediate contacts extends from said contact plate to the farther end of said connection strip, so that thermal and pressure displacements of said spring member and said fastening means do not affect the current flow path between said counter-electrode and the outer end of said connection strip.

2,445,770
BASIC IRON SOAP PIGMENT
Earl K. Fischer, Long Island City, N. Y., assignor to Interchemical Corporation, New York, N. Y., a corporation of Ohio
No Drawing. Application April 10, 1942, Serial No. 438,442
3 Claims. (Cl. 260—414)



1. The method of preparing a transparent golden yellow film-forming composition which comprises precipitating a ferric salt with an ammonium soap to produce a ferric soap, and then converting the soap by heating with ammonium hydroxide to a hydroxylated soap of the general formula $Fe(OH)_xR_y$, where R is the radical of a soap-forming acid, and x and y each may vary from 1 to 2, with x plus y equal to 3.

2,445,771
ELECTRON DISCHARGE DEVICE OF THE VELOCITY MODULATION TYPE
John Heaver Fremlin and Christopher Strachey, London, England, assignors to Standard Telephones and Cables Limited, London, England, a British company
Application October 14, 1942, Serial No. 462,028
In Great Britain December 12, 1941
6 Claims. (Cl. 315—5)

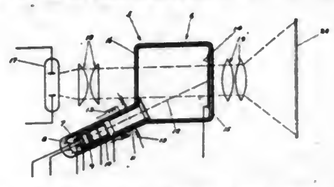


1. An ultra high frequency electron discharge apparatus of the velocity modulation type comprising a hollow electrically conducting body adapted to contain standing electromagnetic waves, means including a source of electrons for producing an electron beam and for projecting the beam in a path through said body, said beam supplying energy toward maintaining a field of standing electromagnetic waves therein, a reflector external to said body adapted to reflect the electrons back into said field, a first electrode element located at a point intermediate said hollow body and said reflector having means for applying the potential of said electron source thereto, said first element being adapted to produce a potential distribution with a point of inflection at said first-mentioned point, and a second electrode element located between said hollow body and said first element having means for applying a potential with respect to that of said cathode thereto, said second electrode element being shaped to produce a potential distribution of substantially parabolic form from the aperture in said hollow body to said intermediate point.

2,455,772
INDUCTANCE CLIP
Joseph F. Frese, Baltimore, Md., assignor to The Monitor Controller Company, Baltimore, Md., a corporation of Maryland
Application December 20, 1944, Serial No. 569,053
5 Claims. (Cl. 173—273)

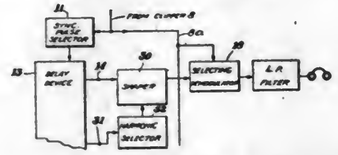
2. An inductance clip comprising a pair of clamping members engageable with opposite sides of an inductance strip, a hook-shaped end on one of said clamping members engageable with one edge of the inductance strip, a pair of spaced cam members integrally connected with portions of said last mentioned clamping member remote from the hook-shaped end thereof and a contact face on said member for establishing surface contact with one face of the inductance strip, said second clamping member having a contact face engageable with the opposite face of the inductance strip and having the other end thereof slidable between the spaced cam members on said first mentioned clamping member, a pair of coacting cam-like members carried by portions of said last mentioned clamping strip in edge-to-edge alignment with the cam members on said first mentioned clamping strip and screw means extending through said clamping members for forcing said coacting cam-like members into engagement for advancing the cam members on said second mentioned clamping member against spaced intervals along the inductance strip confined against the hook-shaped end of said first mentioned clamping member.

2,445,773
RATE TAKING CIRCUIT
William F. Frost, Stewart Manor, N. Y., assignor to The Sperry Corporation, a corporation of Delaware
Application January 22, 1944, Serial No. 519,291
19 Claims. (Cl. 318—31)



13. In a follow-up system, in combination with driven and controlling elements, an alternating current source, pick-off means supplied by said source, said pick-off means being connected to a first of said elements and adapted to cooperate with the second of said elements to produce an alternating-current output signal of phase and amplitude dependent on direction and extent of relative positional deviation of said elements, means for producing an alternating-current output signal of phase and amplitude dependent on the rate of change of amplitude of said alternating current signal, said last named means comprising complex impedance means and impedance changing means therein coupled to and synchronously variable with said alternating-current source, motive means for driving said driven element, and means for combining said rate-of-change dependent signal and said deviation-responsive signal to control said motive means.

2,445,774
PICTURE RECEIVER UTILIZING ANOMALOUS REFLECTION FROM SILVER
Elmer J. Gorn, Newton, Mass., assignor to Raytheon Manufacturing Company, Newton, Mass., a corporation of Delaware
Application August 20, 1945, Serial No. 611,652
11 Claims. (Cl. 178—7.5)

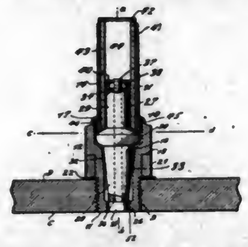


5. In combination: a member having an extended silver surface; means for illuminating said

surface with electromagnetic energy of a wave length within a band extending from about 3075 Å. to about 3275 Å., whereby the reflection coefficient of said surface is capable of being varied; means for translating at least a portion of the energy striking said surface into visible light;

and means for locally altering the temperature of said surface to, in turn, locally alter said reflection coefficient, whereby the quantity of said energy reaching said translating means is varied, and the intensity of the resulting visible light is correspondingly varied.

2,445,775
PULSE TIME MODULATION MULTIPLEX RECEIVER
Donald D. Grieg, Forest Hills, N. Y., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
Application March 5, 1945, Serial No. 581,037
6 Claims. (Cl. 179—15)

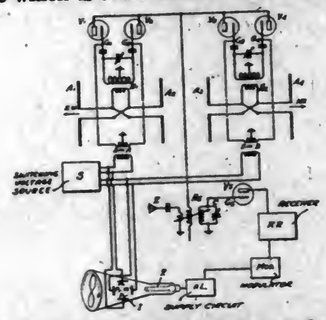


2. In a receiving system for a train of time modulated signal pulses including bench mark pulses interleaved therewith, means for segregating the bench mark pulses from the signal pulses and give them a substantially rectangular shape, means to retard the rectangular pulses, means to produce a wave having an harmonic relationship with respect to the recurrence rate of said bench mark pulses, means to phase said wave to cause a substantially linear part thereof to coincide with each of said rectangular pulses and to combine said wave and said rectangular pulses to produce discrete demodulator pulses having substantially linearly inclined top portions, and means to combine said demodulator pulses with the signal pulses to translate the time modulation of the signal pulses into amplitude modulated energy.

2,445,776
CONDITIONED NAPHTHALENE
Hubert G. Guy, Pittsburgh, Pa., assignor to Koppers Company, Inc., Pittsburgh, Pa., a corporation of Delaware
No Drawing. Application July 11, 1945, Serial No. 604,535
13 Claims. (Cl. 260—666.5)

7. A free flowing powdered composition comprising a coal tar product containing at least one coal tar hydrocarbon chosen from such hydrocarbons as are usually present in the naphthalene to anthracene boiling ranges, having a melting point about 70° C. having intimately mixed therewith at least 4% of fuller's earth and at least 1% of a magnesium compound selected from the class consisting of magnesium carbonate, magnesite, magnesium oxide, and magnesium phosphate.

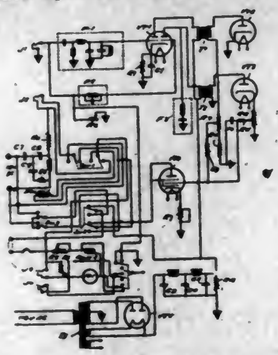
2,445,777
SHIELDED SPARK PLUG
Lewis F. Hahn, Hatboro, Pa.
Application August 30, 1943, Serial No. 500,537
4 Claims. (Cl. 123—169)



1. A shielded spark plug comprising a shell having a long conical gasket seat, a core assembly having its lower portion of conical form, a soft metal gasket of conical form engaging said seat and squeezed between the seat and said conical portion of the core assembly to lock the core assembly to the shell, said core assembly provided mid-height with an outstanding shoulder, a shielding barrel lined with an insulating tube telescoping the upper portion of the core assembly and projecting above the same to form a pocket for receiving a conductor leading to the top of the core assembly, said barrel provided at its lower end with an outstanding flange having its underside contoured to fit on said shoulder and the upper end of the shell rolled over into bearing engagement with the flange to force the core assembly into position to squeeze the gasket on to its seat with incidental distortion of the soft metal gasket from its initial configuration.

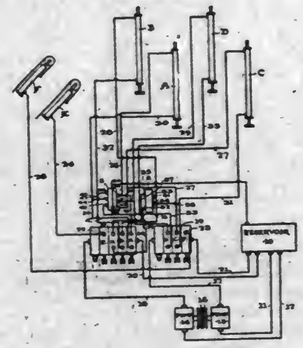
2,445,778
FUELS FOR INTERNAL-COMBUSTION ENGINES
William J. Hale, Midland, Mich.
No Drawing. Application June 27, 1945, Serial No. 601,915
6 Claims. (Cl. 44—53)

4. An alcohol-water fuel containing a heavy metallo-chlorophyllin, the metal component of which is chosen from the group consisting of iron, cobalt, nickel, manganese, chromium, molybdenum, tungsten and copper, which is substantially free from resins and waxes and in an amount sufficient to be effective as an antioxidant.



2,445,779
ELECTROMAGNETIC WAVE DIRECTION RESPONSIVE APPARATUS
René Hardy, Lyon, France, assignor to International Standard Electric Corporation, New York, N. Y.
Application May 24, 1943, Serial No. 488,291
In France December 28, 1940
Section 1, Public Law 690, August 8, 1946
Patent expires December 28, 1960
11 Claims. (Cl. 343—121)

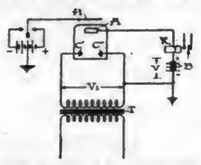
1. A radio direction finding system comprising a pair of directional antennas arranged in quadrature and in fixed position, an indicating device capable of being controlled in a two coordinate system, means to control said indicating device in one coordinate cyclically at a predetermined rate, means cyclically to reverse the direction of currents received by said antennas at a rate which is twice that of the cyclical rate of



control of said indicating device and according to a predetermined law, means to combine the signals from said two antennas, means to detect the combined signals, and means to utilize a characteristic of said combined detected currents to control said indicating device in the other coordinate.

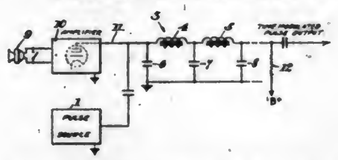
2,445,780
TELETYPE APPARATUS
Tom R. Harvill and Leonard Wroblewski, United States Army; said Leonard Wroblewski now, by judicial change of name, Leonard Sperry
Application January 2, 1945, Serial No. 571,058
4 Claims. (Cl. 178—66)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In a unit for receiving and transmitting Teletype messages by radio, a jack for coupling the unit to the output of a radio receiver, a switch for placing the unit in a condition to receive impulses by radio or by wire, an input filter to pass signals from the receiver only at a predetermined frequency, a double triode tube having a first triode section to amplify the signal of predetermined frequency, a first transformer, through which the amplified signal passes, a first rectifier tube to rectify the signal from first transformer, a cut-off tube, a first resistance connecting said first transformer secondary to ground, a connection from said first resistance to said cut-off tube grid to apply a negative potential thereto, a second input filter adapted to reject said predetermined frequency and pass all other frequencies including noise frequencies and connected to said second triode grid, a circuit from the plate of said second triode to ground, said circuit being series resonant to said predetermined frequency, a second transformer and a second rectifier to rectify the second triode output, a second resistance from the second rectifier cathode to ground, a connection from the second resistance to said cut-off tube grid to apply a positive potential thereto to neutralize said noise frequencies, and means for coupling the plate circuit of the cut-off tube to a Teletype apparatus to control the current of the Teletype circuit, said cut-off tube providing current to produce mark impulses and zero current to produce space impulses in Teletype apparatus.



2,445,781
CONTROL SYSTEM FOR MULTIPLE HYDRAULIC HOISTS
Edward J. Hrdlicka, Jr., Painesville, Ohio, assignor to Hydraulic Equipment Company, Cleveland, Ohio, a corporation of Ohio
Application December 5, 1946, Serial No. 714,279
17 Claims. (Cl. 60—97)

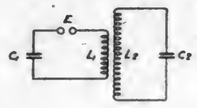
1. In a system for hydraulic hoist control, in combination, a plurality of double acting hoists, a pump, a reservoir, a control valve for each hoist adapted to be positioned to connect the pump thereto to actuate it in either direction or to lock it in any position, a series valve adapted when actuated to connect the hoists in series and a separate control valve adapted to be associated with said series by said series valve to enable the simultaneous actuation of all of the series by said pump in either direction or to lock all hoists.



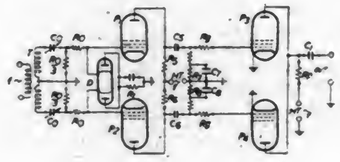
5. A hydraulic hoist system including in combination, a plurality of double acting hoists, a pump, a reservoir, a control valve for each hoist having "raise," "lower" and "hold" positions, piping connecting said elements into a system, a series valve piped into said system and arranged to connect all said hoists into a series when their respective valves are set to "hold," an additional control valve effectively connected into the series by said series valve for simultaneous manipulation of all hoists, and a reversible flow-control valve in said system and effective only when said series valve is open to limit the rate of movement of any hoist to that effected by the delivery of liquid thereto by said pump.

2,445,782
ELECTRONIC DISCHARGE TUBE AND CIRCUITS THEREFOR
Jacob Kruithof and Lucien Alfred Benoit Cabes, Antwerp, Belgium, assignors to International Standard Electric Corporation, New York, N. Y., a corporation of Delaware
Application April 1, 1943, Serial No. 481,510
In the Netherlands February 24, 1941
Section 1, Public Law 690, August 8, 1946
Patent expires February 24, 1961
3 Claims. (Cl. 250—27)

1. Control apparatus comprising a discharge tube containing an anode, a cathode and a third electrode, an external control electrode on the envelope of the tube, said cathode and said third electrode being spaced substantially equal distances from said anode, and including means for applying a direct current potential between said anode and said cathode and means for applying an alternating potential between said cathode and said third electrode to establish an ionized discharge between said electrodes, said discharge forming an electron emitting fictive filament, the algebraic sum of said alternating potential and of the potential applied to said anode being insufficient normally to initiate an independent discharge between said fictive filament and the anode, but being effective to establish said independent discharge when a positive potential is applied to said control electrode.



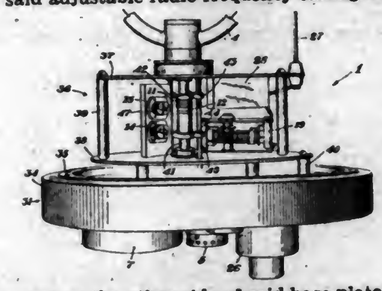
2,445,783
TRANSMISSION SYSTEM
Emile Labin, New York, N. Y., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
Application July 24, 1944, Serial No. 546,378
4 Claims. (Cl. 179—171.5)



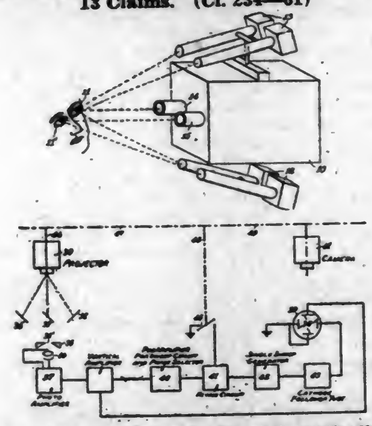
1. A pulse time modulator, a source of signal energy, a retardation circuit including an inductance, means for applying a train of discrete pulses to said retardation circuit, and means for varying the inductance of said circuit according to the instantaneous values of said signal source.

2,445,784
CAVITY RESONATOR ELECTRIC WAVE GENERATOR
Gerard J. Lehmann, New York, N. Y., assignor to International Standard Electric Corporation, New York, N. Y., a corporation of Delaware
Application June 10, 1943, Serial No. 490,319½
In France March 11, 1942
12 Claims. (Cl. 315—39)

3. An oscillation generator for use at very short wave lengths, comprising a primary circuit which includes a linear conductor in series with a spark gap, and a secondary circuit formed by a cavity resonator, of generally rectangular cross section centered on said linear conductor, which is coupled to said primary circuit but galvanically insulated from said conductor, the extent of the resonator in the direction of said conductor being of the order of half a wave length at the operating frequency.



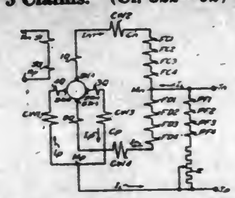
2,445,785
MEANS FOR GENERATING RECTANGULAR ELECTRICAL IMPULSES
Maurice Möise Lévy, London W. C. 2, England, assignor to Standard Telephones and Cables Limited, London, England, a British company
Application September 11, 1942, Serial No. 458,059
In Great Britain May 27, 1941
Section 1, Public Law 690, August 8, 1946
Patent expires May 27, 1961
12 Claims. (Cl. 250—27)



11. A system for producing high voltage impulses having a duration short compared with their period of repetition, comprising a source of impulses of a single frequency which is a multiple of the desired repetition frequency of the impulses to be produced, a stage of amplification comprising a vacuum tube having a cathode, a control electrode and an anode, means for applying impulses from said source to said control electrode, a source of alternating high tension voltage connected to said anode, the frequency of said alternating voltage being an integral submultiple of the frequency of said source of impulses, and means connected to said anode for deriving said high voltage impulses.

2,445,786
DIRECTION FINDER COLLECTOR UNIT
Lester L. Libby, East Orange, N. J., and Fred C. Wallace, New York, N. Y., assignors to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
Application November 3, 1945, Serial No. 627,494
8 Claims. (Cl. 343—118)

1. A direction finder collector unit comprising a base plate having a rotatable antenna and adjustable radio frequency tuning means coupled thereto on one side of said base plate; and motor means for rotating said loop antenna and varying said adjustable radio frequency tuning means mounted on the other side of said base plate, said base plate comprising a radio frequency shield.

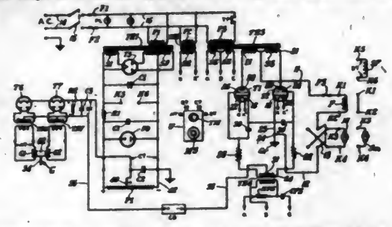


2,445,787
METHOD OF AND APPARATUS FOR PLOTTING AN ORDERED SET OF QUANTITIES
Julius Edgar Lilienfeld, St. Thomas, V. I.
Application December 18, 1945, Serial No. 635,797
13 Claims. (Cl. 234—61)

1. Apparatus for producing automatically a coordinate plot of an ordered set of quantities as represented graphically upon a band in a manner not related to a desired frame of reference and each representation having successive boundary portions of abrupt optical density transition, comprising a projector for projecting consecutive images of the successive representations, the spacing between selected points of opposite boundary portions thereof being representative of said quantity; means for scanning the images successively, and a photo-electric system associated therewith whereby during intervals of rest between successive advances of the band the respective images set up a succession of photoelectric responses; a cathode ray tube with screen and a circuit for producing a uniform sweep of the beam, the said photoelectric responses being adapted to be impressed upon said tube to trigger individual single sweeps at a constant point along the time base of said screen and to provide respective traces upon said screen under the influence of the sweep circuit; and means operating synchronously with the projector to record simultaneously the respective traces produced.

10. The method of producing automatically a coordinate plot of an ordered set of quantities as represented graphically in a manner not related to a desired frame of reference, which comprises projecting intermittently and sequentially from a succession of equally distributed representations of said quantities images having respective opposite boundary portions of abrupt optical density transition, optically scanning the respective projected images transversely of their boundaries and setting up thereby photoelectric responses to provide corresponding oscillograms of ascending and descending branches as determined by the said boundaries of abrupt transition, and photographically recording in timed relationship to the beginning of each scanning operation a point of the oscillogram along a predetermined line.

2,445,788
ROTARY AMPLIFIER
Bernard Litman, Wilkinsburg, Pa., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa., a corporation of Pennsylvania
Application July 20, 1946, Serial No. 685,109
5 Claims. (Cl. 322—92)



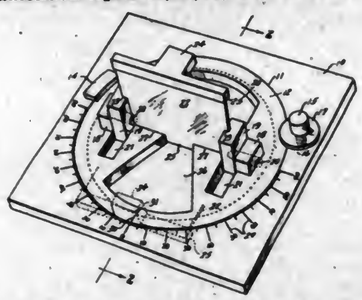
1. A rotary direct-current machine, comprising a field structure having a plurality of poles of different magnetic polarities, an armature having a commutator with a corresponding plurality of brushes of respectively different electric polarities, an internal circuit connection between brushes of one polarity, an internal circuit connection between brushes of the other polarity, two field windings arranged on each of said poles and disposed in series-relation to one another in one of said connections so as to form part thereof, an input circuit having field control coils disposed on said structure for providing a controlled unbalance of flux distribution in said structure in order to cause circulating current to flow through said field windings, an output circuit connected on the one hand with a point of said latter connection between said field windings and on the other hand with said other connection to be energized in dependence upon voltage generated between said two connections, said two field windings of each pole being arranged to act cumulatively as regards said circulating current and differentially as regards output current flowing through said output circuit due to said voltage, and a plurality of auxiliary windings disposed on said plurality of poles respectively and connected in at least one of said connections so as to produce in each pole two component fluxes under excitation by internal circulating current and by output current respectively, said auxiliary winding being arranged so that said flux components due to circulating current are in the directions required to reduce the effect of armature reaction relative to the control function of said input circuit and said flux components due to output current are directed for self-excitation of the machine.

2,445,789
ELECTRICAL REGULATING SYSTEM
Roscoe R. Lobosco, Elizabeth, N. J., assignor to The Linde Air Products Company, a corporation of Ohio
Application August 23, 1944, Serial No. 550,731
4 Claims. (Cl. 314—64)

1. An electrical regulating system for smoothly

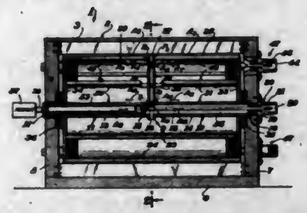
controlling the rate of rod feed in a welding machine including a direct current rod-feed motor, such system comprising the combination of at least one thyratron, means for supplying an alternating voltage to the input circuit of said thyratron, means for passing the rectified current output of the thyratron through the armature of the rod-feed motor, and means for selectively regulating the welding voltage, including means for applying to the grid of said thyratron, an alternating voltage lagging the plate voltage of the thyratron by approximately 90 degrees, a unidirectional positive voltage proportional to the actual welding voltage, and a unidirectional negative voltage proportional to the desired welding voltage.

2,445,790
MECHANICALLY OPERATED RAZOR
Ingvar Lonne, Burbank, Calif.
Application October 27, 1944, Serial No. 560,625
4 Claims. (Cl. 30—43)



4. In a razor of the class described, a stationary shear member on the support, a movable shear member, an oscillating member on the support, said oscillating member having a reduced portion at the free end, and a spring member having a leg threaded over and positioned backwardly from the end of the reduced portion of the oscillating member, and also having a U-shaped leg positioned at right angles to the first leg and over the end of the reduced portion, the U-shaped leg being connected by a loop with the first leg, the U-shaped leg extending into a recess of the movable shear member.

2,445,791
LAST
Stanley P. Lovell, Newtonville, Mass.
Application July 21, 1945, Serial No. 606,304
2 Claims. (Cl. 12—136)



1. A pattern having a body portion compounded of polystyrene as its principal ingredient, with smaller amounts or rubber and rosin, mixed together with 6 to 30 parts of filler selected from the group comprising ground cork, wood flour and cotton floc, and having portions coated with a film insoluble in organic solvents used in shoemaking, the said thermoplastic material of the pattern being capable of repeated remolding without substantial change in character.

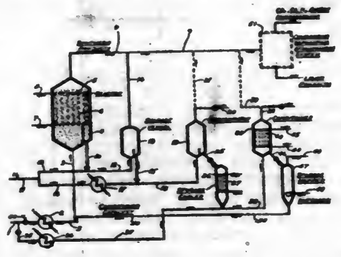
2,445,792
INSTRUMENT FOR MEASURING THE SLOPES OF A CURVE
Edward J. Lunney, Dayton, Ohio
Application June 12, 1946, Serial No. 676,127
5 Claims. (Cl. 88—74)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

5. A geometrical instrument adapted to determine the slope of a curve at any point thereon which comprises a square outer base, a circular inner base rotatably mounted therein upon a stepped joint, indicia at the meeting edges of the two bases whereby their relative angular positions may be determined, a transparent mirror erectably mounted on a diameter of said inner base, pivot blocks in which said mirror is pivotally mounted so as to be foldable downward and vertically alignable, said inner base having a keystone shaped opening in front of said mirror when the latter is erected and a U-shaped opening behind it, a pair of aligning shoulders for said mirror to hold the mirror in erect alignment, said shoulders being between said openings, and means for retaining said inner base in said outer one and for locking said inner base against rotation.

2,445,793
ROTARY HIGH-FREQUENCY SWITCHING CIRCUIT
Nathan Marchand, New York, N. Y., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
Application August 19, 1944, Serial No. 550,196
11 Claims. (Cl. 178—44)

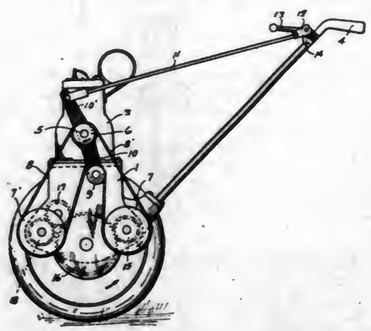
1. A high frequency switch comprising a plurality of terminals, an elongated conductor connected to one of said terminals, a conductive switching member adapted to be moved into and out of coupling relationship with said conductor and in said coupling relationship extending a substantial distance adjacent to and parallel with said conductor, said member having a transverse gap intermediate the ends thereof separating it into two parts, a second elongated conductor connected to another of said terminals, a coupled conductive member coupled with and extending adjacent to and parallel with said second elongated conductor, said coupled member having a transverse gap intermediate the ends thereof separating it into two parts, and means connecting the ends of said switching member facing each other across its gap with the ends of said coupled member facing each other across its gap.

2,445,794
METHYL SILICONE ELASTOMERS CONTAINING Si-BONDED VINYL RADICALS
James Marsden, Schenectady, N. Y., assignor to General Electric Company, a corporation of New York
No Drawing. Application June 11, 1945, Serial No. 598,912
6 Claims. (Cl. 260—46.5)



1. A solid elastomer comprising a solid, elastic, curable, hydrocarbon-substituted polysiloxane consisting of silicon and oxygen atoms, and methyl-substituted and vinyl-substituted silicon atoms, wherein the average ratio of the sum of the methyl and vinyl groups per silicon atom is from 1.95 to 2.00, and from 0.18 to 2.0 per cent of the silicon atoms are connected to at least one vinyl group.

2,445,795
HYDROGENATION OF CARBON OXIDES
Alfred J. Millendorf, Beacon, N. Y., assignor, by mesne assignments, to The Texas Company, New York, N. Y., a corporation of Delaware
No Drawing. Application December 28, 1944, Serial No. 570,223
3 Claims. (Cl. 260—449.6)



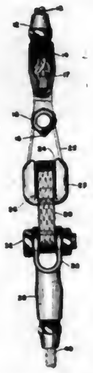
1. The method of improving the activity of a synthesis catalyst containing cobalt which comprises subjecting the catalyst to contact in a reaction zone with a synthesis gas comprising carbon monoxide and hydrogen at a predetermined elevated normal operating temperature in the range about 365 to 410° F. such that substantial conversion of carbon monoxide and hydrogen into hydrocarbons including waxy hydrocarbons occurs, continuing said contact for an extended period of time until there is substantial decline in operating activity of the catalyst, discontinuing contact of the catalyst with said synthesis gas at elevated temperature, removing waxy material from the catalyst by treatment comprising contacting said catalyst with hydrogen at an elevated temperature effective to strip said waxy material from the catalyst, then reducing the temperature of the catalyst to a temperature in the range of about 200 to 300° F., and subsequently passing said synthesis gas in contact with the cooled catalyst while gradually raising the temperature of the cooled catalyst to substantially said predetermined elevated temperature at the rate of about 2 to 30° F. per hour.

2,445,796
PROCESS FOR THE CATALYTIC HYDROGENATION OF CARBON OXIDES
Alfred J. Millendorf, Beacon, N. Y., assignor to The Texas Company, New York, N. Y., a corporation of Delaware
Application February 26, 1946, Serial No. 650,313
9 Claims. (Cl. 260—449.6)

1. In the catalytic hydrogenation of carbon monoxide for the production of hydrocarbons, oxygenated compounds and the like, the method which comprises continuously passing carbon monoxide and hydrogen in contact with a fluidized powdered synthesis catalyst within a reaction zone, effecting said contact at a temperature within a predetermined range such that substantial conversion of carbon monoxide into higher molecular weight compounds occurs with some deposition of solidifiable material upon the catalyst particles, continuously withdrawing from the reaction zone catalyst contaminated with said solidifiable material, subjecting withdrawn catalyst to contact with hydrogen under regenerating conditions including an elevated temperature effective to strip the said solidifiable material from the catalyst, reducing the temperature of resulting hydrogen treated catalyst to substantially below said predetermined temperature range, thereafter passing a mixture of carbon monoxide and hydrogen in contact with resulting cooled catalyst while slowly raising the temperature of the catalyst to substantially said predetermined range to thereby condition the catalyst, and thereafter recycling resulting conditioned catalyst to said reaction zone.

2,445,797
TRACTOR DRIVE
Harry W. Moore, Dayton, Ohio
Application September 29, 1943, Serial No. 504,239
14 Claims. (Cl. 180—19)

1. A power transmission mechanism for a power tractor, wherein a motor mounted on carrying wheels for operation to and fro in alternating directions, is equipped with upwardly and rearwardly extending handle bars by which an operator walking behind the tractor unit may control its operation and guide its travel, including a motor driven power shaft, a drive pulley on the shaft, a pair of relatively spaced driven pulleys, a pair relatively inclined drive belts for transmitting rotary motion from the drive pulley alternately to each of the driven pulleys,



the belts being normally loosely associated in non-driving relation with the pulleys, a belt tightener mounted intermediate the inclined belts, a swinging carrier for the belt tightner by which it is alternately engageable with the respective belts to tighten one of the belts into driving engagement with the driving pulley and a corresponding driven pulley, an operating lever mounted on one of the upwardly and rearwardly extending handle bars, a link connecting the lever with the swinging belt tightener carrier for shifting the belt tightener from operative engagement with one belt into like engagement with the other belt, said lever being movable past dead center relation with the link in opposite directions to releasably lock the belt tightener in operative relation with the respective belts, a detent for releasably retaining the lever in an intermediate position to temporarily hold the belt tightener in neutral position, a gear train including a gear connected with each of the driven pulleys for unison rotation therewith, a gear associated with a carrying wheel, and an idler gear in said gear train between one of the driven pulley connected gears and said carrying wheel associated gear for inducing rotary motion thereof in opposite directions from the respective driven pulleys.

2,445,798

RIGGING INSULATION INSTALLATION

Thomas Moore, Washington, D. C.

Application February 12, 1946, Serial No. 647,183
3 Claims. (Cl. 174—208)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

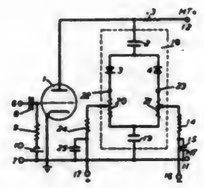
1. An electrical insulator assembly adapted to be installed in stay and bracing ropes comprising a pair of open-ended sockets adapted to grip the ends of said ropes at the point of installation of the assembly, a strain ball insulator of high dielectric and compressive strength characteristics interposed between the sockets, relatively wide, interlinking grooves positioned in the peripheral portion of the insulator at right angles to each other and provided with bottoms curved inwardly with respect to the insulator, endless, interlinking, flexible woven wire straps adapted to fit within said grooves, to connect the insulator to the open-ended sockets, to center the insulator in alignment with the direction of stresses in the bracing rope and by reason of their width, length of contact and flexibility to reduce the unit compressive stress on said insulator.

2,445,799

ORGANIC SULFUR-CONTAINING POLYMERS

Rupert C. Morris, Berkeley, and Edward C. Shokal, Oakland, Calif., assignors to Shell Development Company, San Francisco, Calif., a corporation of Delaware

No Drawing. Application April 25, 1944, Serial No. 532,662
11 Claims. (Cl. 260—77.5)



1. A homopolymer of an ester of tetrahydrothiophene-3-ol-1,1-dioxide with an acid carbonate of an aliphatic, monohydric, mono-olenfinic alcohol having an olefinic double bond between two carbon atoms, one of which is directly attached to a saturated carbon atom which in turn is directly attached to the hydroxyl group.

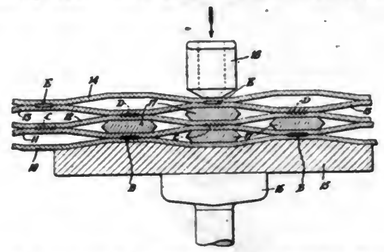
2,445,800

ELECTRIC FREQUENCY COUNTING ARRANGEMENT

Alfred Mortlock, London, England, assignor to Standard Telephones and Cables Limited, London, England, a British company

Application November 10, 1945, Serial No. 627,941
In Great Britain November 28, 1944
8 Claims. (Cl. 320—1)

1. An electric frequency counting arrangement comprising a condenser, a Wheatstone bridge network containing a rectifier in each of two adjacent arms and a resistance in each of the other arms, means for connecting the said condenser in series with one pair of diagonal corners of the bridge and in series with one or more other condensers to one terminal of a direct current source, a switch for periodically charging the said condensers from the said source through one of the said rectifiers and to discharge them through the other, the said switch being controlled by waves having the frequency to be counted, and means for deriving a unidirectional voltage from the other pair of diagonal corners of the bridge.



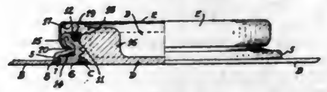
2,445,801

METHOD OF ELECTRIC RESISTANCE WELDING A LAMINATED SHEET METAL STRUCTURE

Maurice Partiot, Noroton, Conn., assignor to The Nitralloy Corporation, a corporation of Delaware

Application August 6, 1942, Serial No. 453,913
2 Claims. (Cl. 219—10)

1. A method of making a laminated sheet metal structure comprising spot welding a pair of metal sheets together at spaced apart points, applying a third sheet of metal to one surface of said pair, applying an electrode having a relatively extended work-contacting face to the opposite surface of said pair of sheets and an electrode having a small face to said third sheet, pressing said electrodes tightly against said sheets, and spot welding said third sheet to the next adjacent



sheet only and at points out of alignment with the welds of the first pair of sheets.

2,445,802

CONTAINER CLOSURE

Joseph Robinson, New York, N. Y.

Application January 8, 1945, Serial No. 571,748
1 Claim. (Cl. 220—46)

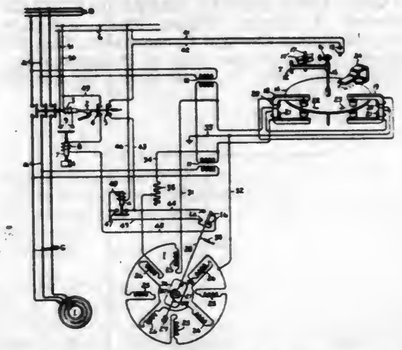
In a closure for a container, in combination, an outwardly struck portion formed from the metal of the container to provide a downwardly facing shoulder and an outwardly extending tubular part of less diameter than said shoulder, a cylindrical spud disposed in said tubular part and provided at one end with an annular flange which seats against said shoulder, said spud having an outwardly extending sleeve which terminates beyond the outer end of said tubular part and having also an internally threaded portion which lies above the bottom of said flange and below the base of said outwardly extending sleeve, said sleeve above the threaded portion being off-set laterally outwardly to form an upwardly facing seat for a gasket and an outwardly opening peripheral groove within which the tubular part is received in V-shaped cross-section, the apex portion of the V-shaped tubular part extending inwardly to a position beneath the gasket seat and into contact with the spud, the upper end of said sleeve being turned over the free end of said tubular part and sealed into liquid-tight rotationally immovable engagement therewith, a gasket on said seat, and a closure plug threaded into said spud into contact with said gasket.

2,445,803

METHOD OF EXPANDING HYDRAULIC RIVETS BY INCREMENTS OF INTERNAL PRESSURE

George D. Rogers, Buffalo, Mo.

Application October 22, 1945, Serial No. 623,842
9 Claims. (Cl. 218—29)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



1. The method of expanding a hollow rivet of the character described by internal hydrostatic pressure set up therewithin, comprising subjecting the rivet to an internal hydrostatic pressure sufficient only to strain the walls of the rivet beyond their elastic limit to a degree which is a small part of the total permanent deformation desired, relieving the rivet of such pressure whereby straining of the rivet wall is discontinued and partial recovering permitted, and then repeating the application of internal hydrostatic pressure and the relief of pressure as before, whereby successive further stages of strain are produced with intervals of relaxation, until a predetermined total permanent deformation of the rivet is effected.

2,445,804

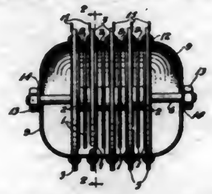
CONNECTING SYSTEM FOR ALTERNATING CURRENT CIRCUITS

Harold T. Seeley, Lansdowne, Pa., assignor to General Electric Company, a corporation of New York

Application June 24, 1946, Serial No. 678,871
3 Claims. (Cl. 171—118)

1. In a connecting system for controlling the closing operation of a switch to effect the connection of two sources of alternating electromotive force when substantially in phase and of substantially the same frequency, a time element relay comprising relatively movable cooperating contacts and means for closing said contacts comprising a retarded movable member adapted to be controlled in dependence on the phase difference between the electromotive forces of the sources, a substantially instantaneous relay comprising double throw contacts and means for closing only one of the throws of said contacts at a time comprising a movable member adapted to be controlled in dependence on the phase relation of the electromotive forces of the sources, an auxiliary relay adapted to be energized when the contacts of the time element relay and one throw of contacts of the instantaneous relay are closed and when energized to maintain such energization while the contacts of the time element relay remain closed, and a switch closing control circuit comprising in series relation the contacts of the auxiliary relay, the contacts of the time element relay and the other throw of contacts of the instantaneous relay.

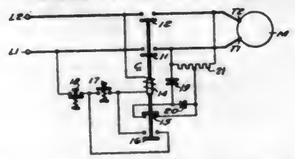
2,445,805



ENCLOSED RECTIFIER

Murray F. Skinker, Montclair, N. J., assignor to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware

Application July 9, 1945, Serial No. 603,933
9 Claims. (Cl. 175—366)

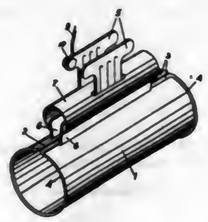


1. A rectifier unit that comprises a stack of rectifier elements, metal connector plates between

at least some of said elements, intermediate members beween said plates surrounding said elements in spaced relationship thereto and hollow end

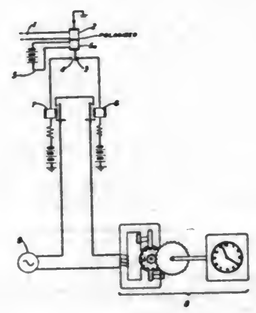
caps engaging with the end connector plates of the stack forming with the intermediate members and the connector plates a casing hermetically enclosing said elements.

2,445,806
INDUCTION MOTOR BRAKING SYSTEM
Frederick D. Snyder, Milton, Mass., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa., a corporation of Pennsylvania
Application May 10, 1946, Serial No. 668,693
2 Claims. (Cl. 318—212)



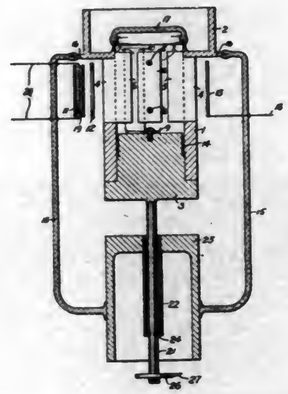
1. A motor control system, comprising an alternating current motor having terminals, a contactor connected to said terminals for supplying alternating current to said motor when closed, a voltage translating device connected across said terminals, a capacitor and a rectifier connected in series relation to each other across part of said device for charging said capacitor through said rectifier, and means controlled by said contactor and connected with said rectifier for causing said capacitor to discharge through said motor when said contactor is opened in order to brake the motor by capacitive discharge current.

2,445,807
JOINT FOR ABRASIVE BELTS OR BANDS
William B. Summers, Buffalo, and William A. Corse, Snyder, N. Y., assignors to The Carborundum Company, Niagara Falls, N. Y., a corporation of Delaware
Application June 18, 1947, Serial No. 755,358
16 Claims. (Cl. 51—188)



1. In a method of making an abrasive belt the steps which comprise providing a strip of abrasive coated sheet material comprising a backing and a layer of abrasive grains attached to one side thereof by an adhesive, removing the abrasive grains from each end of the strip over an area which is substantially the same, applying an adhesive to one of the said areas, overlapping the ends of the strip, applying a finely divided lubricant and a liquid which is convertible to a hard tough solid to that portion of the outer surface of the article which is substantially devoid of abrasive grains, and hardening the cement and the said liquid.

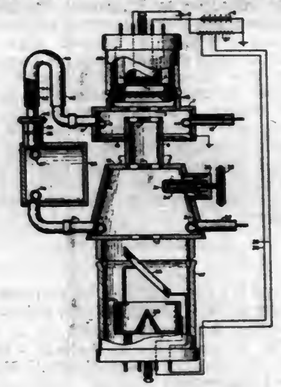
2,445,808
ELECTRODE
Alfred T. Stenstrom, New York, N. Y.
Application March 26, 1945, Serial No. 584,998
1 Claim. (Cl. 173—273)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



An electrode comprising an elongated, tubular sleeve, said sleeve being split longitudinally, upstanding ridges along the sides of said split and at the ends of said sleeve, thereby to minimize concentration of electric potential thereat, means to urge said ridges together, said means comprising clamping members in contact with said ridges, a resilient sleeve, said clamping members passing through said resilient sleeve, and an electrical connector on one of said clamping members.

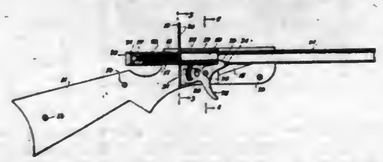
2,445,809
TIMING DEVICE FOR TELEGRAPH CIRCUIT
Burdette S. Swezey, Floral Park, N. Y., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York
Application December 31, 1943, Serial No. 516,453
2 Claims. (Cl. 161—15)

1. An arrangement for indicating the time during which a telegraph channel of transmission is used for transmission by means of a code which in normal transmission changes from one condition to another in the maximum of a given time which comprises two electric circuit closing contacts, instrumentalities so associated with the channel of transmission and said contacts that they close and maintain said contacts closed during normal use of the channel of transmission and a time integrating device associated with a source of operating potential through said contacts in such manner that it operates when both contacts are closed to integrate and indicate elapsed integrated time and ceases to operate when either of said contacts is open.



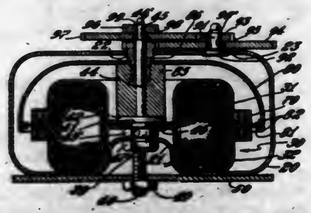
2,445,810
ULTRA HIGH FREQUENCY ELECTRIC OSCILLATOR
Stanley Gordon Tomlin, London, England, assignor to Standard Telephones and Cables Limited, London, England, a British company
Application December 2, 1943, Serial No. 512,575
In Great Britain December 4, 1942
7 Claims. (Cl. 315—5)

1. An electron discharge apparatus of the velocity modulation type including an envelope containing a hollow resonator designed to support ultra high frequency oscillations and having a wall with a pair of slots, means adjacent one of said slots for projecting a stream of electrons in a path across the resonator through said slots, said resonator having successive conductivity gaps in the direction of electron flow, a U-shaped metallic element having blades for the arms thereof askew with respect to one another, said metallic element being mounted with said blades adjacent to and generally parallel to the direction of said electron stream, each of said blades being substantially parallel to one of said gaps, and rotatable means connected to said metallic element and extending to a point external to said envelope for rotating said U-shaped element to adjust the distance between each of said blades and its adjacent gap.



2,445,811
HIGH-FREQUENCY TUBE STRUCTURE
Russell H. Varian, Bellmore, N. Y., assignor to The Sperry Corporation, a corporation of Delaware
Application December 22, 1941, Serial No. 423,930
25 Claims. (Cl. 315—6)

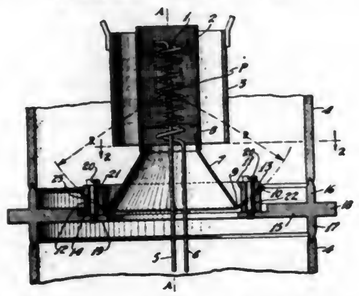
17. A high frequency tube structure comprising a hollow resonator having a pair of spaced grids between which an alternating electromagnetic field may be maintained, means for passing an electron stream in a selected path through said grids for interaction with said field, and an electron stream control electrode within such hollow



resonator mounted to substantially surround said path between said grids.

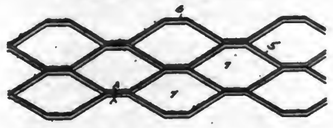
2,445,812
TOY GUN ASSEMBLY
Irving D. Wallach, Port Washington, N. Y., assignor to Associated Development and Research Corporation, New York, N. Y., a corporation of New York
Application November 10, 1945, Serial No. 627,865
8 Claims. (Cl. 124—30)

5. A toy gun or the like, having a barrel, a trigger block affixed thereto, and a stock comprising mutually secured mating half-portions, each said stock portion being configurated on its inner surface to receive a one-half longitudinal section of the barrel and a one half portion of the trigger block and means for securing said stock portions together to envelop and secure said barrel and trigger block substantially immovably therein.



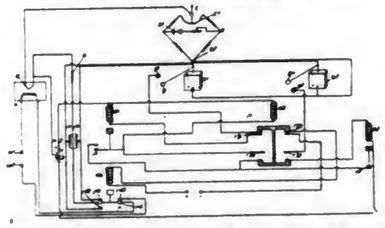
2,445,813
SHADED POLE MOTOR
Clarence B. Walworth, Jr., West Rocky Hill, Conn.
Application August 18, 1945, Serial No. 611,276
18 Claims. (Cl. 172—275)

1. In an electric motor of the type described, an energizing member having a substantially circular sheet steel body with two substantially con-



tinuous circular central plate portions shaped to fit onto each other and each portion being surrounded by an annular channel supplementing the other channel to form an annular housing for an energizing coil and a toothed edge portion peripherally around said housing, a second bell-like member having a substantially circular edge portion shaped to conform to said edge portion of said first member, a supporting column, means for fastening one of said members to said column in alignment with the axis of symmetry of said member, and means for supporting the other member on said column for rotation relatively to said first member with said two edge portions in close proximity.

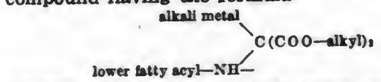
2,445,814
ADJUSTABLE ELECTRODE SUPPORT FOR ELECTRON DISCHARGE TUBES
Arthur K. Wing, Jr., Nutley, and Lyle A. Backer, Denville, N. J., assignors to Federal Telephone and Radio Corporation, New York, N. Y., a corporation of Delaware
Application April 4, 1946, Serial No. 659,606
8 Claims. (Cl. 250—27.5)



1. Means for supporting an electrode comprising a support for the electrode, a flange attached to the support, said flange being in the shape of a spherical segment centered about a point with reference to which it is desired to position the electrode, and clamping means for holding the flange, said clamping means having surfaces in the form of spherical segments centered about the same point, and means holding the flange between said surfaces.

2,445,815
STEEL SHAPE FOR USE IN THE CONSTRUCTION OF BUILDINGS
Donna I. Youmans, Los Angeles, Calif.
Application May 7, 1946, Serial No. 667,946
3 Claims. (Cl. 72—109)

1. A metallic reinforcing shape for concrete buildings comprising a plurality of elongated bars which in transverse cross section present flat upper and lower edge flanges and a longitudinally extending concavo-convex portion, each of said bars being bent transversely of the direction of its length to form a plurality of V shaped portions, the apexes of adjacent bars being flattened to provide portions upon adjacent bars which lie in parallel with each other, said portions being brought together with their concavo-convex portions internested and with their upper and lower edges in the same plane and means for uniting the contacting apex portions of the several bars.

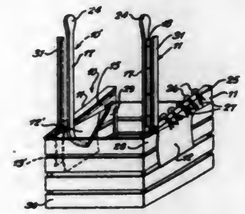


2,445,816
ELECTRICAL CONTACT SYSTEM
Winfield Forbes Abbott, Ruislip, England, assignor to The Bristol Company, Waterbury, Conn., a corporation of Connecticut
Application January 22, 1944, Serial No. 519,331
In Great Britain February 9, 1943
12 Claims. (Cl. 236—69)

6. In an electrical system for limiting departure of the magnitude of a condition from a predetermined value, the combination of an electric circuit, means for producing therein a flow of current in a direction and of an intensity representative of said departure, a pair of deflectable galvanometer elements both connected in said circuit to be responsive to said current, contact elements actuated independently and in opposite senses by said respective galvanometer elements, and relay means subject to actuation under the joint influence of said contact elements for controlling said condition.

2,445,817
PREPARATION OF LEUCINE
Sydney Archer, Albany, and Noel F. Albertson, East Greenbush, N. Y., assignors, by mesne assignments, to Winthrop-Stearns Inc., New York, N. Y., a corporation of Delaware
No Drawing. Application September 22, 1944, Serial No. 555,403
4 Claims. (Cl. 260—482)

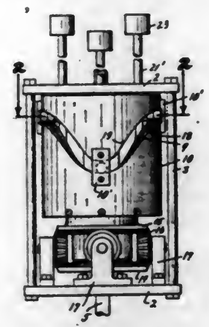
1. The process for preparing dl-leucine which comprises condensing a methallyl halide with a compound having the formula



wherein the lower fatty acyl group is derived from a volatile, water-soluble lower fatty acid by removal of —OH from the carboxyl group, hydrogenating the condensation product and hydrolyzing and decarboxylating the hydrogenation product by heating it with strong mineral acid.

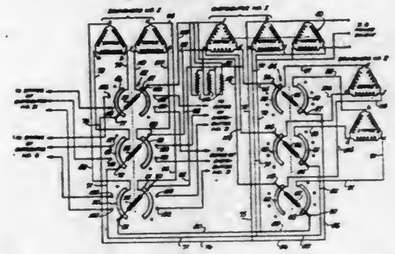
3. Ethyl 2 - acetylamino - 2 - carbethoxy - 4 - methyl-4-pentenoate.

2,445,818
PORTABLE TOPPING KNIFE FOR USE ON ONION CRATES
William Edward Behnke, Florida, N. Y.
Application July 6, 1945, Serial No. 603,486
1 Claim. (Cl. 146—83)



A vegetable topper comprising a narrow elongated jaw supporting member adapted to rest

on the upper edge of a side wall of a vegetable crate, an inverted spring of U-shaped transverse cross section and of a length substantially that of the supporting member fixed to the lower edge of said supporting member and adapted to embrace the upper edge and partially overlie the inner and outer side faces of the side wall of the crate, the upper edge of the supporting member inclining upwardly from the bottom edge of said supporting member from one end of said supporting member to the other end thereof, a ledger blade fixed to the inclined edge of the supporting member, a shear blade, a pivot carried

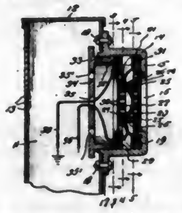


by said supporting member adjacent the convergent ends of the top and bottom edges thereof and connecting the shear blade, said shear blade being adapted to cooperate with the ledger blade in cutting the tops off of vegetables distributed along the top inclined edge of the supporting member, a spring connected to the shear blade and to the supporting member for yieldingly holding the shear blade in a vertical position, a guard extending substantially vertically from the supporting member for guarding the shear blade and a handle extension on the shear blade for manually operating the same.

2,445,819
POWER MECHANISM
Joseph D. Bell, San Francisco, Calif.
Application May 15, 1945, Serial No. 593,895
11 Claims. (Cl. 74—57)

6. In a power mechanism, a plate having an annular series of pistons reciprocably above the same and having an annular series of holes underneath the pistons and having guides suspended therefrom on opposite sides of the holes, connecting rods secured to the pistons and extending through the holes and having vanes slidable in the guides, a cylinder having a cam track thereon and being revolvable around the connecting rods, a second cylinder mounted on the outside of the first cylinder and in concentric relation thereto and having a cam track operable for rotation in the opposite direction and for forming crotches with the first cam track, and drive pins projecting from the connecting rods over the crotches for wedging the cam tracks apart when the pistons are made to descend.

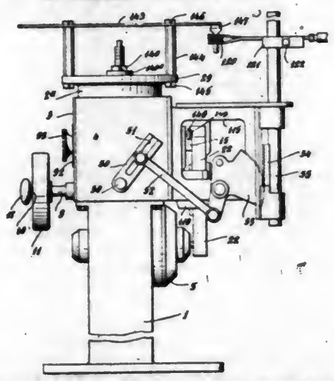
2,445,820
MOTOR CONTROL SWITCHING SYSTEM AND DEVICE THEREFOR
Daniel J. Bloomberg, Sherman Oaks, and Waldon O. Watson, North Hollywood, Calif., assignors to Radio Corporation of America, a corporation of Delaware
Application March 31, 1945, Serial No. 585,914
9 Claims. (Cl. 318—41)



1. In a switching system for a plurality of self-synchronous motors, a plurality of load motors and a plurality of distributors adapted to control the acceleration and speed of said load motors, comprising switching means corresponding in number to the number of said load motors and adapted to select and connect any one or more of said load motors to any one of said distributors, each of said switching means comprising a rotatable plate having contact pins thereon, a plurality of fixed normally open contacts, and a rotatable shaft adapted to rotate said plate for making the selection of said fixed contacts and to be moved longitudinally for causing said pins to close the selected contacts to make the connection.

9. A switching device comprising a plurality of cup members, a plurality of opposing switch contact elements arranged circularly about the center of said cup members, a shaft extending through the centers of all of said members, said shaft being rotatable and longitudinally movable in said members, and a corresponding plurality of elements mounted on said shaft adjacent said cup members and having projections therefrom adapted to bring opposing contact elements into contact when said shaft is moved longitudinally in one direction, said elements being rotatable with said shaft to select the contact elements to be brought into contact.

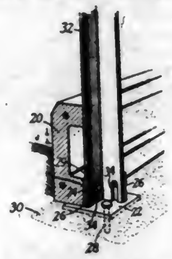
2,445,821
CONDENSER MICROPHONE
Noble E. Brewer, Abilene, Kans.
Application March 29, 1944, Serial No. 528,591
7 Claims. (Cl. 179—111)



1. In a condenser microphone head, a case open at its front and back ends, a perforated face plate engaged in the front opening of the case, a perforated fixed condenser plate positioned in back of and electrically insulated by the supporting perforated face plate, a diaphragm mounted in

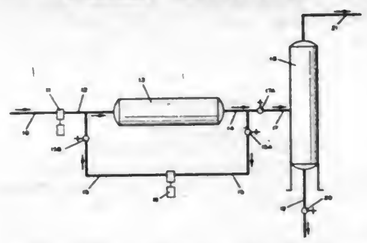
back of the fixed condenser plate, and a closure for the back open end of the case, said fixed condenser plate being perforated for the passage

therethrough of sound vibrations received through the perforations in the face plate for impinging on the diaphragm.



2,445,822
TIMING AND POSITIONING MECHANISM FOR DIAL FEEDING MACHINES
Joseph Briechle, Floral Park, N. Y.
Application October 16, 1946, Serial No. 703,615
25 Claims. (Cl. 219—47)

22. An intermittently movable dial type machine comprising a dial having a plurality of work supporting means equally spaced angularly around the dial, means for intermittently moving the dial about its axis through a central angle equal to the space between two work supporting means and for holding the dial at rest for a predetermined interval of time, a station at which a work piece movable with the dial may be acted upon during its period of dwell, means at said station movable into and out of operative relation to a work piece during its period of dwell at said station, said last mentioned means being operable substantially in synchronism with the movement of the dial, and a rotatable index cam and a time control mechanism for controlling the synchronous movement of the dial and the means at the station for operating upon a work piece during its period of dwell.

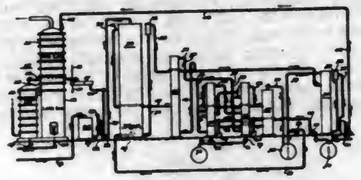


2,445,823
BUILDING CONSTRUCTION
Thomas J. Foster, Ridgewood, N. J., assignor to Larry Foster Foundation, Montclair, N. J., a corporation of New Jersey
Application March 16, 1945, Serial No. 583,082
4 Claims. (Cl. 72—77)

1. In the art of erecting buildings of the type having concrete footings, that improvement which includes the steps of digging holes where columns are to be erected, digging trenches between the holes for receiving foundation girders, laying girders in the trenches, flexibly connecting the girders where they abut one another,

squaring and leveling the girders, pouring concrete footings into the holes to support the girders at their connected ends, and erecting the structure of a building upon said girders as a foundation.

2,445,824
PROCESS FOR ALKYLATING HYDROCARBONS
Frederick E. Frey, Bartlesville, Okla., Paul V. McKinney, Pittsburgh, Pa., and William H. Wood, Cleveland, Ohio, assignors to Phillips Petroleum Company, a corporation of Delaware
Application February 14, 1942, Serial No. 430,980
4 Claims. (Cl. 260—683.4)

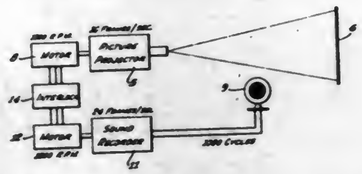


2. A process of producing paraffins boiling in the motor fuel range from a lower-boiling isoparaffin and a lower-boiling olefin, which comprises alkylating a low-boiling isoparaffin with an olefin by contacting an admixture of the olefin and the isoparaffin with a condensation catalyst under alkylating conditions, and maintaining the molecular ratio of isoparaffin to olefin at the point where the olefin initially contacts the condensation catalyst at least about 100:1.

2,445,825
PROCESS FOR THE RECOVERY OF PHENOLS
Herbert A. Gollmar, Mount Lebanon, Pa., assignor, by mesne assignments, to Koppers Company, Incorporated, Pittsburgh, Pa., a corporation of Delaware
Application May 3, 1944, Serial No. 533,983
4 Claims. (Cl. 260—627)

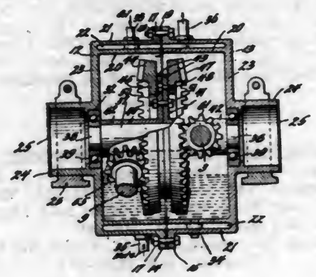
1. In a process for the dephenolization of coke-plant ammonia liquor containing hydrogen sulphide and ammonium salts, and for the recovery of phenols therefrom, consisting in the extraction of the phenols with benzol as a solvent, scrubbing the phenolized solvent with caustic solution, liberating the phenols from the caustic solution with acid reagent, and separating the

so-freed phenols, the step of: dissolving ammonia in the said ammonia liquor to increase the ratio of ammonia as ammonium hydroxide to ammo-



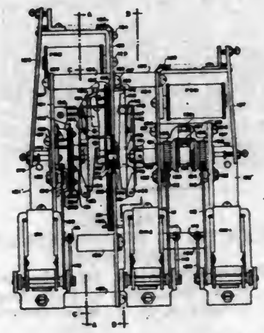
nia as ammonium salts by at least one-tenth of a unit and to a minimum ratio of 0.42 and to at most a maximum ratio of five to one.

2,445,826
ELECTROLYTE PURIFICATION IN MANGANESE ELECTROWINNING
William L. Hammerquist, Knoxville, Tenn., assignor to Electro Manganese Corporation, Knoxville, Tenn., a corporation of Delaware
No Drawing. Application February 1, 1944, Serial No. 520,689
10 Claims. (Cl. 204—105)



1. The process of treating a solution to be used as an electrolyte in the electrodeposition including the electrowinning of manganese, said solution containing manganese sulfate, ammonium sulfate and soluble silica, which comprises treating said solution at a pH of about 5.5 to 7.5 with aluminum sulfate in the proportion of not less than four parts by weight of aluminum sulfate calculated as anhydrous aluminum sulfate for each part by weight of soluble silica, forming a precipitate, and separating said precipitate from said solution.

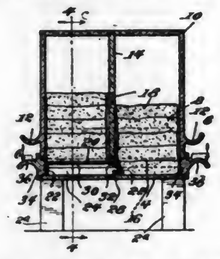
2,445,827
PICTURE SOUND RECORD PRODUCTION
George E. H. Hanson, Los Angeles, Calif., assignor to Radio Corporation of America, a corporation of Delaware
Application October 23, 1945, Serial No. 623,967
5 Claims. (Cl. 88—16.2)



1. The method of producing a sound track for a previously made picture having a projection speed of sixteen frames per second, comprising projecting said picture at sixteen frames per second, recording a film sound record of the concomitant sound therefor at twenty-four frames per second, translating said sound record into electrical currents at thirty-six frames per second, rerecording a film record of said electrical currents at twenty-four frames per second, any definite length of said rerecorded sound film thereby corresponding to the same definite length of said original picture film and combining said last-mentioned rerecorded record with said original picture.

2,445,828
VARIABLE ANGLE GEAR CASING
Henry C. Heinsohn, Jr., Northfield, N. J., assignor to Ventnor Boat Works, Inc., West Atlantic City, N. J., a corporation of New Jersey
Application October 30, 1945, Serial No. 625,630
3 Claims. (Cl. 74—385)

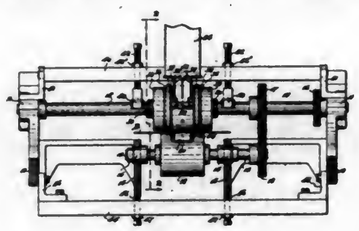
1. In a transmission unit, two like but oppositely disposed half casings, integral throats extending radially from each of the half casings, means for locking the half casings so that the throats extend at any desired angle to each other, a drive shaft mounted in one throat provided with a pinion on its end, a driven shaft mounted in the other throat, and also provided with a pinion at its inner end, functionally integral gears meshing with the respective pinions; means mounted in the unit for supporting the functionally integral gears, means extending from the unit for supporting the half casings in the desired rotative position, spaced circumferential walls in the oppositely disposed half casings, concentric to the functionally integral gears and registering to form a water chamber unaffected by the rotative position of said casings.



2,445,829
MECHANICAL IMPULSE REGENERATOR
Oscar W. Henrikson, Chicago, and Herbert F. Obergfell, deceased, late of River Forest, Ill., by Amanda Obergfell, executrix, River Forest, Ill., assignors to Automatic Electric Laboratories, Inc., Chicago, Ill., a corporation of Delaware
Application September 20, 1944, Serial No. 554,912
16 Claims. (Cl. 179—16)

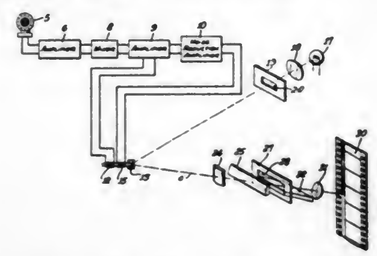
1. In a repeater, the combination of a first and a second stepping magnet each operated in response to a train of incoming impulses, a plurality of marking devices, a setting device for se-

lecting said marking devices, driving means controlled by the operation of said magnets whereby said setting device is operated one step by each magnet in case said magnets are independently operated and whereby said setting device is cumulatively operated a plurality of steps in case both said magnets are simultaneously operated, means for operating the marking device selected by said setting device in accordance with the occupied position of said setting device at the end of said train of incoming impulses to effect a marking, and means including a sending magnet operated in accordance with said operated markings.



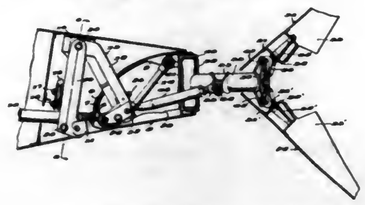
2,445,830
STACKED ARTICLE DISPENSER
Harold L. Hilton, Terrace Park, Henry C. Hilton, Cincinnati, and Huston L. Hargett, Madeira, Ohio; said Hargett assignor to said Harold L. Hilton and said Henry C. Hilton
Application November 22, 1946, Serial No. 711,698
2 Claims. (Cl. 312—67)

1. A dispenser for stacked articles comprising a box-like base with the upper end open and having openings extending across two opposite sides, a box-like cover positioned on the base and extending upward therefrom, a hollow slider having an upper horizontally disposed panel with downwardly positioned flanges at the ends, the length of the said slider being greater than one-half of the width of the base, a pair of spaced lower side bars positioned on the base and at opposite sides of the slider, a head connecting the outer ends of the side bars having a handle on the outer surface and closing an opening in one side of the base in the closed position, a transverse rod intermediate of the length of the side bars extending through the slider and with the ends thereof carried in said lower side bars, an upper pair of spaced side bars positioned on the lower side bars and on opposite sides of the slider, a head connecting the outer ends of the upper side bars also having a handle on the outer surface and closing the opening in the base opposite to the opening closed by the head of the lower side bars, and a transverse rod also extending through the slider carried by the upper side bars and intermediate of the length thereof.



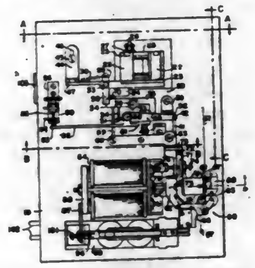
2,445,831
WINDOW CUTTING MEANS FOR ENVELOPE MACHINES
Louis Hoffman, Brooklyn, and August Dalmen, Jamaica, N. Y., assignors to P. L. Andrews Corporation, Brooklyn, N. Y., a corporation of New York
Application February 20, 1945, Serial No. 578,874
4 Claims. (Cl. 164—28)

1. Rotary window cutting mechanism for envelope manufacturing machines comprising a cutting roll having radially projecting window cutting die means, a bed roll above and opposed to said cutting roll for cooperation with the cutting die means thereof, one of said rolls having radially floating annular blank nipping plates of enlarged diameter frictionally clutched respectively to opposite end faces thereof so as to rotate therewith in opposition to the periphery of the other roll, whereby to engage laterally spaced portions of a blank to advance said blank between said rolls, said bed roll having picker means to engage the window cut out portions and carry



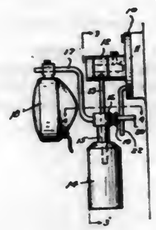
them away from the blanks, a doctor blade mounted to engage its free edge with an ascending surface of said bed roll whereby to strip said cut out portions from said picker means, an air suction conduit having its receiving mouth positioned adjacently above said doctor blade to receive stripped cut out portions and convey them away, and said doctor blade having on its face lifter fingers inclining away therefrom and upwardly toward said conduit mouth, whereby both faces of a stripped cut portion are exposed to air suction currents.

2,445,832
VARIABLE TIME SOUND RECORDING METHOD AND SYSTEM
Edward W. Kellogg, Indianapolis, Ind., assignor to Radio Corporation of America, a corporation of Delaware
Application November 19, 1943, Serial No. 510,857
12 Claims. (Cl. 179—100.3)



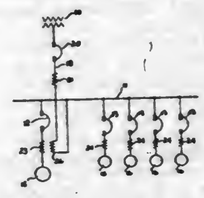
1. A sound recording system comprising a source of light rays, means for defining said rays into a single beam, means for vibrating said beam in accordance with the amplitude of a signal to be recorded, means for directly projecting said beam to form an image thereof, said image having a fixed edge and a movable edge, and means for reflecting said beam to form an image thereof adjacent the image formed by said direct beam, said reflected image having a fixed edge and a movable edge, the vibration of said single beam vibrating the movable edges of said images and thus increasing and decreasing the width of said images.

2,445,833
AIRPLANE WING FLAP AND DIVE BRAKE ASSEMBLY
Robert W. Kraemer, Middle River, Thomas C. Hill, Parkville, and Willem D. van Zelm, Ruxton, Md., assignors to The Glenn L. Martin Company, Middle River, Md., a corporation of Maryland
Application April 16, 1947, Serial No. 741,714
8 Claims. (Cl. 244—42)



6. An airplane wing structure including an airfoil-shaped assembly, said airfoil-shaped assembly comprising a nose portion and a trailing edge portion, the trailing edge portion being divided into an upper brake member and a lower brake member, each brake member having finger-like portions that intermesh, one group of fingers filling the spaces between the fingers on the other member to form a complete airfoil surface, linkage means forming a support and actuator for the nose portion and said trailing edge portions, locking means to secure said nose portion and said trailing edge portions together for simultaneous motion to a position of high lift to the rear of the wing structure, other locking means to secure said nose portion to the rear edge of the wing as said linkage means moves said brake members into the air stream above and below said wing structure into positions of high drag.

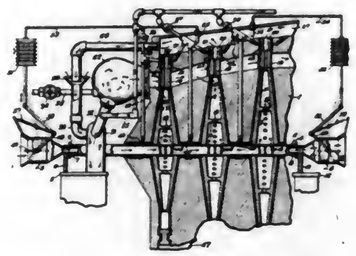
2,445,834
TAPE PERFORATOR
Virgil H. Laney, Fremont, Nebr., assignor to Automatic Electric Laboratories, Inc., Chicago, Ill., a corporation of Delaware
Application October 29, 1945, Serial No. 625,115
10 Claims. (Cl. 164—113)



1. In a signal controlled perforator, a perforating mechanism, an element for conditioning said mechanism, a slot in said element, a pawl for engaging said slot, a power spring, means for tensioning said spring, a latch responsive to said tensioning of said spring for locking said tensioned spring, means responsive to a received signal for releasing said latch to unlock said tensioned spring, said conditioning element actuated in response to the unlocking of said tensioned spring thereby to condition said mechanism, means for causing said pawl to engage said slot thereby to lock said conditioning element in said actuated position, and means for operating said conditioned mechanism.

2,445,835
GRAVITY ACTUATED DIRIGIBLE HEADLIGHT
William Le Clair, Martinsdale, Mont.
Application September 20, 1946, Serial No. 698,102
1 Claim. (Cl. 240—62.2)

A gravity actuated dirigible headlight comprising a base plate adapted to be attached to the forward end of a vehicle, a weight supporting arm mounted on the base plate to swing about a horizontal axis which lies parallel to the longitudinal axis of the vehicle, the axis of said weight supporting arm lying perpendicular to the horizontal axis, a weight at the lower end of the weight supporting arm, a collar mounted on the weight supporting arm to rotate about its longitudinal axis, a lamp bracket extending radially from the collar, a lamp fixed to the bracket, a pair of spaced parallel arms extending radially from the collar diametrically opposite the lamp bracket and a pin fixed to the base plate and extending between the spaced parallel arms whereby when the weight moves to one or the other side of the pin the collar will rotate and move the headlight.



2,445,836
UNLOADING CIRCUIT
Donald W. McCrosky, Lansdowne, Pa., assignor to I-T-E Circuit Breaker Company, Philadelphia, Pa., a corporation of Pennsylvania
Application June 24, 1944, Serial No. 541,992
4 Claims. (Cl. 171—97)

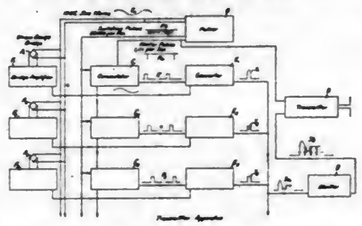
1. In a power supply system, a source of power supply, a feeder circuit connected thereto, a plu-

rality of loads connected in parallel to said feeder circuit, a circuit breaker individual to each of said loads and connected in series with its individual load, each of said circuit breakers having an individual trip coil connected in series in its individual load circuit and responsive to circuit conditions therein for tripping its associated circuit breaker when fault currents flow in its associated circuit, a second trip coil individual to one of said circuit breakers in one of said load circuits and circuit connections for said second trip coil for energizing said second trip coil in accordance with circuit conditions in said feeder circuit so that said circuit breaker associated with said second trip coil is tripped when the load conditions call for a predetermined current from said source of power supply.

2,445,837
AIR-COOLED GAS TURBINE
Thomas M. McKenzie, Jr., Hyattsville, Md.
Application August 24, 1946, Serial No. 692,802
7 Claims. (Cl. 60—41)

1. An impulse type air-cooled multiple stage gas turbine comprising a casing, a hollow shaft extending axially therethrough, a combustion chamber on said casing, multiple stage turbine drums rotatably mounted in said casing having communication with said apertured hollow shaft, hollow turbine blades supported by said drums, ported holding rings disposed about the outer ends of said turbine blades, an air compartment about said rings, and controlled means for cooling said turbine blades.

2,445,838
TREATMENT OF WASTE SULFITE LIQUOR
Karl Henning Albert Melander, Goteborg, and Göte Emanuel Sävö and Tage Ingemar Johanson, Gota, Sweden, assignors to Sulfit Aktiebolaget Gota, Gota, Sweden
No Drawing. Application December 18, 1944, Serial No. 568,786. In Sweden December 29, 1943
6 Claims. (Cl. 260—124)

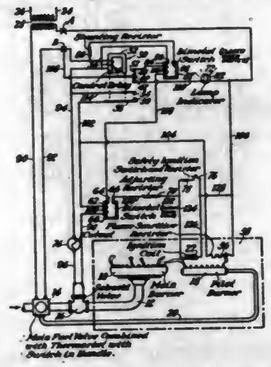


1. In the process of recovering an alkali lignin sulfonate from sulfite waste liquor wherein the latter is treated with lime to produce a precipitate of calcium lignin sulfonate and the latter is then separated from the liquor; the improvement which comprises adding an alkali metal sulfate to said precipitate of calcium lignin sulfonate in the presence of water to convert the calcium lignin sulfonate to the corresponding alkali metal lignin sulfonate, acidifying the mixture with sulfurous acid to produce a precipitate of calcium sulfate and separating the latter from the resulting solution of alkali metal lignin sulfonate.

2,445,839
GOLF SWING INDICATOR
Albert M. Newman and Randall V. Miller, Los Angeles, Calif.
Application May 13, 1946, Serial No. 669,337
9 Claims. (Cl. 273—35)

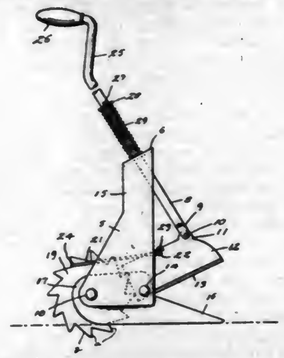
1. A device for indicating bodily movement exceeding predetermined limits comprising a casing having a square sided aperture therein, a plurality of electrodes within said aperture, said electrodes being positioned on a plurality of the sides of said aperture, an armature extending between said electrodes, a separate electric circuit for each of said electrodes, each of said circuits including said armature, and indicating means in each of said circuits to indicate contact between said armature and a respective electrode.

2,445,840
MULTISIGNAL TRANSMISSION
Lawrence Lee Rauch, Princeton, N. J., assignor to Research Corporation, New York, N. Y., a corporation of New York
Application December 3, 1945, Serial No. 632,578
6 Claims. (Cl. 177—351)



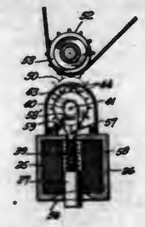
1. A system for transmitting over a single channel signals from a plurality of intelligence sources comprising means for connecting said intelligence sources in cyclic serial order with a common output channel at a preselected periodic sampling frequency F for sampling periods having a duration not exceeding $1/Fn$ where n is the number of intelligence signals to be transmitted, and means for energizing said intelligence sources with a common alternating potential having a frequency not less than one-half F and having a fixed phase relation to said sampling periods.

2,445,841
SAFETY CONTROL FOR FUEL BURNERS
Charles K. Strobel, Pittsburgh, Pa., assignor to Robertshaw-Fulton Controls Company, a corporation of Delaware
Application August 16, 1943, Serial No. 498,749
12 Claims. (Cl. 158—117.1)



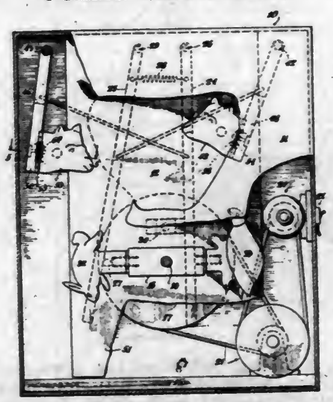
1. A safety control for fuel burners having main and pilot burners, comprising electrically operable means movable between positions for controlling the supply of fuel to the main burner, an energizing circuit for said movable means,

electrically operable switching means in said circuit responsive to variations in the current value supplied thereto for causing movement of said movable means between said positions, a thermal resistance element in said circuit adapted to vary in resistance value to vary the current value supplied to said switching means in response to the presence or absence of a flame at the pilot burner, means electrically connected to said switching



means and cooperable with said element for causing variations in the current value supplied to said switching means sufficient to change the position of said movable means when said element is heated by the pilot burner flame, and means controlled by said switching means for rendering the last said means effective after said resistance element has had time to become heated and thereby changing the position of said movable means.

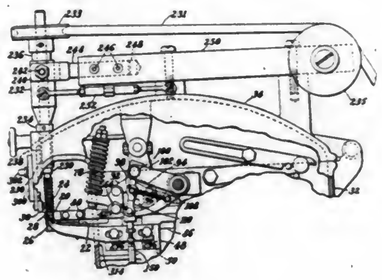
2,445,842
LAWN EDGE TRIMMER
Fidel Trevino, Los Angeles, Calif.
Application September 27, 1946, Serial No. 699,727
6 Claims. (Cl. 56—241)



4. A lawn trimming device comprising a vertical member, a stationary blade projecting from the vertical member, a pivotal blade carried by the vertical member and being cooperative with the stationary blade, a traction wheel provided with peripheral teeth and being carried by the vertical member, means for depressing the pivotal blade in cutting grass in cooperation with the stationary blade and a member projecting from the pivotal blade and cooperative with the toothed wheel for advancing the wheel during each pivotal movement of the pivotal blade, said means for depressing the pivotal blade consisting of an elongated slide bar having its lower end pivotally connected to the last mentioned blade and provided with a handle at its upper end, said vertical member being provided with a flange having an opening through which the bar is slidable, and spring means for returning the hand bar to an elevated position with the pivoted blade away from the stationary blade.

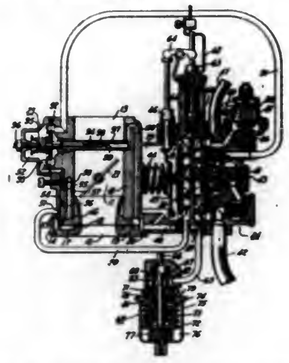
2,445,843
FILM MARKER
Willard H. Turner, Los Angeles, Calif., assignor to Radio Corporation of America, a corporation of Delaware
Application March 28, 1945, Serial No. 585,239
8 Claims. (Cl. 164—99)

1. A film marking device comprising a wheel having a plurality of needle points extending from its periphery, an electromagnet having an armature on which said wheel is directly mounted, and means for energizing said electromagnet for moving the needle points of said wheel into contact with a moving film for continuously perforating said film by a series of said needle points during the period of energization of said electromagnet.



2,445,844
ANIMATED TARGET
Irving D. Wallach, Port Washington, N. Y., assignor to Associated Development and Research Corporation, New York, N. Y., a corporation of New York
Application December 7, 1945, Serial No. 633,329
6 Claims. (Cl. 273—105.2)

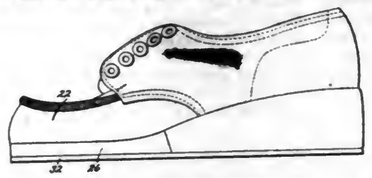
2. A target device, including a casing having an opening in one of its walls to provide a sight area which is relatively small in comparison with the wall area; a drive wheel rotatably mounted



within said casing; means for rotating said wheel; a pair of arms pivotally mounted within said casing and extending adjacent said drive wheel respectively on opposite sides of the axis of rotation thereof; target carrier means for each of said arms and pivotally disposed remote from and on opposite sides of said sight area, the arc of movement of each said target carrier means having one terminus within said sight area; a target swingably affixed to each said target carrier means and movable thereby into and out of said sight area; means on each said target for yieldably holding the same in the plane of said sight area; link means connecting each said arm with its associated target carrier means, actuator means on said drive wheel engageable with one of said arms for substantially one half rotation of said wheel and with the other arm for substantially the other one half rotation, whereby to oscillate each said arm in succession, the oscillation of one arm bringing the target of the target means associated therewith into full view within said sight area at substantially the first ninety degrees of rotation of said wheel and removing it completely therefrom at substantially the second ninety degrees of rotation; the oscillation of the second arm bringing the target of its associated target means into full sight at substantially the third ninety degrees of rotation and out of sight at the fourth ninety degrees of rotation of said wheel; and a third target carrier within said housing and rotatable by said drive wheel, said last named target carrier having targets mounted on the opposite ends thereof and movable into and out of sight substantially ninety degrees out of phase with said first named two targets, whereby when one target is completely exposed to view within said sight area, no part of any other target is simultaneously visible.

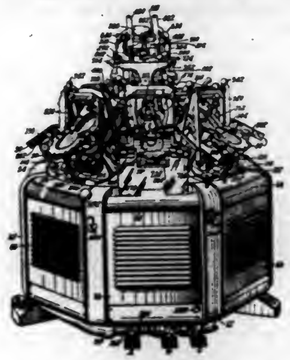
2,445,845
LASTING MACHINE
Corwin W. Baker, Beverly, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application April 2, 1947, Serial No. 738,868
21 Claims. (Cl. 12—1)

2. In a lasting machine, the combination of means for tensioning stock to be lasted, successively in different locations along the edge of the bottom of a shoe, means for abrading the exposed surface of the lasting margin of the stock, and means for pressing the lasting margin of the stock against the shoe bottom in each location.



2,445,846
FUEL SUPPLY SYSTEM
Frederik Barfod and Emil O. Wirth, South Bend, Ind., assignors to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application July 22, 1942, Serial No. 451,920
19 Claims. (Cl. 261—69)

1. In a fuel supplying device for an internal combustion engine, an air supply passage, a chamber subjected to the pressure in the air supply passage, a second chamber, flow responsive means in the air passage for creating a differential between the pressures in said chambers, a fuel supply conduit, area restricting means in the fuel supply conduit, a regulator unit for regulating the fuel pressure only on the upstream side of the area restricting means comprising a pair of air compartments, a passage connecting one of said compartments to one of said chambers, a pair of passages connecting the other of said compartments to both of said chambers, valve means controlling one of the said pair of passages, only one fuel compartment, said fuel compartment being subjected to the pressure in the fuel conduit on the upstream side of the area restricting means, a valve in the conduit anterior to the area restricting means, and pressure responsive members forming movable walls of the air and fuel compartments operative to control the valve, and a second regulating unit for regulating the fuel pressure only on the downstream side of the area restricting means comprising an air compartment connected to the said second chamber, a fuel compartment subjected to the pressure in the fuel conduit on the downstream side of the area restricting means, a valve in the conduit posterior to the area restricting means, and means responsive to the pressures in said last named air and fuel compartments for controlling the last named valve, the first mentioned regulator unit being operable independently of the fuel pressure on the downstream side of the restriction and the second mentioned regulator unit being operable independently of the fuel pressure on the upstream side of the restriction.

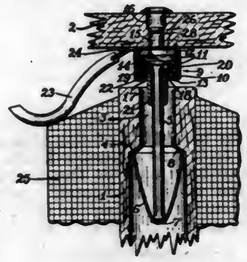


2,445,847
PLATFORM TYPE SHOE
Fount E. Curtis, Milwaukee, Wis., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application January 9, 1946, Serial No. 640,040
3 Claims. (Cl. 36—19.5)

1. A platform shoe having an upper, an insole, a platform sole, a platform cover and an outsole, said insole having covers on its inner and outer faces, said covers being larger than the insole and having their marginal portions united to constitute a sewing rib about the periphery of

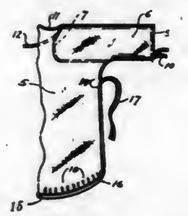
the insole, the upper and platform cover being sewed to said rib, the marginal portions of the platform cover extending over the bottom of the platform, and said outsole being attached to the marginal portion of the platform.

2,445,848
MACHINE FOR PRESSING SOLES ON SHOES
Sidney J. Finn, Beverly, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J., a corporation of New Jersey
Application September 29, 1944, Serial No. 556,391
181 Claims. (Cl. 12—37)



116. In a cement sole-attaching machine, a turret, a series of inflatable pads carried by the turret, means for holding the turret in indexed position, fluid-pressure-operated means for releasing the turret-holding means, fluid-pressure-operated means for inflating the pads, and a valve biased to closed position, the inflating pressure acting on said valve in opposition to said bias to open the valve and supply fluid to the turret-releasing means.

2,445,849
BOBBIN HOLDER
John P. Garey, Elmira Heights, N. Y., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application July 7, 1945, Serial No. 603,617
14 Claims. (Cl. 242—130)

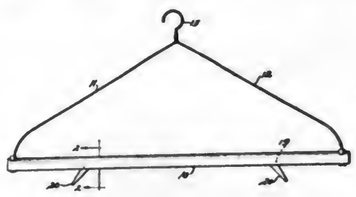


7. In a pendant type of bobbin holder, a swivel head, screw-threaded means for attaching the head to a creelboard, said head comprising annular laminations providing an interior cavity and a bottom wall having an opening therein, a unitary tension bar bracket between said head and creelboard, said unitary member having an upturned and a downturned end, a top lamination of the head having an opening leading into said cavity and receiving said downturned end, a flanged tube projecting through said bottom wall and loosely supported thereby, an anti-friction bearing in the head resting on said tube flange, a vertical spindle within said tube supported by said bearing, said tube fitting loosely around a substantial portion of the spindle length; and spring means fixed to the lower end of said spindle for supporting a bobbin thereon.

14. In a pendulous bobbin holder a resilient bobbin engaging member, a vertical spindle on

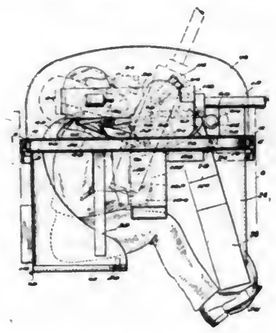
which said member is mounted, an anti-friction bearing pendulously supporting the spindle including an upper race member fixed to the spindle, a lower race member having a sleeve surrounding the spindle and extending downwardly into the bobbin when it is mounted on the spindle so as to exclude lint from the bearing, and a housing enclosing the race members forming a support for the lower race members, and means for rigidly attaching the housing to a creelboard.

2,445,850
INFANT'S FEEDING BIB
Eleanor W. Gibson, Detroit, Mich.
Application April 4, 1945, Serial No. 586,566
5 Claims. (Cl. 2—49)



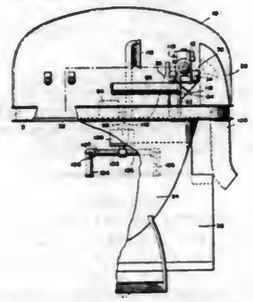
1. A highchair bib comprising a bodice portion, an apron at the lower part of said bodice portion and having transverse and longitudinal edges, means for attaching the upper bodice portion around the neck of an infant, a narrow hem formed along the lower transverse edge of said apron and extending a substantial distance along both longitudinal edges to said upper bodice portion, said hem being permanently gathered.

2,445,851
CAM-ACTING GARMENT HANGER
Alvin W. Guthrie, Chicago, Ill.
Application December 27, 1946, Serial No. 718,856
3 Claims. (Cl. 223—89)



1. In a garment hanger having a hook with depending arms and a horizontal bar suspended

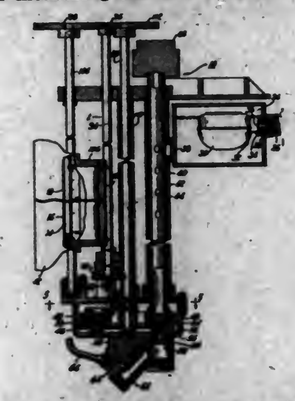
from the ends of the arms, gripping jaws with cam-shaped inner ends and knurled surfaces on their outer ends slidably mounted in a longitudinally extending slot in the horizontal bar, said jaws having pins on the sides extending



into grooves in the sides of the slot said cam-shaped inner ends being adapted, when rotated on said pins, to bind against the top of the slot for holding the jaws in selected positions, and said knurled surfaces being adapted to resist slipping of garments disposed thereagainst.

2,445,852
GUN TURRET
Homer D. Huey, Baltimore, and George F. Towner, Joppa, Md., assignors to The Glenn L. Martin Company, Baltimore, Md.
Application April 12, 1941, Serial No. 388,255
6 Claims. (Cl. 89—41)

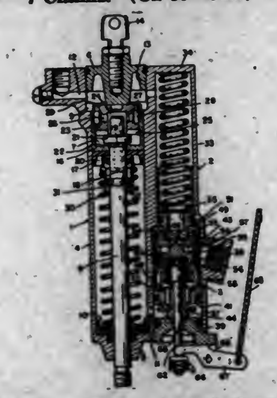
1. A gun turret for mounting on the top surface of a vehicle adapted for turning about an axis substantially normal to said surface, comprising an annular supporting member secured in said vehicle and constituting the sole mounting means for said turret on said vehicle, an annular turret member movable in said supporting member, a plurality of spaced parallel guns mounted for elevation on said annular turret member, a unitary dome member of transparent material, mounted on said turret member and having a plurality of slots which permit the elevation of said guns, a bucket seat, the seat, back and sides of which are of armor plate, secured to said turret member and movable therewith which positions the gunner between the butts of the guns with only his head and neck extending into said dome member, the pivot point of said guns being so located that the butts of the guns remain within the turret defined by said annular member.



2,445,853
SPENT AMMUNITION CHUTE FOR GUN TURRETS
Homer D. Huey, Baltimore, and George F. Towner, Raspeburg, Md., assignors to The Glenn L. Martin Company, Middle River, Md., a corporation of Maryland
Original application April 12, 1941, Serial No. 388,255. Divided and this application November 30, 1945, Serial No. 631,850
3 Claims. (Cl. 89—33)

2. A gun turret for a vehicle mounted for turning about a substantially vertical axis comprising an annular supporting member secured in said vehicle, an annular turret member constituting the sole mounting means for the turret in said vehicle mounted for turning in said annular supporting member, a pair of spaced parallel guns secured to said annular turret member, mounting means extending above said annular turret member to pivotally support said guns about an axis transverse to said first mentioned axis which includes a hollow duct member secured to said annular turret member, affording a pivotal support on one side of each gun, an ammunition box for each gun depending from and supported by said annular turret member, a rectangular ammunition chute extending from said box to a point adjacent but spaced from the breech of said gun on the opposite side from said hollow member to conduct a belt of ammunition from said box to said gun, the end of said ammunition chute being so arranged that a line parallel with the longitudinal axis of the opening in the end thereof, and intersecting the pivotal axis of said guns, substantially bisects the angular movement of said guns in elevation, said hollow member being located close to the butt end of the gun and having an opening large enough to span the portion of the gun carrying the ejector slot for all positions of the gun in elevation so that ejected cases and links are collected by said hollow member.

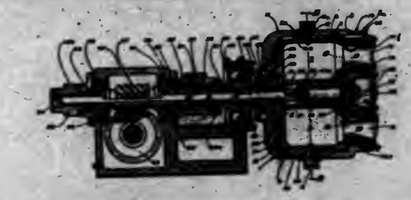
2,445,854
FLOW METER
James C. Keyworth, South Bend, Ind., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application July 5, 1943, Serial No. 493,573
13 Claims. (Cl. 73—216)



1. A device of the class described for measuring the flow of charge liquid comprising a reservoir containing liquid at a controlled level, a casing in communication with said reservoir and adapted to hold liquid at the same level as that in the reservoir, a standpipe within said casing having openings therein for communication with said liquid and adapted to move longitudinally on its axis, a plate having a plurality of different area orifices thereon adapted to be engaged by said standpipe and through which said liquid may flow, means comprising a plurality of gages each adapted to be used with a particular size orifice for measuring the flow through said ori-

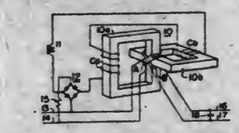
fice, and means for selecting a particular orifice with its gage, said means being adapted to move said standpipe out of engagement with said orifices while shifting from one orifice to another,

---



2,445,855
FLUID PRESSURE CONTROL DEVICE
Ludwig A. Majneri, Grosse Pointe, Mich., assignor to The Warner Aircraft Corporation, Detroit, Mich., a corporation of Michigan
Application November 19, 1942, Serial No. 466,183
7 Claims. (Cl. 60—54.5)

1. A fluid pressure control device comprising a fluid pressure producing mechanism, a passage communicating with said mechanism, a mechanism for applying pressure to the fluid in said passage, a valve for normally closing the communication between said second mentioned mechanism and said passage and means for moving said valve comprising an operating member and a spring between said valve and operating member, said spring being movable between predetermined limits, said valve being movable between predetermined limits through a distance greater than said spring movement and said operating member being movable between predetermined limits through a distance greater than said valve movement with a difference less than said spring movement.



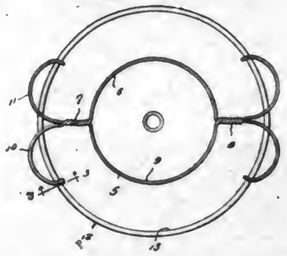
612 O. G.—62

2,445,856
ROTARY REACTION MOTOR
Waldemar F. Mayer, Los Angeles, Calif., assignor to Aerojet Engineering Corporation, Azusa, Calif., a corporation of Delaware
Application May 26, 1945, Serial No. 595,940
4 Claims. (Cl. 60—35.6)

3. A jet propulsion motor comprising a cylindrical firing chamber mounted on a shaft which extends axially through the chamber and forming an annular space around the shaft, said chamber having a front wall and a rear wall, exhaust nozzles from within the chamber through the rear wall, said nozzles being directed at an angle from the axis of rotation to produce a rotating force, an injector located at the periphery of the chamber, for injecting fuel into the chamber, and means for leading fluid propellant to the injector, said means comprising a passageway extending along the shaft to the nozzles, then helically around the nozzles to the periphery of the chamber and then helically around the chamber to the injector.

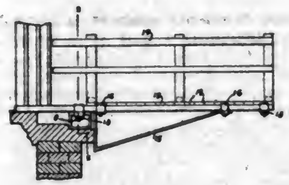
2,445,857
MAGNETIC FREQUENCY CHANGER
Harold J. McCreary, Lombard, Ill., assignor to Automatic Electric Laboratories, Inc., Chicago, Ill., a corporation of Delaware
Application November 23, 1944, Serial No. 564,879
22 Claims. (Cl. 172—281)

1. In a static frequency changer, a saturable magnetic core including a pair of intersecting members, a first coil wound through one pair of diagonally opposite corners of the intersection, a second coil wound through the remaining pair of diagonally opposite corners of the intersection, a source of alternating current connected to one of said coils, a load circuit connected to the other of said coils, and means for producing a biasing flux in said core, whereby alternating current having a frequency integrally related to the frequency of said source is delivered to said load circuit.



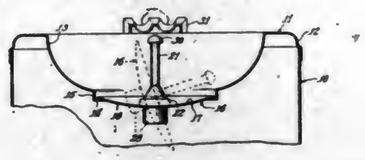
2,445,858
LAMINATED STRUCTURE
Edmund G. Mitchell, Godfrey, and De Wilton B. Timberman, Alton, Ill., assignors to Olin Industries, Inc., a corporation of Delaware
Application July 1, 1943, Serial No. 493,150
8 Claims. (Cl. 29—194)

1. A composite laminated structure comprising a supporting sheet having a copper base and an



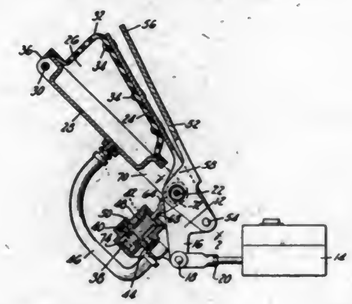
exposed layer of copper-phosphorus brazing alloy in direct contact with and firmly bonded to one surface of said supporting sheet.

2,445,859
SUPPORTING RACK FOR MILK STRAINERS
Harold E. Murdock, Oneida, Ill.
Application November 1, 1944, Serial No. 561,454
2 Claims. (Cl. 248—94)



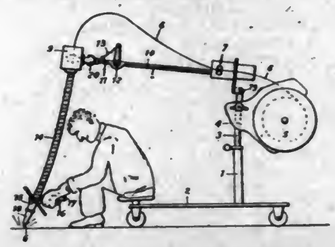
1. A strainer supporting rack for a cream separator bowl, comprising an inner ring consisting of two opposed curved wire sections, the ends of the wire sections being twisted together at diametrically opposite points with respect to the ring to form only two radial arms, the wire sections being extended at the outer ends of each radial arm to form a pair of large curved portions which are horizontal and disposed in the same plane, the curved portions in each pair extending circumferentially of the bowl in opposite directions and projecting radially inwardly and outwardly beyond the top edge of the bowl, the curved portions in each pair having their free ends bent downwardly to provide depending extensions to engage within the bowl.

2,445,860
WINDOW PLATFORM
Elmer M. Newkirk, St. Joseph, Mo.
Application January 2, 1946, Serial No. 638,674
5 Claims. (Cl. 304—26)



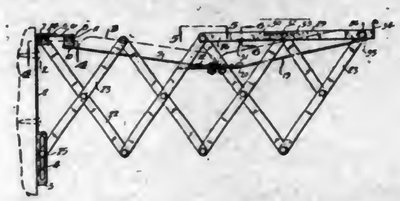
1. A portable platform for use with a window frame having an outwardly projecting window sill, said platform comprising a pair of parallel horizontal side bars adapted to be placed through the window frame against the facing sides thereof, laterally outwardly projecting portions on the inward ends of said side bars for engaging the back of the opposite sides of the window frame, an outer cross member extending between and securable at its ends to the outer ends of said side bars, said outer cross member being adjustable lengthwise to space said side bars at the proper distance for engaging said side bars with the facing sides of the window frame, a window sill block depending from each side bar and slidably adjustable therealong to position for resting upon the window sill, and an inner cross member extending between and securable at its ends to said window sill blocks for positively maintaining said side bars in engagement with the facing sides of said window frame.

2,445,861
ASH RECEPTACLE CLOSURE WITH TILTING MEANS
William C. Panzer, Chicago, Ill.
Application September 25, 1945, Serial No. 618,437
3 Claims. (Cl. 220—36)



1. In a structure of the class described, the combination of a depository, a cover therefor, a tiltable closure for said cover, said closure being of concave formation and having an embossment on its upper concave face adjacent the margin of the closure and coincident with its axis of tilting, and a tilter post upstanding from said closure, said tilter post being offset from the center of said closure and located on said embossment.

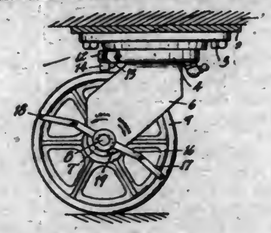
2,445,862
POWER CONTROL UNIT FOR BRAKES
Earl R. Price, South Bend, Ind., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application March 26, 1945, Serial No. 584,847
7 Claims. (Cl. 121—41)



6. A power brake control mechanism comprising a power lever fulcrumed on a fixed member and pivotally connected to a brake operating device, an operator operated lever pivotally mounted on the power lever at a distance from the fulcrum of said power lever, and a power device on a fixed member and having two movable parts which are urged in opposite directions by a change of pressure in said power device, one of the movable parts of the power device being pivotally connected to the power lever to exert a brake operating force therethrough, and the other of said movable parts being connected to the operator operated lever to exert a force thereon acting against the operator.

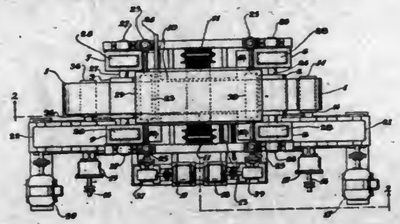
2,445,863
MACHINE FOR ARC WELDING WITH CONTINUOUS ELECTRODES
Robert Sarazin, Neuilly sur Seine, France
Application June 26, 1945, Serial No. 601,605
In France January 8, 1944
1 Claim. (Cl. 219—8)

A machine for arc welding comprising a reel carrying a provision of coiled electrode wire, a support for adjustably carrying said reel, a pivot on said support, a first driving part adapted to rock round said pivot and adapted to exert an unwinding tractional action on the electrode wire on the reel, a bracket rigid with the first driving part, an arm pivotally secured to said bracket, a balancing spring connecting said arm with said bracket, a second driving part pivotally secured to said arm and adapted to make the electrode wire progress in synchronism with the action of the first driving part, a flexible sheath at the outlet of the second driving part through which the electrode wire is adapted to pass, a guiding tube at the outlet of said sheath, a nozzle for guiding the electrode wire and leading the current ending said tube and means for directing said guiding nozzle on to the welding point and means for balancing the system comprising the driving and guiding parts round the pivot carried by the support.



2,445,864
BOOKHOLDER
Frank Seidel, Detroit, Mich.
Application November 8, 1946, Serial No. 708,509
10 Claims. (Cl. 45—85)

10. A book holder comprising a back member adapted for attachment to a wall, two sets of lazy-tongs having an upper end pivotally attached to said member and extensible therefrom, slotted flanges on said member below said ends, a lower end of each of said lazy-tongs being slidably mounted in each of said flanges, a pair of plates supported between and respectively at the upper ends of said lazy-tongs, and an extensible hinge joining said plates between said ends, and linearly adjustable articulated linkage joining two of the pivotal points of said lazy-tongs, whereby to prevent the collapse of said lazy-tongs.



2,445,865
CASTER WHEEL LOCK
Paul H. Sleeper, Albion, Mich., assignor to Domestic Credit Corporation, Chicago, Ill.
Application April 28, 1947, Serial No. 744,289
7 Claims. (Cl. 16—35)

7. In a caster, the combination with a base member, of a wheel standard rotatably mounted thereon, a wheel mounted on said standard for adjustment towards and from said base member, and a wheel brake and standard lock member mounted on said standard in operative relation

to both said wheel and base members to be simultaneously engaged or disengaged from both by the adjustment of said wheel on said standard.

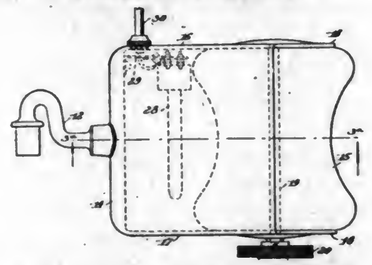
2,445,866
APPARATUS FOR ELECTRIC RESISTANCE HEATING OF MOVING METALLIC STRIP
Golder P. Wilson, Alton, Ill., Lyle W. McNair, Overland, Mo., and Wade D. Waters, Alton, Ill., assignors to Olin Industries, Inc., a corporation of Delaware
Application August 9, 1943, Serial No. 498,008
3 Claims. (Cl. 219—11)

1. In an electric furnace for heating moving metal strip, the combination which comprises a plurality of spaced metal rolls for contacting said moving metal strip, one of said rolls being on the charge end and one on the discharge end of said furnace, liquid electric conductors for supplying an electric current to said strip through said rolls, means for applying an electromotive force to said liquid conductors, means for providing tension on said strip as it passes over each of said rolls and means for providing a substantially lesser tension on said strip between said rolls.

2,445,867
FLEXIBLE ANTIPICKING BLINDERS FOR POULTRY
David Wolfson and Hyman Seiden, Far Rockaway, N. Y.
Application June 16, 1945, Serial No. 599,780
9 Claims. (Cl. 119—97)

1. In a device of the character described, a pair of blinds, a bridge piece connecting them and normally curved to conform to the beak of the fowl, said blinds constituting a single piece of

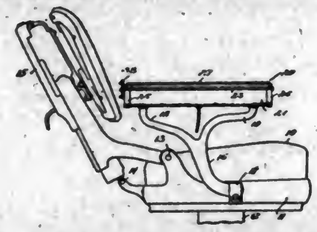
resilient non-metallic material, a relatively rigid metallic member for securing said piece to the beak comprising a body part connected with said



bridge piece and integral prongs extending inwardly and laterally therefrom at both sides of the bridge piece and securing member.

2,445,868
COPPER BASE ALLOYS
John D. Berwick, Alton, Ill., assignor to Olin Industries, Inc., a corporation of Delaware
No Drawing. Application August 28, 1944, Serial No. 551,620
8 Claims. (Cl. 75—157.5)

8. A copper base alloy comprising 53% to 75% copper, 8% to 12% manganese, and 7% to 11% nickel, with the balance zinc.



2,445,869
SANITARY BODY REST FOR CHAIRS
Henry J. Beyer, Rochester, N. Y., assignor to Ritter Company, Inc., Rochester, N. Y., a corporation of Delaware
Application April 29, 1946, Serial No. 665,652
5 Claims. (Cl. 155—176)

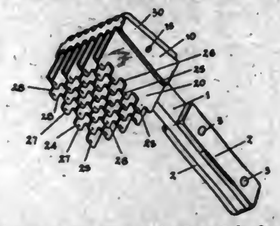
3. A head rest for chairs comprising a support for attachment to said chairs, a hollow casing on said support having an opening in a side thereof, a source of germicidal rays in said casing, a roller formed of material impervious to ultra-violet rays and shaped to conform to and comfortably support a patient's head, said casing having its walls shaped to fit closely about the opposite sides and ends of said roller with said roller substantially closing said opening, means for rotatably mounting said roller in said opening for successively rotating different portions thereof directly and alternately into head supporting position outside said casing and ray receiving position inside said casing to maintain said roller in sterile condition, and means for indicating the rotary positions of said roller in said casing.

2,445,870
SANITARY CHAIR ARMREST
Clarence G. Maxson, Rochester, N. Y., assignor to Ritter Company, Inc., Rochester, N. Y., a corporation of Delaware
Application October 7, 1944, Serial No. 557,569
4 Claims. (Cl. 155—198)

1. A sanitary arm rest for dental and medical operating chairs comprising a casing having an opening therein, means for supporting said casing at one side of said chair in position for supporting an arm of an occupant thereof, a source of germicidal rays in said casing, and an elongated unitary arm supporting member rotatably mounted on said casing in said opening thereof with one portion thereof normally disposed outside said casing in position for engagement with the

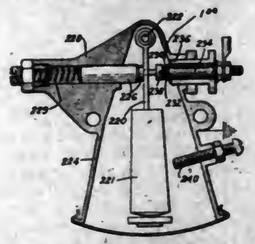
arm of an occupant of the chair and also with another portion located inside said casing and exposed to germicidal treatment by said rays, said member being rotatable on said casing to alternately rotate said portions thereof directly to position for supporting engagement with an occupant's arm and to position for exposure to said rays, respectively.

2,445,871
PROTECTIVE COVER FOR BOOK JACKETS
Arthur Brody, Newark, N. J.
Application November 23, 1945, Serial No. 630,189
3 Claims. (Cl. 281—34)



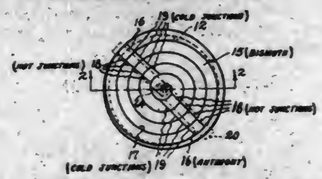
1. A protective cover for an embellished book jacket, comprising a thin transparent facing, and a longitudinally-split relatively stiff but flexible backing, the facing being wider than the backing and having its opposite longitudinal margins folded over the outer edges of said backing and adhesively secured to the latter, whereby the book jacket is removably insertable from the rear into protected sandwiched position between said facing and backing.

2,445,872
MALLET FOR PREPARING MEAT
John C. Burkett, Toledo, Ohio
Application December 3, 1945, Serial No. 632,308
1 Claim. (Cl. 17—30)



A mallet for preparing meat and having integral handle and head parts; the head part having opposed face surfaces, the plane of one of which extends parallel to the major axis of the handle and the other extends at an oblique angle to said axis; the head part having a hole extending parallel to said planes of said face surfaces and at right angles to said major axis of the handle part; the head having a plurality of parallel slotted recesses extending inwardly of the head from the first named face surface at right angles to said planes of said face surfaces and terminating at contiguous points on an arcuate surface; a

plurality of blade elements, each having a thickness slightly less than the width of the slotted recesses, a dimension in one direction greater than the depth of said slotted recesses and another dimension, at right angles to the first, equal to that of the length of the slotted recesses; each blade element having an opening in the web portion thereof equal in diameter to the diameter of the said hole and having an arcuate edge approximating the said arcuate surface of termination of the recesses and an opposed edge having a plurality of sharpened castellar teeth and alternate gullies, each gully of a shape and dimension substantially like that of a neighboring tooth; each blade element disposed in one of said recesses to locate the web opening thereof in regis-



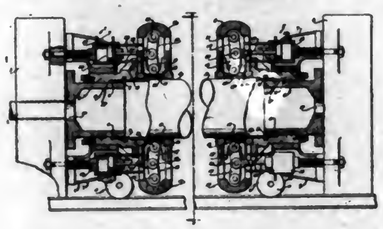
tering relation with the said head hole and with the corresponding openings of all the similarly disposed blade elements; a pin initially having a bend along the line of its major axis and resilient to distortion and extending through the hole and openings of the assembled head and blade elements to retain the elements with their toothed edges extending beyond the head to points on a common plane extending parallel to the first named face surface of the head; and the said obliquely extending face surface having a plurality of alternately arranged flat crowned ribs and semi-cylindrical gully surfaces extending parallel to each other and to said major axis of the handle part.

2,445,873
INERTIA-ACTUATED SWITCH
Allan C. Chambers, South Bend, Ind., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application Serial No. 453,629, August 5, 1942, now Patent No. 2,391,129, dated December 18, 1945, which is a division of application Serial No. 290,243, August 15, 1939, now Patent No. 2,297,692, dated October 6, 1942. Divided and this application July 20, 1945, Serial No. 606,235
3 Claims. (Cl. 200—52)

1. A switch and operating means therefor adapted for use on an automotive vehicle comprising a hollow casing securable to the chassis of the vehicle, a pin mounted in one of the side walls of said casing and extending therein, a lever pivotally mounted at one of its ends upon said pin, a weight secured to the other end of said lever, a stop adjustably mounted in said casing and contactable by said weight, a pin slidably mounted in the casing, another pin, serving as an electrical conductor, fixedly mounted in said casing opposite said slidable pin, an electrical contact secured to one end of said latter pin, an electrical contact secured to the end of said fixed pin, and a spring housed within the casing, said spring serving to move said movable pin so as to normally bring said contacts into engagement with each other, the parts of the switch mechanism being so constructed and arranged that the lever member contacts a portion of said movable pin to move the latter when the casing is being decelerated at a predetermined rate and thus separate the electrical contacts.

2,445,874
RADIATION THERMOPILE AND METHOD OF MAKING THE SAME
Deslonde R. de Boisblanc and Hugh M. Barton, Jr., Bartlesville, Okla., assignors to Phillips Petroleum Company, a corporation of Delaware
Application June 1, 1944, Serial No. 538,320
14 Claims. (Cl. 136—5)

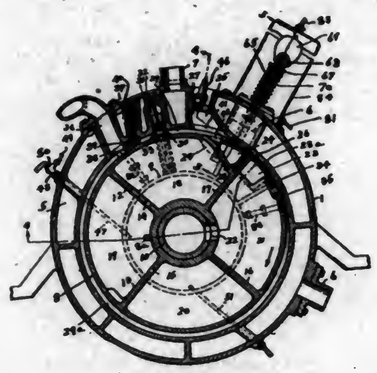
1. A thermopile comprising an insulating support, a metal film mounted on said support cut to form a spiral strip, and a plurality of metal plates thermoelectrically dissimilar from said film and diametrically arranged on said strip to provide a plurality of alternate hot and cold thermo-electric junctions.



2,445,875
COMBINED COMPARATOR AND LIMIT GAUGE
Alfred Hamilton Emery, Wappingers Falls, N. Y., assignor to Standard Gage Company, Inc., Poughkeepsie, N. Y., a corporation of New York
Application February 29, 1944, Serial No. 524,357
3 Claims. (Cl. 33—147)

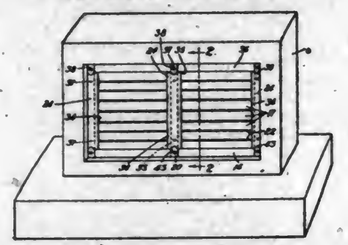
3. In a combined comparator and limit gage, in combination, a U-shaped frame, an anvil

mounted in one arm of said frame, a dial indicator housing adjustably mounted in a bore in the second arm of said frame, a dial indicator mounted in said housing with its plunger extending into the said bore, a measuring element comprising an outer sleeve and an inner measuring button said sleeve being longitudinally adjustably mounted in said bore in said second arm, a shank on said measuring button extending through said sleeve and making contact with said dial indicator plunger, resilient means for extending said measuring button and its shank outwardly with respect to said sleeve, means comprising a shouldered chamber in said sleeve for limiting the inward movement of said measuring button with respect thereto and means comprising lock nuts on said shank for limiting the outward movement of said button with respect to said sleeve, whereby the range of movement of said measuring button may be limited and the tolerance limits set.



2,445,876
APPARATUS FOR TESTING TUBES BY FLUID PRESSURE
Herbert S. Fullerton, Merion, Pa., assignor to The Baldwin Locomotive Works, a corporation of Pennsylvania
Application March 31, 1945, Serial No. 585,971
4 Claims. (Cl. 73—37)

1. Apparatus for testing a tube under multiple stresses comprising, in combination, means for subjecting the tube to a radial fluid pressure so as to create a circumferential stress in the tube, fluid pressure operated means for mechanically engaging the tube to transmit a longitudinal force thereto, a normally anchored stationary sleeve, an axially movable packing gland surrounding said sleeve for engagement therewith and to which said mechanical engaging means is connected for movement together as a unit, and means providing a fluid pressure area upon which fluid within the tube acts so as to move and slide said unit axially along said sleeve thereby to create and impose a longitudinal load force on the tube.

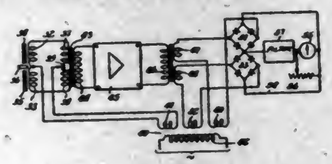


2,445,877
INTERNAL-COMBUSTION ROTARY MOTOR
Robert K. Garnuch, Houston, Tex.
Application November 15, 1946, Serial No. 710,169
6 Claims. (Cl. 123—14)

1. An internal combustion motor comprising, a casing having end walls and an inside annular wall, a rotor mounted to rotate therein and spaced radially inwardly therefrom, a transverse cam on the rotor which spans the space between the rotor and casing and moves in contact with the inside wall of the casing as the rotor turns, a seal carried by the casing which separates said space into a compression chamber and an exhaust chamber, said rotor having an external pocket behind the cam and the casing having an internal pocket in front of the seal, said pockets, upon registration, forming a combustion chamber to receive an explosive charge, radial partitions in the rotor providing internal chambers connected by perforations and an internal chamber which is closed, the end walls of the closed chamber being provided with outlet ports and the motor casing be-

ing provided with channels which lead to said combustion chamber and whose inner ends register with the outlet ports as the rotor turns, said rotor having an intake channel leading into the closed chamber through which motive fluid may enter said chamber and pass through said channels, upon registration of said ports therewith and means for firing the charge.

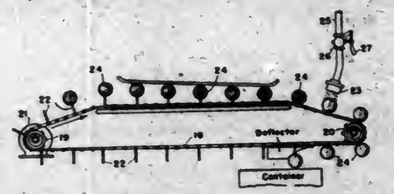
2,445,878
DISPLAY STRUCTURE WITH REMOVABLE INDICIA-BEARING INSERTS
William C. Grueneberg and Willard G. Grueneberg, Cincinnati, Ohio
Application September 23, 1944, Serial No. 555,500
10 Claims. (Cl. 40—63)



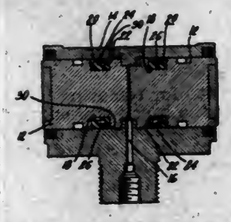
1. A display structure comprising in combination, a series of individually freely displaceable indicia-bearing inserts of equal length, means for supporting said inserts in edge to edge contact to form a plurality of adjacent vertical columns, said supporting means providing access openings at the heads of the columns for the removal and replacement of inserts one by one in succession, a displaceable capping rail common to all said columns for closing said openings precluding unauthorized removal of the inserts, and overlapping means on all the inserts and the capping rail, to close the spaces therebetween and preclude passage of foreign matter past the separable inserts to the rear thereof.

2,445,879
PROCESS OF TREATING EGGS
George O. Hall, Murrysville, Pa., assignor to Hall Laboratories, Inc., Pittsburgh, Pa., a corporation of Pennsylvania
No Drawing. Application October 8, 1945, Serial No. 621,175
7 Claims. (Cl. 99—210)

1. The process of treating churned eggs to inhibit proteolytic action and coagulation thereof, which comprises adding thereto at least about 3% by weight of molecularly dehydrated phosphate having a molar ratio of R_2O to P_2O_5 not greater than 1.7:1, where R represents at least one member of the group consisting of hydrogen, alkali-metal and ammonium, said molecularly dehydrated phosphate being selected from the group consisting of molecular dehydrated phosphate glass, tripolyphosphates and water-insoluble crystalline metaphosphates.



2,445,880
ELECTRICAL STRAIN MEASURING APPARATUS
Claude M. Hathaway, Denver, Colo., assignor to Hathaway Instrument Company, a corporation of Colorado
Original application November 8, 1943, Serial No. 509,437. Divided and this application May 10, 1945, Serial No. 592,944
6 Claims. (Cl. 177—351)



1. In a displacement measuring apparatus, the combination comprising a pair of variable impedances arranged to vary in opposite senses in accordance with the displacement to be indicated, a pair of fixed impedances, a source of alternating current, means connecting one of said variable impedances in series circuit with one of said fixed impedances, means connecting the other of said variable impedances in series circuit with the other of said fixed impedances, means for producing equal energization of each of said series circuits from said source of alternating current, a pair of bridge rectifiers, an indicating instrument differentially connected to the output of said rectifiers, means for energizing each rectifier from said source, and means for energizing each rectifier input in accordance with a different one of said first mentioned circuits.

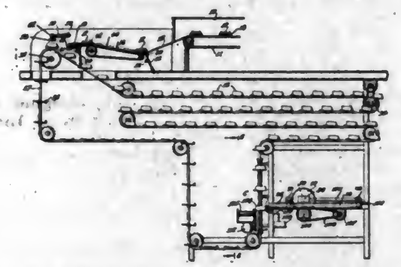
2,445,881
APPARATUS FOR PEELING ONIONS, INCLUDING A CONICAL JET OF GAS
George T. Hemmeter, Berkeley, Calif., assignor to the United States of America as represented by the Secretary of Agriculture
Application December 18, 1945, Serial No. 635,811
1 Claim. (Cl. 146—48)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

An apparatus for peeling onions comprising a nozzle for delivering a conical, diverging, hollow jet of gas, a pipe line for connecting the jet to a source of gas under pressure, a valve in the pipe line for controlling the velocity of gas issuing from the nozzle, and means for supporting an onion with its top cut off in the open spaced from the nozzle in the jet such that the gas impinges on the onion on its curved surface at its largest diameter and surrounding the cut end, the velocity and pressure of the jet being sufficient to cause reduction in pressure on the surface with consequent loosening of the skin and tearing it from the surface, said means for supporting the onion comprising an endless conveyor having a plurality of spaced spikes thereon upon each of which the onion may be placed, movement of the conveyor carrying the onion into its proper position relative to the nozzle for peeling.

2,445,882
SEALING MEANS
Bryan E. House, South Bend, Ind., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware
Application December 10, 1943, Serial No. 513,684
9 Claims. (Cl. 309—33)

1. Sealing means, for a cylinder and a piston having an annular groove in its outer cylindrical surface, comprising an annular resilient seal having inner and outer sealing lips, and an expander adapted to urge the outer lip of said seal radially outwardly into tight contact with the cylinder wall, said expander being constituted by an annular resilient metal strip split to permit circumferential expansion of the strip under the influence of its inherent resilience, said resilient metal strip being retained in position by contact of its forward edge with the forward side of the groove in the piston, the forward edge of the metal strip having a plurality of notches cut therein to permit the ingress and egress of fluid to and from the annular piston groove.

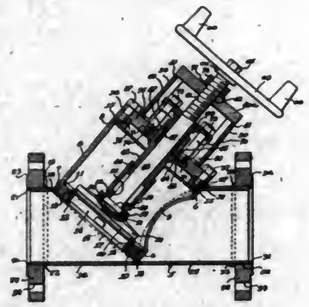
2,445,883
BIAS TUBING
Julius Katz, Bronx, and Frank P. Majoros, Brooklyn, N. Y., assignors to Superba Manufacturing Co., Inc., New York, N. Y., a corporation of New York
Application January 18, 1945, Serial No. 573,364
2 Claims. (Cl. 112—63)



1. A method of manufacturing tubular bias bagging material from unbiased tubular textile material which comprises the steps of cutting said

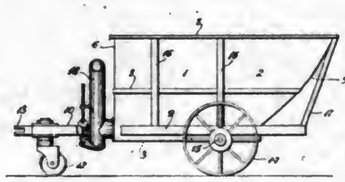
tubular material along the convolutions of a continuous helical line to obtain cut-edged bias ma-

terial and thereafter joining the said bias material adjacent the cut edges to form tubular bias bagging material.



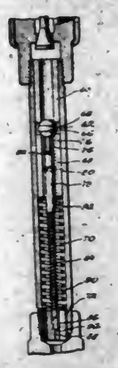
2,445,884
APPARATUS FOR HANDLING BREAD
John MacManus, Yonkers, N. Y., assignor to Cushman's Sons, Inc., New York, N. Y., a corporation of New York
Application December 2, 1942, Serial No. 467,609
2 Claims. (Cl. 214—1)

1. In apparatus for removing bread from pans and depositing the bread without tumbling it on its top crust, the combination comprising a stationary platform for receiving pans of bread, means cooperating with said platform for locating the pans containing bread on said platform, a travelling conveyor, trays spaced along said conveyor, a pneumatic chuck for engaging the top crust of a bread contained in a pan on said stationary platform, said chuck having a flexible cup shaped to conform with varying shapes of the top crusts of bread, means for carrying said chuck between said stationary platform and said conveyor, said carrying means comprising a horizontally pivoted arm and a hollow shaft for pivotally mounting said chuck, said hollow shaft and chuck being ported whereby air may be withdrawn from said chuck and said chuck is pivoted on said hollow shaft, and means for controlling the suction of said chuck and the operation of said chuck-carrying means to synchronize the lifting of breads from pans successively located on said platform and the placing of the breads on different trays on said conveyor.



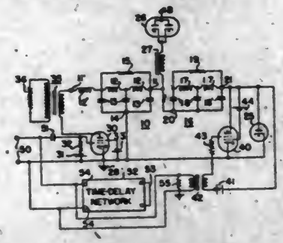
2,445,885
ALL-STEEL HIGH-PRESSURE VALVE
Donald R. McMullen, Detroit, Mich.
Application March 24, 1944, Serial No. 527,861
3 Claims. (Cl. 251—156)

1. A fabricated valve body comprising a valve chamber structure formed of a tubing section having a sidewall opening thereon and having an annular flange welded to each end thereof, one of said flanges on its inner side having a valve seat receiving portion and on its outer side having an annular flat surface, and the other flange having a valve bonnet receiving portion; and inlet and outlet pipe sections of substantially uniform diameter but of smaller diameter than said tubing section arranged substantially end to end, said pipe sections having their inner ends cut diagonally to provide elliptically-shaped edge portions, the elliptically-shaped edge portion of one pipe section being welded to said tubing section in communication with the sidewall opening



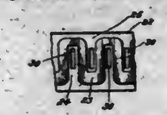
thereof and the elliptically-shaped edge portion of the other pipe section in the areas near the extremities of the major and minor axes being welded to the valve chamber structure adjacent the outer and inner peripheral edges respectively of said valve seat receiving flange, the diameter of said other pipe section along the major axis of the ellipse formed by the diagonally cut end thereof being substantially equal to or less than the diameter of said tubing section.

2,445,886
MOBILE GRAIN HOPPER
Frederick A. Mulligan, Rosser, Manitoba, Canada
Application February 5, 1946, Serial No. 645,602
In Canada February 7, 1945
2 Claims. (Cl. 214—83.16)



1. A mobile grain hopper for use particularly in connection with combine-harvesting, comprising in combination a hopper supported on a pair of wheels, said hopper being formed of a substantially vertical front wall, and a grain supporting surface including downwardly converging side walls, said front wall being apertured at the base thereof, a grain auger positioned in advance of and adjacent said front wall, a horizontal intercommunicating duct between said aperture and said auger being rotatable in a vertical plane substantially parallel to said front wall and about said duct, power take-off mechanism associated with said auger, and a ground support for the front end of said hopper to sustain the same in maximum grain holding position.

2,445,887
CONTROL VALVE AND VIBRATING FLOW INDICATOR
George H. Palm, Chicago, Ill., assignor to Stewart-Warner Corporation, Chicago, Ill., a corporation of Virginia
Application December 11, 1941, Serial No. 422,514
2 Claims. (Cl. 222—125)



1. A unitary, manually portable and manually operable lubricant control valve adapted to be connected to a source of lubricant under high pressure, said valve including a tube through which the lubricant flows, a valve part in said tube and a flow indicator, said indicator comprising a fixed sleeve in the end of said tube adjacent said valve part, a vibrator having an end adapted to seal against one end of said fixed sleeve, a sliding sleeve in said tube adapted to form a seal with the other end of said vibrator, a spring for urging said sliding sleeve toward said fixed sleeve, a spider providing an abutment for said spring, a cylinder provided by said spider, a vibrator stem having an end slidable in said cylinder, a second spring resting on said spider and urging said vibrator stem and vibrator toward said fixed sleeve, a nozzle secured to the outlet end of said tube and removably retaining said spider in said tube, and a passage connecting said cylinder with the interior of said nozzle.

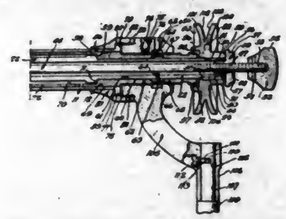
2,445,888
PULSE GENERATOR
John A. Rado, Little Neck, N. Y., assignor, by mesne assignments, to Hazeltine Research, Inc., Chicago, Ill., a corporation of Illinois
Application March 14, 1945, Serial No. 582,662
14 Claims. (Cl. 250—27)

6. A high-frequency pulse generator for generating a plurality of time-spaced pulses comprising, a plurality of energy-storage devices, means for charging said energy-storage devices, gas-filled electron-discharge means having a predetermined deionization characteristic for discharging each of said plurality of energy-storage devices, and means including a time-delay network for successively completing discharge paths through said gas-filled means from each of said energy-storage devices in a predetermined sequence with a time separation between succeeding steps of said sequence less than the deionization interval of said gas-filled means consecutively to discharge said plurality of energy-storage devices to produce a corresponding plurality of output pulses having a predetermined time separation.

2,445,889
THERMOPLASTIC BELT
Irving Rossi, West Orange, N. J., and William Dubilier, New Rochelle, N. Y.
Application July 12, 1944, Serial No. 544,614
3 Claims. (Cl. 2—338)

1. A belt comprising a strip of flexible thermoplastic material having a thin strip of spring metal completely embedded therein, said metal strip having a series of spaced transverse slots alternately extending to the opposite edges thereof and overlapping each other in the center, the width of the solid portions of said metal strip between adjacent slots being a multiple of the thickness of the strip, whereby to impart additional mechanical strength and quick acting spring action to said belt in the longitudinal direction.

2,445,890
LIGHTER
George Philip Schmitt, New York, N. Y., assignor to Cardinal Products Inc., New York, N. Y., a corporation of New York
Application March 23, 1944, Serial No. 527,687
3 Claims. (Cl. 67—7)



1. A fuel reservoir for a lighter comprising a body of substantially cylindrical shape, said body being divided into longitudinal sections each made of a mass adapted to hold a liquid fuel and formed with a channel which is offset from the cylinder axis while extending substantially parallel thereto, the channels of adjacent sections being angularly displaced with respect to each other and being interconnected by a generally transverse channel provided on said body whereby fuel introduced at one end of the cylinder may be caused to permeate said mass and the excess fuel removed at the other end of the cylinder.

2,445,891
DENTAL HAND PIECE
Martin Staunt, Chicago, Ill.
Application September 13, 1945, Serial No. 616,130
1 Claim. (Cl. 32—26)

In a dental hand piece, the combination of a chuck tightener rod with a spindle, said spindle comprising a tubular member having a cylindrical

bore of substantially larger size than said rod, said rod having an integral enlargement adjacent its free end for centering the rod in said bore, said rod being provided with a threaded portion adjacent its other end and said threaded portion being mounted in a threaded bore in a gland member, said gland member being threaded into the end of said spindle, a knob threaded on the threaded end of said rod, and a transverse pin passing through a part of the knob and rod for preventing relative rotation between the knob and rod, a wrist joint member having a threaded bore and a relatively hard alloy bearing comprising a tubular member externally threaded to fit in said latter bore, said bearing having a cylindrical bearing bore for receiving said spindle, a sheath carried by said wrist joint member and surrounding said bearing member, said sheath carrying at its forward end a front bearing mem-

ber, said front bearing member having an inner tapered bearing surface, and said spindle having a complementary surface, said spindle being provided with exterior chromium plated surfaces for engaging the bearings, said wrist joint member being formed with an external threaded surface for engaging a threaded sleeve, and said sleeve and sheath having annular shoulders engaging each other, whereby the sleeve may be adjustably threaded on the wrist joint member to take up and adjust the length of the sleeve with respect to wear on the tapered end of the spindle, the said wrist joint member having a transverse threaded bore, a relatively soft metal block in said bore engaging the threads of the first-mentioned bearing, and a set screw in said transverse bore engaging said soft metal block to secure the wrist joint member against rotation on said bearing without damage to the threads engaged by said soft metal block.

2,445,892

AMINO FATTY DERIVATIVES

Daniel Swern and Thomas W. Findley, Philadelphia, Pa., assignors to the United States of America as represented by the Secretary of Agriculture

No Drawing. Application February 5, 1946, Serial No. 645,696
6 Claims. (Cl. 260—404)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

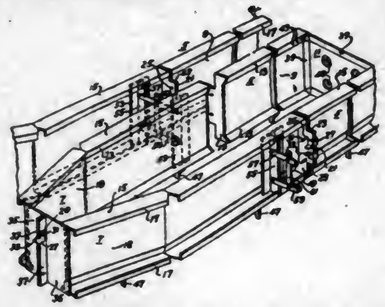
1. A process comprising reacting a compound selected from the class consisting of 9,10-epoxystearic acid and 9,10-epoxyoctadecanol-1 with an aqueous compound selected from the class consisting of ammonia, methylamine, ethylamine, dimethylamine, diethylamine and phenylamine to produce a compound selected from the class consisting of stearic acid and octadecanol-1, said produced compound being substituted on the ninth and tenth carbon atoms by a hydroxyl group and a group selected from the class consisting of amino, methylamino, ethylamino, dimethylamino, diethylamino and phenylamino.

2,445,893

WELL DRILLING MUD AND PROCESS

Gerald B. Tjoflat, Mount Lebanon, Pa., assignor to Hall Laboratories, Inc., Pittsburgh, Pa., a corporation of Pennsylvania

No Drawing. Application February 18, 1944, Serial No. 522,973
14 Claims. (Cl. 252—8.5)



11. A drilling fluid comprising an aqueous suspension of clay and containing about 0.10% to 0.40% based on the weight of said drilling fluid of at least one water-insoluble crystalline alkali-metal metaphosphate, and at least one water-soluble compound selected from the group consisting of compounds of ammonium and compounds of alkali metals other than the alkali metal of at least one of the water-insoluble metaphosphates in amount to provide from 0.1 to 3 equivalents of ammonia or alkali metal to one equivalent of said water-insoluble metaphosphates.

2,445,894

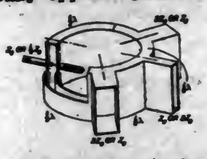
FORM FOR MOLDING CONCRETE PILES

Arthur E. Troiel, Berkeley, Calif., assignor to Troiel Companies, Inc., Berkeley, Calif., a corporation of California

Continuation of application Serial No. 406,609, August 13, 1941. This application February 14, 1945, Serial No. 577,863
11 Claims. (Cl. 25—121)

1. A self-sustaining side wall component for a pile form, comprising a substantially rectangular web having inwardly directed chamfer strips along the upper and lower edges thereof, and including a relatively thin end wall at one end of said web, shaped to conform to the end contour offered by said web and chamfer strips, and having a lateral offset in substantially the plane of said end wall to provide an offset shoulder below the upper edge of said side wall component.

2,445,895



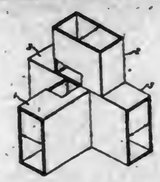
COUPLING ARRANGEMENT FOR USE IN WAVE TRANSMISSION SYSTEMS

Warren A. Tyrrell, Fairhaven, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York

Application December 31, 1942, Serial No. 470,810
13 Claims. (Cl. 178—44)

1. A device for enabling efficient transmission of wave power between certain and for substantially preventing transmission of wave power between others of four transmission circuits comprising an intermediate coupling consisting of another transmission circuit forming a closed transmission loop, means for connecting two of said four transmission circuits symmetrically to geometrically opposite points of the looped circuit, by

a series and a parallel electrical connection, respectively, so as to electrically balance one of said two circuits against the other at a given wave frequency, means for symmetrically connecting the other two of said four transmission circuits respectively to opposite sides of the looped circuit at intermediate points so spaced electrically from said geometrically opposite points thereof as to



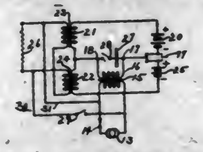
provide the maximum amount of unbalance between each of said other two circuits and each of the first two of said four circuits, the characteristic impedances of said four circuits being proportioned with respect to the characteristic impedance of said looped circuit to provide the optimum impedance matching between said four circuits at said given wave frequency.

2,445,896

DIELECTRIC WAVE GUIDE COUPLING ARRANGEMENT FOR USE IN TWO-WAY SIGNALING SYSTEMS

Warren A. Tyrrell, Fairhaven, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y., a corporation of New York

Original application December 31, 1942, Serial No. 470,810. Divided and this application March 6, 1945, Serial No. 581,285
12 Claims. (Cl. 178—44)



1. In combination in a wave transmission system, a dielectric wave guide adapted for transmission of electric waves of the dominant mode with only one polarization and two wave transmission branches connected to said wave guide at closely adjacent points in the electric and magnetic plane, respectively.

2,445,897

ALTERNATING CURRENT SYSTEM

Philip J. Walsh, San Francisco, Calif.

Application April 29, 1946, Serial No. 665,655
7 Claims. (Cl. 171—97)

3. In combination, a parallel resonant circuit having two branches and a common branch, a source of direct current in each of said two branches, and means including a source of alternating current potential coupled to said common branch to alternately oppose the flow of current from one of said direct current sources while increasing the flow of current through the other direct current source during each cycle, means combining these effects in an output circuit, and means feeding back some of the output power to said common branch to sustain continuous oscillations upon removal of said original source of alternating current potential.

2,445,898

OXIDATION OF BARBITURIC ACID TO ALLOXAN

Wilhelm Wenner, Upper Montclair, N. J., assignor to Hoffmann-La Roche, Inc., Roche Park, Nutley, N. J., a corporation of New Jersey

No Drawing. Application November 20, 1944, Serial No. 564,413
11 Claims. (Cl. 260—257)

1. The process of preparing alloxan which comprises mixing and reacting barbituric acid with an oxidizing agent selected from the group consisting of chromic acid, chloric acid and manganese dioxide in an acid medium so as to produce alloxan.

2,445,899

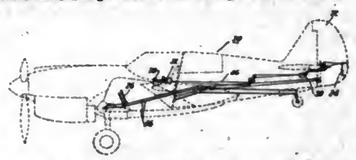
LOOM SHUTTLE

Otis C. Williams, Atlanta, Ga.

Application April 11, 1945, Serial No. 587,715
1 Claim. (Cl. 139—196)

A shuttle comprising an elongated plastic body rectangular-shape in cross section with pointed ends and having a bobbin receiving cavity in the intermediate portion extending through the body from the upper to the lower surfaces thereof to permit passage of a bobbin through the shuttle, a pair of bobbin supporting gripper arms positioned in one end of the cavity and molded into the plastic body, conical-shaped metal points with shanks having ridges thereon providing the ends of the shuttle with shanks thereof molded into the plastic body, and a metal eye providing a thread guide molded into the said plastic body and spaced from one end of the cavity, said plastic having sufficient toughness and tensile strength to insure increased wearing characteristics as compared with other materials.

2,445,900



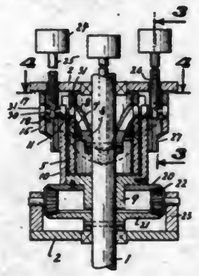
POWER BOOSTER FOR AIRCRAFT CONTROL SURFACES

Franklin O. Wisman, South Bend, Ind., assignor to Bendix Aviation Corporation, South Bend, Ind., a corporation of Delaware

Application February 20, 1943, Serial No. 476,509
4 Claims. (Cl. 244—82)

1. In an airplane, a control surface, manual means for moving said surface, an auxiliary sur-

face mounted on said control surface and manually and automatically movable relative thereto, power means for automatically altering the position of said auxiliary surface relative to the control surface when the force for moving the control surface manually varies beyond a predetermined limit, whereby said control surface is also caused to move, said power means including a planetary gear and an electric motor drivably connected to the planetary gear, a control circuit for the electric motor and including a device responsive to the predetermined force

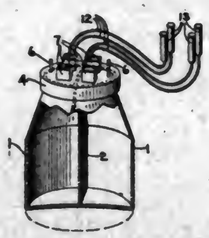


applied to the manual means tending to move said control surface to thereby energize said motor to cause said auxiliary surface to be moved, a switch mechanism in the control circuit, manually adjustable indexing means operatively connected with the switch for preselecting the maximum displacement of said auxiliary surface for a desired flight attitude at the conclusion of a maneuver, and a hand wheel operatively connected through the planetary gear to said auxiliary surface for manually changing its position relative to the main surface.

2,445,901
METHOD OF SEATING PISTON RINGS IN INTERNAL-COMBUSTION ENGINES
Henry A. Ambrose, Penn Township, Allegheny County, Pa., assignor to Gulf Research & Development Company, Pittsburgh, Pa., a corporation of Delaware
No Drawing. Application June 19, 1945, Serial No. 600,408
7 Claims. (Cl. 252—25)

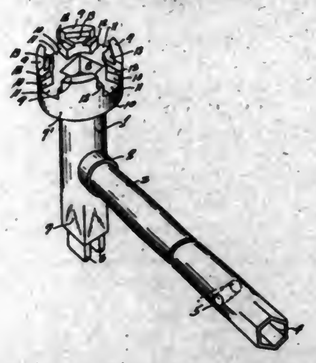
1. A method of seating piston rings in an internal combustion engine comprising operating the engine while the crankcase thereof contains a lubricating oil in which is dispersed from 0.1 to 1.0 per cent by weight (based on the lubricating oil) of a finely divided solid inorganic material having abrasive qualities and a particle size not greater than 0.1 mm.

2,445,902
ENGINE DRIVE
Joseph D. Bell, San Francisco, Calif.
Application March 26, 1945, Serial No. 584,876
8 Claims. (Cl. 74—56)



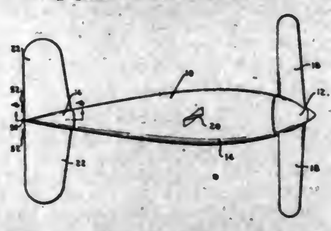
1. In an engine drive, a shaft having a cylinder mounted thereon, two spaced cam tracks in the cylinder, a cap revolvable about one end of the cylinder and having a cam track thereon in cooperative relation to one of the cylinder tracks, a sleeve fixed to the cap so as to surround the same in spaced relation thereto and having a cam track in cooperative relation to the other cylinder track, and a drive pin mounted for rectilinear motion between the cap and the sleeve and in driving relation with all of the tracks.

2,445,903
ENGRAVING MACHINE
Louis Bentzman, New York, N. Y., assignor to Accmatool Co., Inc., New York, N. Y., a corporation
Application April 1, 1946, Serial No. 658,675
5 Claims. (Cl. 90—62)



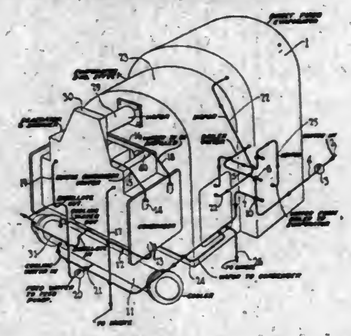
1. In an engraving machine, the combination of a holder, an engraving tool having a cutting tip and being mounted for rotation about its longitudinal axis in said holder, two stop members on opposite sides of the cutting tip of said tool equally spaced from the longitudinal axis of the latter, and means carried by said holder for supporting said members for movement longitudinally of said tool and for drivingly connecting said members so that they move equal amounts in opposite directions on moving either member in either direction, said members being adapted to contact a surface to be engraved of an article when the tip of the rotating tool cuts into said surface to a predetermined depth.

2,445,904
MILKING MACHINE
Albert C. Bloemers, Holland, Mich.
Application February 11, 1946, Serial No. 646,866
7 Claims. (Cl. 31—58)



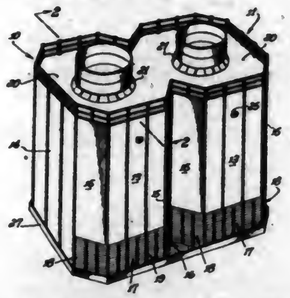
1. A valve construction comprising a sealed chamber, an outlet opening leading from the chamber, a valve for closing and sealing the outlet opening, a fluid inlet leading into the chamber, a movable impact member adapted to be moved on impact of fluid thereagainst entering through the inlet, means for moving the valve to open position when the impact member is moved and yieldable means for moving the valve to closed position.

2,445,905
RIGID JAW WRENCH WITH INSERTABLE AUXILIARY SOCKET
Lewis L. Busby, Cheney, Wash.
Application December 3, 1945, Serial No. 632,428
1 Claim. (Cl. 81—121)



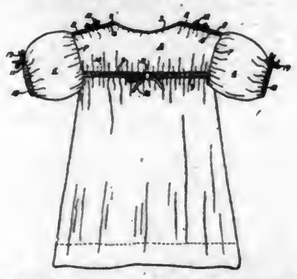
A bung remover comprising a body having an enlarged end portion forming a head of greater diameter than the body, blocks projecting outwardly from the peripheral portion of the head longitudinally of the body, said blocks having inner side portions formed with transverse recesses of less depth than the blocks constituting portions of a socket formed by all of the blocks, said body being formed with a socket leading from its headed end and located centrally of the head, and an auxiliary socket of an external diameter adapting it to fit snugly within the socket formed by the blocks, said auxiliary socket having a shank of dimensions adapting it to fit into the socket leading from the head and removably mount the auxiliary socket.

2,445,906
FLYING TOY HELIPLANE
John Chizmadia, Detroit, Mich.
Application November 29, 1946, Serial No. 712,988
4 Claims. (Cl. 46—78)



1. A flying toy heliplane comprising an elongated fuselage having a nose section, a main body section and a tail section arranged on a common axis, said nose and tail sections being arranged to swivel on said axis relative to said body section, a pair of oppositely rotatable wing systems, one of said wing systems comprising a plurality of blades mounted on said nose section and projecting laterally therefrom and the other of said wing systems comprising a plurality of blades mounted on said body section and projecting laterally therefrom, means arranged within said fuselage and connected to said nose and body sections and operable for rotating the same relative to each other so as to rotate said blades in opposite directions in order to propel said heliplane in flight, said tail section having laterally and oppositely extending tail surfaces and a depending rudder which is weighted so as to maintain said laterally extending tail surfaces horizontal during flight, said laterally extending tail surfaces having tabs projecting from the rear edges and away from the surface thereof.

2,445,907
WATER STILL WITH DEAERATOR
Howard C. Davis, Elizabeth, and William H. Thompson, Chatham, N. J., assignors to Davis Engineering Corporation, Elizabeth, N. J., a corporation of Delaware
Application February 27, 1942, Serial No. 432,612
5 Claims. (Cl. 202—177)



5. A distillation unit comprising, in combination, evaporating means, a water cooled condenser to which vapor from the evaporating means is conducted to be condensed into distillate, a water-operated cooler connected to said condenser to receive the distillate therefrom, and means for supplying deaerated and heated water to said evaporating means including a pump operable to draw water from a source and discharge the same to said cooler at a rate greatly in excess of the feed water requirements of said evaporating means, a conduit leading from said cooler to said condenser for conducting the partially heated water to said condenser for further absorption of heat while reducing the vapor in the condenser to distillate, a deaerator having a first, a second and a third compartment, with the second and third compartments operable to maintain a reserve of liquid, a conduit tapped into the coolant water circuit of said condenser at a point in advance of the end thereof and discharging to the second compartment of said deaerator and designed to take off the major part of the coolant flowing through said condenser, a conduit tapped into the coolant water circuit of said condenser at the end thereof and discharging to the third compartment of said deaerator, the rate of discharge being in excess of the feed water requirements of said evaporating means, said third compartment overflowing into the first compartment, and said second compartment providing a reserve operable to flow into said first compartment if the overflow from said second compartment is insufficient to maintain the water in the first compartment at a predetermined level, a feed water conduit leading from the bottom of said first compartment to said evaporating means, a pump in said conduit continuously supplying feed water to said evaporating means at a rate in excess of the evaporation thereof, and means for permitting a continuous blow down from said evaporating means.

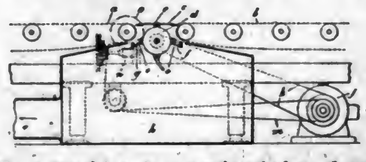
2,445,908
MECHANICAL DRAFT WATER-COOLING TOWER
James G. De Flon, Los Angeles, and George W. Meyer, North Hollywood, Calif., assignors to The Fluor Corporation, Ltd., Los Angeles, Calif., a corporation of California
Continuation of application Serial No. 599,682, June 15, 1945. This application May 23, 1947, Serial No. 749,987
6 Claims. (Cl. 261—23)

1. A mechanical draft water cooling tower comprising walls forming a succession of alined cells, adjacent cells being separated by a common wall, means for mechanically inducing air flow upwardly through said cells, the side walls of the cells having portions extending inwardly of the tower at said common wall of successive cells, said inwardly extending portions of the walls containing inlets at the bottoms of the cells through which air is drawn into the cells, and said side walls above the inlets being of closed formation.

2,445,909
CHILD'S GARMENT
Lyn H. De Vries, San Jose, Calif.
Application April 24, 1946, Serial No. 664,610
1 Claim. (Cl. 2—75)

A child's garment comprising front and back portions connected by shoulder portions and having a neck opening and sleeve openings, a pair of front draw strings having fixed ends secured at points adjacent the sleeve openings and loose ends meeting for tying at a point between the sleeve openings, a pair of back draw strings having fixed ends secured at points adjacent the sleeve openings substantially opposite the front draw strings and having loose ends meeting for tying at a point between the sleeve openings, and a pair of shoulder draw strings in each shoulder portion with fixed ends secured adjacent the sleeve and neck openings respectively and loose ends meeting for tying at points between the sleeve and neck openings.

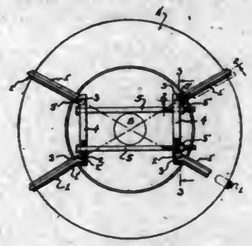
2,445,910
TOE COUPLING FOR ARTIFICIAL FEET
Charles Dumelin, Detroit, Mich.
Application March 8, 1946, Serial No. 653,098
2 Claims. (Cl. 3—6)



1. A toe coupling adapted to be inserted between a toe section and an arch section of an artificial foot comprising a soft rubber cushion with the outer contour lines to conform with the shape of the foot, the opposite faces having shoulders adapted to be seated in recesses of the toe and foot construction, means comprising a control lever with a ball shaped end inserted through a counter sunk hole in a retainer plate and rotate thereabout to control the toe movement, said retainer plate being secured into a recess of the artificial foot, the other end of the lever being tapped and extending through the rubber cushion, a set screw received by the tapped end of the lever and holding the toe section about the rubber cushion to provide a resilient walking movement.

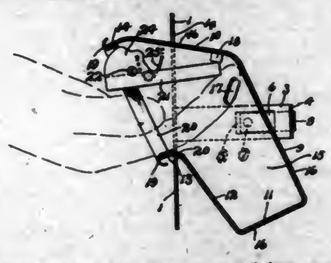
2,445,911
PROCESS OF ACETYLATING TRIETHYL CITRATE
Charles H. Fisher, Abington, Pa., and Martin L. Fein, Riverside, N. J., assignors to the United States of America as represented by the Secretary of Agriculture
No Drawing. Application March 21, 1946, Serial No. 656,123
1 Claim. (Cl. 260—484)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

A process of acetylating tri-ethyl citrate comprising reacting said citrate with acetic anhydride by continuously introducing said citrate and said anhydride into a continuous still, the lower portion of which still is at a temperature of 210° to 235° C., continuously distilling the reaction mixture of said ester and anhydride, maintaining the upper part of the still at such temperature that acetic acid distills off, the acetylated citric acid ester collecting in the still.



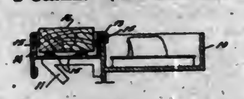
2,445,912
COTTON BALE MIXING AND OPENING MACHINE
Walter Frost, Rochdale, England
Application February 6, 1946, Serial No. 645,877
In Great Britain February 26, 1945
4 Claims. (Cl. 19—80)

1. In a machine for opening bales of cotton, two conveyors of the endless band type, arranged horizontally and in line with one another, the distance between the ends of the conveyors being less than the length of a bale, a toothed cylinder arranged between the conveyors, with its teeth



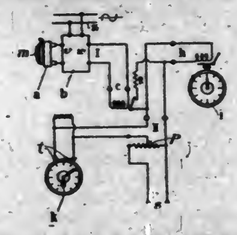
projecting slightly above the level of the conveyors, means for driving the conveyors to convey a bale of cotton from one conveyor over the toothed cylinder to the other conveyor, and means for rotating the toothed cylinder so that its teeth detach and open out a layer of cotton from the bottom of the bale as it passes from one conveyor to the other.

2,445,913
MUD AND SNOW HOOKS FOR VEHICLE TIRES
Harry W. Grosjean and Elmer M. A. Sizer, Milwaukee, Wis., and Andrew Zinda, Portland, Oreg.
Application May 6, 1946, Serial No. 667,604
2 Claims. (Cl. 152—225)



1. In a wheel having a pneumatic tire; a traction attachment therefor comprising pairs of tread shoes, radially disposed legs extending therefrom, a yoke in pivotal union with each pair of shoe legs, spaced threaded end tie-rods connecting the yokes, and nuts in threaded connection with the tie-rods for tightening or loosening the shoes relative to the tire tread.

2,445,914
ASH RECEIVER
Cornelius Hendricks, Grand Rapids, Mich., assignor to Applied Arts Corporation, Grand Rapids, Mich., a corporation of Michigan
Application September 11, 1944, Serial No. 553,512
1 Claim. (Cl. 220—18)



A structure as described comprising, a vertical support having an opening therethrough, a receptacle removably inserted through said opening having a well portion back of and below said opening and a forwardly and upwardly inclined portion with a vertically positioned entrance opening in substantially the same plane as the opening in said support, a stirrup member secured to said support having spaced arms connected therewith, said arms extending rearwardly from the support one at each side of the receptacle and a cross member connecting said arms at their rear ends, and interengaging means carried by said stirrup member and the sides of the receptacle for yieldingly retaining the receptacle in position, said sides of the stirrup member having openings therein, spring members connected with the stirrup member having free end portions passing through said openings, said sides of the receptacle having ribs pressed outwardly therefrom, and said spring members having projections extending inwardly therefrom to engage said ribs and yieldingly hold the receptacle in position.

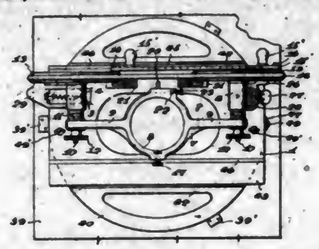
2,445,915
CUTTING BOARD FOR STEAM TABLES
Angelo Karry, Denver, Colo.
Application July 9, 1945, Serial No. 603,872
1 Claim. (Cl. 146—215)

Means for supporting articles of food upon a steam table for cutting and slicing purposes, comprising: an elongated, rectangular tray bottom; end walls arising from the extremities of said bottom; side walls arising from the sides of said bottom and joining said end walls, the upper edges of said end walls and said side walls extending outwardly; an apron extending downwardly from each end wall and one of said side walls, the lower edges of said aprons being aligned on a horizontal plane below said bottom; a hook-like flange formed along the outwardly extending upper edge of the other side wall in parallel relation to the latter and adapted to receive and extend over the edge of the steam table throughout the length of said other side wall; a plurality of bosses formed in and extending upwardly from said bottom; a plurality of similar bosses formed in and extending inwardly from said side and end walls, said bottom, walls, aprons, and said hook-like flange being formed integrally from a single sheet of sheet metal; and a wooden block resting upon and against said bosses, said block having a thickness sufficient to elevate its upper surface above the plane of the outwardly extending upper edges of said side and end walls.

2,445,916
WATCH TIMING APPARATUS
Jean L'Eplattenier, La Chaux de Fonds, Switzerland
Application December 21, 1943, Serial No. 515,166
In Switzerland January 22, 1943
3 Claims. (Cl. 73—6)

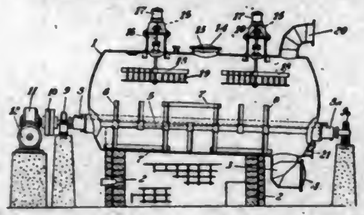
1. In a watch timing apparatus, a relay, sound responsive means for transmitting to said relay electrical impulses corresponding to the beats of a watch to be tested; a standard watch provided with a pair of electrical contacts actuated in synchronism with the beats thereof; a time registering mechanism, electromagnetic means effec-

tive to start, stop and reset to zero said time registering mechanism in response to successive energization thereof; an electric circuit including in series, said pair of contacts, said electromagnetic means and a source of current; a resistance incorporated in said circuit and normally effective to reduce the current flowing through said electromagnetic means to a value insufficient to cause operation thereof; and means effective upon the actuation of said relay to nullify the current reducing effect of said resistor whereby the electro-magnetic means is actuated only when the beat of the test watch coincides with the beat of the standard watch.



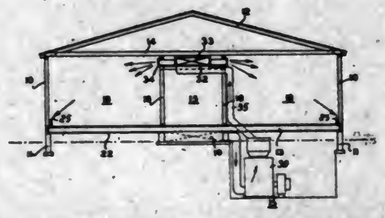
2,445,917
BLOOD PRESSURE STETHOSCOPE
John M. Mallory, Endicott, N. Y.
Application January 24, 1945, Serial No. 574,413
3 Claims. (Cl. 181—24)

1. A blood pressure stethoscope comprising a rectangularly-shaped body having a sounding chamber, said body being adapted to fit transversely in the inner groove side of the elbow joint and to receive pulsations from the blood vessels in the arm, a strap extending from one end of the body and having a central row of eyelets therein arranged along the length of the strap, a pair of elastic straps secured to the other end of the body and being crossed over each other a short distance from the body, said elastic straps passing around the arm and being spaced from the elbow point and having their free ends secured together, and a hook carried at the ends of the elastic straps and being removably receivable in the desired eyelet for yieldingly holding the body in the elbow groove while permitting flexing of the arm.



2,445,918
CORE BOX CUTTER
Olen L. Miller, Washington, D. C.
Application July 19, 1944, Serial No. 545,711
11 Claims. (Cl. 144—136)

1. A device of the character described including an auxiliary support adapted for rotation relative to the work to be operated upon, a plate slidable on said auxiliary support, a base member slidable on said plate, the auxiliary support, plate and base member each having an opening therethrough for register each with the other, spaced standards carried by the base, a yoke movably connected to said standards for movement in a vertical plane throughout 360°, a motor-driven tool mounted in said yoke for movement therewith, and means for actuating the yoke and



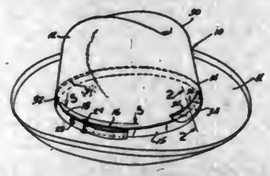
thereby the tool through all of said openings into engagement with the work.

2,445,919
APPARATUS FOR COOKING RESINS
William Arthur Mitchell, Buckland, Betchworth, England
Application April 12, 1945, Serial No. 588,036
In Great Britain February 24, 1944
1 Claim. (Cl. 23—290.5)

Apparatus adapted for use in heat treating natural resins and particularly copal, comprising a closed cylindrical vessel having an inclined axis to the horizontal, a furnace setting in which the cylindrical vessel rests so that only the under portion of the vessel is heated, with the lower end of the vessel extending out beyond the setting, an inlet for the material to be treated adjacent to the upper part of the vessel, an outlet for the withdrawal of the molten resin in the lower portion of the lower end wall of the vessel, a well dependent from and opening into the lower bottom portion of the vessel external to the furnace setting, and an agitator provided in the portion of the vessel which is substantially within the setting.

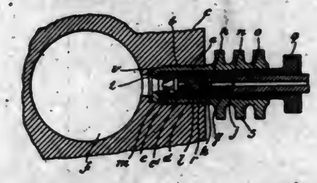
2,445,920
COMBINED BUILDING STRUCTURE AND HEATING SYSTEM
Arthur A. Olson, Youngstown, Ohio
Application February 22, 1944, Serial No. 523,395
1 Claim. (Cl. 98—33)

In a building structure having outer side walls and a corridor formed of spaced partition walls



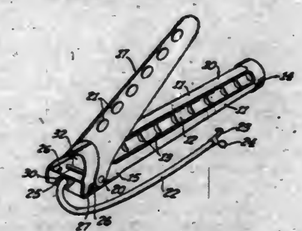
defining enclosures on either side of said corridor, foundation walls below said outer side walls and said partition walls and being substantially coextensive therewith, floor joists extending between the outer foundation walls and transversely of said corridor and extending across the top of the foundation walls below said partition walls, a heating and ventilating air source, means comprising a duct positioned in the upper portion of said corridor for distributing air from said source throughout said enclosures, cover means secured to the bottom surface of said joists intermediate the outer side foundation walls and the foundation walls below said partition walls to provide air duct means between said joists, means providing communication between the lower outer portions of said enclosures and spaces between said joists at points spaced along said outer walls whereby return air may be drawn from said enclosures into the space between the foundation walls below said partition walls, and means to conduct air from said last mentioned space to said heating and ventilating air source.

2,445,921
HEADBAND CONNECTOR
Frank Ostolaza, Florissant, and Glenn Ellery Holmes, St. Louis, Mo., assignors to Mexican American Hat Company, St. Louis, Mo., a corporation of Missouri
Application August 29, 1946, Serial No. 693,723
3 Claims. (Cl. 2—183)



1. In a hat, a flexible head band having free ends, means mounting the band in the hat and permitting perimetral adjustment of the band for adaptation thereof to a given head size, one free end of the band being provided with an opening therethrough, a tape of flexible material having one end secured to the other free end of said band, and a strip element of a semi-rigid, bendable metallic material arranged along and secured to said tape, said tape and strip element in any perimetral adjustment of the band, being insertible through said opening and serving upon bending of the strip element substantially upon itself, to connect the ends of the head band.

2,445,922
ADJUSTABLE HATBAND
Frank Ostolaza, Florissant, and Glenn Ellery Holmes, St. Louis, Mo., assignors to Mexican American Hat Company, St. Louis, Mo., a corporation of Missouri
Application August 29, 1946, Serial No. 693,724
2 Claims. (Cl. 2—179)



1. In a hat having a brim and crown, a flexible hat band surrounding the lower part of the crown and providing opposed end portions, a semi-rigid bendable metal strip, one of said band end portions being lapped over said strip with the strip and lapped portions of the band end secured together, and a loop provided on the other band end portion, through which the first said band end portion including said metal strip, is projected and looped thereover in band assembly.

2,445,923
FUEL INJECTION DEVICE FOR INTERNAL-COMBUSTION ENGINES
Edward Philip Paxman, Colchester, England
Application June 26, 1944, Serial No. 542,176
In Great Britain April 22, 1943
3 Claims. (Cl. 137—53)

1. A fuel injection device for an internal combustion engine of the compression-ignition type, comprising a casing, a valve seat formed centrally at the inner end of said casing, a valve component mounted within said casing providing a surrounding annular passage between it and the casing and comprising a substantially cylindrical member composed of solid compressible material, a conical tip composed of heat-resistant material carried by the inner end of said valve component and adapted to engage said seat, a fuel delivery pipe secured to said casing in axial alignment with said valve component, a central inlet passage and radial ports in said valve component through which fuel from said delivery pipe passes to said annular passage and said valve seat, and means for exerting pressure on the outer end of said valve component through said delivery pipe, the tip having an effective area exposed to hydraulic pressure in said annular passage which is larger than the area of said central inlet passage, and the valve component being inherently compressible axially by hydraulic pressure in said annular passage acting on said effective area of the tip to disengage the tip of the valve component from the valve seat.

2,445,924
HAIR CURLER
Rudolph E. Ratliff, Los Angeles, Calif.
Application August 26, 1946, Serial No. 693,018
9 Claims. (Cl. 132—42)

5. A hair curler which includes: a tubular body portion having longitudinally extending ridges and grooves therein, said ridges being adapted to support hair wound upon said body portion,

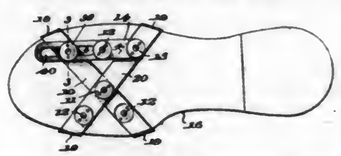
and said grooves having holes therein through which air may pass; a cylindrical member at one end of said body portion and coaxial therewith; a smaller cylindrical member at the other end of said body portion and coaxial therewith; a finger pivotally attached to said larger cylindrical member adapted to extend along the length of said body portion on the outside thereof; a cross member attached to said larger cylindrical member at the outer end thereof and having a centrally located hole, said first mentioned cylindrical member having a portion cut away adjacent said cross member to permit a free flow of air through said body portion and said cylindrical members; and a claming member rotatably mounted in said hole and adapted to extend along the length of said body portion and engage said smaller cylindrical member, whereby hair may be wound on said curler and held against unrolling by said clamping member.

2,445,925

ACRYLIC ESTERS OF SECONDARY ALCOHOLS

Chessie E. Rehberg, Glenside, and Charles H. Fisher, Abington, Pa., assignors to the United States of America as represented by the Secretary of Agriculture

No Drawing. Application July 7, 1944, Serial No. 543,933
11 Claims. (Cl. 260—486)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



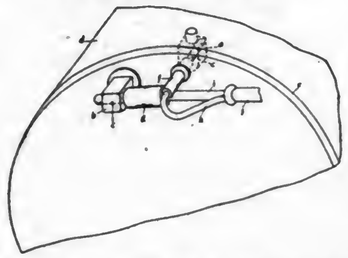
1. The process of preparing unsubstituted acrylic acid esters of secondary alcohols which comprises reacting a molar excess of a lower alkyl acrylate corresponding to the acrylic ester desired with a secondary noncyclic alcohol of the structure RCHOHR' in which R and R' are alkyl groups in the presence of an esterification catalyst and a polymerization inhibitor, and removing the resulting lower alcohol as it is formed during the reaction in the form of an azeotrope of the lower alcohol in the lower alkyl acrylate.

2,445,926

DETACHABLE SHOE CLEAT

Melvin A. Robinson, Washington, D. C.

Application October 15, 1946, Serial No. 703,385
3 Claims. (Cl. 36—7.7)



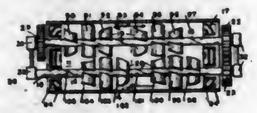
1. A detachable shoe cleat comprising a pair of swingably connected elements having integral sole gripping clips, one of said elements having an opening spaced from the point of swingable connection, the other element having a part provided with an elongated slot overlying said opening, and means for holding said elements in adjusted position comprising a threaded socket passing through said opening and slot, the socket having at one end an integral disc engaging the outer face of the first mentioned element, the disc having upstruck portions passing through the element, and a calk having a threaded shank entering said socket and having an integral disc-like enlargement for fixing the elements in adjusted position.

2,445,927

ELECTRICAL PLUG AND SOCKET CONNECTIONS

Frederick Talbot Shaw, Birmingham, England, assignor to Joseph Lucas Limited, Birmingham, England

Application May 8, 1946, Serial No. 668,102
In Great Britain May 28, 1945
2 Claims. (Cl. 173—328)



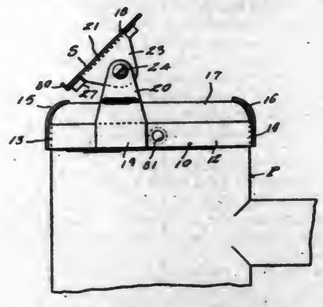
1. Electrical connecting means comprising in combination two pairs of plug and socket components arranged with their axes substantially at right angles to each other, one component of each pair being fixed and the other detachable therefrom, supporting means on which the fixed components are mounted, the detachable components being provided with mutually abutting surfaces whereby one of the detachable components obstructs accidental detachment of the other.

2,445,928

METHOD AND APPARATUS FOR PREPARING IN A GASEOUS MEDIUM PULVERULENT NONCOALESCENT DISPERSIONS

Albert Sommer, New York, N. Y.

Application June 6, 1944, Serial No. 538,924
16 Claims. (Cl. 259—6)



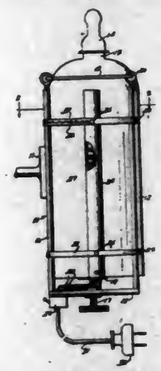
1. An apparatus for preparing a pulverulent, non-coalescent composition of minute units of a solid and minute particles of a plastic attached to one another by impact, said apparatus including a vessel having rotatably mounted therein an impeller system for axial flow and a pressure operated nozzle system, said apparatus further including a drive for said impeller system; said impeller system for moving gaseous medium contained in said vessel as a body in a column, said impeller system having blades shaped, and said drive adapted to drive said blades at a speed sufficiently high so as to create an axially extended sheet-like zone of said medium in vortex movement at the uncovered surface of said column, said blades further adapted to project said units of the solid assembled in said vessel into said zone from the one side, said nozzle system directed towards said zone and disposed at a distance therefrom so as to project from the other side liquefied particles of said plastic into said zone, for causing said units and said particles to collide, whilst, by means of the vortices in said sheet-like zone, they are held suspended in said zone sufficiently long to adhere to one another at the impact as a dispersion without coalescing.

2,445,929

PROJECTOR SLIDE VIEWER

Wayne Sturgess, Salem, Oreg.

Application April 7, 1947, Serial No. 739,820
3 Claims. (Cl. 88—26)



1. A slide viewing attachment for a slide projector having an upwardly directed spill of light, comprising a frame for engagement about the outer side of the projector, means carried by said frame for limiting the downward movement of said frame, a pair of upwardly extending arms fixedly carried by said frame, a slide holder, and means pivotally securing said holder to said arms above the spill of light.

2,445,930

COMBINED BOTTLE HOLDER AND HEATER

Valerian Albert Arens, Portland, Mich.

Application November 22, 1946, Serial No. 711,565
1 Claim. (Cl. 219—19)

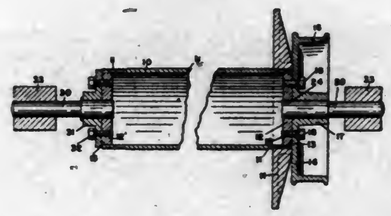
In a combined bottle holder and heater, comprising four corner posts secured together to form a frame, means supported upon the lower ends of said corner posts for supporting a bottle between the posts, and heating means associated with said posts for heating the bottle when in position between the latter, the features which include a bracket secured to the two rear posts, a pair of side straps secured to each rear post and the forward post on the same side therewith and terminating at the front posts to provide a clear front opening beween the latter, a tubular member within the straps disposed intermediate and parallel with the front and rear posts upon each side of the frame and containing the heating means, the corner posts being upwardly-open tubes, a group of corner links having depending portions extending removably down into the upper open ends of said tubes and having loops above the latter, and a bottle-retaining cross-wire having the ends thereof engaging the loops of the corner links associated with the front and rear posts upon each side of said frame, said corner links and associated cross-wires being vertically removable from said corner posts to release said bottle from between said posts.

2,445,931

PROCESS OF EXTRACTION FROM VEGETABLE MATERIALS

Arthur C. Beckel, Peoria, Paul A. Belter, Pekin, and Allan K. Smith, Peoria, Ill., assignors to the United States of America as represented by the Secretary of Agriculture

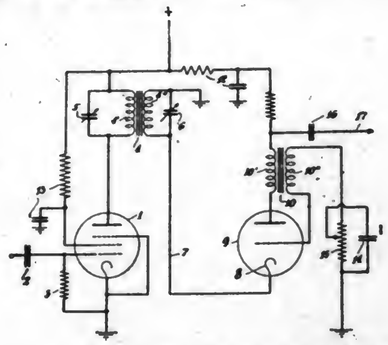
No Drawing. Application May 24, 1946, Serial No. 672,044
6 Claims. (Cl. 260—412.4)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)



1. A continuous process of extracting alcohol-soluble oils from a material of the group consisting of vegetable seeds and nutmeats, comprising subjecting the said material to extraction with hot ethyl alcohol; withdrawing the alcoholic solution; cooling the latter to a temperature that is not above about 20° C. to cause the separation of oil and solids; and separating the alcoholic solution from the oil and solids and reusing the said alcoholic solution, without subjecting the latter to distillation refinement, to extract a fresh batch of said material.

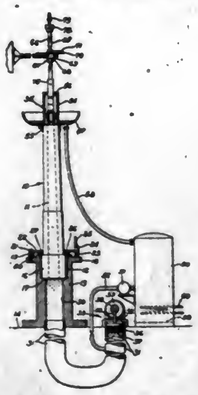
2,445,932

WARP BEAM FOR LOOMS



Carl P. Bergstrom, Millbury, Mass., assignor to Crompton & Knowles Loom Works, Worcester, Mass., a corporation of Massachusetts

Application March 18, 1946, Serial No. 655,158
1 Claim. (Cl. 242—124)



In a warp beam for looms, a metallic tubular barrel, a disklike plate fastened permanently to the interior of the barrel at one end thereof and having a bore therethrough concentric with the axis of the barrel, a fitting having a web transverse of the barrel, screw means for attaching said web to said plate and holding said fitting firmly in position on the plate, a hub integral with the fitting extending laterally from the web and having a substantially cylindrical bore therethrough, and a gudgeon driven into the bore of the hub and extending beyond the web and into the bore of said plate and centering said fitting on the barrel and plate, said fitting being removable from the barrel when said screw means are removed and said gudgeon then being capable of being driven out of said hub.

2,445,933
CONTROLLED BLOCKING TUBE OSCILLATOR
Harold Edward Beste, East Rutherford, N. J., assignor to Allen B. Du Mont Laboratories, Inc., Passaic, N. J., a corporation of Delaware
Application January 23, 1945, Serial No. 574,138
8 Claims. (Cl. 250—36)

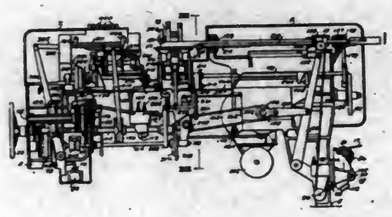
1. In a device of the character described, a vacuum tube having its cathode grounded and having a signal lead connected to its control grid, an inductance and condenser in parallel in its plate circuit, an inductance associated with said first named inductance to provide a transformer, a condenser in parallel with said second named inductance, a vacuum tube to the cathode of which one side of said last named condenser is connected, the other side of said last named condenser being connected to ground, said last named vacuum tube having a resistance and the primary of a transformer in series in its plate circuit, one end of the secondary of said last named transformer being connected to the grid of said last named tube and the other end thereof to one end of a circuit having a time constant and having its other end grounded.

2,445,934
METHOD AND APPARATUS FOR CUTTING INTO THE SURFACE OF AN ARTICLE
Albert G. Bodine, Jr., Burbank, Calif.
Application November 3, 1942, Serial No. 464,406
33 Claims. (Cl. 51—31)

23. In combination in an abrading apparatus: an oscillation member; a sound-wave generator remote from said oscillation member; an elastic medium operatively connecting said sound-wave generator and said oscillation member for transmission of wave energy from said generator to said oscillation member to reciprocate same, the length of said elastic medium being substantially a multiple of one half wave length of the waves in the elastic medium to establish substantially a resonant condition in said elastic medium; and a block of abrasive material operatively connected to said oscillation member to be reciprocated thereby and adapted to engage a surface of an article in abrading relationship.

2,445,935
PRODUCTION OF GREASES
Arnold A. Bondi, New Orleans, La., assignor, by mesne assignments, to Shell Development Company, San Francisco, Calif., a corporation of Delaware
No Drawing. Application October 31, 1945, Serial No. 625,966
21 Claims. (Cl. 252—42)

1. The method of manufacturing a soda base grease comprising forming a mixture of a lubricating base, a material furnishing a non-hydroxy saponifiable fatty material, metallic sodium, acting as a saponifying agent, and an addition agent selected from the group consisting of the higher hydroxy fatty acids and esters thereof; and heating said mixture until saponification, and the grease making reaction are substantially completed.

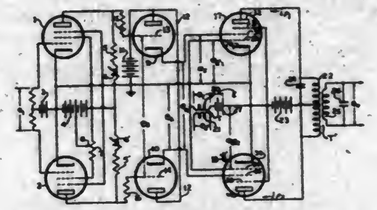


2,445,936
WATERPROOFING OF LUBRICATING GREASES
Richard August Butcosk, New Orleans, La., assignor, by mesne assignments, to Shell Development Company, San Francisco, Calif., a corporation of Delaware
No Drawing. Application April 27, 1945, Serial No. 590,713
13 Claims. (Cl. 252—33.2)

1. A lubricating grease consisting essentially of a major amount of an oil base having present a minor amount, sufficient to form a grease structure, of a metal soap of a fatty acid, at least 70% of said metal soap being an alkali metal soap of a fatty acid, said alkali metal having an atomic weight varying from about 6.94 to 23.0, from about 1% to about 3% of a hydrocarbon sulfonate, said sulfonate being present in an amount at least sufficient to inhibit rusting of a rustable base in contact therewith, which amount of the sulfonate decreases the water-proofing characteristics of the grease, and a metal soap of a 12-hydroxy-stearic acid, the metal of said latter soap appearing in group 2 of the periodic classification of the elements and having an atomic weight between 24.32 and 112.4, said metal soap of 12-hydroxy-stearic acid being present in an amount of between about 1% and about 3% to counteract the action of the rust-proofing agent in decreasing the water-proofing characteristics of the grease.

2,445,937
COIL WINDING MACHINE
David E. Carpenter, Springfield, Mass., assignor to Westinghouse Electric Corporation, East Pittsburgh, Pa., a corporation of Pennsylvania
Application May 9, 1945, Serial No. 592,812
28 Claims. (Cl. 242—1)

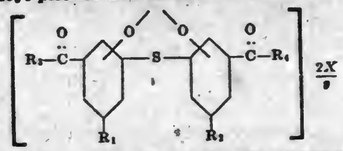
1. A machine for winding coils into the slots of electric machine cores, comprising rotatable chuck means for accommodating a core, a reciprocatory structure having an eye at its working end for the passage therethrough of the wire to be wound, drive means for reciprocating and angularly oscillating said eye so that said eye and the wire issuing therefrom perform a winding motion substantially about a slotted portion of the core, coil-shaping form means disposed to engage the core so as to guide the wire from said eye into the proper slots of the core, means for rotating said chuck means a given indexing angle, control means for alternately operating said drive means and said chuck rotating means, and tension control means engageable by the wire for maintaining the wire at a desired tension during said winding motion.



7. A machine for winding coils into slots of magnetizable cores, comprising a vertically displaceable chuck assembly for accommodating a core, a horizontally reciprocable shuttle structure having an angularly movable eye for the passage therethrough of a wire to be wound, means for driving said shuttle structure so as to impart reciprocation and angular movement to said

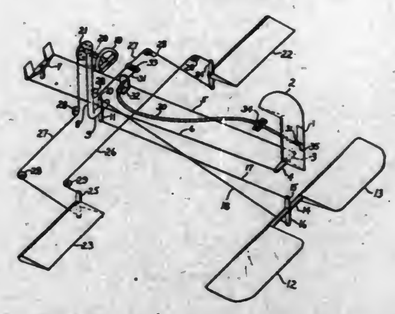
eye in order to have said eye and the wire issuing therefrom perform a winding motion substantially about a slotted portion of the core, a plurality of coil-shaping forms of graduated width each being seatable on the core for guiding the wire into the core slots as the wire issues from said eye during said winding motion in order to produce coils of, respectively, different width, magazine means for accommodating said forms, form transfer means for selectively placing one of said forms onto said core between winding periods of said shuttle structure, means for lowering and lifting said chuck assembly in order to thereby unseat and seat, respectively, one of said forms relative to the core, tension control means engageable by the wire, and means for controlling said tension control means so as to maintain the wire substantially at constant tension during said periods of winding operation while reducing the tension during the periods in which said chuck assembly is moved out of its lifted position, and means for holding the wire down in proper relation to the core during the periods of reduced tension.

2,445,938
DIRECT-CURRENT AMPLIFIER
Robert Terrance Cavanagh, Toronto, Ontario, Canada, assignor to Allen B. Du Mont Laboratories, Inc., Passaic, N. J., a corporation of Delaware
Application May 8, 1947, Serial No. 746,750
12 Claims. (Cl. 179—171.5)



1. An amplifier for low amplitude signals which comprises push-pull pentodes, one of which has its screen grid biased to a higher potential than the other, cathode follower tubes to which the outputs of said pentodes are respectively coupled, a modulator to which the cathodes of

said follower tubes are coupled and means to apply a carrier signal to said modulator.

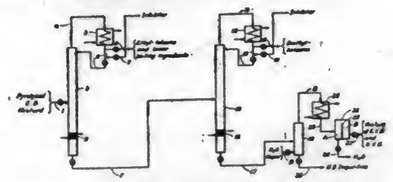


2,445,939
METAL SALTS OF ACYL PHENOL MONOSULFIDES
Elmer W. Cook, New York, N. Y., and William D. Thomas, Jr., Stamford, Conn., assignors to American Cyanamid Company, New York, N. Y., a corporation of Maine
No Drawing. Application October 31, 1941, Serial No. 417,310
6 Claims. (Cl. 260—592)

4. Acyl phenol monosulfides of the formula

in which R_1 and R_2 are alkyl radicals containing 1 to 20 carbon atoms, R_3 and R_4 are members of the group consisting of alkyl and cycloalkyl radicals, X is a salt-forming metal and v is the valence of X.

2,445,940
AILERON-RUDDER TAB LINKAGE
Ralph L. Copeland, Piedmont, Calif.
Application March 20, 1946, Serial No. 655,792
5 Claims. (Cl. 244—83)



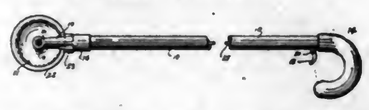
1. An airplane control system comprising ailerons and a rudder or the like, means for positively moving said ailerons, and means for positively moving said rudder, a rudder tab mounted on said rudder, and operating means for said rudder tab connected to the actuating means for said ailerons.

2,445,941

PURIFICATION OF READILY POLYMERIZABLE VINYL AROMATIC COMPOUNDS BY DISTILLATION

Robert R. Dreisbach, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a corporation of Delaware

Application December 27, 1943, Serial No. 515,692
6 Claims. (Cl. 202—46)



1. In a method for recovering a nuclear substituted styrene which is more readily polymerized than styrene from a pyrolysis mixture containing the same, the steps of subjecting the mixture to a series of distilling operations at subatmospheric pressure, alternately in the absence and in the presence of water vapor, such distillation in the absence of water vapor being a fractional distillation in the presence of a polymerization inhibitor to distill lower boiling material from the nuclear substituted styrene, which fractional distillation is discontinued before appreciable polymerization of the residual nuclear substituted styrene occurs, and each distillation together with water vapor being carried out in the presence of a polymerization inhibitor other than the water vapor on the residue from such fractional distillation without water vapor to distill the nuclear substituted styrene from said residue.

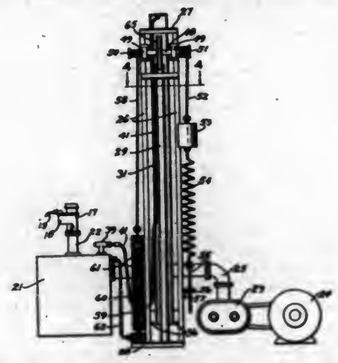
2,445,942

CANE

George B. Dusinberre, Wichita, Kans.

Application January 31, 1947, Serial No. 725,591
3 Claims. (Cl. 135—47)

1. In a walking stick, a tubular staff, a socket with downwardly extending arms mounted on the lower end of the staff, a wheel rotatably mounted in the lower ends of said downwardly extending arms, a braking element slidably mounted in the socket positioned to contact the surface of the roller, means resiliently urging the braking element away from the roller, a trigger pivotally mounted in the upper end of the staff, and a rod pivotally connected to the trigger extending through the staff to the braking element adapted to be actuated by the trigger to move the braking element into contact with the roller for clamping action thereof.



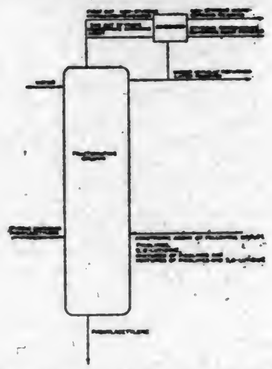
2,445,943

CONDITION RESPONSIVE MOUNTING FOR MEASURING INSTRUMENTS

James L. Edelen, Kirkwood, Mo., assignor to Carter Carburetor Corporation, St. Louis, Mo., a corporation of Delaware

Application January 1, 1944, Serial No. 516,688
6 Claims. (Cl. 73—118)

1. A measuring device comprising a support having an observation window, a scale element and an indicating element movable relative to said scale element for measuring a value, means mounting said elements adjacent said window for movement in unison relative to said support past said window, and differential pressure producing



means for moving said mounting means in accordance with the value being measured but oppositely from the corresponding movement of said indicating element relative to said support so as to maintain said indicating element readily observable through said window.

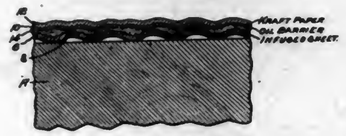
2,445,944

ISOLATION OF STYRENE BY AZEOTROPIC DISTILLATION WITH PICOLINES AND LUTIDINES

Karl H. Engel, Teaneck, N. J., assignor to Allied Chemical & Dye Corporation, New York, N. Y., a corporation of New York

Application January 22, 1946, Serial No. 642,749
23 Claims. (Cl. 202—42)

1. In a method for producing a hydrocarbon oil of high styrene content from an oil containing a lower styrene content and like boiling non-styrene components, the step which comprises fractionally distilling a mixture of such oil and an azeotropic agent of the group consisting of the picolines, 2,6-lutidine, mixtures of the picolines, and mixtures of the picolines and 2,6-lutidine.



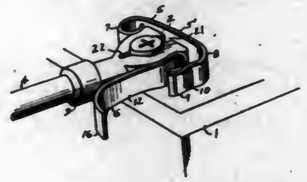
23. The process of separating a mixture of hydrocarbons and an azeotropic agent of the group consisting of the picolines, 2,6-lutidine, mixtures of the picolines and mixtures of the picolines and 2,6-lutidine, which comprises distilling said mixture in the presence of water to distill off an azeotropic mixture of said hydrocarbons with water and thus effect the separation of said hydrocarbons from said agent.

2,445,945

WRAPPING SHEET FOR OIL-SLUSHED METAL ARTICLES

Marshall W. Forrest, Framingham, Mass., assignor to Angier Corporation, Framingham, Mass., a corporation of Massachusetts

Application May 12, 1943, Serial No. 486,726
4 Claims. (Cl. 154—50)



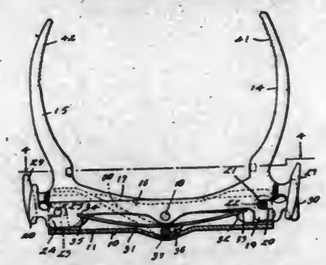
1. A flexible sheet for wrapping oil-slushed metal articles comprising a craped paper base having absorbed into the body thereof a normally solid, flexible impregnant and comprising a neutral resinoid and a permanent oil ingredient compatible with the slushing oil, the base presenting at one side of the sheet for contact with the article a rugose impregnant-bearing non-abrasive and non-tacking surface, the sheet having a stratum impenetrable by oil exterior to said surface, which stratum is undulating to permit its expansion and contraction with the base.

2,445,946

TERMINAL AND CLAMP THEREFOR

Glen Wood Harper, Manhattan, Kans.

Application August 13, 1945, Serial No. 610,620
3 Claims. (Cl. 173—259)



3. In a device of the character described comprising, a cable terminal, said terminal having a head provided with an opening adapted to engage a post of a battery, said head having a longitudinal slot located centrally of said head and providing outwardly extending arms having recessed portions on the outer surface of said head, a clamp for anchoring said terminal to the battery post, said clamp including a body of spring metal having a substantially semi-cylindrical portion adapted to engage in the recess on one side of said head and its opposite end turned transversely inwardly and having a recessed portion on its inner face, and an arm having a hook on one end engaging in said recess on said transversely turned portion and the recess in said terminal for exerting inward pressure on said terminal, said arm having a recess adjacent the hook to conform to the head of said terminal.

2,445,947

COMBINED TIRE CHAIN APPLICATOR AND MUD LUG

Thomas O. Hoppes, Tamaqua, Pa.

Application December 1, 1947, Serial No. 789,086
4 Claims. (Cl. 152—225)

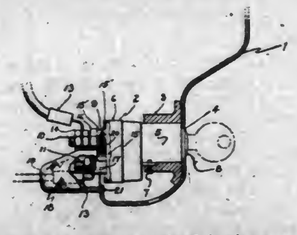
1. A combined chain applicator and tire lug comprising a pair of tire clamping jaws, oppositely extending lever arms carried by said jaws, pivot means securing said arms together between the ends thereof, a hook carried by the free end of each arm, an inverted transversely U-shaped combined cover and traction lug engaging over said arms, a loose coupling between said combined cover and traction lug and the upper ends of said jaws, and a spring constantly urging said jaws to clamping position.

2,445,948

HYDROXYPHOSPHATIDES

Harold Wittcoff, Minneapolis, Minn., assignor to General Mills, Inc., a corporation of Delaware

No Drawing. Application December 4, 1944, Serial No. 566,651
6 Claims. (Cl. 260—403)



5. A phosphatide characterized by improved stability and improved water dispersibility, containing a higher fatty acid group, said fatty acid group having attached to a carbon atom thereof an OX group in which X is the acyl group of a low aliphatic acid.

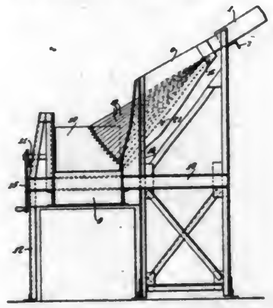
2,445,949

SWITCH TERMINAL GUARD

Edward N. Jacobi, Milwaukee, Wis., assignor to Briggs & Stratton Corporation, Milwaukee, Wis., a corporation of Delaware

Application April 29, 1946, Serial No. 665,880
4 Claims. (Cl. 174—138)

1. A guard for an electrical instrumentality of the type having a wall with a plurality of terminal studs projecting therefrom and adapted to receive wire connectors and fastening means for said wire connectors, said guard comprising: a one-piece cup-shaped shell of insulative material adapted to telescope over and completely enclose the projecting portion of one of the terminal



studs of the instrument and the fastening means associated with said stud; and an external flange integral with said shell and projecting to one side thereof to be engageable by the fastening means on an adjacent stud for securement of the guard in place on its terminal with the shell obstructing access to said fastening means on the adjacent stud from the side of the shell remote from the flange thereon.

2,445,950

CONVEYER SWITCH

William S. Jennings, Richmond, and Walter Rowland, Petersburg, Va., assignors to Allied Chemical & Dye Corporation, a corporation of New York

Application June 13, 1945, Serial No. 599,204
10 Claims. (Cl. 193—31)

5. A conveyer comprising an inclined main chute, two delivery chutes extending in opposite directions at angles to the discharge end of the main chute, a hinged chute disposed between said two delivery chutes, and a plurality of bars extending in substantially the same longitudinal direction as the main chute and connecting the main chute with the hinged chute, the ends of the bars remote from the main chute resting on said hinged chute, the plurality of bars being constructed and arranged so that upon movement of the hinged chute to connect with one of said delivery chutes, the bars form a connecting surface communicably connecting the main chute with one of said delivery chutes and upon movement of the hinged chute into operative position with respect to the other of said delivery chutes the bars form a connecting surface communicably connecting the main chute with the other of said delivery chutes.

2,445,951

METHOD OF PRODUCING WELDED JOINTS

Theodore E. Kihlgren, Scotch Plains, and Charles E. Lacy, Westfield, N. J., assignors to The International Nickel Company, Inc., New York, N. Y., a corporation of Delaware

No Drawing. Application December 26, 1946, Serial No. 718,620. In Canada October 25, 1946
12 Claims. (Cl. 219—8)

1. In the method of producing welded joints between adjacent members made of nickel-chromium-iron alloys containing about 30% to 80% nickel, about 10% to 20% chromium, and the balance mainly iron with a welding element of similar composition containing at least 0.15% silicon, the improvement which comprises incorporating in said welding element a columbium content up to 8%, controlling the content of columbium to provide a critical minimum ratio of columbium to silicon in a fusion deposit made by the welding element, the ratio of columbium to silicon in said fusion deposit being so proportioned to the iron content thereof that the minimum ratio with 0.1% iron is about 3.84 to 1, the minimum ratio with 50% iron is about 8 to 1, and the minimum ratio with intermediate amounts of iron is between said values and is higher as the iron content increases in said range, whereby welded joints substantially devoid of hot cracks are produced.

2,445,952

SEALING RING

Henning Lagergren, Montgomery, N. Y.

Application November 19, 1946, Serial No. 710,846
1 Claim. (Cl. 288—20)

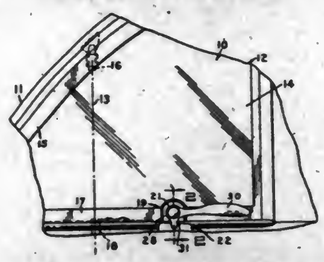
A sealing ring for jars, comprising an annular gasket formed from resilient material, and an outwardly projecting tongue formed integrally at the outer edge of said gasket, said tongue having outwardly divergent lateral edges formed with sets of teeth, and being bendable to a longitudinally doubled position wherein the sets of teeth on said edges are disposed in adjacent arcuate rows.

2,445,953

SIGNAL DEVICE

Franklin Arthur Lancaster, Lake Charles, La., assignor of one-half to Le Roy Lambert, Jr., Leesville, La.

Application September 6, 1946, Serial No. 695,308
3 Claims. (Cl. 14—49)



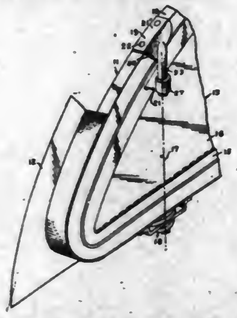
1. A bridge span signal comprising a tubular mounting secured to a pivoted bridge span at a side of a free end portion thereof, a shaft rotatably mounted in said tube and projecting from the outer end thereof, a gear rigidly mounted about the tube, a coupling fitting about the protruding end portion of said shaft, a hanger shaft extending downwardly from said coupling in vertical position, a sleeve rotatably mounted about the hanger shaft, a gear about said sleeve meshing with the first gear and turning the sleeve during vertical swinging movement of the bridge span, a collar secured about the lower end portion of said sleeve, a housing carried by and extending downwardly from said collar and having transparent wall sections of contrasting colors moved into position to be seen by turning of the sleeve and the housing during vertical swinging movement of the span, and a lamp in the housing for displaying a light visible through the wall sections.

2,445,954

VENTILATING WINDOW ASSEMBLY AND LATCH THEREFOR

Guy M. Lane and Harold G. Thunder, Detroit, Mich., assignors to Motor Products Corporation, Detroit, Mich., a corporation of New York

Application September 8, 1947, Serial No. 772,743
4 Claims. (Cl. 296—44)



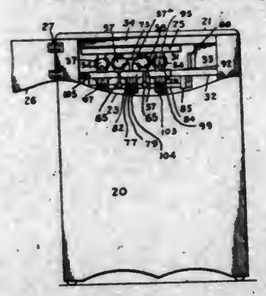
1. A ventilator window assembly comprising a main frame, a ventilator panel supported in the main frame for swinging movement about a generally vertically extending axis, a frame for the ventilator panel having an upwardly opening channel-shaped bottom bar for receiving the lower edge portion of the panel and having a slot in the inner flange of said bar spaced to one side of the axis of swinging movement of the ventilator panel, a bracket having a part occupying a position in said slot and having a portion secured to the base of the channel-shaped bottom bar, a latch arm pivoted to said part and means on the main frame engageable with the arm in one position thereof to secure the ventilator in its closed position.

2,445,955

UPPER PIVOT FOR VENTILATOR PANELS

Guy M. Lane and Harold G. Thunder, Detroit, Mich., assignors to Motor Products Corporation, Detroit, Mich., a corporation of New York

Application September 8, 1947, Serial No. 772,744
5 Claims. (Cl. 296—44)



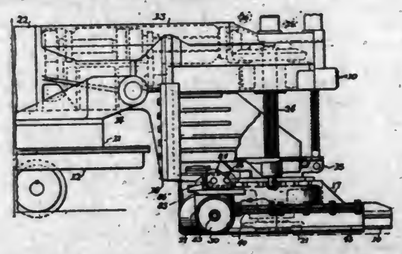
1. A window assembly comprising a window frame, a ventilator supported in the window frame for swinging movement about an up and down axis, a frame for the ventilator having a channel-shaped frame member opening inwardly with respect to the window opening and having an opening in one side wall of the frame member, a bracket having an attaching flange extending into the channel of the frame member through said opening and having a part positioned to one side of the frame member in concentric relation to the axis of swinging movement of the ventilator, means for securing the attaching flange to the base of the channel-shaped frame member, and means secured to the window frame and pivotally engageable with the part aforesaid of the bracket.

2,445,956

BUILT-IN IRONING BOARD

Alpha Perry Lants, Washington, D. C.

Application August 8, 1944, Serial No. 548,523
12 Claims. (Cl. 38—105)

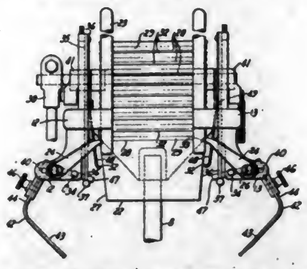


1. The combination with a supporting casing, of an ironing board slidable into and out of the casing, means for propelling the board outwardly, and means normally preventing functioning of the propelling means to retain the board in the casing, said propelling means comprising interfitting members located beneath the board and spring means therein to force the board outwardly.

2,445,957

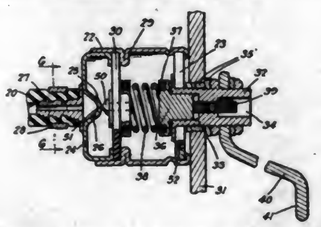
SLACK OR CUTTINGS REMOVING DEVICE FOR KERF-CUTTING MACHINES

Frank A. Lindgren, La Grange, Ill., assignor to Goodman Manufacturing Company, Chicago, Ill., a corporation of Illinois



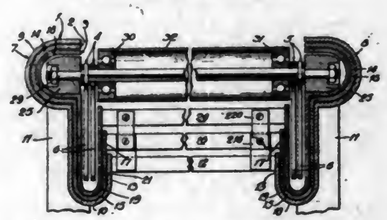
Application May 10, 1946, Serial No. 668,963
9 Claims. (Cl. 262—28)

1. In combination with a kerf-cutting machine adapted to cut along the ground by movement about a vertical axis and having a depending cutter head having a cutter bar projecting therefrom with a cutter chain orbitally movable about said cutter bar, means journaled in said cutter head for driving said cutter chain about said cutter bar including a vertical drive member having a cutter chain drive sprocket mounted thereon, means mounted at the rear end of said cutter head in the path of said cutter chain as it travels about said sprocket for collecting the cuttings cut by said cutter chain including a cuttings discharge conveyor having a casing extending across the rear end of said cutter bar with a screw conveyor element mounted therein, said casing opening towards said cutter chain as it



rounds said sprocket in cuttings' receiving relation with respect thereto, and means for driving said screw conveyor element from said drive member, including a gear mounted on said drive member and driven thereby, a vertical shaft spaced from said gear and journaled in said casing, a selective bevel gear reduction from said vertical shaft to said screw conveyor element, and a spur gear drive from said gear to said vertical shaft.

2,445,958
CONTAINER DISPENSER
Andrew E. Lindstrom, Larkspur, Calif.
Application June 7, 1945, Serial No. 597,993
5 Claims. (Cl. 312—44)

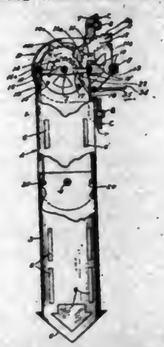


1. In a mechanism for dispensing open containers one at a time from a stack of containers arranged in nested relation with each container having a side portion protruding outwardly from the rim of the container in which it is nested, a frame including means for holding the nested containers in a vertical stack and for vertical displacement, transversely spaced detents mounted on the frame engageable with and to support the containers at opposed sides thereof, said detents being pivoted to the frame and extending upwardly and inwardly from their pivots into operative engagement with the containers so that the weight of the containers will be exerted to force the detents inwardly against the containers with a pressure proportional to the weight of the containers, means operative to effect release of the detents from engagement with the containers, and means operative to support the containers independently of said detents when the detents are disengaged from the containers.

2,445,959
TIRE PRESSURE SWITCH
Harvey R. Luper, Portsmouth, Va.
Application August 18, 1945, Serial No. 611,285
1 Claim. (Cl. 200—58)

A pressure controlled switch for a tire deflation signal comprising a tubular casing, an inwardly extending annular shoulder near one end of the casing, a disk of non-conducting material fixed in the end of the casing remote from the shoulder, an externally screw-threaded mounting stud extending axially through the disk, a clamp nut threaded on the stud for holding the switch on a support, said stud having an axial socket opening through one end and into the casing, a spring seat mounted in the socket for movement axially thereof, a diaphragm of flexible non-conducting material seated against the shoulder, a cover secured in said casing remote from the disk and bearing on the diaphragm to form in conjunction therewith a pressure chamber, means in the cover for admitting fluid under pressure to the chamber, an electrical contact carried by the diaphragm and extending axially therethrough, and a compression spring bearing against the spring seat and bearing on the diaphragm to urge the contact into engagement with the cover when fluid pressure in the pressure chamber falls below a predetermined value.

2,445,960
EXTENSIBLE CONVEYER
Leslie A. Mapes, Palisade, N. J.
Application April 17, 1946, Serial No. 662,717
3 Claims. (Cl. 193—35)

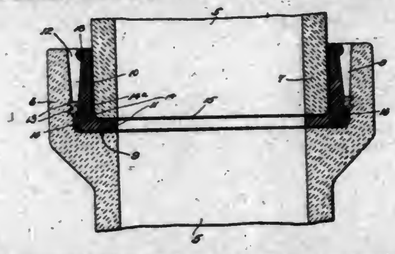


3. In a conveyor, the combination of a plurality of sections, each section including a pair of side casings, the side casings of the successive sections on each side forming a set telescopically slidable into one another, each of said side casings having an upper laterally extending U-shaped portion and a downwardly extending U-shaped portion, crossbars connecting each pair of side casings to one another, cargo supporting rotatable means, shafts operatively associated with said rotatable means, rollers on the ends of said shafts being rotatably mounted in the laterally extending U-shaped portions, chains connected at their ends to the free ends of the end side casings, said chains including links, each link being connected at one end to a shaft and having a slot to slidably receive a succeeding shaft, the slots in said links cooperating with said shafts to enable said sections to be telescoped into one another in closed position when said links will be suspended in said downwardly extending U-shaped portions, the slots also cooperating with said shafts to enable said sections to be extended into expanded or open position, and stops on some of the crossbars engaging adjacent crossbars of adjacent sections in expanded position and engaging other adjacent crossbars of adjacent sections in closed position to determine the open and closed position of the sections.

2,445,961
VEHICLE STOP AND TURN SIGNAL
Masayoshi Matsuda, Cleveland, Ohio
Substituted for abandoned application Serial No. 422,127, December 8, 1941. This application March 7, 1945, Serial No. 581,353
13 Claims. (Cl. 116—52)

1. In a vehicle stop and turn signal, a bracket adapted for attachment to a vehicle, a sectional

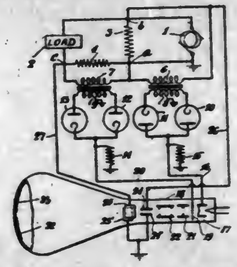
articulated semaphore arm pivoted on said bracket, gearing associated with said bracket and semaphore arm for swinging said arm into signalling positions, including a rocker member movable about its pivot to tilt one section of the arm relative to the other section, rods pivotally connecting said rocker member with said one section, means



for operating said gearing to move the arm about its pivot on the bracket and to operate said rocker member for tilting said one section of the arm relative to the other arm section, and lock means normally holding said rocker member against rocking and responding to predetermined movement of said gearing to release said rocker member.

2,445,962
METHOD OF FORMING SILVER SULFIDE COATINGS
Clifford W. Mell, Moorestown, N. J., assignor to Radio Corporation of America, a corporation of Delaware
No Drawing. Application August 24, 1944, Serial No. 551,063
5 Claims. (Cl. 148—6.30)

1. The method of forming a coating of silver sulphide on a silver surface which comprises first treating said silver surface with a film-forming hydrophilic substance, then drying said treated surface, and then exposing said treated surface to a humid atmosphere saturated with hydrogen sulphide and containing from about 90 percent to about 100 percent humidity until a desired coating of silver sulphide has formed on said treated surface.

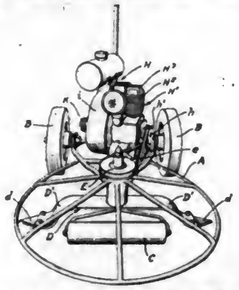


2,445,963
FLEXIBLE JOINT CONSTRUCTION FOR CERAMIC PIPE
Earle T. Montgomery, Columbus, Ohio, assignor, by mesne assignments, to The National Clay Pipe Research Corporation, Logan, Ohio, a corporation of Ohio
Application July 10, 1945, Serial No. 604,239
6 Claims. (Cl. 285—115)

1. Joint construction for ceramic pipe members of the bell and spigot type, comprising a sealing ring of flexible elastic composition having an annular body terminated at one end in a flat-surfaced inwardly directed sealing flange, the latter being positioned upon and adhesively secured to the shoulder of the bell end of one of said pipe members for permanent retention therewith, the inner diameter of the body of said ring being such as to cause it to receive snugly and elastically surround the outer wall surfaces of the spigot end of the complemental pipe member for adhesive union therewith, there being an annular space provided between the outer circumferential wall of said ring and the adjacent inner wall of the bell socket to provide for limited flexing of said ring in unison with

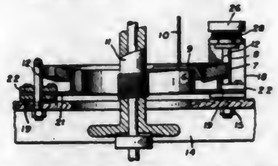
the spigot member and without compression of the material comprising the ring in compensating for coaxial misalignment of the joined pipe members.

2,445,964
CATHODE-RAY POWER INDICATOR
Robert P. Owen, Passaic, N. J., assignor to Allen B. Du Mont Laboratories, Inc., Passaic, N. J., a corporation of Delaware
Application September 15, 1944, Serial No. 554,320
4 Claims. (Cl. 171—95)



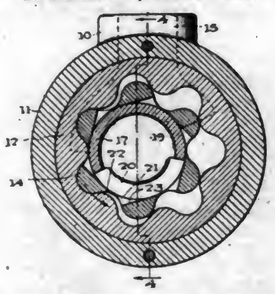
4. A device for indicating the power consumed in an electrical load, which comprises a resistor in series with said load, a resistor in parallel with said load, a transformer primary connected across each of said resistors, respectively, a relay cathode-ray tube having sections of conducting material on the inside face thereof divided into separated insulated sections, means connected from opposite ends of said load to the horizontal and vertical deflection plates of said tube to cause the ray of said tube to be deflected onto said sections in accordance with the power factor of said load, and means comprising another cathode-ray tube which has one of its deflection plates connected to said sections to indicate said load.

2,445,965
POWER LAWN MOWER WITH AIR FILTERING SCREEN
Hezz H. Packwood, Baton Rouge, La.
Application August 7, 1946, Serial No. 688,940
2 Claims. (Cl. 56—25.4)



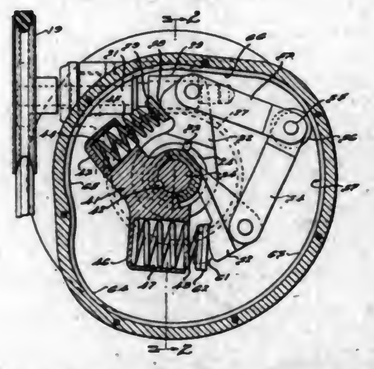
1. In a lawn mower, the combination with the lawn mower framework, of a rotary grass cutter and a motor having a rotating driving shaft mounted in said framework, a motor cooling fan comprising a rotating air impeller carried by said shaft at one side of said motor and a fan casing enclosing said impeller and having an air inlet at the opposite side of the impeller from said motor and having an outlet for the discharge of

cooling air against the motor, and an inlet screen carried by said shaft at the outer side of said inlet opening and extending across the path of air flow through said opening, whereby bodies



which the air drawn into the casing through said inlet tends to carry into the fan casing, are arrested by the screen and when dislodged, pass into the space external to said casing.

2,445,966
ADJUSTABLE RING HOLDER FOR SPINNING MACHINES
Leroy S. Peachey, Kenosha, and Raymond P. Knull, Lake Geneva, Wis.
Application March 5, 1947, Serial No. 732,592
6 Claims. (Cl. 57—122)

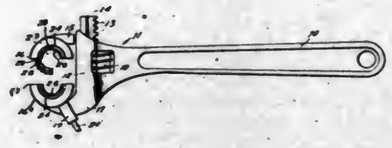


1. A mounting for the ring holder of a spinning machine comprising a support carried by the machine at one side of the ring holder, a bracket vertically adjustable on the support, and horizontally adjustable means connecting the bracket to the ring holder.

2,445,967
ROTARY GEAR PUMP
Reginald J. S. Pigott and Fred E. Fleischer, Pittsburgh, Pa., assignors to Gulf Research & Development Company, Pittsburgh, Pa., a corporation of Delaware
Application March 7, 1945, Serial No. 581,378
14 Claims. (Cl. 103—126)

1. In a rotary pump having a casing provided with an inlet and an outlet, the combination of meshing rotary gears in said casing for transferring fluid from the inlet to the outlet, at least one of said gears being formed with an axial cavity and having inclined ports extending outwardly from said cavity to the spaces between adjacent teeth of such gear, a fixed inlet passage means extending from the pump inlet into the gear cavity and having an outwardly directed opening to which said ports are successively presented in rotation of the gear, said inlet passage means constituting an abutment between the inlet and outlet of the pump.

2,445,968
TRANSMISSION
Henry D. Polie, Detroit, Mich., assignor to The Murray Corporation of America, Detroit, Mich., a corporation of Delaware
Application August 16, 1944, Serial No. 549,689
11 Claims. (Cl. 74—68)

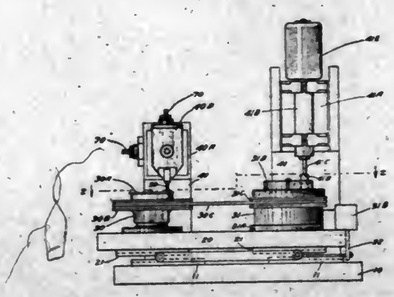


6. A transmission including, in combination, a housing, an external and internal shaft journaled in said housing for rotation, means for driving said external shaft, an arm on said external shaft, a bell crank secured to said internal shaft, an arm journaled for rotation on said internal shaft, a pair of toggle links having their ends pivoted to said arms, a roller pivoted on the toggle links, a cam track within said housing with which said roller engages, and springs disposed between said arms and bell crank for producing a relative rotation between said shafts and for applying a predetermined pressure therebetween through the operation of said toggle links produced by the rotation of the roller over said cam track.

2,445,969
RATCHET WRENCH WITH SEGMENTED SOCKET AND SEPARABLE SOCKET-RECEIVING JAWS
James T. Powell, Atoka, Tenn.
Application March 23, 1945, Serial No. 584,289
2 Claims. (Cl. 81—60)

2. A wrench comprising a handle having a head, said head being bifurcated and the furcations being in spaced parallelism and grooved to provide a keyway, a toothed rack-bar slidable in said keyway, a worm mounted for use in said head and directly coacting with the teeth of the rack-bar for adjusting the latter, an arm extending angularly from said rack-bar and terminating in a work-engaging jaw member, and a second jaw member, the last-named jaw member being integrally connected by an extension with said head,

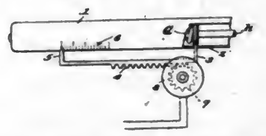
said jaw members being semi-circular in cross-sectional form and, when brought together, forming an elongated cylindrical sectional socket holder, each jaw member having laterally directed end flanges and an intermediate flange intervening between the two end flanges, said intervening flange coacting with an adjacent one of the end flanges in defining between itself and the latter a substantially semi-circular channelway and coacting with the remaining end flange in defining a semi-circular keyway, and a semi-circular cleat attached to said last-named end flange and spanning said keyway and spaced from the inner curvate edge of said intermediate flange and constituting assembling means for a complemental socket section, and a sectional cylindrical work gripping socket mounted for rotation in said holder, the sections of said socket being respec-



tively assembled in said jaw members, each section embodying a semi-circular body portion having an externally disposed semi-circular, outstanding ratchet segment located midway of the transverse ends of said section, having a semi-circular outstanding keying flange at one transverse end, parallel to and spaced from said ratchet segment, the upper inner surface portions of said sections having gripping teeth and the lower inner surface portions of said sections being smooth, the lower portions of said sections being movably confined in their operative positions in said jaw members by said cleats with the keying flanges situated in said keyways and ratchet segments in said channelways, and a spring retained ratcheting plunger mounted for use on one of said jaw members and having its inner end engaging said ratchet segments.

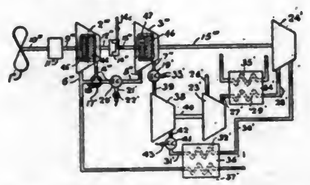
2,445,970
METHOD FOR POLYMERIZING
Robert C. Reinhardt, Midland, Mich., assignor to The Dow Chemical Company, Midland, Mich., a corporation of Delaware
No Drawing. Application July 21, 1944, Serial No. 546,051
2 Claims. (Cl. 260—83)

1. In a method of polymerizing a monomeric substance from the group consisting of vinylidene chloride, vinyl chloride, styrene, vinyl acetate, vinyl butyrate, acrylic esters, methacrylic esters, acrylonitrile, mixtures of vinylidene chloride and vinyl chloride and mixtures of vinylidene chloride and acrylonitrile, the polymerization of which in an aqueous suspension of macroparticles and without the use of emulsifiers is normally characterized by the transition of the suspended particles from a liquid state to a sticky, semi-liquid agglomerative state to a hard granular state, the steps which include: supplying such a water suspension of the monomer continuously to an initial zone at a temperature known to induce polymerization of the monomer, with sufficient agitation to insure thorough mixing of the monomer with the suspension medium, for so long as most of the suspended macroparticles remain liquid and until solid particles begin to appear; displacing continuously from said initial zone a volume of suspension of liquid partial polymer equal to the volume of monomer suspension being supplied thereto; conducting the suspension of predominantly liquid particles from the said first zone into a second zone, isolated from the first, wherein agitation is maintained at a rate greater than that in the first said zone to keep the particles from agglomerating and coalescing to any appreciable extent, the said second zone likewise being at a temperature known to induce polymerization, retaining the suspension in the said second zone while the suspended particles pass from a predominantly liquid to a sticky and agglomerative state and thence to a substantially non-sticky granular condition in their normal process of polymerization; displacing continuously from said second zone a volume of suspension of granular partial polymer equal to the volume of liquid polymer suspension fed thereto; conducting the suspension into a third and final zone after the said non-sticky granular state has been attained but before the amount of monomer in the granules has been reduced below 40 per cent by weight, and continuing the polymerization in the said final zone at a polymerization temperature, with sufficient agitation to maintain suspension but which is less than those used in the first and second said zones and is insufficient to grind the suspended particles to a fine powder, until the desired degree of polymerization is attained; and finally recovering the granular polymer of substantially uniform particle size and composition continuously from the third said zone.



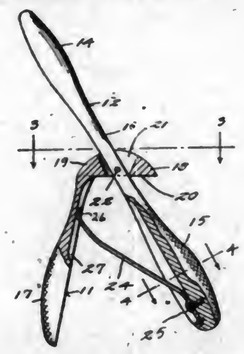
2,445,971
TRACER CONTROL CUTTER OR GRINDER
Oscar E. Rosen, Detroit, Mich., assignor to The Lodge and Shipley Company, Cincinnati, Ohio, a corporation of Ohio
Application October 16, 1944, Serial No. 558,826
3 Claims. (Cl. 51—101)

3. In a cutting machine, a base, a slide movable horizontally thereon, supporting means fixed to said base and having mounted thereon in spaced relation a tracer and a vertically arranged cutter spindle and cutter, a pair of tables mounted for rotation about vertical axes upon said slide, means for continuously rotating said tables at the same speed, means for fixing a template to



one of said tables in position to act on said tracer, means for fixing a workpiece to the other of said tables in position to be acted upon by said cutter, means for longitudinally oscillating the cutter spindle, and means controlled by said tracer for moving said slide in accordance with the action of said template upon said tracer.

2,445,972
MEASURING DEVICE FOR TOWING WINCHES
George William Royster, Portsmouth, Va.
Application March 8, 1945, Serial No. 581,616
1 Claim. (Cl. 73—135)

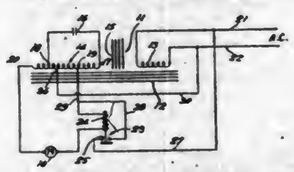


The combination with winch mechanism including a brake wheel, and wheel restraining means including a brake band embracing the wheel, and a spring positioned normally to hold the band and wheel in tight engagement and yieldingly against movement, of a longitudinally slotted housing for the spring, said housing being graduated, a rack mounted for movement longitudinally of and outside the housing, an indicator integral with the rack and overlying the graduations, a rigid connection between the rack and restraining means movable in the slot, a gear actuated by the rack, and an electric indicator circuit including a "Selsyn" generator actuated by the gear.

2,445,973
ROTARY ENGINE POWER PLANT
Robert T. Sawyer, Hohokus, N. J., assignor to American Locomotive Company, New York, N. Y., a corporation of New York
Application April 13, 1944, Serial No. 530,859
5 Claims. (Cl. 60—41)

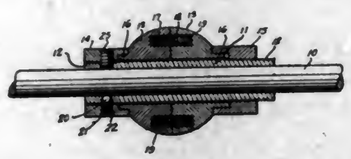
1. A power plant comprising two rotary engines, each of said engines having an exhaust outlet and a supply inlet for power fluid, said engines rotating in opposite directions when each is supplied with power fluid, said supply inlet of one of said engines having controllable means adapted to be opened and closed for respectively supplying and cutting off its said fluid; a power plant main load for said one engine; a load for the other of said engines; and a clutch for coupling and uncoupling said engines, said engines, when uncoupled and when said inlet controllable means of said one engine is open, rotating in said opposite directions, and, when said engines are coupled and said inlet controllable means of said one engine is closed, said other engine rotating in its said direction and reversing the direction of rotation of said one engine and its said load.

2,445,974
PROSTATE MASSAGER
Alfred John Charles Schwartz, Evanston, Ill.
Application April 24, 1947, Serial No. 743,612
4 Claims. (Cl. 128—62)



1. A prostate massage device comprising an elongated member having a handle at one end and an elongated bulbous massage member on the other end, an annular base having a convex surface on one side thereof, a handle extending from said base opposite from said convex side, said base formed with a central opening therethrough, and means pivotally connecting said elongated member intermediate its length to said base in said opening.

2,445,975
SOLUBILIZED ALKARYL SULFONATE COMPOSITION
Norman A. Shepard, Stamford, Conn., assignor to American Cyanamid Company, New York, N. Y., a corporation of Maine
No Drawing. Application May 8, 1946, Serial No. 668,306
2 Claims. (Cl. 252—355)

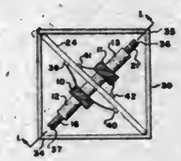


1. An aqueous 10–20% solution of a wetting agent selected from the group consisting of alkali metal and ammonium salts of alkaryl sulfonates containing from 4 to 15 carbon atoms in the alkyl radicals thereof, said solution being stabilized against deposition at low temperatures of about 7° C. to 0° C. by a content of 0.2% to 2.5% of dicyandiamide.

2,445,976
MOTOR CONTROL SYSTEM
Joseph G. Sola, River Forest, Ill., assignor to Sola Electric Company, Chicago, Ill., a corporation of Delaware
Application February 19, 1947, Serial No. 729,563
8 Claims. (Cl. 318—414)

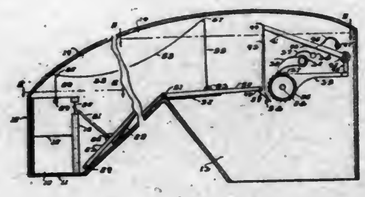
1. In a motor control system for energizing a motor during running from a constant-voltage transformer incapable of supplying from the constant-voltage winding thereof the inrush starting current required by said motor, the combination of means forming a motor circuit permanently connecting said motor to said constant-voltage winding for energization therefrom, means for connecting the primary winding of said transformer to a source of energy, and means operable between open and closed circuit positions for connecting a portion of said constant-voltage winding to said source whereby said constant-voltage winding forms an auto-transformer independent of said primary winding and capable of supplying the inrush starting current to said motor and for disconnecting said portion of said constant-voltage winding from said source when said motor attains a predetermined speed.

2,445,977
TAP WRENCH
John L. Stark, Chicago, Ill.
Application May 17, 1946, Serial No. 670,478
3 Claims. (Cl. 10—148)



1. An adjustable tap wrench comprising a cylindrical handlebar, a tubular sleeve slidably mounted thereon and threaded exteriorly on each end, rotatable jaw members mounted on said sleeve and provided at their outer ends with annular bosses, nuts threaded on the ends of the sleeve and provided with annular recesses to engage said bosses, means carried by said sleeve operatively engaging one of said nuts and handlebar for securing said nut and sleeve to the bar, there being longitudinally-extending diametrically-opposed sockets in the abutting faces of said jaw members and positioned to register with each other, and means in the registering sockets for spreading said jaw members apart normally, the abutting faces of said jaw members being provided with recesses in register to contain tap shanks.

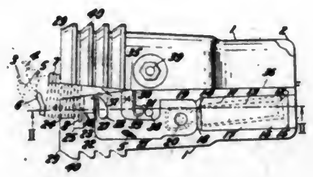
2,445,978
SOCKET HEAD SCREW
Domnic V. Stellin, Detroit, Mich.
Application May 7, 1945, Serial No. 592,480
4 Claims. (Cl. 85—45)



1. A screw comprising a shank-like body member having a socket extending axially from one of its end surfaces, said socket including a plurality of substantially radially extending recesses, the walls of said recesses extending to said end surface, opposite walls of each recess being equidistant along any plane transverse of the recess and parallel to the axis of said member, the outer wall of each recess sloping downwardly toward said axis, said opposite walls of each recess converging toward each other in a radial direction.

2,445,979
COIL MOUNTING
Robert T. Thompson, Oak Park, Ill., assignor to Zenith Radio Corporation, a corporation of Illinois
Application December 31, 1943, Serial No. 516,361
8 Claims. (Cl. 171—777)

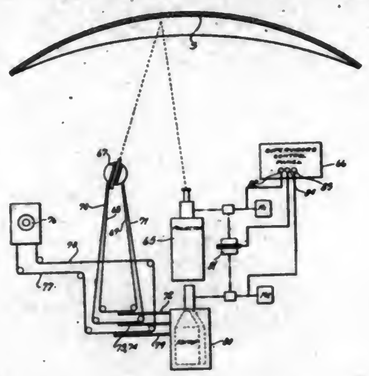
1. In a mounting for a transformer, a metal box, a first winding, a winding holder having a screw-threaded projection and having a tapped inner portion, an adjustable core member in said coil holder, a supporting sheet having an aperture through which said projection extends, a second winding, a second winding holder having a tapped portion arranged to receive said screw-threaded projection with said supporting sheet clamped between the two coil holders, an adjustable core member on said second coil holder, whereby said first winding, second winding and said supporting sheet may be moved as a unit apart from said box, said metal box having oppositely disposed corners receiving snugly the edges of said supporting sheet.



2,445,980
TRAP DEVICE FOR RODENTS
Herbert Tsai and Nicholas Chuy, Detroit, Mich., assignors to Herbnick Manufacturing and Engineering Company, Incorporated, Detroit, Mich.
Application January 10, 1946, Serial No. 640,254
7 Claims. (Cl. 43—77)

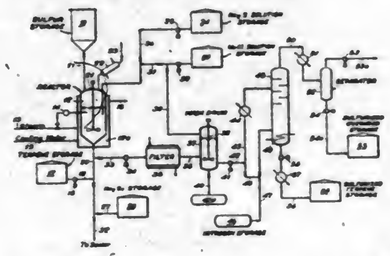
1. A device of the class described having a garbage receptacle, a casing within the garbage receptacle, a rotor within the casing, an arm connected to the rotor, a spring within the rotor to operate rotation of the arm to destroy several rodents successively, by one winding thereof, means to wind the spring, an entrance to admit rodents into the casing, said entrance being provided in the wall of the garbage receptacle, a slidable door carried by the casing to close the entrance when a rodent has been admitted therethrough, means to maintain the door normally open, a platform carried by the casing to operate said means to close the door by the weight of a rodent, a lever for controlling the unwinding operation of the spring throughout each cycle of rotation of the arm, said lever being carried

by the casing, and means, operative by the weight of a rodent, to operate the lever to effect rotation of the rotor, to destroy rodent, by the rotative arm thereof.



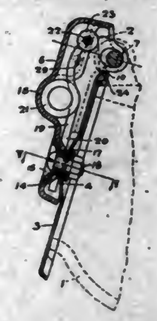
2,445,981
SELF-ADAPTING CONNECTOR
Frederick Von Voigtlander, Grass Lake Township, Jackson County, Mich., assignor, by mesne assignments, to Sperti Faraday Inc., a corporation of Ohio
Application February 7, 1946, Serial No. 646,095
1 Claim. (Cl. 173—332)

An adaptable electric connector comprising a pair of terminals, a housing providing a pair of chambers for the terminals, said housing including a first pair of sections each having an open side half chamber, there being seat way means in registry between said sections at a straight way intermediate portion, each section having a cylindrical way portion to which the straight portion extends, a leaf spring having a flat intermediate portion in the straight way portion and an end loop in each cylindrical way portion thereby to hold the two sections assembled with the spring protruding thruout its extent from the way portions, a second pair of housing sections complementary to said first pair with way means to complete enclosure of the protruding portion of the spring and with half chamber portions to register with and complete the chambers in the housing for the terminals, and assembly means in addition to the spring coacting between the first and second pair of housing sections to anchor the spring in the thus completed connector, whereby the two sections completing one chamber may swing on the spring as a hinge in movement relatively to the two sections completing the other chamber, there being conductor lead means into the housing to the terminals, said lead means entering the housing more remote from the chambers than the spring.



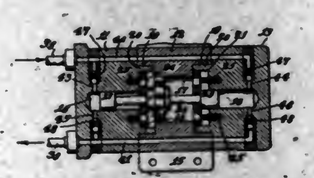
2,445,982
GUNNERY TRAINING APPARATUS
Fred Waller, Huntington, N. Y., Willis Robert Dresser, Long Hill, Conn., and Robert R. Swain, Huntington, N. Y., assignors to The Vitarama Corporation, Long Island City, N. Y., a corporation of New York
Application May 20, 1944, Serial No. 536,579
17 Claims. (Cl. 35—25)

1. In gunnery training apparatus, in combination, a projector for throwing a target image from a picture frame on a screen, a pointer in the nature of a dummy gun to be directed toward said target, an editing device for placing aim indicia on a control frame, said editing device including an exposure slide movable transversely across said control frame in response to horizontal movements of said pointer for indicating aim azimuth, and a second slide movable transversely across said control frame in response to vertical



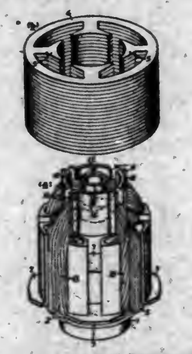
movements of said pointer for indicating aim elevation.

2,445,983
METHOD OF SULFURIZING TERPENES
Roger W. Watson, Chicago, Ill., assignor to Standard Oil Company, Chicago, Ill., a corporation of Indiana
Application April 26, 1946, Serial No. 665,291
9 Claims. (Cl. 260—139)



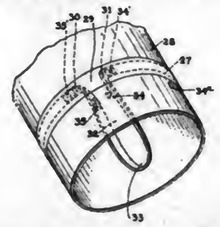
8. The method of preparing a sulfurized terpene lubricant additive comprising heating elemental sulfur to a temperature of 310° F.–340° F., adding a small amount of terpenes to the heated sulfur, heating the terpene-sulfur mixture to a temperature of about 350° F. to about 375° F., adding the remaining portion of the terpene to the heated mixture, maintaining the reaction mixture at a temperature of about 350° F. to about 375° F. for a time sufficient to substantially complete the sulfurization of the terpene, reducing the temperature of the sulfurized terpene reaction mixture to a temperature of from about 200° F. to about 250° F., adding an alkali metal sulfide to the sulfurized terpene reaction mixture to remove corrosive sulfur therefrom, separating the alkali metal sulfide from the sulfurized terpene reaction product, washing the sulfurized terpene reaction product with a sodium chloride solution and distilling the washed sulfurized terpene reaction product in the presence of an inert gas at a temperature of from about 250° F. to about 350° F. to obtain a bottoms fraction containing from about 30% to about 50% sulfur.

2,445,984
JOURNAL BOX STRUCTURE
Theodore R. Weber, Latrobe, Pa., assignor to American Locomotive Company, New York, N. Y., a corporation of New York
Application October 4, 1944, Serial No. 557,166
1 Claim. (Cl. 308—47)



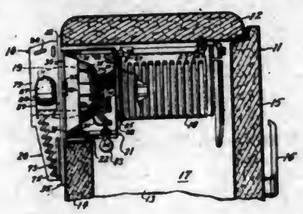
A closure for an open-faced journal box having a cam hinge lug adjacent the upper margin thereof, comprising a hood having a centrally apertured spherical recess struck inwardly out of the plane thereof; a centrally apertured spherical washer movably disposed in said recess; a pintle hinging said hood to said lug; an eyeless closure lid closing the open face of said journal box and having an aperture at the center of said open face and an arcuate ridge struck outwardly out of the plane of said lid at opposite sides of said aperture, said apertures in said lid, recess and washer being in alignment; means extending through said apertures connecting said lid to said spherical washer for limited universal movement of said lid relative to said hood and journal box; and a torsion spring operatively disposed between said hood and lid, presenting two spaced legs of circular cross section having point contact on said arcuate ridges with the axes of said legs perpendicular to the axis of said ridges, said legs terminating in two spaced coils in contact with said hood and said coils terminating in a loop engaging said cam lug whereby said spring exerts pressure on said hood and lid in all positions of movement relative to said journal box.

2,445,985
COMBINED FLUID-OPERATED MOTOR AND PUMP
Herbert J. Werner, Chicago, Ill., assignor of one-half to Frank P. Werner, Chicago, Ill.
Application January 28, 1946, Serial No. 643,894
8 Claims. (Cl. 103—51)



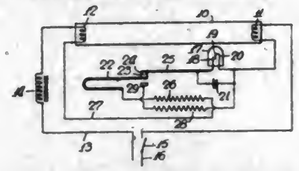
1. In a combined fluid-operated motor and pump, a cylinder block containing three axially aligned piston cylinders opening into each other, the central cylinder constituting the motor cylinder, being larger in diameter than the others which are pump cylinders, a rigid piston device containing three pistons spaced apart from each other and each fitting slidably in one of said cylinders, said cylinder block containing a power-transmitting fluid inlet passage and a discharge passage each of which is connected to both of said pump cylinders, check valves in said passages to prevent a flow of fluid from the pump cylinders into the inlet passage and from the discharge passage into the pump cylinders, said cylinder block also containing an inlet port and an outlet port for motivating fluid at each end of the motor cylinder, and means, including disc valves forming partitions between said cylinders and movable by said piston device, to open and close said inlet and outlet ports in the proper sequence to cause the piston device to reciprocate when the motivating fluid under pressure is alternately passed through said inlet ports.

2,445,986
STATOR WINDING METHOD AND APPARATUS THEREFOR
Arthur P. Adamson, Ballston Spa, N. Y., assignor to General Electric Company, a corporation of New York
Application August 8, 1946, Serial No. 689,107
4 Claims. (Cl. 171—252)



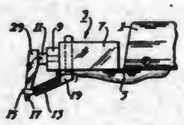
4. A removable coil assembly unit for dynamo-electric machine stators of the type which have an outer yoke and inwardly projecting salient pole pieces, comprising a hollow integral structure of insulating material having a cylindrical supporting part at one end of sufficient internal diameter to pass over the rotor of the machine for which intended, a smaller hollow cylindrical part at the other end coaxial with the first-mentioned cylindrical part, skeleton coil holding structure supported between said cylindrical parts lying outside of a circle greater than the diameter of such rotor and between the pole pieces of the machine for which designed, a plurality of coils supported on said structure in position to excite the inwardly projecting salient poles of the machine for which designed, means for supporting the end turns of such coils at the small diameter cylinder end of the structure within a circle less than the diameter of a circle conforming to the inner faces of such pole pieces, and a bearing for the rotor of such machine supported within the smaller cylindrical end part, said coil assembly unit being axially removable from and replaceable into the salient pole stator of the machine for which designed.

2,445,987
BATH MIT
Claire Ashman, Woodside, Long Island, N. Y.
Application August 22, 1946, Serial No. 692,329
2 Claims. (Cl. 2—158)



1. A bath mit having an envelope portion to receive the body of the hand and a thumb portion to receive the thumb of the hand of the user, said mit also having a wrist portion of flexible tubular construction through which the hand is inserted, a guide, said guide comprising a strip of binding material having its side edges secured to the inner surface of said tubular portion and positioned circumferentially with respect thereto, said strip having a pair of spaced slits formed therein, a continuous ribbon disposed in said guide and having portions thereof projecting through each of said slits to form a handle loop extendable through said tubular portion to permit the user to pull said handle loop to constrict said tubular portion about the wrist of the user.

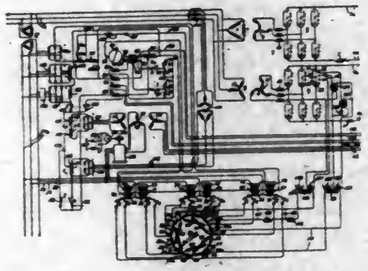
2,445,988
REFRIGERATOR CONSTRUCTION WITH REMOVABLE REFRIGERATOR UNIT
Russell W. Ayres, Evansville, Ind., assignor, by mesne assignments, to Seeger Refrigerator Company, a corporation of Minnesota
Application July 14, 1943, Serial No. 494,600
28 Claims. (Cl. 62—116)



1. A refrigerator comprising a cabinet having a food storage compartment and having an insulated rear wall provided with an opening, a removable cooling unit comprising an insulated plug adapted to be inserted in the opening in said rear wall, said plug carrying an evaporator within said compartment, said plug being formed with an inner wall, a layer of insulation and an intermediate wall, said intermediate wall being inwardly recessed to receive refrigerating apparatus communicating with said evaporator and partially mounted within said recess, said apparatus, when inserted, projecting rearwardly beyond the plane of the rear wall of refrigerator said evaporator being shorter from front to back than the depth of said compartment, and being located forwardly in said compartment, and said plug projecting into said compartment behind said evaporator to utilize space behind said evaporator and to provide insulation thickness for the plug substantially equal to that of the rear wall.

2,445,989
STARTING AND OPERATING UNIT AND CIRCUIT FOR GASEOUS ELECTRIC DISCHARGE DEVICES
Maynard A. Babb, Elkins Park, and Arnold E. Hayes, Philadelphia, Pa., assignors to Maxwell M. Bilofsky, Newark, N. J.
Application May 22, 1945, Serial No. 595,212
12 Claims. (Cl. 315—100)

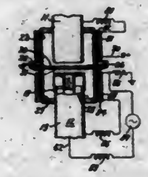
1. A safety starting and operating circuit for a gaseous electric discharge device equipped with spaced electrodes, said circuit comprising a starting connection including a pair of starting contacts, a pair of safety contacts and a heating element in series, with one of said starting contacts being connected directly to one of said safety contacts, whereby when said starting connection is in series with said electrodes and a source of current, current will pass through said starting connection and said electrodes, actuating means in series with said starting contacts controlled by current flow through said starting connection, separating said starting contacts and maintaining the latter separated only while the arc of the electric discharge device is maintained, thermally responsive, electrically conductive, displaceable means actuating at least one of said safety contacts and responsive to the prolonged starting current through said heating element in the attempted operation of a defective electric discharge device for separation of said safety contacts, and current operated heat evolving means positioned adjacent said displaceable means, directly connected at one end to the other of said starting contacts, having its free end normally disconnected from said safety contacts, and in the path of movement of said displaceable means, whereby upon separation of said safety contacts, and engagement of said displaceable means with said free end, said current operated heat evolving means will be connected in series with said two electrodes, said heating element and such source of current to maintain said safety contacts separated.



2,445,990
SIGNAL TRANSLATING APPARATUS
Alexis Badmaieff, Indianapolis, Ind., assignor to Radio Corporation of America, a corporation of Delaware
Original application June 12, 1943, Serial No. 490,614. Divided and this application April 29, 1944, Serial No. 533,333
6 Claims. (Cl. 179—100.41)

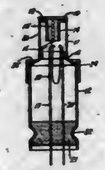
1. A phonograph record signal translating device comprising, in combination, a support, a pair of conductive members carried by said support, said members extending downwardly from and to one side of said support in physically spaced and electrically insulated relation to each other,

a third conductive member carried by said support in electrically insulated relation to each of said pair of members, said third member also extending downwardly from and to one side of said support between and in spaced relation to each of said pair of members and having a freely suspended end terminating in a loop, and a needle mounted in said loop for cooperation with a phonograph record, said three members cooperating to provide a pair of capacitor components, and said third member being movable laterally relative to each of said pair of members in response to movement of said needle by a record to thereby vary the capacities of said components simultaneously and in opposite phase.



2,445,991
ELECTRIC CONTROL SYSTEM
Burnice D. Bedford, Scotia, N. Y., assignor to General Electric Company, a corporation of New York
Original application June 12, 1944, Serial No. 539,942. Divided and this application March 5, 1946, Serial No. 652,169
4 Claims. (Cl. 322—92)

1. In combination, a dynamo-electric machine having an armature winding, a first control field winding, a second control field winding, means for energizing said first control field winding in a direction to effect an increase in the armature current above a predetermined value, means for producing a reference component of voltage, means for producing a component of voltage proportional to current in said armature winding, and means including a unidirectional conducting device for connecting said components of voltage in opposed relation responsive to the current of said armature winding for energizing said second control field winding only when said armature current exceeds said predetermined value and in a direction to limit the current of said armature winding to said predetermined value.



2,445,992
ELECTRIC DISCHARGE DEVICE FOR SPACE RESONANT CIRCUITS
James E. Beggs, Scotia, N. Y., assignor to General Electric Company, a corporation of New York
Application September 10, 1943, Serial No. 501,790
22 Claims. (Cl. 315—39)

1. A high frequency electron discharge device comprising a pair of cylindrical and substantially coaxially aligned electrodes, a tubular metallic structure concentrically surrounding said electrodes forming therewith a section of concentric transmission line, a control member interposed between said electrodes and coupled to said tubular metallic structure, and dielectric members hermetically sealed between said electrodes and said structure and forming therewith sealed portions of cavity resonators connected respective-

ly between said electrodes and said control member, said electrodes extending through said dielectric members in opposite directions and providing externally accessible terminals for said electrodes.

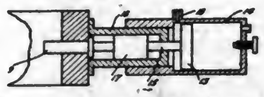
2,445,993
CATHODE STRUCTURE
James E. Beggs, Scotia, N. Y., assignor to General Electric Company, a corporation of New York
Application February 12, 1944, Serial No. 522,097
12 Claims. (Cl. 250—27.5)

1. An electron discharge device having an enclosing envelope, a cathode extending into said envelope, said cathode comprising a hollow tube hermetically sealed to said envelope, said tube having an emissive end wall lying within said envelope, a heater supported within said tube in thermal relation with said end wall, gettering material disposed within said tube, means within said tube whereby said gettering material may be flashed, and means within said tube for limiting the rate of removing residual gas from said device by said material.

2,445,994
TOY
Ellen Gay Benson and Richard Ernest Benson, Eden, N. Y.
No Drawing. Application September 6, 1944, Serial No. 552,938
2 Claims. (Cl. 46—1)

1. A toy washcloth or the like, comprising a piece of cotton fabric and a dye selected from a group composed of Curcumin having the formula

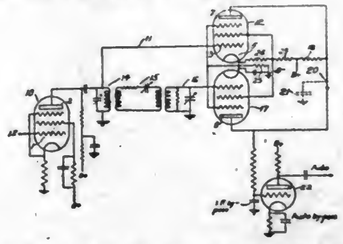
$$(2\text{—}CH_3OC_6H_3\text{—}1\text{—}OH\text{—}4\text{—}CH{:}CHCO)_2CH_2$$



and Brilliant Yellow having the formula

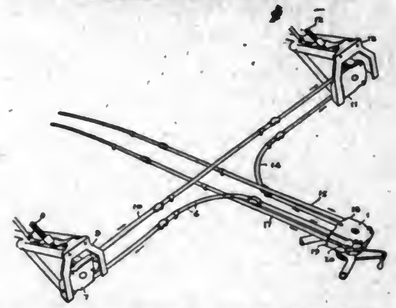
$$(4\text{—}HOC_6H_4N{:}NC_6H_3SO_3NaCH{:})_2$$

covering a restricted portion of said piece of cotton fabric to provide a pictorial representation thereon, said dye being characterized by changing in color when contacted with a solution of a fatty acid soap having a pH of from 9.0 to 11 and by substantially reverting to its origi-



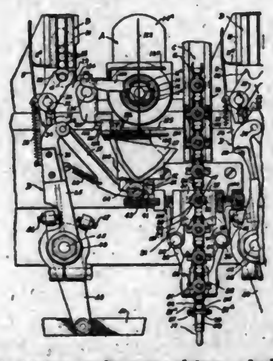
nal color when thereafter rinsed with water having a pH of from 6.0 to 8.5, and said dye also having an affinity for said piece of cotton fabric to withstand repeated rubbings, washings and rinsings.

2,445,995
AUTOMATIC DIE CASTING MACHINE
René Bourret, Boulogne-sur-Seine, and Jacques Bardou, Paris, France, assignors to Societe d'Applications Mecaniques pour l'Automobile, Boulogne-sur-Seine, France, a corporation of France
Application July 11, 1946, Serial No. 682,968
In France November 7, 1945
1 Claim. (Cl. 22—92)



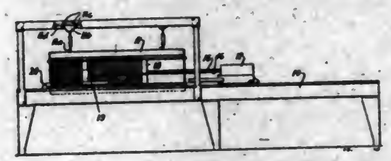
An automatic die casting machine having cores and dies, a compressed fluid piston and cylinder device for controlling each of said cores and its corresponding die, said piston and cylinder device comprising a cylinder having two sections of different cross-sectional area, a piston in each section, the larger of said pistons being beyond the smaller with respect to said die, said smaller piston being hollow, and said larger piston having a rod passing through said smaller piston and secured to said core, said smaller piston being secured to said die, means for supplying compressed fluid to said cylinder between said pistons, said piston rod being provided with a stop within said smaller piston to limit the relative displacement of said pistons to the approximate length of the said core.

2,445,996
FREQUENCY MODULATION DETECTOR CIRCUIT
William E. Bradley, Swarthmore, Pa., assignor, by mesne assignments, to Philco Corporation, Philadelphia, Pa., a corporation of Pennsylvania
Application January 13, 1945, Serial No. 572,669
7 Claims. (Cl. 250—27)



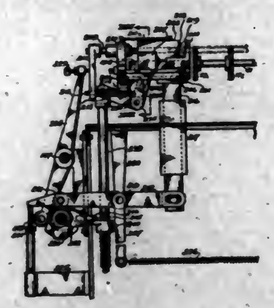
4. In a detector for frequency modulated signals, in combination, a pair of electron discharge tubes having plate and input circuits, each of which tubes is biased to cut-off in the absence of input signals applied thereto, a common plate circuit for said tubes, and means to apply the signal to be detected to the input circuits of said tubes in dephased relationship, said means comprising a dephasing network interposed between the signal source and the input circuit of at least one of said tubes, and a load resistor in said common plate circuit, said load resistor being of such high value that when either tube is conducting the plate potential is substantially that of the cathode and when both tubes are non-conducting the plate-to-ground capacity of the tubes is charged substantially linearly, said charging continuing until either of said tubes becomes conducting whereby the voltage of said capacity depends directly upon the interval in which the tubes are both non-conducting, said charge being dissipated immediately upon either of said tubes becoming conducting, the dissipation being substantially instantaneous.

2,445,997
EQUALIZER FOR CABLE OPERATED CONTROLS
William H. D. Brouse, Toronto, Ontario, Canada, assignor to Teleflex Limited, Toronto, Ontario, Canada
Application May 21, 1945, Serial No. 594,837
4 Claims. (Cl. 74—501)



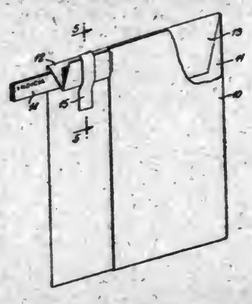
1. An equalizer for cable operated controls, comprising the combination with a gear operated cable slidable in an enclosing conduit and controls engaging same intermediate of its length, of a pair of co-axially journalled gears meshing with spaced lengths of cable, and freely rotatable differential means for driving said gears to push or pull said cable lengths and equalize the compression or tension loads applied thereto in operating the controls.

2,445,998
BOBBIN HANDLING MECHANISM
Russell P. Drake, Caledonia, Ill., assignor to Barber-Colman Company, Rockford, Ill., a corporation of Illinois
Application September 11, 1944, Serial No. 553,507
37 Claims. (Cl. 242—1)



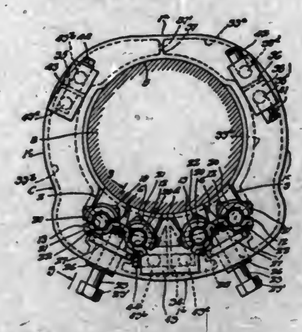
1. In a bobbin winding machine, a bobbin winding mechanism, an endless conveyer having an elongated vertical run disposed laterally of the winding mechanism, a series of bobbin holders movable with the conveyer, a bobbin transfer mechanism, and means for actuating said conveyer and transfer mechanism in timed relation to each other whereby the transfer mechanism receives wound bobbins from the winding mechanism and delivers the same to the bobbin holders successively.

2,445,999
WARP DRAWING MACHINE
Russell P. Drake, Caledonia, Ill., assignor to Barber-Colman Company, Rockford, Ill., a corporation of Illinois
Application June 27, 1946, Serial No. 679,822
16 Claims. (Cl. 28—44)



1. In a warp drawing machine having a stationary machine frame with reed and harness supporting means thereon and a carriage mounted for movement along the frame and having means operative upon the harness to release and present successive heddles to the operation of a drawing-in needle, said harness supporting means being adapted to support a plurality of heddle frames parallel to the reed and each slidably supporting a pack of heddles with a backer therefor; means actuated by the carriage and directly connected with the heddle frames to shift the same endwise parallel to the reed, the last mentioned means operating in timed relation to the carriage but at a reduced speed.

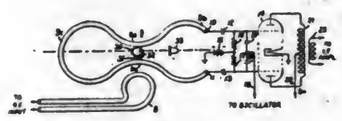
2,446,000
MACHINE FOR FLANGING GLASS BLANKS
Charles Eisler, South Orange, N. J.
Application November 17, 1943, Serial No. 510,847
5 Claims. (Cl. 49—7)



1. In a machine for treating glass blanks, means for passing the blanks through the machine, means to heat and soften the blanks during their passage through the machine, means to interrupt the passage of the blanks and to flange them when so interrupted, a mechanism for shearing flanged portions of said blanks, comprising a support plate, a carriage slidably arranged on said plate, said carriage having a face, a plunger slidably arranged in said carriage, means to urge said plunger into a glass blank having a flange to be sheared and to urge said flange against said face, shearing members fixed to said carriage, and means to reciprocate said carriage on its support to move the shearing members into shearing engagement with the flange to shear the latter.

2,446,001
BAG
Richard D. Elwell, Lawrence, N. Y., assignor to Equitable Paper Bag Co. Inc., Long Island City, N. Y., a corporation of New York
Application August 21, 1947, Serial No. 769,799
1 Claim. (Cl. 229—56)

In combination, a bag having a tab extending from one wall beyond the bag mouth, said tab being folded over the bag mouth into parallel relation to the other wall and formed with a return bend to locate the end of the tab adjacent the bag mouth thereby providing two oppositely directed pockets, a folded sales ticket or the like having a portion arranged in each pocket with one end of the ticket projecting beyond the back edge, and a tape passing over said folded tab with the ends of the tape fixed to the opposite walls of the bag.



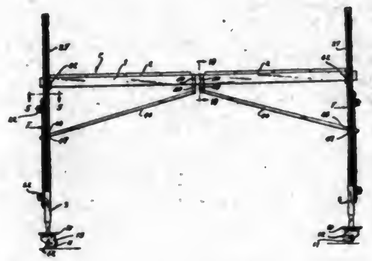
2,446,002
CONTACT MEMBER AND ELECTRODE FOR ARC FURNACES
Arthur J. Fausek and Irwing F. Fausek, Clayton, Mo.
Application March 26, 1945, Serial No. 584,762
14 Claims. (Cl. 13—16)

14. The combination of an electrode of an electrical furnace, an element arranged for movement toward and from said electrode, supporting means for said element which is provided with an opening formed therein, means disposed in said opening of said supporting means for moving said

element with respect to said supporting means toward said electrode, a removable abutment member which engages said element moving means for retaining same in the opening of said supporting means, and electrical conducting means for delivering electrical energy to said electrode.

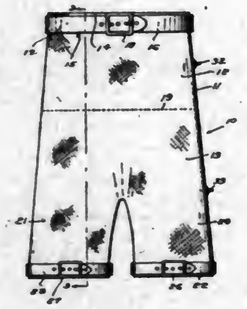
2,446,003
HIGH-FREQUENCY COUPLING DEVICE
Paul C. Gardiner, Scotia, N. Y., assignor to General Electric Company, a corporation of New York
Application November 12, 1946, Serial No. 709,393
8 Claims. (Cl. 171—777)

1. An inductive coupling device for high frequency apparatus and the like comprising spaced primary and secondary windings, one of said windings comprising a single loop conductor enclosing at least two substantial areas with a relatively narrow contiguous area between them, and means for selectably shorting said conductor across said narrow area.



2,446,004
STORM DOOR CHECK
Charles E. Gibbs, Middletown, Ohio
Application November 29, 1946, Serial No. 712,985
4 Claims. (Cl. 16—84)

1. A door check comprising a piston cylinder fixed to the door frame and having an open vent at one end and a choked vent at the other end, a bracket having side wings secured to one end of said cylinder, a shaft rotatably mounted in the side wings of said bracket, a door contact lever mounted on said shaft, a compression lever mounted on said shaft between the bracket wings in spaced relation to said contact lever, a tensioning spring tending to move said levers to door checking positions, a piston rod carrying a piston traversing said cylinder and engaging said compression lever, and a threaded sleeve on said rod adjustably to connect said bracket and said cylinder.

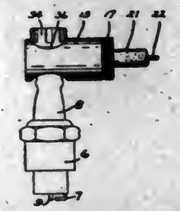


2,446,005
COLLAPSIBLE SCAFFOLD
Fred Hartmann, St. Louis, Mo.
Application October 8, 1945, Serial No. 620,907
1 Claim. (Cl. 304—2)

A scaffold having collapsible end frames, said end frames including supporting standards, each of said standards comprising a hollow slotted member having a notched bar on its outer face, a hanger assembly operable in said slot, means

for clamping the assembly to the standard, and means for anchoring said hanger assembly to said notched bar.

2,446,006
DRIVER'S COMFORT
Norva E. Hendricks, Scranton, Iowa
Application June 27, 1945, Serial No. 601,846
1 Claim. (Cl. 2—2)



A cushion conformable to the contour of a wearer's body comprising an inflatable bifurcated seat portion and an inflatable back supporting portion separated by a transverse line of stitching serving as a hinged connection between said portions, a body encircling strap attached to the upper end of the back-supporting portion of said cushion, leg encircling straps attached to the terminal ends of said bifurcated seat portion of said cushion, and means for independently inflating each portion of said cushion.

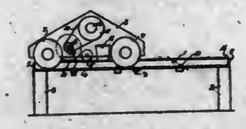
2,446,007
SPARK PLUG COVER
Melvin S. Hook, Gurnee, Ill., assignor to Outboard, Marine & Manufacturing Company, Waukegan, Ill., a corporation of Delaware
Application December 11, 1944, Serial No. 567,686
7 Claims. (Cl. 174—77)

2. A spark plug cover having a body portion impervious to moisture and lead wires sealed in

one end of the body, a bore extending through the body transversely of the lead wires with its ends counterbored to provide spaced annular shoulders on opposite sides of the axis along which the lead wires enter, compressible annular gaskets seated against said shoulders, a coupling nut rotatable in said bore and having an electrically conductive portion in position for threaded engagement with the upper end of the central terminal of the spark plug, said nut having a dielectric cap portion fitted to one of the

counterbores and adapted to apply clamping pressure to said gaskets, one of said gaskets being adapted for sealing engagement with the body at the inner end of its associated counterbore and the other of said gaskets being adapted for sealing engagement with the porcelain end of a spark plug when the central terminal of such plug is in threaded engagement with said nut, and an electrically conductive clip having a forked end in pressure contact with the conductive portion of said nut and having a head portion with which said lead wires are engaged.

2,446,008
PREPARATION OF ORGANOBORON COMPOUNDS
Dallas T. Hurd, Schenectady, N. Y., assignor to General Electric Company, a corporation of New York
No Drawing. Application October 25, 1945, Serial No. 624,599
13 Claims. (Cl. 260—607)

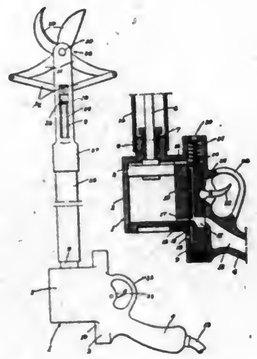


1. The method of preparing an alkylated boron compound which comprises bringing a mixture of a boron halide and an alkyl halide into contact with a metal selected from the group consisting of aluminum and zinc at an elevated temperature.

2,446,009
COMBINED WALLET AND CIGARETTE CASE
Sidney Hyman, New York, N. Y.
Application December 20, 1945, Serial No. 636,148
1 Claim. (Cl. 150—35)

A combined wallet and cigarette case, comprising a wallet forming body comprising two side walls secured along adjacent longitudinal edges and along adjacent end edges to each other and open along one longitudinal side to receive paper money, and said body being foldable in three sections, with a right and left wing folding over the intermediate central area in overlapping engagement, said central area having a card holding pocket secured thereto on the inside and forming a support for a cigarette case on the outside, each of said wings having a pocket opening inwardly adjacent the card holding pocket, a flap having its inner end edge hinged to one end of the central area to fold inwardly and a flap hinged to the other end of said central area to fold inwardly in overlapping relation to said first-named flap outwardly of said wings when in a folded condition, and cooperating fasteners carried by said flaps to secure one to the other and to confine the wings of said wallet forming body within said flaps in overlapping relation.

2,446,010
MACHINE FOR TRANSFERRING A DESIGN TO A CLOTH MATERIAL
Jens Simoni Jahn, Copenhagen, Denmark, assignor to Aktieselskabet Brødrene Hartmann, Kanalvej, Kongens Lyngby, Denmark
Application September 13, 1938, Serial No. 229,651
In Denmark September 15, 1937
Section 3, Public Law 690, August 8, 1946
Patent expires September 15, 1957
6 Claims. (Cl. 101—121)

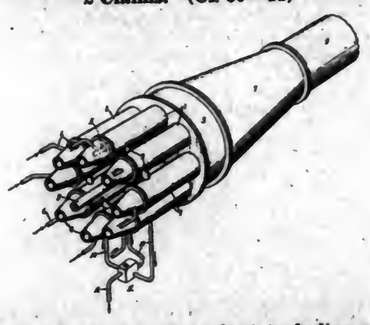


1. The combination in a machine for stencilling a fabric, of a table with perforated top, means for producing a vacuum on the lower side of the table, rails attached to two opposing sides of the table, a carrier mounted for displacement along the rails over the table top, a drum rotatably mounted within the carrier, a pliable stencil attached by its one end to the drum, means for affixing the other end of the stencil detachably to the table top, means for rotating the drum in conformity with the displacement in one direction of the carrier to unwind the stencil from the drum, spring means for rewinding the stencil on the drum during the return movement of the carrier, and means for applying a colour substance to the stencil during its unwinding.

2,446,011
HYDRAULIC MOTOR WITH PISTOL GRIP HANDLE AND TRIGGER ACTUATED VALVE
Charles J. Johnson, Sacramento, and Frank E. King, Woodland, Calif.
Application August 6, 1945, Serial No. 609,288
1 Claim. (Cl. 121—3)

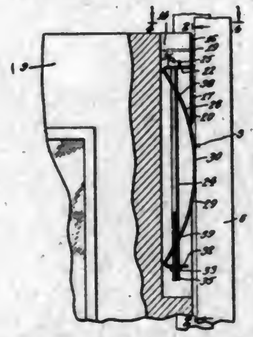
A hydraulic motor and valve mechanism for the purpose described comprising a hollow pistol grip handle, means for connecting a source of fluid supply to the interior of the handle, a trigger pivoted on the handle and having a finger grip at one end within reach of a finger on a hand gripping the handle, the other end of the trigger being in the form of a rounded head, a valve sleeve formed on the handle and lying trans-

versely of the longitudinal axis of the handle, a slide valve disposed in the sleeve, such valve being provided with a notch in its circumference, the rounded head of the trigger fitting in the notch, a spring interposed between one end of the valve and the adjacent end of the sleeve and acting to normally hold the valve against the opposite end of the sleeve, the trigger being operable to slide the valve against the resistance of the spring, a cylinder mounted on the sleeve substantially parallel therewith, such cylinder being provided with a port at each end, a piston mounted in the



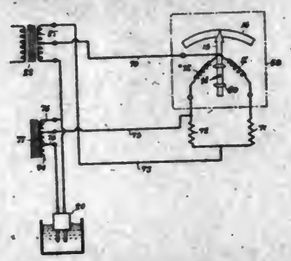
cylinder for reciprocating movement between said ports, the valve being provided with spaced ports, each valve port being positioned to be alternately carried into and out of register with one of the cylinder ports as the valve is reciprocated through the functioning of the trigger and spring, means placing both of the valve ports in communication with the interior of the handle, and means for venting the cylinder ports to the atmosphere.

2,446,012
COLLAR HOLDING CLASP
Louis Martin Kahn, Bronx, N. Y.
Application December 31, 1943, Serial No. 516,365
3 Claims. (Cl. 24—81)



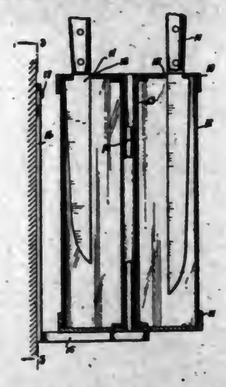
1. A collar holding clasp, comprising a resilient sheet having a back bar portion for extending across the back faces of the points of a collar, a front bar portion for extending across the front faces of the points of said collar and connected at its center with the center of said back bar portion, loop-like clamp portions on the ends of said front bar portion and engaging against the ends of said back bar portion, and means for adjusting the resilient shape of said loop-like clamp portions, comprising prongs formed on the ends of said loop-like clamp portions and selectively engageable with complementary openings formed in the ends of said front bar portion.

2,446,013
COMBUSTION CHAMBER DRAIN ARRANGEMENT
William W. Kuyper, Schenectady, N. Y., assignor to General Electric Company, a corporation of New York
Application May 31, 1945, Serial No. 596,955
2 Claims. (Cl. 60—44)



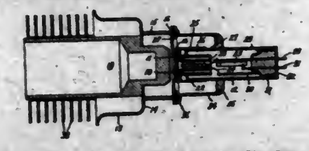
1. In a thermal power plant including a plurality of substantially cylindrical hot gas generators with their axes substantially parallel and arranged to discharge into a common energy converting device, means associated with each generator for burning liquid fuel therein and cross-ignition flame tubes connecting the generators, the combination of means for automatically draining residual liquid from all the generators, said drain means including a valve with a housing having a single discharge port and a plurality of inlet ports, conduit means connecting the lowermost chambers with the respective inlet ports, and a check member in the housing biased to open position and arranged to shut off the flow of fluid from the inlet ports to the drain port when moved to closed position during operation of the power plant by the pressure of the fluid in the generators.

2,446,014
STABILIZER FOR DOUBLE HUNG WINDOWS
Algot Larson, Bronx, N. Y., assignor to Unique Balance Co., Inc., New York, N. Y., a corporation of Illinois
Application September 21, 1945, Serial No. 617,790
10 Claims. (Cl. 292—76)



1. A stabilizer comprising a forwardly arched resilient shoe portion, a forwardly extending flange on each end of said shoe portion and a laterally extending attaching portion on the forward end of one of said flanges.

2,446,015
ELECTROLYTIC CONCENTRATION INDICATOR
Henry Lehde, Brooklyn, N. Y., assignor to Control Instrument Company, Inc., Brooklyn, N. Y., a corporation of New York
Application October 16, 1943, Serial No. 506,578
2 Claims. (Cl. 175—183)



1. In an electrolytic concentration indicator, a conductivity cell, a stator of fixed, angularly disposed coils, a movable magnetic indicating element responsive to the combined magnetic fields produced by said coils, an energizing transformer, parallel energizing circuits of constant current connected to a portion of said energizing transformer independently of said cell, and a variable auto-transformer in shunt with said conductivity cell, and having a part of its winding in series with but one of the aforementioned coils and the remaining portion of the said energizing transformer.

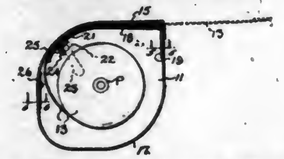
2,446,016
KNIFE RACK
Maurice E. Lessin, Bronx, N. Y.
Application June 30, 1945, Serial No. 602,563
3 Claims. (Cl. 211—60)

3. For use with a substantially horizontal support and a spindle upstanding therefrom, an improved knife receptacle comprising a tubular transparent wall, a top head frictionally engaging the top portion of said tubular transparent wall, a bottom head fitted against the bottom portion of said transparent wall and affixed thereto, said top head having a series of radially arranged slots of widths to receive therethrough the blades of knives viewable through the transparent wall but narrower than the handles of the knives whereby to support the knives on the top head with the handles projecting upwardly from said top head, said bottom head having a substantial circular perforation and a tube within said wall having a horizontal flange affixed to said bottom head with internal passage registering with said perforation to slidably and rotatably receive the spindle on which the receptacle may be rotated.

2,446,017
ULTRA HIGH FREQUENCY ELECTRIC DISCHARGE DEVICE AND CAVITY RESONATOR APPARATUS THEREFOR
Elmer D. McArthur, Schenectady, and James E. Beggs, Scotia, N. Y., assignors to General Electric Company, a corporation of New York
Application January 29, 1944, Serial No. 520,240
11 Claims. (Cl. 315—39)

1. A high frequency electronic discharge device comprising an anode cylinder, a cathode cylinder coaxially aligned therewith, said cylinders having adjacent closed ends in opposed spaced relation and constituting electron emitting and electron receiving elements of said device, a transversely extending insulating disc hermetically sealed to said cathode cylinder at a point spaced from said closed end, a metallic cylinder concentrically surrounding said cathode and extending longitudinally toward said end, said anode having a transversely extending portion spaced from said closed end, a cylindrical insulating member surrounding said anode cylinder and hermetically sealed between said transversely extending portion and said metallic cylinder, and means conductively connected to said metallic cylinder supporting a grid between said anode and cathode in spaced relation with said opposed ends.

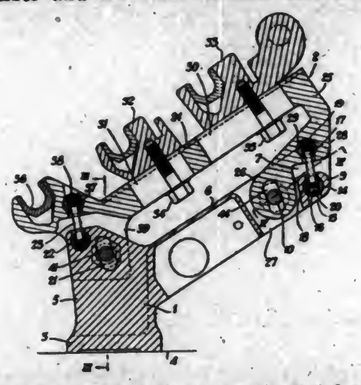
2,446,018
GARTER CONSTRUCTION
Burt D. Miskimen, Columbus, Ohio
Application February 2, 1946, Serial No. 645,031
2 Claims. (Cl. 2—321)



1. Garter construction comprising an elastic band substantially oval in transverse cross section throughout the length thereof, a pair of detachable connectors having open-ended sockets in which the ends of said band are received, annular and inwardly extending ribs formed on said connectors in the regions of the sockets thereof for gripping the ends of said band and permanently retaining the same in firm union with said connectors, said connectors forwardly of said ribs being reduced in cross-sectional thickness and formed with inwardly disposed, relatively slidable flat interengaging surfaces, a headed stud projecting rigidly and laterally from one of said surfaces, and the other of said surfaces being formed with a keyhole slot shaped to receive removably said headed stud.

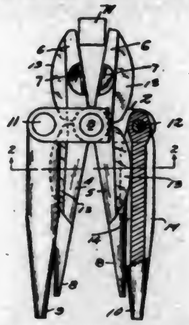
2,446,019
DETONATING OR IMPACT FUSE
Harry J. Nichols, Binghamton, N. Y.
Application November 7, 1939, Serial No. 303,294
7 Claims. (Cl. 102—80)

1. In a fuse of the class described, in combination, a fuse casing, a centrifugally actuated rotatable cylindrical detonator holder mounted therein, a detonator mounted diametrally in said holder in safe position, an axial detonator firing pin in restraining engagement with said holder, safety means for maintaining said firing pin in said restrainng engagement, and spring means adapted to act on said firing pin to advance said firing pin from said restraining engagement to armed position after the fuse is fired in a projectile.



2,446,020
TAPE RULE
Ragnar C. Nicholson, White Plains, and Nathan H. Schneider, New York, N. Y., assignors to Master Rule Manufacturing Co., Inc., New York, N. Y., a corporation of New York
Application December 24, 1943, Serial No. 515,514
6 Claims. (Cl. 242—84.9)

2. A tape rule of the type described comprising a housing having a graduated tape coiled therein and issuing from an opening in the housing, a cantilever arm attached to the casing adjacent said opening and extending parallel to the wall along which the tape extends to said opening, said tape lying between the casing wall and arm so that the arm forms a support therefor, and a brake member mounted on said casing and engaging the free end of said cantilever arm for gripping the tape between the arm and the housing for a substantial portion of the tape length.

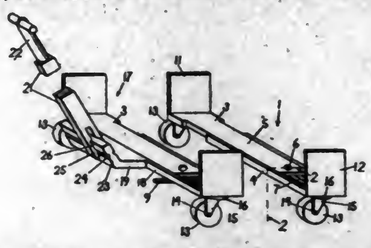


2,446,021
ROLLER STAND FOR SPINNING AND PREPARING MACHINES
Joseph Noguera, Prestwich, Manchester, England, assignor to Casablancas High Draft Company Limited, Salford, Manchester, England, a British company
Application April 9, 1946, Serial No. 660,712
In Great Britain April 19, 1945
6 Claims. (Cl. 19—134)

1. A roller stand for spinning and preparing machines comprising a base member for attachment to a stationary part of the machine, an upper roller supporting member, a pivotal connection between each end of said supporting member and said base member and adjusting

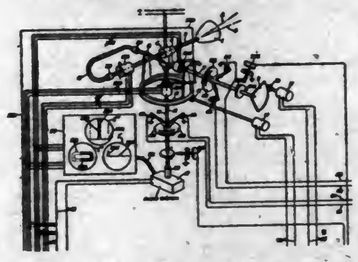
means associated with each said pivotal connection for adjusting the height and inclination of said supporting member with respect to said base member.

2,446,022
DOUBLE-ENDED MULTIPLE JAW PLIERS
Arthur L. Peterson, Long Beach, Calif.
Application March 24, 1945, Serial No. 584,514
6 Claims. (Cl. 81—47)



1. A hand pliers consisting of a pair of crossed members having at each end differentiated work engaging features, those on common ends being cooperative, a body on which the members are tiltable on a common pivot, and a pair of handles pivoted on the body and swingable in half-circles to engage and close either end of the pair of members, and means disposed on the outer sides of the work members to releasably interconnect with either of opposite sides of the handles to pull the members to open position as the handles are moved outward at either end of the pliers.

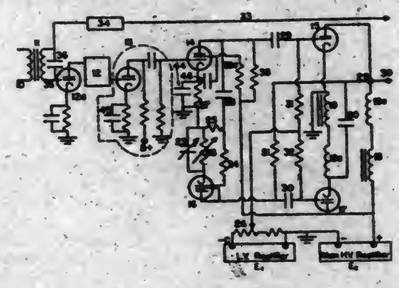
2,446,023
ADJUSTABLE BAGGAGE APPLIANCE FOR ROLLING MOVEMENT
Elsa Pohl, New York, N. Y.
Application August 15, 1947, Serial No. 768,768
2 Claims. (Cl. 280—35)



1. A baggage appliance comprising two separate units, each comprising two flat parts shiftable relatively to each other whereby these parts form a platform of adjustable length, a wheel

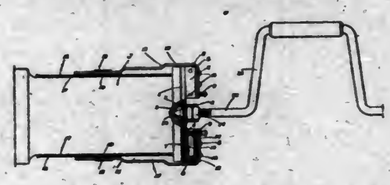
rotatably connected to and supporting one of said parts and another wheel rotatably connected to and supporting the other part, said units being adapted to be placed under and across a piece of baggage at any desired distance from each other, said appliance further comprising a shaft

and means to attach said shaft to one of said units in any of a variety of positions shifted relatively to each other in the longitudinal direction of said unit whereby said shaft can be attached in a position central with respect to said unit whatever the adjusted length of said unit may be.



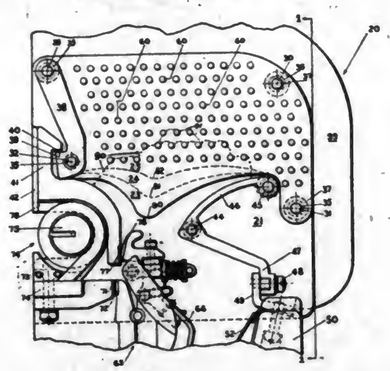
2,446,024
DIRECTIVE RADIO SYSTEM
Richard W. Porter, Schenectady, N. Y., and Anthony G. Linowiecki, Minneapolis, Minn., assignors to General Electric Company, a corporation of New York
Application March 13, 1943, Serial No. 478,994
13 Claims. (Cl. 343—7)

13. The combination, of a directive radio system, voltage generating means to vary the orientation of said system to scan in accord with a predetermined pattern an area of remote space in a plane perpendicular to the direction of orientation of said system, means responsive to radio waves received by said system during operation of said first means to generate a second voltage in accord with variation in the direction from which said waves are received, means selectively responsive to said two voltages in accord with their relative intensities for varying the orientation of said system, and indicating means responsive to said second voltage for indicating the variation in orientation of said system.



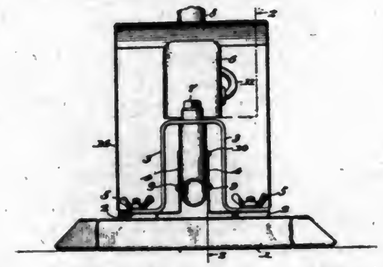
2,446,025
MODULATION SYSTEM
Ronald J. Rockwell, Cincinnati, Ohio, assignor, by mesne assignments, to Avco Manufacturing Corporation, a corporation of Delaware
Application May 10, 1946, Serial No. 668,699
26 Claims. (Cl. 179—171.5)

1. A modulation system comprising an input voltage amplifier, a driver, a negative half cycle modulator, an output circuit for said modulator, a load, a conductive connection between said output circuit and said load, a second driver having a grid connected to the output of said first driver and consisting of a phase inverter, said second driver having its plate conductively connected to said output circuit, a positive half cycle modulator, having a cathode circuit, said second driver being connected to and driving said positive half cycle modulator, an inductive reactance in said cathode circuit across which the output voltage



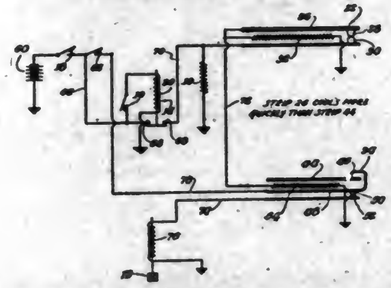
of said positive half-cycle modulator is developed, and a source of negative voltage, the cathodes of said modulators and said second driver being connected to said source for supplying cathode voltage to said modulators and said second driver, said second driver having a cathode circuit including a resistance-capacity net-work for adjusting the amplitude and phase of the output of the positive half cycle modulator with respect to that of the negative half cycle modulator.

2,446,026
JOURNAL DRESSER
William Raby, Fresno, Calif.
Application February 8, 1946, Serial No. 646,413
5 Claims. (Cl. 51—187)



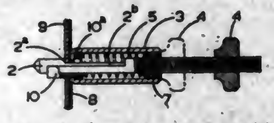
1. A journal dresser comprising a supporting disc adapted to be disposed in concentric relation at the end of a journal for rotation about the axis thereof, a plurality of dresser shoes each having a working face, said dresser shoes being adapted to engage the journal in circumferentially spaced relation, a spring finger connected at one end to each dresser shoe and extending lengthwise of the journal in overhanging relation to the disc, inturned attachment tongues on the adjacent ends of the fingers, radially extending base members on the outside of the disc adjacent the tongues, said base members being pivoted adjacent their outer ends on the disc for swinging relative thereto in radial planes, means attaching the tongues to corresponding base members, adjustment screws threaded through the base members inwardly of their pivots and bearing against the disc, and means to rotate the latter.

2,446,027
ARC CHUTE
William M. Scott, Jr., Bryn Mawr, Pa., assignor to I. T. E. Circuit Breaker Company, Philadelphia, Pa., a corporation of Pennsylvania
Application August 19, 1944, Serial No. 550,179
2 Claims. (Cl. 200—147)



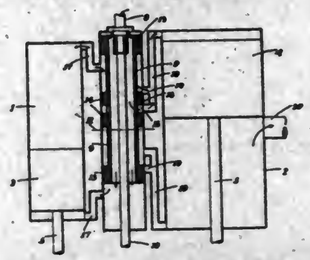
1. An arc chute comprising means for drawing an arc, means for moving the arc into the chute, and arc extinguishing means within the arc chute, said arc extinguishing means having a pair of flat side walls, a plurality of flat perforated plates of insulating material located between and parallel to said walls and squeezing said arc, and a plurality of metallic members for breaking said arc into a plurality of arcs in series, each of said metallic members extending through the perforations in the plates of insulating material and into the spaces therebetween transverse to said arc path.

2,446,028
CONCRETE FINISHING DEVICE
William J. Sponseller, Salem, Ohio
Application May 3, 1945, Serial No. 591,678
4 Claims. (Cl. 94—45)



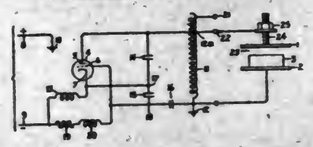
1. A concrete finishing device comprising an elongated concrete finishing implement, base members secured to the upper surface of said implement, a mounting provided with a pair of laterally extending flanges joining said base members, an electrical pulsating magnet vibrator secured to the mounting, a handle to manipulate the device, a pair of right angle brackets arranged to present two vertically extending arms spaced to receive the handle, the remaining arms of the brackets extending laterally in opposite directions, means to adjustably secure the handle to the vertically extending arms, means to connect the vibrator to a source of electricity, and means mounted on the said base members to secure the flanges of the mounting and the laterally extending arms of the brackets to the base members.

2,446,029
THERMAL TIME-DELAY SWITCH
Vernon N. Tramontini, Indianapolis, Ind., assignor to Stewart-Warner Corporation, Chicago, Ill., a corporation of Virginia
Application September 14, 1946, Serial No. 697,128
1 Claim. (Cl. 175—320)



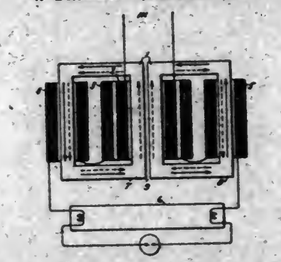
A voltage compensated time delay switch comprising a pair of contacts, a bimetal element arranged to separate said contacts when heated to a predetermined temperature, an electric heating element in heat transfer relation to said bimetal element, a second set of contacts, a second bimetal element arranged to separate the last said contacts when heated to a predetermined temperature, a second electric heating element in heat transfer relation to the last said bimetal element, and circuit means connecting both of said heating elements in parallel and for energizing both of said heating elements by way of the said second set of contacts, the characteristics of the heating elements and the bimetal elements being such that simultaneous energization of both heating elements will cause separation of the second set of contacts before the first set of contacts has separated while simultaneous de-energization of both heating elements will cause closing of the second set of contacts before the relationship of the first set of contacts has been substantially disturbed.

2,446,030
PLATE CLAMP
Thomas Charles Poynder Tunnard-Moore, Hendon Way, London, England
Application May 8, 1946, Serial No. 668,189
In Great Britain November 3, 1945
1 Claim. (Cl. 85—5)



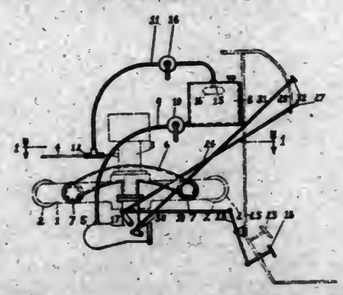
A plate clamp comprising in combination a holder, a screw threaded pin having a gapped portion thereon slidably mounted in said holder, a shrouding having a part which is adapted to project beyond said holder at one end with a collar formed on the other end which is disposed within said holder, and in which said pin slides, a collar threaded on said screwed pin, a compression spring disposed between the collar and the collar on the shrouding to normally retain this pin in its retracted position and a screwed member mounted on the screwed pin for augmenting the clamping pressure on said pin.

2,446,031
SEMICOMPOUND MULTIPLE EXPANSION STEAM ENGINE
Russell R. Waterman, Lodi, Calif.
Application July 24, 1944, Serial No. 546,344
3 Claims. (Cl. 121—103)



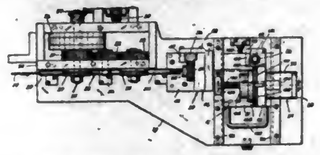
1. A steam engine comprising a counterflow cylinder and a uniflow cylinder having an exhaust port, a steam chest connected to a source of steam, steam passage means between the cylinders and chest and including the latter, and a valve adjustable as to length of stroke, movable in the chest and cooperating with the passage means to feed steam from the chest to one end of the counterflow cylinder and from the opposite end of the latter to the uniflow cylinder; or to feed steam from the chest to both cylinders simultaneously and depending on the length of stroke of the valve.

2,446,032
HIGH-FREQUENCY GENERATING APPARATUS
Donald E. Watts and Julius Vahle, Jr., Schenectady, N. Y., assignors to General Electric Company, a corporation of New York
Application December 9, 1944, Serial No. 567,416
2 Claims. (Cl. 250—36)



2. High frequency apparatus comprising an electric oscillator device provided with an anode, a cathode, and a grid, a tank oscillation circuit including an inductance, three capacitors connected in series with each other and across at least a portion of said inductance, an electric connection between said anode and said inductance, an electric ground connection for said inductance, connections connecting points between different pairs of said capacitors respectively to said grid and said cathode, positive and negative direct current supply connections for supplying a direct current to said oscillator device, an electric ground connection for said positive supply connection whereby said positive supply connection is connected to said anode through said ground connections, and electric connections between said negative supply connection and said grid and cathode including radio frequency choke coils.

2,446,033
HIGH REACTANCE TRANSFORMER
John G. Wellings, Rugby, England, assignor to General Electric Company, a corporation of New York
Application July 9, 1946, Serial No. 682,178
In Great Britain February 13, 1946
2 Claims. (Cl. 171—242)



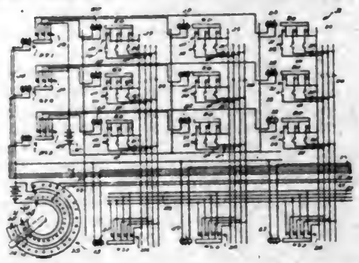
2. A three-legged magnetic core, primary and secondary transformer windings on the center leg of said core, separate reactance windings on the outer legs of said core, and means for connecting said reactance windings in series with said secondary winding and in series opposition with each other relative to voltages induced in them by the primary winding, said center leg being longitudinally split so as to provide an air gap in the magnetic circuit of the reactance windings without introducing an air gap into the magnetic circuit of the transformer windings.

2,446,034
AUXILIARY INDEPENDENT CARBURETOR
Max R. Williams, Baltimore, Md.
Application March 4, 1947, Serial No. 732,301
1 Claim. (Cl. 123—127)

In an internal combustion engine, an auxiliary source of fuel-air mixture comprising an auxiliary manifold which is permanently connected to the intake manifold of the engine, an auxiliary carburetor connected to said auxiliary manifold, an auxiliary fuel receptacle being located above both the auxiliary carburetor, and the carburetor which is normally connected to the intake manifold of the engine, a branch of the main fuel line, which line leads from the last mentioned carburetor to the main fuel receptacle, being extended into said auxiliary fuel receptacle and provided with a manually controlled shut-off valve as well as with a float controlled valve, an independent auxiliary fuel line provided with a shut-off valve connecting said auxiliary fuel receptacle to said auxiliary carburetor, an independent accelerator pedal being connected to the throttle of said auxiliary carburetor, and an independent choke control and hand throttle control being provided for said auxiliary carburetor, all substantially as described.

2,446,035
INSERTING MACHINE
Lawrence J. Winkeler, St. Louis, Mo., assignor to The Emerson Electric Manufacturing Company, St. Louis, Mo., a corporation of Missouri
Application September 15, 1944, Serial No. 554,303
17 Claims. (Cl. 140—140)

1. In an inserting mechanism, a rod feeding device adapted to project an uncut rod intermittently, cutting means to cut the rod, holding means to support a member having a series of openings into which the rod is inserted, means to rotate the holding means to successively dispose the openings adjacent the cutting means, and mechanism to cause the feed, cutting, and holding means to operate in timed relation, said mechanism having means causing the rod to be projected into a slot, means to operate the cutting means to cut off the rod, and means rendered operative after operation of the cutting means to cause the rotating means to move to dispose a subsequent slot in position to receive a projection of the rod.

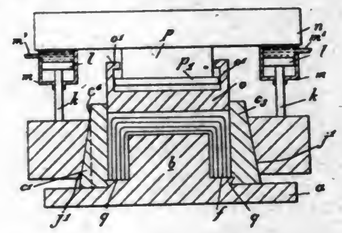


2,446,036
BRACKET SUPPORTED SUSPENDED CHAIR
Vit Zdanaitis and Violet Zdanaitis, Fort Wayne, Ind.
Application May 8, 1945, Serial No. 592,595
2 Claims. (Cl. 155—79)

2. In a detachable support for suspending a child's chair from the back-rest of an automobile seat where the chair is of a type having arm-rests, a back-rest and legs, said support consisting of a spring frame having a bent upper loop portion and pendent side members, the lower portions thereof having inturned offsets and outturned terminal hooks, said offsets having supporting engagement with said chair under the arm-rests thereof and hooked engagement with the rear legs of the chair around the backs thereof, thus to secure the chair suspended in place, when said loop portion is disposed over the back-rest for the automobile seat.

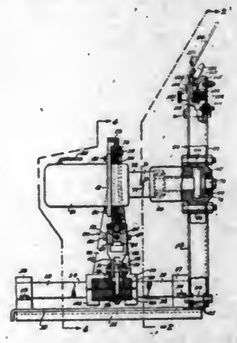
2,446,037
SELECTIVE SIGNALING SYSTEM
Charles E. Ammann, Yonkers, and Rodney W. King, Rockville Centre, N. Y., assignors to American Airlines, Inc., New York, N. Y., a corporation of Delaware
Application March 1, 1946, Serial No. 651,190
10 Claims. (Cl. 177—353)

1. A signalling system for the selective operation of signalling devices, at a remotely located station, comprising central station storage apparatus, including a plurality of information storage circuit groups, each circuit of each group matching a like circuit in each of the other groups, to provide matched circuit sets each corresponding with a signalling device to be operated, said storage circuit groups including group classes, comprising corresponding circuit groups, and group categories comprising like circuit groups, each group class comprising a circuit group from each group category, and each group category comprising a circuit group from each group class, a circuit conditioning switch in each circuit and selectively operable to set the circuit for the storage of information and the dissemination thereof by operation of its corresponding signalling device, a relay switch in each circuit on one side of its circuit conditioning switch, selectively operable group category conditioning means comprising a set of group category selector switches at the remote station, each of said category selector switches being operable to select and condition the relay switches of the cir-



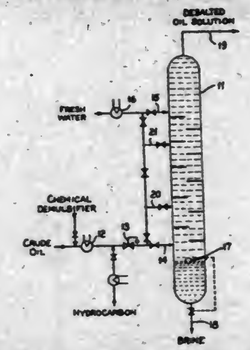
cuits of the circuit groups of the corresponding group category for the operation of the signalling devices, relay switch means in said circuits on the other side of the circuit conditioning switches thereof, selectively operable group class conditioning means comprising a set of group class selector switches at the remote station, each of said class selector switches being operable to select and condition all of the relay switch means of the circuits of the circuit groups of the corresponding group classes for the operation of said signalling devices, and actuating means, operable in response to the actuation of any selector switch in one of said switch sets contemporaneously with any selector switch in the other of said sets, for actuating said signalling devices in response to the set condition of the corresponding circuits of the circuit group contained in the selected group class and also in the selected group category.

2,446,038
MOLDING OF BOXES FROM LAMINATIONS OF FELTED FIBROUS MATERIALS IMPREGNATED WITH SYNTHETIC RESINS
Alfonso Amigo, Ealing, London, England, assignor of one-half to Ebonestos Industries Limited, London, England
Application November 29, 1943, Serial No. 512,269
In Great Britain October 18, 1943
2 Claims. (Cl. 154—1)



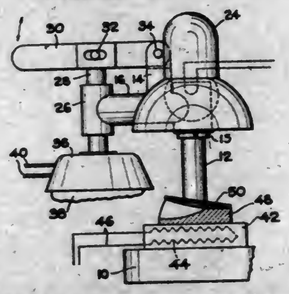
1. An apparatus for moulding boxes from a packet of laminations of felted fibrous material impregnated with synthetic resins in which the laminations are cut to present a central portion for the bottom of the box and side portions for its sides, the said portion and portions forming a hollow space between them, comprising a base

plate: an inner moulding member projecting from the said base plate; a plurality of movable side moulding members, each side member corresponding to one side of the box and each abutting with its inner surface near the edge at one end against the end of one of the two adjacent side members and with the other end against the inner surface of the other adjacent side member near the edge of the latter, thereby forming an enclosure around the projecting inner member and the enclosed space thus obtained being capable of being reduced by a relative sliding



movement of adjacent side members of each other in order to compress the portions of the laminated packet forming the sides of the boxes between the side moulding members and the projecting inner member; a separate movable top moulding member positioned above the inner moulding member and intended to be displaced into part of the space enclosed by the side members above the inner moulding member to form the bottom of the box between itself and the projecting inner moulding member; and means for moving the said side and top moulding members towards the inner member.

2,446,039
STARTER TESTING APPARATUS
Harold L. Bennett, South Bend, Ind., assignor to Bennett-Feragen, Inc., South Bend, Ind., a corporation of Washington
Application November 27, 1944, Serial No. 565,308
13 Claims. (Cl. 73—118)

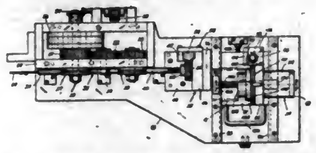


1. Apparatus for testing the torque developed by an airplane engine starter having a shaft adapted to releasably engage and rotate an element associated with the engine, comprising a torque indicator having a member shaped to be releasably engaged by said shaft, means supporting said starter for slidable movement into and out of operative relation to said member, manually operable means for rotating said starter and shaft to bring the shaft into operative engagement with said member, and releasable means for locking said supporting means against slidable movement.

2,446,040
PROCESSES FOR DESALTING MINERAL OILS
Charles M. Blair, Jr., Webster Groves, Mo., assignor to Petrolite Corporation, Ltd., Wilmington, Del., a corporation of Delaware
Application November 29, 1946, Serial No. 713,061
3 Claims. (Cl. 252—327)

1. A process for treating petroleum oils to reduce the inorganic salt content thereof, characterized by diluting the oil with a hydrocarbon solvent having a viscosity of less than 4 centistokes at 200° F., continuously and countercurrently contacting such mixture with fresh water in a unitary contacting zone, wherein the counterflowing phases are subjected to a period of gentle agitation, characterized by a Reynolds number of between 2100 and 300,000 for a period of from 1 to 10 minutes, incorporating a chemical demulsifier in one of the counterflowing phases prior to the period of gentle agitation, continuously withdrawing a desalted oil solution from one end of said zone and continuously withdrawing an aqueous phase from the other end of said zone; said fresh water being fed continuously to said contacting zone in the proportion of from 2% to 20% of the volume of the petroleum oil.

2,446,041
PLASTIC MOLDING PRESS
Lloyd H. Blanchard, Worcester, Mass.
Application September 6, 1945, Serial No. 614,652
2 Claims. (Cl. 18—17)



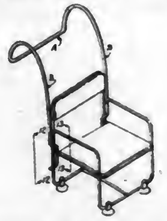
1. A molding press comprising a base, a standard, a bracket swingable on the standard parallel to the base, a source of heat and a plunger on the

2,446,035

INSERTING MACHINE

Lawrence J. Winkeler, St. Louis, Mo., assignor to The Emerson Electric Manufacturing Company, St. Louis, Mo., a corporation of Missouri

Application September 15, 1944, Serial No. 554,303
17 Claims. (Cl. 140—140)



1. In an inserting mechanism, a rod feeding device adapted to project an uncut rod intermittently, cutting means to cut the rod, holding means to support a member having a series of openings into which the rod is inserted, means to rotate the holding means to successively dispose the openings adjacent the cutting means, and mechanism to cause the feed, cutting, and holding means to operate in timed relation, said mechanism having means causing the rod to be projected into a slot, means to operate the cutting means to cut off the rod, and means rendered operative after operation of the cutting means to cause the rotating means to move to dispose a subsequent slot in position to receive a projection of the rod.

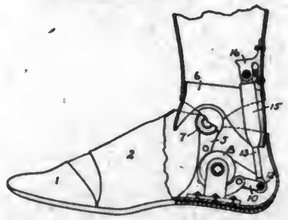
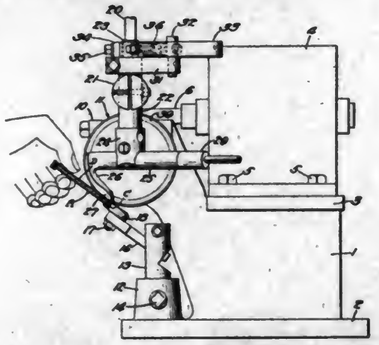
PLASTIC MOLDING PRESS

Lloyd H. Blanchard, Worcester, Mass.



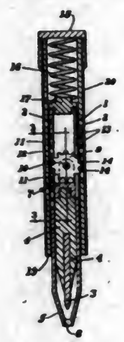
Application September 6, 1945, Serial No. 614,652
2 Claims. (Cl. 18—17)

1. A molding press comprising a base, a standard, a bracket swingable on the standard parallel to the base, a source of heat and a plunger on the



bracket to swing therewith for selective positioning of either the heat source or the plunger in operative relation to the base, a carrier on the lower end of the plunger, means to operate the plunger to approach the base, deformable material in the carrier, said base being adapted to support a mold for pre-heating by the heat source.

2,446,042
PROSTHETIC FOOT FOR INJURED OR SHORT LEGS
Mario Capella Valenti, Barcelona, Spain
Application January 17, 1946, Serial No. 641,729
In Spain February 7, 1945
7 Claims. (Cl. 3—6)



1. A prosthetic foot for injured or short legs comprising a heel part that forms the body or principal part of the foot and a forward part which forms the end and which is pivotally connected to the heel part by means of a hinge-joint articulation in combination with a spring; said heel part being pivotally connected to a framing which is attached to the patient's leg, and said heel part comprising in its interior a shock absorbing mechanism whose lever is articulated to the end of the rod of a piston sliding in the inside of a cylinder of a spring pump, in order to smooth the movement of the foot upon its point of articulation with the framing fastened to the leg.

2,446,043
FOLDING AND LASTING MACHINE
Christian Christiansen, Swampscott, Mass., assignor to Rotary Machine Company, Inc., Lynn, Mass., a corporation of Massachusetts
Application October 12, 1946, Serial No. 702,925
11 Claims. (Cl. 12—7)

1. A folding and lasting machine having, in combination, a rotatable folding wheel, means for rotating the wheel, and heated means adapted to bear with constant pressure against work held between it and the folding wheel during an operating cycle.

2,446,044
WRITING IMPLEMENT
Elmer W. Davis, Newton Center, Mass.
Application July 24, 1946, Serial No. 685,980
8 Claims. (Cl. 120—9)

1. A writing implement having a body, a marking element within said body, said body and marking element being relatively movable to retract the marking element into an inoperative position within the body or to project it into an operative writing position, and means normally holding the marking element in its retracted position but responsive to pressure applied to the implement body to project the marking element into its operative writing position.

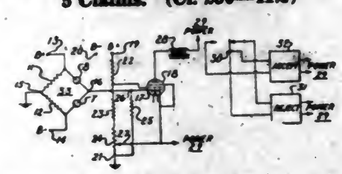
2,446,045
COMPOSITION OF MATTER AND METHOD OF MAKING SAME
Melvin De Groote, University City, and Bernhard Keiser, Webster Groves, Mo., assignors to Petrolite Corporation, Ltd., Wilmington, Del., a corporation of Delaware
No Drawing. Application November 26, 1945, Serial No. 630,976
7 Claims. (Cl. 260—410.5)

1. A surface-active hydrophile chemical compound of the formula:

$$R—R_5—R$$

in which R is a member of the class consisting of

$$R_1O(R_2O)_nH$$



$$R_1O(R_2O)_nOCR_6$$

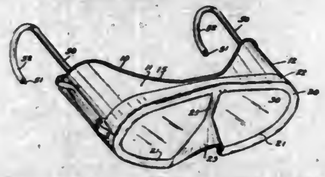
and

$$R_1O(R_2O)_nOCR_7$$

radicals, and in which R_5 is a member of the class consisting of methylene and substituted methylene radicals representing the residue of low molal aldehydes; R_1 is a substituted monocyclic phenol radical having 2 of the 3 reactive 2, 4, 6 positions substituted by 2 alkyl side chains, of which at least 1 contains 3 carbon atoms and the longest of which does not contain more than 8 carbon atoms; R_2O is an alkylene oxide radical containing at least 2 and not more than 4 carbon atoms selected from the class consisting of ethylene oxide, propylene oxide, butylene oxide, glycide and methylglycide radicals; and n is a whole number varying from 1 to 60; R_6CO is the acyl radical of a low molal monocarboxy acid having not over 7 carbon atoms; R_7CO is an acyl radical of a detergent-forming acid having at least 8 and not more than 32 carbon atoms, with the proviso that there be present at least one polyglycol radical containing at least 8 ether linkages, and there must be at least one occurrence of the acyl radical R_7CO.

2,446,046
SIZING BRIDGE
Samuel C. Hurley, Jr., Danville, Ill.
Application September 23, 1944, Serial No. 555,474
5 Claims. (Cl. 250—41.5)

1. In a photoelectric sizing device for making precision dimensional inspections of articles a source of light, a condensing lens positioned to concentrate a beam of light in an inspection zone, light sensitive devices positioned about a magnifying mirror, at least one of said light sensitive devices positioned to be placed in shadow and at least one other of the light sensitive device positioned to be placed in light when the article being tested is of a proper size, a bridge circuit including said light sensitive devices having the light sensitive devices which are in light when the article is of the proper size placed in the positive arm of said bridge and having the light sensitive devices which are in shadow when the article is of the proper size placed in the negative arm of the bridge, means for maintaining the bridge in balance when all the light sensitive devices are in shadow or all in light, means for unbalancing the bridge when a portion of the light sensitive devices are in light and another portion are in shadow, a selecting means for accepting or rejecting the article, means operating to accept the article only when all of the light sensitive devices in the positive arm of said bridge are in light and all of the light sensitive devices in negative arm of said bridge are in shadow, means operating to reject the article when the bridge is in balance or when the bridge is unbalanced in any other manner than the state of unbalance required for accepting the article, and means for varying the tolerance within which the selecting means will accept the article including independent means for varying the maximum tolerance and the minimum tolerance by adjusting the position of the light sensitive devices about the magnifying mirror.



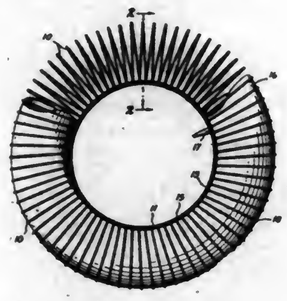
2,446,047
FLASH ILLUMINATED STRIPED PATTERN DIRECT READING STROBOSCOPE FOR WAVE FREQUENCY MEASUREMENT
Earle L. Kent, Elkhart, Ind., assignor to C. G. Conn, Ltd., Elkhart, Ind., a corporation of Indiana
Application August 2, 1944, Serial No. 547,795
13 Claims. (Cl. 88—14)

1. A stroboscope comprising a light, means for intermittently lighting the light at a frequency proportional to the frequency of a wave to be measured, a cylinder adjacent the light, means for driving the cylinder at a substantially constant speed, and a pattern on the cylinder including a series of spaced lines each lying at a small acute angle to adjacent lines with some of the lines extending the full axial length of the pattern and others having an axial projected length less than the pattern, the lines being of such varying width throughout their lengths as

to provide a gradually increasing number of pattern segments of equal width and equally spaced circumferentially of the cylinder at successive points spaced axially along the pattern.

2,446,048
EYESHIELD
Donald E. Kimball, Cleveland Heights, Ohio
Application July 20, 1945, Serial No. 606,181
3 Claims. (Cl. 2—14)

1. In a goggle, the combination of a frame having a top portion, end portions and a pair of separated bottom portions, the rear edge of the frame being formed to fit approximately against the face of the wearer, a movable lens plate adapted to bear against the frame at the front, an open retaining member having a contour approximately corresponding to that of the front of the frame, and having a rearward flange adapted to embrace the frame, said retaining member being movable from the frame to allow the ready insertion and removal of the lens plate between them, the retaining member being provided with ears at its ends and loop portions adapted to connect said ears removable to the end portions of the frame.



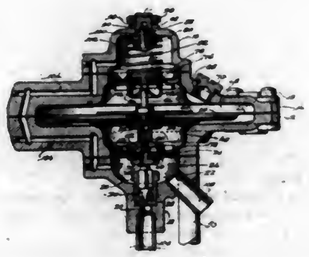
2,446,049
COPOLYMERS OF ISOPROPENYL TOLUENE AND ACRYLATE AND PROCESSES OF PRODUCING SAME
Edward L. Kropa, Old Greenwich, Conn., assignor to American Cyanamid Company, New York, N. Y., a corporation of Maine
No Drawing. Application February 13, 1943, Serial No. 475,792
7 Claims. (Cl. 260—84)

1. A copolymer of a mixture consisting of isopropenyl toluene and an acrylic compound selected from the group consisting of acrylic acid, methacrylic acid, methyl acrylate, and methyl methacrylate, the weight ratio of said isopropenyl toluene to said acrylic compound being between 1:10 and 10:1.

2,446,050
INNER TUBE TESTER
Andrew Kubin, Westlake, Charles Kubin, North Olmsted, and Andrew Brondos, Jr., Lakewood, Ohio, assignors to The Reliable Spring & Wire Forms Company, Cleveland, Ohio, a corporation of Ohio
Application August 6, 1946, Serial No. 688,670
6 Claims. (Cl. 73—50)

1. A testing cage for inner tubes comprising two laterally spaced rings and a series of cir-

cumferentially spaced resilient wire loops having open bases supported at their ends on said rings, each loop comprising a single piece of wire having each of its ends coiled helically to provide



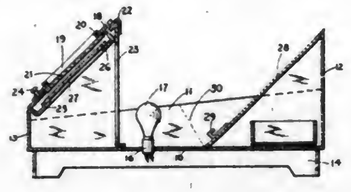
an elongated tubular ring receiving end portion disposed substantially normal to the plane of the loop, said tubular end portions of said loops abutting end to end on said rings to uniformly space said loops circumferentially of the cage.

2,446,051

CONTROL VALVE

John H. Leslie, II, Winnetka, Ill., assignor to Stewart-Warner Corporation, Chicago, Ill., a corporation of Virginia

Application December 3, 1943, Serial No. 512,791
9 Claims. (Cl. 137—153)



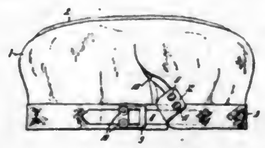
1. A control valve comprising an upper casting, a lower casting, a pair of intermediate castings, a lower diaphragm between said lower casting and one of said intermediate castings, an upper diaphragm between the other of said intermediate castings and said upper casting, a third diaphragm between said intermediate castings, a valve for admitting fuel to a chamber provided in said lower casting beneath said lower diaphragm, means rigidly connecting said diaphragms and adapted to urge said valve toward closed position, a spring urging said last named means and said diaphragms toward valve closing position, conduit means connecting the chamber in the lower casting with a chamber formed in the upper casting above said upper diaphragms, means for adjusting the relationship between said diaphragms, and means for creating a differential pressure across the intermediate diaphragm.

2,446,052

COMPARATOR FOR COLOR PHOTOGRAPHS

Edward H. Loessel and John J. Risdon, Binghamton, N. Y., assignors to General Aniline & Film Corporation, New York, N. Y., a corporation of Delaware

Application April 26, 1945, Serial No. 590,356
5 Claims. (Cl. 88—14)



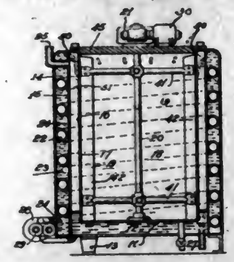
1. A comparator for viewing color transparencies and prints made therefrom including in combination a supporting structure, a light source intermediate the ends of said structure, an inclined plate extending upwardly and back from one end of the supporting structure, a holder for supporting a color transparency carried by said inclined plate, both the plate and holder being disposed normally to the direction of light from the source and having therein openings coextensive with the transparency to be viewed and through which light from the source illuminates the transparency, a second inclined plate adjacent the other end of said structure and means thereon for supporting a print in such position as to be lighted by said source with substantially the same intensity of illumination as the transparency, and light diffusing means between the source of illumination and the transparency holder, substantially parallel to the holder and plate and of such extent that light from the source to the transparency is diffusely transmitted thereby.

2,446,053

ADJUSTABLE CAP

Stephen Matarazzo, Schenectady, N. Y.

Application November 16, 1946, Serial No. 710,372
4 Claims. (Cl. 2—197)



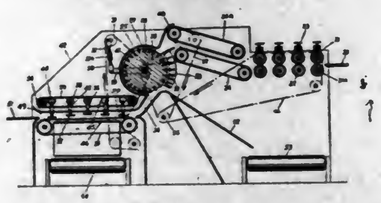
1. A cap comprising a crown, a band attached along the periphery of said crown, said band having two ends at the back of said cap, one of said ends being adapted to overlap the other end, a strap with two extremities attached respectively to the inner side of said band adjacent said one end and to the outer side of said band adjacent said other end, a stop member slidingly arranged on said strap, and means adjacent said one end of said band for cooperation with said stop member to confine said band to a predetermined effective length and to cause a portion of said band to conceal said stop member.

2,446,054

LIQUID TEMPERATURIZING VAT

Francis J. McCullough, Chicago, Ill.

Application July 9, 1947, Serial No. 759,863
4 Claims. (Cl. 257—108)



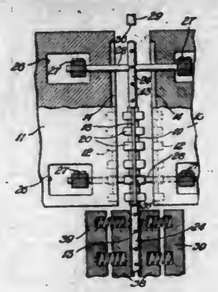
1. A liquid temperaturizing vat comprising an outer shell having a bottom well portion adapted to receive water, an intermediate wall spaced inwardly from said outer shell and leaving an aisle therebetween, a container having its bottom portion contacting said well, said container having a thin wall spaced from said intermediate wall and providing a space therebetween, a hollow pipe coil containing cold producing means positioned within said aisle, and extending spirally upwardly therein, said coil being of such a diameter as to fill said space laterally and contact said walls, said coil and said outer and intermediate walls forming a spiral pathway, return spray members communicating with the top of said pathway, an agitator rotatable within said container and having members contacting the wall thereof, and a pumping means for forcing the water in the well upwardly along said spiral pathway for providing cooled water, said spray return members directing said cooled water against the thin wall of the container for cooling the contents thereof, said water dropping back to said well for recirculation and for imparting cold to the lower portion of said container.

2,446,055

MACHINE FOR CLEANING AND SEPARATING FLAX OR OTHER FIBROUS PLANTS

Thomas Graham McLaurin and Robert Duncan, Montreal, Quebec, Canada

Application November 3, 1944, Serial No. 561,760
In Canada November 4, 1943
1 Claim. (Cl. 19—30)



In a cleaning machine for flax or other fibrous plants, a breaker section consisting of a series of toothed rollers meshing with each other in pairs under spring pressure, each of said pairs of rollers having teeth of a finer pitch than those of the preceding pair, a breaking and separating section comprising a toothed rotor and an arcuate knife carrier oscillating about the circumference of said rotor, the knives or teeth of the lower portion of said carrier being spaced progressively closer together, means to individually adjust the knives on said carrier radially in relation to the teeth on the rotor, a beater section comprising a slatted endless belt, a perforated support below the top section of said slatted belt and spaced therebelow a sufficient distance to allow vibrations of the belt, a series of beater plates, each beater being constrained to beat upon the fibres passing on the slatted belt and acting to force the refuse through between the slats of the belt, and means to drive the various sections synchronously with each other.

2,446,056

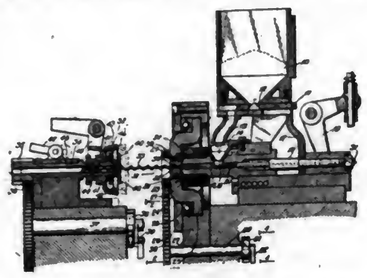
APPARATUS FOR FORMING GROUPS OF DIE CASTINGS

Louis H. Morin, Bronx, N. Y., assignor of one-half to Davis Marinsky, Bronx, N. Y.

Application March 29, 1944, Serial No. 528,637
11 Claims. (Cl. 18—42)

1. A die casting machine comprising a pair of dies having a plurality of independent cavities spaced along the parting line of the dies in a straight row, adjacent surfaces of the dies having an elongated impression spaced from said cavities and arranged substantially parallel to said row of cavities for forming a gate rod, the dies having an admission gate passage communicating with said impression, passages extending from the impression to each of the die cavities whereby in the pressure injection of casting material into the dies a plurality of castings are formed in the die cavities all united by the gate rod, means for ejecting the casting and gate rod from the dies coincidently with the operation of separating the dies and for supporting the complete casting in predetermined position between the open dies, and reciprocating means for engaging the end of said gate rod to strip the unit casting from last named means and to feed the same beyond adjacent surfaces of said dies.

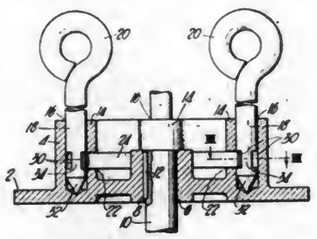
2,446,057



PLASTIC CASTING MACHINE

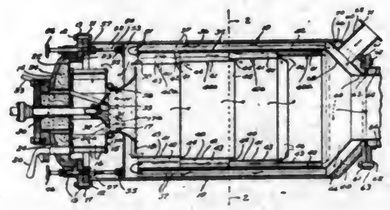
Louis H. Morin, Bronx, N. Y., assignor of one-half to Davis Marinsky, Bronx, N. Y.

Application April 25, 1944, Serial No. 532,659
14 Claims. (Cl. 18—30)



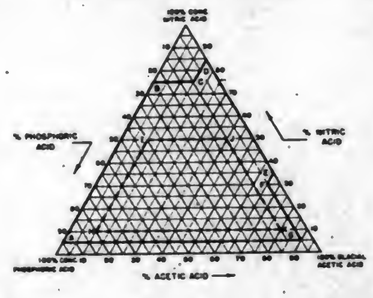
1. A machine for forming helical die castings comprising a casting mechanism and a feed mechanism; the casting mechanism comprising a cylinder for receiving casting material and having a nozzle discharge end, a die abutting said nozzle discharge end having a helically shaped cavity opening through opposed ends thereof, means supporting the die to maintain one end of the cavity in constant registration with said cylinder, means for intermittently feeding casting material into the cylinder, a plunger in said cylin-

der movable toward said die for pressure injecting casting material into the cavity of said die, said casting mechanism having a passage extending therethrough longitudinally of said cylinder for receiving a strand whereby a casting of helical contour may be cast on the strand in said die;



said feed mechanism being movable toward and from the die and having grippers which are themselves movable to engage said strand with the casting thereon, said feed mechanism including said grippers serving to draw said strand and casting out of said die.

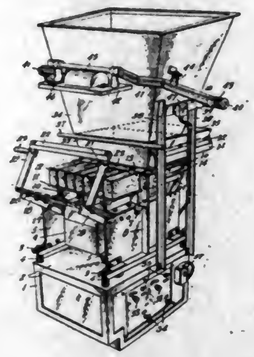
2,446,058
WIRE DRAWING BLOCK
Stephen J. Pachl, New Haven, Conn.
Application May 14, 1945, Serial No. 593,613
6 Claims. (Cl. 205—20)



1. A wire drawing block comprising a wire receiving body rotatable about an axis, the body having a plurality of holes directed generally parallel to the axis of rotation of the block and arranged therein on one side thereof on a circle concentric with the axis of rotation of the body, a plurality of removable pin-like members with one adapted to be disposed in each of said holes, each of said pin-like members having means on the bottom portion thereof cooperating with means adjacent the bottom of the hole in the body selectively to lock the pin-like member in the body or to release it therefrom, said locking means comprising at least one open sided socket in each pin-like member and a spring-pressed locking ring for reception into the sockets in the members, said locking ring being supported coaxially on the body of the wire drawing block so as to be held from movement axially of the body and so that portions of it lie in the paths of the pin-like member in the holes in the absence of such members, the locking ring having peripheral and bottom surfaces shaped for interaction with the sockets in the pin-like members to lock such members in the holes.

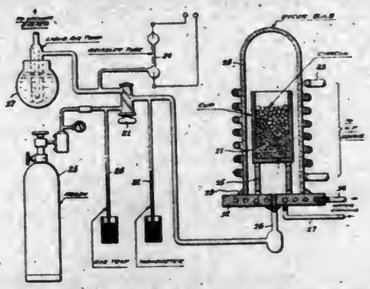
2,446,059
GAS HEATER
Eric G. Petersen, New York, and David P. Graham, Westbury, N. Y., assignors to Peabody Engineering Corporation, New York, N. Y., a corporation of New York
Application October 5, 1944, Serial No. 557,266
11 Claims. (Cl. 263—19)

1. A heat exchanger comprising a closed shell, an inner liner spaced from said shell to form an annular fluid passage, a corrugated spacing member in said passage supporting said inner liner and dividing said annular passage into a plurality of separate axial channels, a second concentric liner disposed within said first inner liner and separated therefrom by a corrugated separator to form a second set of axial channels, and means supplying fluid to one of said passages, means connecting said passages for the series flow of said fluid therein and means discharging the fluid from the other of said passages.



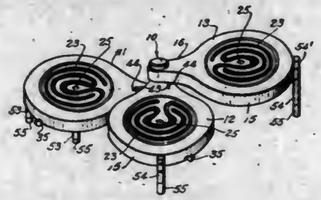
2,446,060
CHEMICAL POLISHING OF METAL SURFACES
Henry A. Holden Pray and Iver Igelsrud, Columbus, Ohio, and Gerald L. Simard, Stamford, Conn., assignors, by mesne assignments, to The Battelle Development Corporation, Columbus, Ohio, a corporation of Delaware
Application July 4, 1944, Serial No. 543,450
8 Claims. (Cl. 252—101)

8. The method of producing a brilliant, reflective surface on a metal selected from the group consisting of German silver, copper, brass, nickel, and Monel, which comprises immersing the metal surface to be polished in a bath consisting essentially of a mixture of concentrated solutions of nitric acid of about 1.42 sp. gr., phosphoric acid of about 1.7 sp. gr., and acetic acid of about 1.05 sp. gr. present in relative proportions by



volume lying within the area defined approximately in the accompanying diagram by the dotted lines AB, BC, CD, DE, EF, FG, and GA, and containing up to about 10% water.

2,446,061
CONCRETE BLOCK MOLDING MACHINE
Robert S. Reed, Three Rivers, Mich.
Application December 6, 1946, Serial No. 714,400
25 Claims. (Cl. 25—41)

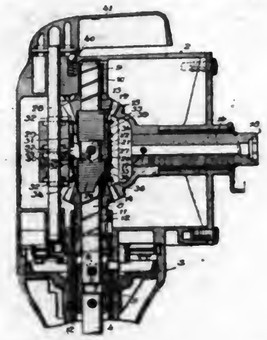


1. In combination with a brick molding machine having a molding cavity defined by a removable pallet, a fixed vertical plate, a movable plate and a plurality of translatable vertical plates slidable through said other plates, a magnetic vibrator arranged to vibrate said pallet and cavity defining plates, a bar connected to said translatable plates to effect translation thereof and interconnected with said movable plate to be retracted from said cavity upon movement of said movable plate from cavity defining position, guide members for said bar connected to said fixed vertical plate, a bottom plate supported on said guide members and above the retracted positions of said translatable plates, a charging drawer having rail members on the sides thereof, rollers supported from the sides of said bottom plate and engaged with said rail members, said rollers being yieldingly held down on said bottom plate, said charging drawer having a volume equal to the volume of mortar compactable in said molding cavity, an open bottom hopper secured to said machine independently of said cavity forming walls and registering with the top of said charging drawer in the retracted position of said drawer, a closure plate secured to the top of said charging drawer and at the rear thereof and arranged to close the bottom of said hopper in the advanced position of said drawer, a second magnetic vibrator pivotally mounted on said hopper and adapted to be swung into operative position at the top of said molding cavity, a pair of electrical rectifying and regulating units in said machine, a switch arranged to connect said vibrators to said units, said switch being operatively associated with said second vibrator to energize both of said vibrators when said second vibrator is in operative position, and a second switch arranged to connect said vibrators to said units, said second switch being operatively associated with said charging drawer and arranged to energize said vibrators only when said drawer is in advanced position.

2,446,062
MANUFACTURE OF THORIUM
Harvey C. Rentschler, East Orange, William C. Lilliendahl, Mountain Lakes, and John E. Gray, Newark, N. J., assignors to Westinghouse Electric Corporation, East Pittsburgh, Pa., a corporation of Pennsylvania
Application January 23, 1945, Serial No. 574,130
9 Claims. (Cl. 75—84)

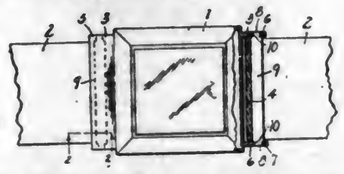
1. The method of manufacturing thorium comprising mixing the oxide thereof with calcium, placing the mixture in a molybdenum cup, enclosing said cup in a high-silica glass bulb, evacuating said bulb, introducing inert gas thereinto, heating the cup and contents to between about 800° and 900° C. to melt the calcium and cause it to react with the oxide and liberate free thorium, cooling the mixture, leaching, and drying the powdered metal produced.

2,446,063
ELECTRIC RANGE
William P. Cameron, New York, N. Y.
Application June 20, 1946, Serial No. 678,021
8 Claims. (Cl. 219—37)



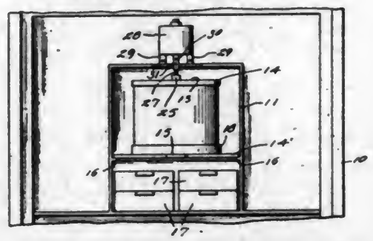
6. A range and the like comprising a support means, a plurality of hot plates arranged oscillatably on said support means one above the other, each hot plate including a heating element and a control switch, an operating handle connected to each switch and exposed at the periphery of each hot plate, certain of said hot plates having a switch handle exposed above the surface of the hot plates and cam means on the hot plate thereabove for moving and holding said switch handle to "off" position upon movement of said hot plates into superposed relation.

2,446,064
SPRING CLUTCH DRIVE
Thomas R. Smith, Newton, Iowa, assignor to The Maytag Company, Newton, Iowa, a corporation of Delaware
Application July 12, 1946, Serial No. 683,189
2 Claims. (Cl. 192—51)



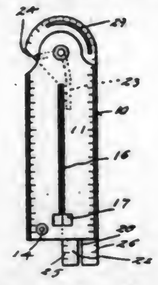
1. In a spring clutch drive, a drive shaft, opposed bevel gears journalled on the shaft but

adapted to be clutched thereto, a drive collar secured to the drive shaft intermediate the opposed gears, said drive collar having an axial recess in each of its opposite ends, a tapered axial recess provided in each of the gears and opening toward the axial recess in the adjacent ends of the drive collar to thereby provide a clutch pocket between each gear and the drive collar, a coiled clutch spring unsupported on its inner diameter and located in each clutch pocket with an end of each clutch spring located in the reduced end of the tapered recess and thereat frictionally engaged to its respective gear, the remainder of each clutch spring being normally free from engagement with the tapered surface defining such recess and the surface defining the axial recess in the drive collar, a lug shiftably



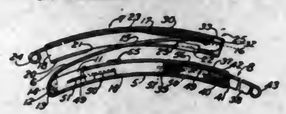
mounted in the drive collar, a shifter sleeve surrounding the drive collar and carrying the lug for moving an end of the lug into and out of engagement with the free end of either clutch spring and thereby expand or release the clutch spring from clutching engagement with the drive collar and one of the driven gears, a pair of cam members disposed adjacent to and each having a part engaging the shifter sleeve, and a pair of opposed spring members encompassing the drive collar and associated with the cam members for moving the shifter sleeve and its lug whereby the latter is moved into engagement with the free end of one of the clutch springs by one of the spring members when the other spring member is displaced by one of the cam members.

2,446,065
WRIST WATCH STRAP BAR
Otto A. Starke, Ludington, Mich.
Application October 22, 1947, Serial No. 781,373
6 Claims. (Cl. 58—88)



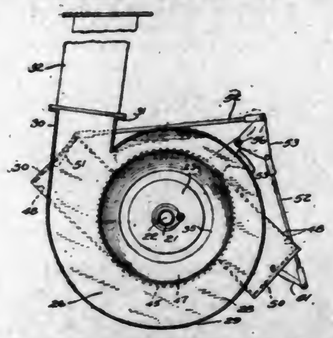
6. In a device of the class described, a frame, spaced members on the frame, a wrist strap bar for connection to a wrist strap, said spaced members including means for retainingly connecting the ends of said bar thereto and for preventing rotation of said bar relative thereto, said bar being of a length greater than the distance between said spaced members, and being of spring material and being in cross section relatively thin as compared to its width to permit bending thereof and insertion thereof between said spaced members and in retaining engagement with said retaining means, said retaining means retaining the bar in such position relative to the spaced members that the pull of a wrist strap disposed on the wrist of the wearer is edgewise of the bar.

2,446,066
MIXING UNIT FOR REFRIGERATORS
Merze Tate, Detroit, Mich.
Application December 23, 1943, Serial No. 515,411
2 Claims. (Cl. 62—114)



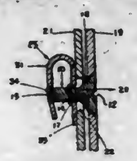
1. In combination with the freezing unit of a refrigerator, a support therein having a groove, a receptacle resting on the support and having a rib engaged in the groove, said receptacle having a depression exteriorly providing a boss, said support having a depression receiving the boss, a cover on the receptacle, a dasher within the receptacle having a shaft journaled in the first-mentioned depression, said shaft extending through and above the cover, a motor mounted on the exterior of the unit, said motor having a rotatable part extending through the top of the unit, and detachably engaged with said shaft to drive the same.

2,446,067
COMBINATION BEVEL
William Thomas, San Francisco, Calif.
Application September 2, 1943, Serial No. 500,962
1 Claim. (Cl. 33—102)



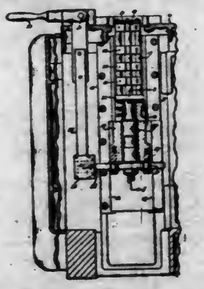
A structure of the class described comprising a stock consisting of spaced plates, a blade, a bolt pivotally and slidably securing the blade to the stock for disposition of a portion of the blade between the plates of the stock, said blade having a substantially L-shaped slot engaged by the bolt and including a portion extending substantially longitudinally of the blade for adjustment of the blade longitudinally of the stock when said parts are disposed substantially parallel, said blade being of a length to extend adjustably beyond the free end of the stock to serve as a gauge with said free end engaging the work, said slot permitting pivotal adjustment of the blade to various angles and positions relatively to the stock to form a bevel or square and with said bolt disposed in various portions of the slot, and said slot having an arcuate enlargement at its apex in which said bolt is normally disposed when the parts are positioned to form a bevel or square.

2,446,068
CLASP FOR WRIST-WATCH BRACELETS AND OTHER LINKAGES
Louis E. Valcourt, East Providence, R. I., assignor to Kestenman Bros. Mfg. Co., Providence, R. I., a corporation of Rhode Island
Application December 27, 1946, Serial No. 718,772
10 Claims. (Cl. 24—71)



1. A clasp or connector for wrist-watch bracelets comprising a plurality of sections foldable into overlying relationship, latching means on one of said sections, an extension member slidable in one of said sections, resilient means for sliding said section to normally maintain it in contracted relationship, a slidable latching member having means engageable with the first-named latching means to hold the foldable sections in closed relationship, said slidable latching member being movable by and with the extension member to release the latching means, and detent means for normally restricting the movement of the slidable latching member to prevent release of the latching means, said detent means being manually operable to permit the slidable member to be moved to release the latching means.

2,446,069
FUEL BURNER
Robert C. Vroom, Montclair, and John Dunn, Tenafly, N. J., assignors to Peabody Engineering Corporation, New York, N. Y., a corporation of New York
Application October 31, 1944, Serial No. 561,187
2 Claims. (Cl. 110—104)



2. A fuel burner comprising a burner tube adapted to connect with a combustion chamber burner tube and having means to supply a rotating air admission means located in advance of said air stream axially to said burner tube, means forming an annular fuel channel between said burner tube and said air admission means open throughout its entire inner periphery to said rotating air stream, a fuel inlet duct carrying a stream of fuel suspended in a carrying fluid communicating tangentially with said annular channel, said annular channel decreasing progressively in radial extent from said inlet duct around its circumference, but having a substantial minimum radial extent so as to provide a continuous annular channel for the re-circulation of fuel around said channel entirely beyond said rotating air stream, said channel being adapted for the uniform admission of fuel around its periphery radially inwardly into said burner tube.

2,446,070
SEPARABLE FASTENER
Jeremiah W. Albin, Babylon, N. Y.
Application June 6, 1945, Serial No. 597,923
4 Claims. (Cl. 24—221)

1. For use with two plates which are adapted to be locked together, a lock comprising a key rotatably and axially movably mounted in one of said plates, a shank on said key, a pin in said shank to prevent axial disengagement thereof with respect to said plate, the said shank extending through the other of said plates, a keeper plate bracket, a base on said bracket secured to the said other plate and provided with a slotted opening to admit the passage of the key shank and pin therethrough, a tab on said base in spaced relation thereto and having a slot therein in axial alinement with the opening in the base, and a tongue at the end of the shank disposed at an angle to the pin for locking engagement with the slot in the tab when the key is rotated to locking position.

2,446,071
SIZE GAUGING DEVICE
Willis Fay Aller, Dayton, Ohio, assignor to The Sheffield Corporation, Dayton, Ohio, a corporation of Ohio
Application April 10, 1946, Serial No. 660,904
7 Claims. (Cl. 73—37.5)

1. Gauging apparatus for checking the diameter of a hole in an object in different transverse planes comprising a carrier, a plurality of gaug-

ing elements mounted on said carrier for limited lateral movement independently of one another, each element having a fluid passage and a pair of diametrically disposed gauging nozzles communicating with said passage and adapted for cooperation with the object to provide fluid leakage paths, said elements having apertures, and pipes extending from the fluid passages of said elements and adapted for connection to fluid flow gauging devices, the pipe connected to the fluid passage of one block extending through the aperture of another block.

2,446,072

PREPARATION OF DIALKENYL SULFIDES

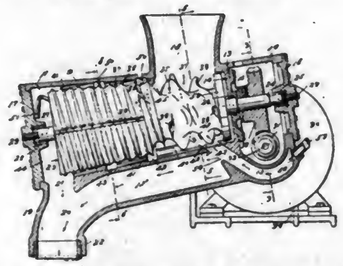
Robert T. Armstrong, Johnson City, Tenn., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey

No Drawing. Application April 11, 1945, Serial No. 587,831

4 Claims. (Cl. 260—608)

1. A method of preparing dialkenyl sulfides subscribing to the formula R—S*n*—R where R is an olefinic radical, and *n* is an integer from 1 to 2, which comprises reacting 2 molecular proportions of an olefinic hydrocarbon containing from 3 to 12 carbon atoms and containing the structure

with at least 1.5 atomic proportions of elemental sulfur, in the presence of at least 1 molecular proportion of a metal salt of a saturated fatty acid having from 3 to 18 carbon atoms, the metal thereof being selected from the magnesium-zinc family of elements of the periodic table, and as catalyst a small but effective amount of a nitrogen-containing compound recognized as a vulcanization accelerator for rubber.



2,446,073

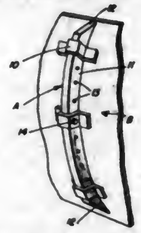
GARBAGE CUTTING AND FLUSHING DEVICE

Arvid Bjorklund, Minneapolis, Minn.

Application July 14, 1945, Serial No. 605,104

9 Claims. (Cl. 146—184)

1. A device of the character described comprising, a housing provided with a rotor compartment having shearing blades on its interior walls disposed axially of said compartment, a rotor in said compartment provided with a spiral cutting blade cooperating with said compartment shearing blades, a feed hopper in communication with the compartment at a point adjacent one end of the rotor, the other end of the rotor terminating at a spaced distance from the other end of said compartment to form a discharge chamber in said compartment end, a water conduit in communication with the rotor compartment at a point beneath the feed hopper, a continuation of said water conduit extending to a point beneath the compartment discharge chamber, the compartment discharge chamber provided with a discharge port opening into the said conduit continuation, the conduit continuation being provided with a discharge end, means for supplying water to the conduit, and means for rotating the rotor.



2,446,074

REVERSIBLE SCARIFIER

Robert B. Blackmore, Casper, Wyo.

Application November 20, 1945, Serial No. 629,839

3 Claims. (Cl. 262—8)

1. The combination with a bulldozer and a transversely curved earth moving blade carried thereby of guides on the convex face of said blade and scarifying teeth of a length substantially equal to the width of the blade adjustably supported in said guides and said teeth being curved longitudinally to coincide with the curvature of the blade.

2,446,075

PREPARATION OF RUBBER CRUMBS

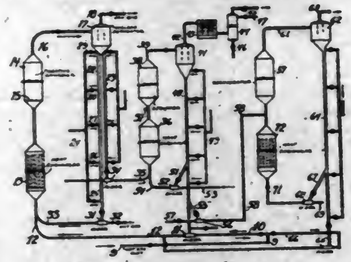
George W. Blair, Mishawaka, Ind., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey

Application December 2, 1944, Serial No. 566,391

2 Claims. (Cl. 260—96)

1. The method of obtaining crumbs of a rubber from frozen coagulated latex particles which comprises raising the temperature of the frozen particles to above the freezing point of the serum portion thereof and allowing the particles to remain at such temperature until syneresis of the serum to the outside of the particles takes place, lowering the temperature of the thus treated particles sufficiently to refreeze the serum on the outside of the cores of coagulum of the synerized particles, mechanically removing at least part of the frozen shells of serum from the outside of the cores of coagulum, and drying the thus treated particles to form crumbs.

2,446,076



SEPARATION AND PURIFICATION OF GASES

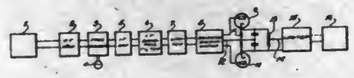
Donald L. Campbell, Short Hills, Homer Z. Martin, Elizabeth, and Eger V. Murphree and Charles W. Tyson, Summit, N. J., assignors to Standard Oil Development Company, a corporation of Delaware

Application March 1, 1941, Serial No. 381,294

4 Claims. (Cl. 183—4.2)

1. A method of treating gaseous mixtures to remove constituents therefrom which comprises passing the gaseous mixture to be treated in a confined stream along an extended path including a treating zone, imposing a positive pressure along the stream of gases to overcome the resistance of said path to the flow of said gases, maintaining a vertical column of finely-divided solids capable of selectively removing said first-named constituents from said gases, continuously keeping a fluidizing gas in admixture with said solids throughout the full length of said column in an amount sufficient to maintain said solids in a freely flowing, fluidized state to thereby develop a fluid pressure at the base of said column, dis-

charging said solids from the base of said column into said stream of gases to be treated, maintaining said column of solids at a height sufficient to develop a pressure at the base thereof greater than the pressure on said gases at the point of discharge therein, treating said gases with said solids discharged therein for a period sufficient to effect removal of said first-named constituents therefrom, thereafter separating the treated gases from the solids, reactivating the solids to remove constituents retained thereby and thereafter returning the reactivated solids to the top of said column for return to said treating zone.



2,446,077

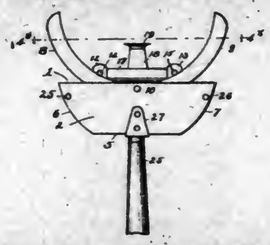
FREQUENCY-SHIFT TELEGRAPH SYSTEM

Murray G. Crosby, Riverhead, N. Y., assignor to Press Wireless, Inc., New York, N. Y., a corporation of Delaware

Application May 2, 1945, Serial No. 591,483

2 Claims. (Cl. 178—66)

1. The method of telegraph transmission which comprises, generating a sustained carrier of frequency F, shifting the normal frequency to $F+a$ for one telegraph signal and to $F-a$ for another telegraph signal, receiving said shifted carrier frequencies to derive two frequencies of difference $2a$, limiting the amplitude of said derived frequencies so as to remove undesired amplitude variations, converting the amplitude-limited frequencies into D. C. signals of opposite sign with respect to a base potential by subjecting said amplitude-limited frequencies to a frequency-to-amplitude discrimination and detection whereby one frequency produces a positive sign D. C. signal and the other frequency produces a negative sign D. C. signal, amplitude-limiting said negative and positive D. C. signals to produce final signals of uniform amplitude and square-topped wave shape, and applying said final signals to a telegraph responder.



2,446,078

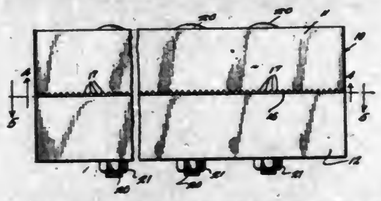
CHOKER FOR TRAPPED ANIMALS

Merton E. Churchill, Arcadia, Pa.

Application August 14, 1946, Serial No. 690,514

3 Claims. (Cl. 43—85)

1. A choking mechanism for trapped animals, comprising a supporting frame, levers fulcrumed thereon, each having a long arm and a short arm, the former extending in parallelism beyond the frame and being curved toward each other, springs each attached to the frame at one end and to said short arms and serving to force said long arms toward each other, and a setting and releasing means located on the frame.



2,446,079

MEANS FOR MANUFACTURING COMBS FOR COMBER MACHINES

Joseph P. Curry, New Bedford, Mass.

Application May 23, 1945, Serial No. 595,405

2 Claims. (Cl. 140—100)

1. A sectional needle receiving, alining, spacing and holding vise of the class decribed comprising a pair of complemental substantially rectangular blocks, clamping bolts for assembling said blocks and disposing predetermined surfaces thereof in tight mating contact with each other, one of said surfaces being serrated and thus provided with a plurality of V-shaped notches defining needle receiving and spacing pockets, said surface being provided with a longitudinally extending metal gauge bar, said gauge bar having an edge portion thereof projecting beyond the notches and constituting a line-up and leveling ledge for pointed ends of the needles, the remaining block having a straight edge opposed to said notches and a longitudinally extending groove receiving the coacting half-portion of said bar when the blocks are clamped together.

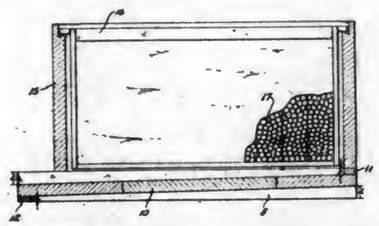
2,446,080

FACE POWDER AND PUFF CONTAINER

Gertrude B. Dennis, Kansas City, Mo.

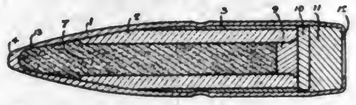
Application December 18, 1944, Serial No. 568,609

1 Claim. (Cl. 132—32)



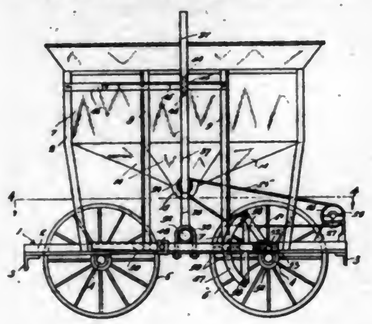
A face powder and puff container comprising an open top and open bottom cylindrical body; an internal continuous lip on the body intermediate the said open top and open bottom thereof; a lid hingedly mounted on the body for swing-

ing movement to and from a position closing the open top of the body; a flat, substantially semicircular wall on the innermost face of said lid and parallel thereto, said wall being spaced from the lid and having a lateral flange extending the length of its curved periphery and joined to the lid whereby to present a pocket for a powder puff; a cover in screw-threaded engagement with the body to close the open bottom thereof; an open top powder container within the body between the lip and the open bottom of the body;



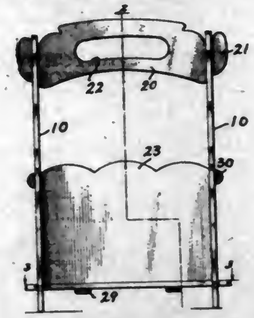
and a top fittable over either the open top of the container or the bottom thereof, the distance between the lip and the open bottom of the body being less than the depth of said container whereby the container is compressed between the cover and the lip when the top of the container is on the bottom thereof, on its top, or entirely removed, said wall forming the pocket being parallel to the lip when the lid is closed and being spaced from the lid a distance substantially the same as the distance between the lip and the open top of the body.

2,446,081
BOTTOM BOARD ASSEMBLY FOR BEEHIVES
Walter Diehnelt, Menomonee Falls, Wis.
Application June 23, 1945, Serial No. 601,235
2 Claims. (Cl. 6—4)



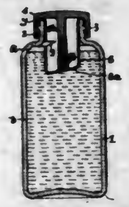
1. A bottom board assembly for beehives comprising spaced side rails having upper edges for supporting a hive, a bottom board supported between said side rails below the upper edges thereof and extending at an angle to provide a progressively smaller headroom space between the upper surface of the bottom board and the plane of the upper edges of the side rails from front to rear, a closure strip extending transversely between the side rails near the rear edge of the bottom board and filling the rear end space between the upper surface of the bottom board and the plane of the upper edges of the side rails, and a strip of substantially the same thickness below the bottom board near the front edge thereof filling the space between the lower surface of the bottom board and the plane of the lower edges of the side rails, said bottom board also being so positioned between the side rails that when the assembly is turned over and reversed end for end, the head room space at any point along the length of the bottom board is substantially the same as the head room space at the corresponding point when the bottom board is in the first position.

2,446,082
INCENDIARY PROJECTILE
Cecil Aubrey Dixon, London, England, assignor to Minister of Supply in His Majesty's Government of the United Kingdom of Great Britain and Northern Ireland, London, England
Application November 24, 1942, Serial No. 466,803
In Great Britain September 15, 1941
Section 1, Public Law 690, August 8, 1946
Patent expires September 15, 1961
2 Claims. (Cl. 102—66)



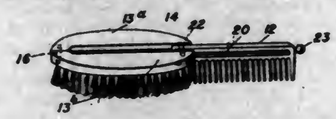
2. An incendiary projectile comprising an outer envelope, a steel sleeve within said envelope, a packing sleeve of soft metal between said steel sleeve and envelope, a tapered nose and a rear portion for said envelope extending beyond the front and rear ends respectively of said steel sleeve, a portion of the wall of said nose being of reduced thickness to facilitate distortion on impact, incendiary material filling said sleeve and nose, said material being one which will be ignited by the distortion of said nose on impact, and closing means embraced by the rear portion of said envelope and extending into the rear end of said sleeve.

2,446,083
VEHICLE SIDE DRAFT HITCH
Ernest W. Fehlberg, Walla Walla, Wash.
Application November 16, 1945, Serial No. 629,060
5 Claims. (Cl. 280—33.44)



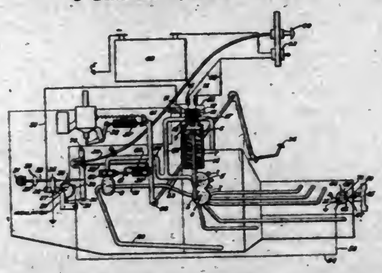
1. A portable receptacle for receiving grain from a combined harvester and thresher comprising a carriage having a frame, front and rear axles mounted across said frame, wheels carried by said axles, posts mounted vertically at opposite sides of said frame, spaced cross bars carried by posts at the inner side of said frame and extending longitudinally of the frame, a bar mounted vertically in spaced relation to the inner side of said frame, brackets carried by the vertical bar, a roller mounted vertically between said brackets and engaged between the cross bars, a bar for extending longitudinally of a harvester, a block pivoted to the last mentioned bar, brackets projecting outwardly from opposite side edges of said block and overlapping opposite sides of the vertical bar, and rollers carried by the last mentioned brackets and engaged in grooves formed along sides of the vertical bar.

2,446,084
KNOCKDOWN CARRIER CARTON
John O. Grady, Arab, Ala.
Application September 15, 1943, Serial No. 502,516
6 Claims. (Cl. 224—48)



1. A portable knockdown carrier carton comprising a pair of end members, a pair of side members, a bottom, and a handle, constructed to fit together and provide a rigid carrier receptacle, said end members having centrally located slots adjacent their upper extremities for reception of opposite ends of the handle and having openings adjacent their lower extremities with constricted lower portions through which openings the extremities of the bottom may be inserted and lowered into position between said constricted portions, the extremities of said bottom being T-shaped, the under surface of the top of the T engaging and limiting outward movement of said ends, said bottom also having flat surfaces spaced from the end surfaces of the T which flat surfaces engage the inner surfaces of the ends and prevent movement of the ends toward each other whereby the ends are held in relatively fixed relation and are prevented from moving in substantially parallel planes by the width of the legs of the T filling the constricted portions of the openings in the ends, said bottom having slots adjacent its sides and said ends having upright grooves located in the same relative positions as the slots in the bottom, and side members slidably disposed in said grooves and provided with tongues for engaging the slots in said bottom, said side members having locking ears at their upper corners extending beyond and hooking over and engaging the outer surface of the end members.

2,446,085
MEASURING DEVICE WITH DISTORTABLE PORTIONING MEANS
Erich Gronemeyer, Pompton Plains, and Samuel Cherba, Totowa, N. J.
Application March 2, 1945, Serial No. 580,566
8 Claims. (Cl. 222—446)



1. A liquid dispensing device including in combination, with a container having a space therein, a liquid-discharge outlet communicating with said space, and a pliable elastic closure normally sealing off flow of liquid from the space via the outlet, said container having in the closure a normally closed port arranged to permit, when opened, flow of liquid from said space toward the outlet, of a stopper for the outlet removably connected with the container and movable thereon toward and from the closure and respectively into and out of closing relation to the outlet, one of the group of parts consisting of the stopper and the closure having a projection arranged to abut the other such part and thereby to distort the closure to open said port when the stopper is moved toward the closure.

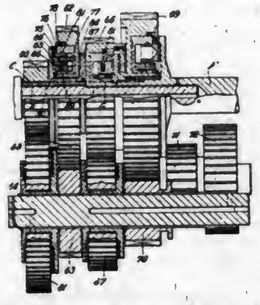
2,446,086
COMBINED COMB AND BRUSH
James Hermans, New York, N. Y.
Application March 14, 1945, Serial No. 582,727
1 Claim. (Cl. 132—86)

A hair brush, comprising a brush back which forms the handle for the brush, said brush back being made up of two parts interlocked at one set of ends and otherwise completely spaced apart as jaws defining a longitudinal open slideway for the reception of a comb; a pin extending transversely through said interlocked ends for securing said two parts together; a comb having its back fitted into said slideway for guided sliding movement therealong; and a limit-stop arrangement defining the maximum extent of withdrawal of said comb from the brush, the length of said end-interlocking of said two parts being so minor relative to the length of said slideway that grasping of the said brush back during a hair brushing or a hair combing operation clamps the said comb in place by reason of the pressure on said jaws.

2,446,087
CONTROLLING MEANS FOR VARIABLE-SPEED GEARS
Howard Frederick Hobbs, Leamington Spa, England, assignor, by direct and mesne assignments, to Hobbs Transmission Limited, Leamington Spa, England, a British company
Application April 6, 1943, Serial No. 482,017
In Great Britain April 14, 1942
5 Claims. (Cl. 74—472)

1. Change speed control system for power plants including an engine with means for manually operating the throttle thereof, coupled to a variable speed transmission gear having an in-

put and an output shaft, comprising: means for varying the velocity ratio of said transmission, means for actuating said ratio varying means to increase said velocity ratio, means for actuating said ratio varying means to decrease said velocity ratio, means responsive within a certain range of input shaft speed to actuate either of said ratio increasing and decreasing means, means operable by said manual means to vary said speed range at which said responsive means will function, means operable by travel of said manual throttle operating means beyond a predetermined throttle opening to condition said actuating means for increasing said velocity ratio, and means responsive to a fall of said output shaft speed below a predetermined minimum to actuate said ratio increasing means.



2,446,088

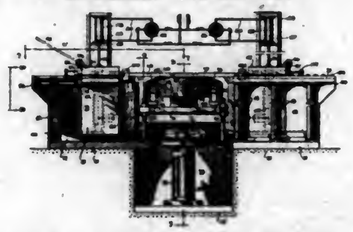
POWER-TRANSMISSION APPARATUS

Howard Frederick Hobbs, Leamington Spa, England, assignor, by direct and mesne assignments, to Hobbs Transmission Limited, Leamington Spa, England, a British company

Original application November 3, 1941, Serial No. 417,739. Divided and this application April 28, 1944, Serial No. 533,189. In Great Britain March 24, 1941

5 Claims. (Cl. 74—359)

1. A power transmission apparatus comprising an input shaft, a layshaft, an output shaft, gear wheels mounted on all said shafts and some at least of which are free on the respective shafts and at least two said gear wheels on the layshaft being permanently in mesh with gear wheels on one of said other shafts, a pair of sets of clutch teeth mounted on the layshaft adapted to be clutched together by sliding axially into engagement, a pair of sets of clutch teeth mounted on one of the other shafts adapted to be clutched together by sliding axially into engagement, at least one further pair of sets of clutch teeth mounted on at least one of said shafts adapted to be clutched together by sliding axially into engagement, operative connections from said sets of clutch teeth to the respective free gear wheels and their respective shafts whereby said free gear wheels can be operatively fixed to their respective shafts through said teeth whereby at least three different gear ratios are obtainable by appropriate disengagement and engagement of the sets of clutch teeth, at least three pairs of members associated one pair with each pair of sets of clutch teeth and each pair of members comprising a piston and a cooperating cylinder at least one of which is movable by fluid pressure to bring the sets of clutch teeth into engagement with each other, at least three spring means associated one with each movable member and adapted to effect disengagement of the clutch teeth, and means for applying fluid pressure to each pair of members for effecting engagement of said sets of clutch teeth and adapted to urge the teeth into engagement whilst they are clutched together.



2,446,089

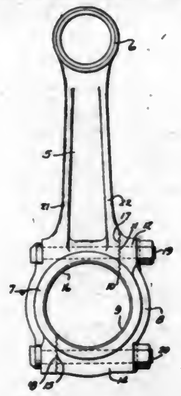
APPARATUS FOR STRETCH FORMING ELONGATED ARTICLES

Edward Hochreiter, Cynwyd, Pa., assignor to The Budd Company, Philadelphia, Pa., a corporation of Pennsylvania

Application December 16, 1943, Serial No. 514,573

14 Claims. (Cl. 153—48)

1. Stretch-forming machine comprising a frame structure, a support for a form and a pair of vises adapted for immovably engaging an elongated member to be formed at longitudinally spaced points thereof; means for reciprocatingly guiding and moving during the operation of the machine said support in said structure along a generally straight path; means for reciprocatingly guiding and moving during the operation of the machine both said vises on said structure along paths extending transversely to and on opposite sides of the path of said support, and further means for guiding one of said support and said pair of vises relative to the other along a path transversely to the aforesaid paths during the operation of the machine.



2,446,090

CONNECTING ROD FOR INTERNAL-COMBUSTION ENGINES

John H. Holloway, Green Bay, Wis.

Application April 20, 1945, Serial No. 589,383

4 Claims. (Cl. 74—579)

1. A connecting rod having a wrist pin bearing and a crank shaft bearing and a shank portion extending substantially along a longitudinal center line between said bearings, the crank shaft bearing comprising a fixed bearing portion in permanent connection with the shank portion, and a removable cap portion connected with the fixed bearing portion, the fixed bearing portion and the cap together providing a bearing surface divided as between the cap and the fixed bearing portion upon a diameter of said bearing lying diagonally between said longitudinal center line and a line at right angles thereto, and bolt means extending transversely respecting said longitudinal center line providing a releasable connection between the cap portion and the fixed portion of the crank shaft bearing, the said fixed and cap portions having complementary abutting surfaces extending in opposite directions from said diameter in general parallelism with said center line, said surfaces having interengaging key means transverse with respect to the bolt means and said center line.

2,446,091

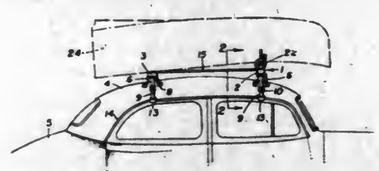
METHOD OF EXTRACTING GELOSE FROM SEAWEEDS SUCH AS HYPNEA MUSCIFORMIS AND OTHER SPECIES OF THE GENUS HYPNEA

Harold Judson Humm, Beaufort, N. C., assignor to Duke University, Incorporated, Durham, N. C.

No Drawing. Application August 6, 1945, Serial No. 609,328

13 Claims. (Cl. 260—209.6)

1. The method of preparing gelose, comprising, steeping washed and dried *Hypnea musciformis* in fresh water, at a temperature of from 45° C. to 60° C. and in the proportions of from about 0.3 to 2.0 parts of *Hypnea musciformis* to one hundred parts of fresh water, and filtering the resulting liquid.



2,446,092

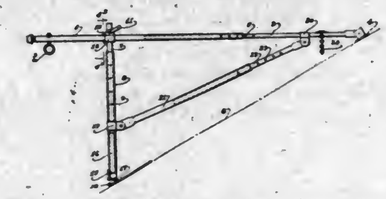
BOAT RACK MEANS ON AUTOMOBILES

Morris Lait, Lynn, Mass.

Application April 14, 1947, Serial No. 741,245

3 Claims. (Cl. 214—77)

1. A rack for use in loading and carrying on top of an automobile body, of the type having upper side beads, an inverted row boat having oar lock brackets, said rack comprising a pair of front and rear base bars adapted to extend across the front and rear of said top, a boat turning bar pivotally connected at one end to one end of the front base bar to be swung horizontally parallel with said front bar from a position in which the same extends longitudinally of said body, means supporting the other end of said boat turning bar during swinging thereof, fasteners on said boat turning bar adapted for attachment to said brackets whereby said boat may be attached on top of the boat turning bar to be swung into a position of rest on the rear base bar and thereby swing said turning bar parallel with the front base bar to support said boat while being swung, and means to attach said bars on said top and to said beads, said supporting means comprising an arcuate track rigidly connecting said base bars and a roller on said turning bar running on said track.



2,446,093

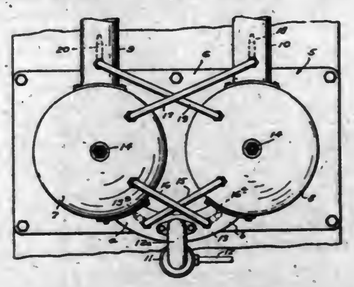
HOIST FRAME

Edward J. Lambert, Quincy, Ill.

Application February 10, 1947, Serial No. 727,698

7 Claims. (Cl. 248—237)

6. In a frame for supporting hoists on roofs, the combination with a boom having a forward end for extending beyond the side wall of a building and a rear end for engagement with the roof of the building, an upright leg supporting the boom in rear of its forward end in rear of a building side wall, and a ballast plate pivoted to the rear end of the boom, of a strut connecting the lower end of the leg to the rear end of the boom at a point forward of said plate, said boom, leg and strut each comprising two telescoping members, means for locking the same in their relative positions of adjustment, and an adjustable clamping member for securing the upper end of said leg to the outer member of the boom.

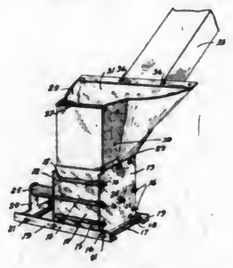


2,446,094

SUPERCHARGING AND SCAVENGING INTERNAL-COMBUSTION ENGINE

Harold E. Mattice, Eureka, Calif.

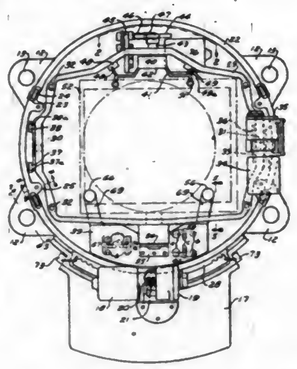
Application July 5, 1944, Serial No. 543,570



6 Claims. (Cl. 123—119)

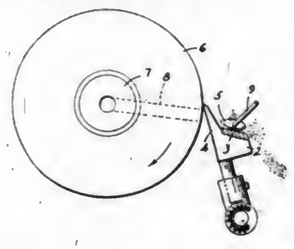
2. An arrangement for supercharging internal combustion engines with a plurality of cylinders operating with a phase difference, each cylinder being provided with a cylinder head closing the combustion space of the said cylinder, and further provided with inlet and exhaust openings, a reciprocating piston, a fuel manifold for charging said cylinder and an exhaust manifold, the reciprocating piston of one of the cylinders being in position for its suction phase, when the piston of another cylinder is in position for the combus-

tion phase, a pressure conduit leading from the cylinder head of each cylinder to the fuel manifold of another cylinder for conducting gases under combustion pressure from the first-named cylinder when in the combustion phase to the last-named cylinder when in its suction phase, a nozzle in said fuel manifold connected with the said pressure conduit for converting the pressure of the gases into velocity and for producing a jet, said nozzle being arranged to direct its jet into the fuel mixture and towards the inlet opening of the cylinder.



2,446,095
FEED GRINDING MILL OF THE ROTARY BEATER TYPE
Gustaf E. Miller, Stratton, Nebr.
Application January 25, 1945, Serial No. 574,503
1 Claim. (Cl. 241—189)

A grinding mill comprising: two side plates; two end plates; a bottom plate; a plurality of bolts extending between said two end plates and clamping the latter against the ends of said side and bottom plates, said bolts being positioned against the outer faces of said side plates to prevent outward movement of the latter; a pair of angle frame members receiving the bottom corners of said end plates and extending parallel to said side plates and having projecting extremities extending beyond one end plate; a shaft bracket member positioned between the projecting extremities of said angle frame members; means clamping said latter members against the side edges of said end plates and against said shaft bracket member to support the latter; a stationary shaft rod extending from the end plate more distant from the bracket member through said mill to said shaft bracket member; means fixedly securing said rod to said more distant plate and to said bracket member; a tubular shaft sleeve rotatably mounted on said stationary rod; and of a length substantially equal to that of the rod; and a beater blade secured to each side of said tubular shaft sleeve said blades extending equally outward from said shaft in parallel relation between said end plates.

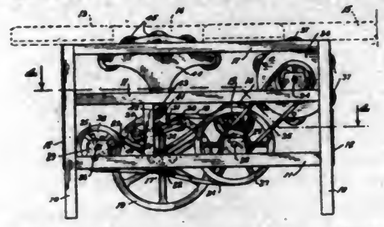


2,446,096
AUTOMATIC LEVELER
Milford B. Moore, Lansing, Mich., assignor to Talbert Abrams, doing business as Abrams Instrument Company, Lansing, Mich.
Application September 15, 1941, Serial No. 410,821
9 Claims. (Cl. 318—19)

4. A support, a gimbal carried in said support, a member carried by said gimbal, means for maintaining said member in a fixed relation to the horizontal comprising motor means adapted to rotate said member about both axes of said gimbal, and level responsive gravity actuated pick-up means in control of said motor means,

said level responsive means being carried by said gimbal.

2,446,097
CUTTING APPARATUS
Seddon C. Nelson, Front Royal, Va., assignor to American Viscose Corporation, Wilmington, Del., a corporation of Delaware
Application May 24, 1944, Serial No. 537,030
8 Claims. (Cl. 19—66)



2. A device for cutting continuous filamentary material to fibers of discontinuous lengths comprising a knife having a cutting edge, and a projection thereon having an indented surface spaced back of the cutting edge with its indentations disposed to provide longitudinal ridges lying in planes which are generally parallel to the cutting edge, said surface being inclined to face the material being cut so that collision of the fibers therewith occurs upon cutting action whereby an opening and crimping action is exerted upon the fibers as they collide.

2,446,098
MASSAGE TABLE
Harley D. Niblack, Denver, Colo.
Application July 18, 1946, Serial No. 684,493
3 Claims. (Cl. 128—57)

1. A massage table comprising: a supporting frame; a table top on said frame extending beyond one extremity thereof; a semi-annular cushion extending beyond the other extremity of said table; a plurality of rotatably mounted rollers supported by said table within the confines of said semi-annular cushion; a second plurality of

reciprocally mounted rollers extending upwardly through an opening in the table top; and means

for selectively imparting movement to either set of rollers as desired.

2,446,099
MASSAGE ROLLER
Harley D. Niblack, Denver, Colo.
Application July 18, 1946, Serial No. 684,494
3 Claims. (Cl. 128—57)

1. A massaging device for weight reduction comprising: two inverted, U-shaped frame members; a pair of vertical leg portions formed on said frame members; an arcuate intermediate handle portion formed on said frame members; supporting means secured to and extending between said frame members and supporting the latter in vertical, spaced-apart relation; end plates supported from said frame members at each extremity of said supporting means; a horizontal roller shaft extending between said end plates; a pair of spaced-apart roller discs secured to said shaft; a plurality of freely rotatable rollers extending between the peripheries of said discs in spaced-apart relation; panels extending between said end plates at each side of the device; an arcuate guide plate extending upwardly between the panels between each frame member and the adjacent roller plate; and means for rotating said shaft.

2,446,100
PREPARATION OF CATALYSTS
Alex G. Oblad and Edward R. Boedeker, Dallas, Tex., assignors, by mesne assignments, to Socony-Vacuum Oil Company, Incorporated, New York, N. Y., a corporation of New York
Application July 12, 1945, Serial No. 604,714
4 Claims. (Cl. 252—251)

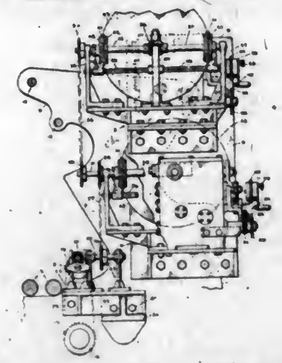
1. A process for the manufacture of aluminum chloride impregnated porous solid comprising the steps of (1) contacting said solid with a paraffinic hydrocarbon solution of aluminum bromide for a sufficient time to adsorb aluminum bromide on said solid, (2) contacting the aluminum bromide adsorbed on the solid in step 1 with a paraffinic hydrocarbon solution of sufficient chlorine for sufficient time to convert all of said adsorbed aluminum bromide to adsorbed aluminum chloride whereby said hydrocarbon solution of chlorine is converted to a hydrocarbon solution of bromine, (3) passing the hydrocarbon solution of bromine from step 2 in contact with metallic aluminum to reform hydrocarbon dissolved aluminum bromide, (4) recycling the hydrocarbon solution of aluminum bromide from step 3 to step 1, and (5) recovering aluminum chloride and aluminum bromide impregnated porous solid from step 2 of the process.

2,446,101
CREAMING OF SYNTHETIC RUBBER LATICES
Charles R. Feaker, Union City, Conn., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey
No Drawing. Application June 25, 1947, Serial No. 757,071
4 Claims. (Cl. 260—8)

1. A process for creaming a synthetic rubber latex which comprises reducing the pH of an alkaline aqueous soap emulsion polymerizate of polymerizable material selected from the group consisting of butadiene-1,3 hydrocarbons and mixtures of butadiene-1,3 hydrocarbons with compounds which contain a $CH_2=C<$ group and are capable of forming copolymers with butadiene-1,3 hydrocarbons to between 4.5 and 6.5 by incorporating an acid therein, in the presence of 0.01 to 2% based on the latex solids of glue in the latex without irreversibly coagulating the aqueous emulsion polymerizate, raising the pH of the thus treated emulsion polymerizate to above 9 by the addition thereto of a material of the group consisting of alkali-metal hydroxides, ammonium hydroxide and amines, and creaming the thus treated emulsion polymerizate with a vegetable mucilage.

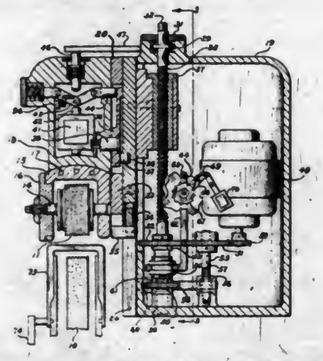
2,446,102
COMPLEX SALTS OF STREPTOMYCIN AND PROCESS FOR PREPARING SAME
Robert L. Peck, Plainfield, N. J., assignor to Merck & Co., Inc., Rahway, N. J., a corporation of New Jersey
No Drawing. Application August 24, 1945, Serial No. 612,557
20 Claims. (Cl. 260—210)

1. As a new composition of matter a streptomycin complex double salt consisting of an acid salt of streptomycin and an alkaline earth metal halide.



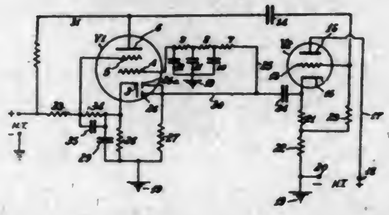
2,446,103
LINOLEUM DISPENSER
Theodore Pettyjohn, Crosby, and Ralph T. Stickel, Deerwood, Minn.
Application May 29, 1945, Serial No. 596,438
8 Claims. (Cl. 242—72)

1. In a device as described, a slatted drum including slidable disks adapted to expand the diameter of the drum, means adapted to con-



tract the drum, including springs connecting the slats and normally contracting the drum and slide said disks, a rack supporting the drum, and clamping means carried by the drum and actuated by the disks to clamp and release one end of the material to be wound on the drum.

2,446,104
WEB LETOFF MECHANISM
Brian Plunkett and George Fama, Cumberland, Md., assignors to Celanese Corporation of America, a corporation of Delaware
Application October 22, 1946, Serial No. 704,820
11 Claims. (Cl. 66—86)

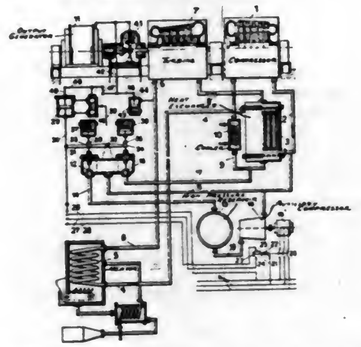


1. A let-off motion for positively rotating a beam, comprising means including friction gearing for rotating said beam, said friction gearing comprising a driver member adapted to be constantly rotated and a driving member for frictionally rotating said driver member, and means operated by said first-mentioned means for moving said driving member to variable radial distances with respect to said driver member so as to cause the speed of rotation of said beam to vary.

2,446,105
CRUSH-TYPE GRINDING WHEEL TRUING DEVICE
Louis F. Polk, Dayton, Ohio, assignor to The Sheffield Corporation, Dayton, Ohio, a corporation of Ohio
Application November 20, 1944, Serial No. 564,318
14 Claims. (Cl. 125—2)

1. A grinding machine having a rotatable grinding wheel, a grinding wheel support, a rotatable crusher wheel for forming the grinding wheel, a crusher wheel holder rotatably supporting said crusher wheel, a power operated actuator having a yielding connection to said holder, means for moving said actuator to advance said crusher wheel into engagement with said grinding wheel and then cause relative yielding action between the holder and the actuator, means automatically operable as a result of such yielding movement for locking the holder to the actuator, and means for automatically adjusting one of said wheels positively at comparatively slow speed after said locking action to force said wheels one into the other.

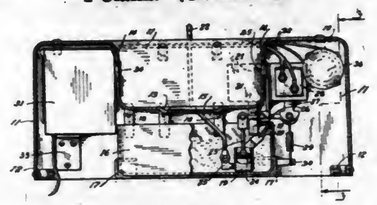
2,446,106
PHASE SHIFT OSCILLATOR
David Stirling Robertson, Sydney, New South Wales, Australia, assignor to Amalgamated Wireless (Australasia) Limited, Sydney, New South Wales, Australia, a company of New South Wales, Australia
Application June 29, 1944, Serial No. 542,797
In Australia November 5, 1943
4 Claims. (Cl. 250—36)



1. A phase shift oscillator in combination with a system for stabilizing the amplitude and frequency of the oscillations generated, the components of said combination being constituted as a circuit arrangement having an oscillation generating discharge tube in which the electron emission from a cathode traverses a grid-controlled space path to a main anode and an uncontrolled space path to at least one rectifier anode, a capacitively shunted resistor connected between the cathode and ground, a resistive connection between ground and a grid which controls said controlled space path, said connection including a resistance element in series with a phase shifting network, a connection from said rectifier anode to the junction between said resistance element and said network, and a feedback circuit coupled between the main anode and said junction.

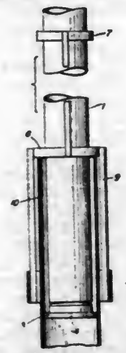
2,446,107
CREAMING OF SYNTHETIC RUBBER LATICES
John S. Rumbold, Woodbridge, Conn., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey
No Drawing. Application December 30, 1944, Serial No. 570,768
5 Claims. (Cl. 260—29.7)

1. The improvement in the creaming with a hydrophilic colloidal creaming agent of a synthetic rubber latex comprising an aqueous emulsion polymerizate of polymerizable material selected from the group consisting of butadiene-1,3 hydrocarbons and mixtures of butadiene-1,3 hydrocarbons with other polymerizable compounds which contain a $CH_2=C<$ group and are capable of forming copolymers with butadiene-1,3 hydrocarbons which comprises carrying out the creaming operation in the presence of .03 to 1 percent based on the water phase of the aqueous emulsion polymerizate of a hydrophilic colloidal creaming agent selected from the group consisting of vegetable mucilages, polyacrylates, alkylated celluloses, and hemi-celluloses, and in addition .4 to 3 percent based on the water phase of the aqueous emulsion polymerizate of strong alkali from the group consisting of alkali-metal hydroxides and quaternary ammonium hydroxides.



2,446,108
POWER PLANT WORKING WITH A HOT GASEOUS MEDIUM
Fritz Salzmann, Zurich, Switzerland, assignor to Aktiengesellschaft Fuer Technische Studien, Zurich, Switzerland, a corporation of Switzerland
Application March 7, 1945, Serial No. 581,493
In Switzerland February 27, 1942
Section 1, Public Law 690, August 8, 1946
Patent expires February 27, 1962
8 Claims. (Cl. 60—59)

1. The method of regulating the output of a thermal power plant in which a gaseous working medium flows in a closed circuit in which heat is supplied to the working medium from an external source, the heated medium expands through a turbine while doing external work and is then recompressed preparatory to being again heated, whereby the circuit has a high pressure side and a low pressure side, which method comprises, maintaining a reserve of working medium under a pressure higher than that in said high pressure side; and varying the weight of working medium in the circuit to vary the pressure in the high pressure side in relation to the load on the plant, by establishing a flow path for working medium from said reserve to said high pressure side when the power generated in the plant is smaller than the momentary power to be delivered externally and withdrawing working medium from said high pressure side when the power generated in the plant is greater than the momentary power to be delivered externally; compressing said withdrawn medium to a higher pressure and delivering it to said reserve.



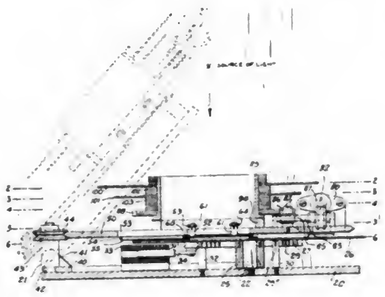
4. The combination of a thermal power plant comprising a heater, a turbine, a turbo compressor and an output machine, the heater, turbine and turbo compressor being connected to form a closed circuit in which a gaseous working medium circulates, and the turbine being arranged to drive the turbo compressor and the output machine; a governor responsive to the load in the output machine; a reservoir for storing working medium at high pressure; flow controlling means arranged to control flow of medium from said reservoir to the circuit at a point of high pressure; compressing means operable to withdraw medium from said circuit at a point of high pressure and deliver it to said reservoir; and means controlled at least in part by said governor and serving to control said flow controlling means and said compressing means.

2,446,109
SURGEON'S SOAP DISPENSER
Earl J. Scarry, Denver, Colo.
Application November 28, 1944, Serial No. 565,517
1 Claim. (Cl. 222—63)

In a soap dispenser, of the type having a soap pump actuated in consequence of the interruption of a beam of light entering a photo-electric cell, means for supplying liquid soap to said pump comprising: an open-bottomed housing; a pump; means for supporting said pump from above in said housing so that it will depend downwardly therein; an open-topped soap reservoir; and means for removably supporting said reservoir in said housing with its upper edge above said pump, and with its bottom in close proximity to said pump, said reservoir being unattached to said pump so that it may be lowered through the open bottom of said housing without disturbing said pump, and so that when said reservoir is lifted into said housing, it will envelop said pump in liquid soap.

2,446,110
ROCKET
Conrad David Schermuly, Alfred James Schermuly, and Charles Schermuly, Parkgate, Newdigate, England, assignors to The Schermuly Pistol Rocket Apparatus Limited, Parkgate, Newdigate, Surrey, England, a British company
Application July 25, 1944, Serial No. 546,483
In Great Britain June 23, 1943
4 Claims. (Cl. 102—50)

1. A rocket comprising a casing, a tail unit slidable on said casing, a stop member of greater



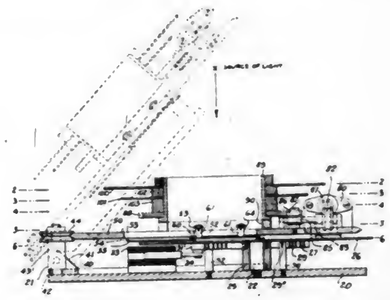
diameter than said casing arranged at the rear end of said casing to limit rearward movement of said tail unit, and a plurality of holes in said stop member adjacent its periphery for the passage of gas to cushion the blow of the tail unit against the stop member when the rocket is fired from a discharger.

2,446,111

DEVICE FOR MAKING TEST PRINTS ON COLOR PRINT MATERIAL

Alfred Simmon, Jackson Heights, and Louis L. Weisglass, New York, N. Y., assignors to Simmon Brothers, Inc., Long Island City, N. Y., a corporation of New York

Application August 15, 1946, Serial No. 690,688
10 Claims. (Cl. 95—10)



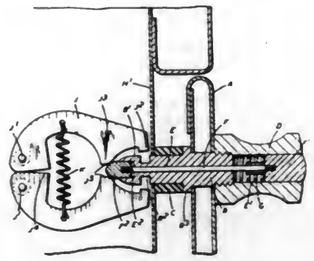
1. A device for making test prints on photographic color print material of the separation-transfer type, comprising a structure, means to subject on said structure consecutively on three separate sheets of said material a plurality on each sheet of triangular areas to non-uniform exposures of varying lengths, said triangular areas having "A," "B" and "C" corners and occupying identical positions on said three sheets, and the respective "A," "B" and "C" corners of corresponding triangular areas occupying identical positions on each sheet, said exposing means comprising means to mask progressively parts of each triangular area during each exposure and including a movable slide, made from opaque material and having a straight edge, and means to adjust the position of said masking means relative to said exposed triangular area, whereby said straight edge may be made parallel selectively to one of the sides of said triangular area, said means comprising a rotatable table supporting said masking means including said slide, its axis of rotation substantially coinciding with the center of said triangular area, said center being defined as the point of intersection of the lines connecting the center of the sides of said triangular area to the respective opposite corners, whereby on the first sheet the "A" corners of all triangular areas receive full exposures, the sides opposite the "A" corners receive no exposures, and intermediate points receive intermediate exposures in dependence upon their distance from said side, and whereby the second and third sheets are treated in like manner with respect to the "B" and "C" corners of all triangular areas, respectively, and said masking means including speed control means, whereby the "A" corner of each triangular area on the first sheet receives the same exposure as the "B" corner of the corresponding triangular area on the second, and the "C" corner of the corresponding triangular area on the third sheet, respectively, but whereby the lengths of said exposures is rendered different for different triangular areas, the images on said three sheets adapted, after their respective exposures, to be processed, dyed in different colors and transferred, in register with, and superimposed upon each other, on a common base.

2,446,112

METHOD FOR MAKING TEST PRINTS ON COLOR PRINT MATERIAL

Alfred Simmon, Jackson Heights, and Louis L. Weisglass, New York, N. Y., assignors to Simmon Brothers, Inc., Long Island City, N. Y., a corporation of New York

Original application August 15, 1946, Serial No. 690,688. Divided and this application April 25, 1947, Serial No. 743,948
1 Claim. (Cl. 88—14)



The method of making test prints of photographic color print material of the separation-transfer type, comprising the steps of first, subjecting, on a first sheet of said material, a plurality of triangular areas to non-uniform exposures of varying lengths, said triangular areas having "A", "B" and "C" corners, all "A" corners receiving full exposures, the sides opposite the "A" corners receiving no exposures, and intermediate points receiving intermediate exposures in dependende upon their distance from said side, the length of the full exposure received by each "A" corner being different for different triangles, second, treating a second sheet in like manner with respect to the "B" corners of said triangular areas, third, treating a third sheet in like manner with respect to the "C" corners of said triangular areas, corresponding triangular areas occupying identical positions on all three sheets, the respective "A", "B" and "C" corners of each corresponding triangular area occupying identical positions on all three sheets, and the exposures received by the "A" corner of any triangular area on the first sheet being the same as the exposures received by the "B" and "C" corners of the corresponding triangular areas on the second and third sheets, respectively, said exposures, however, being different for different triangles, fourth processing said three sheets in the usual manner, including developing, fifth, treating each of the three sheets with a dye of a different color, and sixth, transferring the three colored images, in register with, and superimposed upon each other, upon a common base.

2,446,113

FASTENING DEVICE FOR DETACHABLY CONNECTING TOGETHER TWO RELATIVELY MOVABLE PARTS

Herbert Owen Spiller, Wootton, Isle of Wight, England, assignor to J. Samuel White & Company Limited, Isle of Wight, Hampshire, England, a company of Great Britain

Application November 7, 1945, Serial No. 627,247
In Great Britain November 27, 1944
3 Claims. (Cl. 292—30)

1. In a fastening device for detachably connecting together two relatively movable parts of the type comprising a fixed projection mounted on the first of the two parts, a head with a reduced part behind it at the end of this fixed projection, and two similar jaws mounted on the second of the two parts, each jaw being pivoted at one end and having a tooth-like portion on the other end adapted first to pass over the head and then automatically to engage the reduced part of the fixed projection when the said two relatively movable parts are brought together; the combination of a rod which passes longitudinally through and which can slide in the said fixed projection, a spring operative to cause sliding of the rod in the outward direction, a formation on the inner end of the rod which extends beyond the head of the fixed projection when the rod is pushed inwards against the action of the said spring, and a formation on each of the said jaws intermediate between the pivot and the tooth-like portion adapted to be engaged by the said formation on the inner end of the rod when the latter is moved inwards to move apart the jaws to disengage the reduced part of the fixed projection.

2,446,114

PREPARATION OF ESTERS

Roger W. Strassburg, Minneapolis, Minn., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey

No Drawing. Application June 14, 1947, Serial No. 754,778
5 Claims. (Cl. 260—487)

1. A method of preparing 2-propenyl esters of α-halogenated aliphatic carboxylic acids which comprises heating a mixture of a lower alkyl ester of an α-halogenated aliphatic carboxylic acid and a 2-propenyl alcohol, the saturated aliphatic alcohol corresponding to the lower alkyl group in said ester being substantially lower-boiling than the 2-propenyl alcohol, in the presence of elemental zinc as a catalyst, and distilling the saturated aliphatic alcohol corresponding to the lower alkyl group in said ester out of the reaction mixture as rapidly as it is formed.

2,446,115

CREAMING OF SYNTHETIC RUBBER LATICES

Edward C. Svendsen, Mishawaka, Ind., assignor to United States Rubber Company, New York, N. Y., a corporation of New Jersey

No Drawing. Application January 11, 1945, Serial No. 572,425
8 Claims. (Cl. 260—93)

1. The improvement in the creaming with a vegetable mucilage of an aqueous emulsion polymerizate of polymerizable material selected from the group consisting of butadienes-1,3 and mixtures of butadienes-1,3 with other polymerizable compounds containing a $CH_2=C<$ group and capable of forming copolymers with butadienes-1,3 which comprises adding to the aqueous emulsion polymerizate an ammonium salt which frees acid in-situ in the presence of formaldehyde and adding formaldehyde to reduce the pH of the aqueous emulsion polymerizate to between 4.5 and 6.5 without irreversibly coagulating the same, raising the pH to above 9 by addition of an alkali material selected from the group consisting of fixed alkalis, ammonia and volatile amines having boiling points below 160° C., and creaming with a vegetable mucilage.

2,446,116

PROCESS OF PURIFYING CAROTENE CONTAMINATED WITH CHLOROPHYLL AND XANTHOPHYLL

Monroe E. Wall, Oreland, and Edward G. Kelley, Whitemarsh, Pa., assignors to United States of America as represented by the Secretary of Agriculture

No Drawing. Application September 8, 1944, Serial No. 553,260
4 Claims. (Cl. 260—666)
(Granted under the act of March 3, 1883, as amended April 30, 1928; 370 O. G. 757)

1. In the process of purifying carotene contaminated with chlorophyll and xanthophyll, the steps comprising forming a petroleum ether solution of the contaminated carotene and treating the solution with hydrated lime to absorb the contaminants, thence removing the lime from the solution.

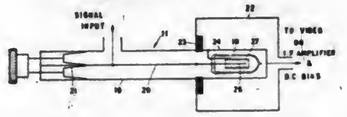
2,446,117

CUFF HOLDER

George D. Tye, New York, N. Y.

Application March 4, 1947, Serial No. 732,325
2 Claims. (Cl. 2—123)

1. A device adapted to retain the cuff of a sleeve in turned up position comprising an arcuate base adapted to register in the fold between the sleeve and the upturned cuff, said base hav-



ing a substantially upright member extending from each extremity thereof, each of said members having two oppositely disposed extensions extending from the upper portion thereof, said extensions lying in a common plane substantially at right angles to the plane through said base, said extensions being pointed.

2,446,118

DETECTOR OR FREQUENCY CHANGER FOR RADIO-FREQUENCY OSCILLATIONS

Donald Weighton, Cambridge, England, assignor to Pye Limited, Cambridge, England, a British company

Application May 31, 1944, Serial No. 538,118
In Great Britain May 17, 1943
4 Claims. (Cl. 250—27)

1. Arrangement for detection and frequency changing in ultra high frequency signalling systems, comprising in combination, a gas discharge tube having an envelope containing a low pressure gas filling and electrodes therein consisting of a cylindrical cathode concentrically surrounding and spaced from an axial rod anode, impedance matching means for feeding an ultra high frequency signal input to said tube, said means comprising a resonant concentric line having an outer conductor and an inner conductor, said tube being disposed within said outer conductor with said anode and cathode coaxial with said line and respectively conductively connected to said inner conductor and said outer conductor of said line, and means for applying an isonising potential to said tube to maintain a discharge therein such that ultra high frequency oscillations of the electron plasma of such discharge are excited responsively to the impressed signal input frequency.

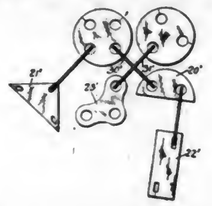
2,446,119

GLASS FIBER REINFORCED PLASTICS

Erven White, Robert Steinman, and Lawrence P. Biefeld, Newark, Ohio, assignors to Owens-Corning Fiberglas Corporation, Toledo, Ohio, a corporation of Delaware

No Drawing. Application July 27, 1944, Serial No. 546,928
4 Claims. (Cl. 117—124)

1. As an article of manufacture, a body of synthetic resin containing distributed therein a plurality of glass fibers as reinforcement, the fiber surfaces being provided with an adherent coating of heat treated dextrinized starch, the heat treated starch being incapable of entire removal by boiling the fibers in water for three hours, the adherent film of heat treated starch providing an intermediate layer between the fibers and the resin.



2,446,120

OVERLAPPING LINKAGE ENGAGEMENT FOR MODEL-FORMING SHAPED SHEET PIECES

William J. Wiswesser, near Stony Creek Mills, Pa., assignor to Willson Products, Inc., Reading, Pa., a corporation of Pennsylvania

Application September 5, 1946, Serial No. 694,913
4 Claims. (Cl. 35—18)

1. Separate model forming pieces of thin resilient sheet material linkably engageable with companion pieces into a composite figure structure, each piece consisting of a sheet of determined outline and having at least one linkage aperture occupying a small portion of the total area of the piece and spaced inwardly from its marginal edge and adapted to engage with the marginal section enclosing a like aperture in a companion sheet,

the apertures in said discs being spaced inwardly from their marginal edges at like distances, and having an inwardly extending depth length greater than the width of its inward spacing from said margin, and the aperture of one sheet having an entrance slit thereto from said marginal edge in alinement with the axial depth length of its aperture.

2,446,121

COMPOSITIONS OF POLYMERIC PLASTICIZERS AND ORGANIC PLASTIC MATERIALS

David E. Adelson, Berkeley, and Hans Dannenberg, Berkeley Highlands, Calif., assignors to Shell Development Company, San Francisco, Calif., a corporation of Delaware

No Drawing. Application October 10, 1944, Serial No. 558,110
1 Claim. (Cl. 260—17)

A composition comprising 100 parts cellulose nitrate and as a plasticizer therefor from 10 to 100 parts of polyallyl acetate.

2,446,122

NECK AND EAR PROTECTOR

Lela Bills, Dallas, Tex.

Application September 19, 1946, Serial No. 697,869
1 Claim. (Cl. 2—174)

As a new article of manufacture, a protective device for the neck, ears and forehead, comprising a hair net, a flexible body consisting of a depending flap secured to the rear portion only of said hair net and on the upper corners of which are formed pockets adapted to wholly enclose the ears of the wearer and whose upper portions are sewed to the sides of said hair net, forehead shielding tabs integral with the upper portions of the pockets and extending forwardly, their ends lying in overlapping relationship on the forehead of the wearer, and means for securing the ends of said tabs together.

2,446,123

PREPARATION OF VINYL CHLORIDE

Thomas Boyd, Springfield, Mass., assignor to Monsanto Chemical Company, St. Louis, Mo., a corporation of Delaware

No Drawing. Application June 21, 1944, Serial No. 541,457
8 Claims. (Cl. 260—656)

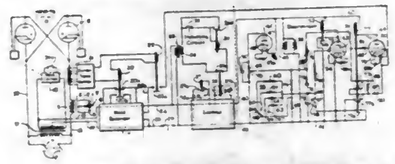
1. A process for preparing vinyl chloride which comprises reacting hydrogen chloride in the vapor phase with acetylene, in the presence of a solid complex salt of mercuric chloride and cerium chloride.

2,446,124

REACTION OF HYDROGEN HALIDES WITH COMPOUNDS HAVING ALIPHATIC UNSATURATION

Thomas Boyd, Springfield, Mass., assignor to Monsanto Chemical Company, St. Louis, Mo., a corporation of Delaware

No Drawing. Application June 21, 1944, Serial No. 541,458
10 Claims. (Cl. 260—656)



1. A process which comprises reacting in the vapor phase a hydrogen halide with a compound having aliphatic unsaturation, in the presence of a solid complex salt of a mercuric halide and a cerium halide.

2,446,125

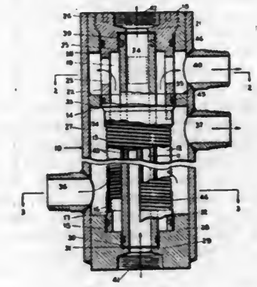
CONTROL SYSTEM

Edwin M. Callender, Cynwyd, and Robert S. Phair, Philadelphia, Pa., assignors to The Budd Company, a corporation of Pennsylvania

Application March 7, 1945, Serial No. 581,468
15 Claims. (Cl. 219—4)

1. In a power system, welding means for producing a series of welds, means for supplying power to said welding means, and means for preventing connection of said power means to said welding means only after completion of at least two defective welds in said series, said connection-preventing means comprising a relay switch, a relay for operating said switch, an electronic tube circuit including said relay, said tube having a control grid, a capacitor connected to said grid and normally biased to tube cut-off for good welds, and means for changing the capacitor potential to the grid striking point on close recurrence of a defective weld by said welding means whereby said relay is energized to actuate said relay switch.

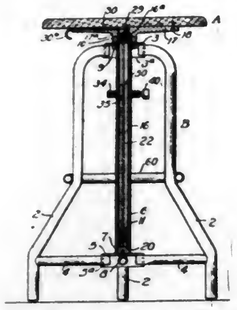
2,446,126



FILTER HEATER

Wilfred S. Crake, Houston, Tex., assignor to Shell Development Company, San Francisco, Calif., a corporation of Delaware

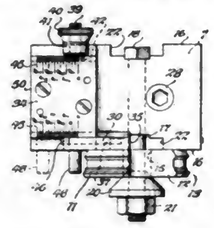
Application October 1, 1946, Serial No. 700,430
4 Claims. (Cl. 210—150.5)



1. A filter device comprising a mandrel having an axial bore, a plurality of radial rib elements extending outwardly from said mandrel, a screen element supported on the outer ends of said ribs to form a screening surface surrounding said mandrel in spaced co-axial relationship therewith, a closed housing surrounding said screen element and spaced therefrom, a flange element affixed to the housing and extending inwardly into contact with said mandrel to divide the space between said housing and said screen element into two chambers, a port through the housing to supply the liquid to be filtered to one of said chambers, a port through the wall of the housing to withdraw said liquid from the other chamber, and port means through the walls of said housing in register with the axial bore through the mandrel, whereby the heat supplied to said mandrel by means of a temperature controlling fluid admitted to said bore through said port means is transmitted by conduction through said ribs to said screen element.

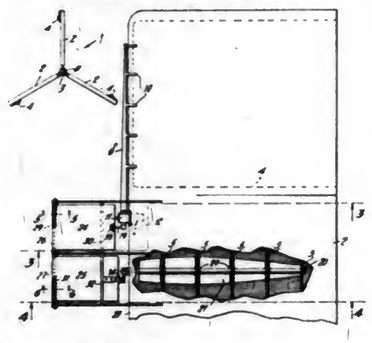
4. A filtering device comprising an elongated mandrel member having an axial bore, a plurality of ribs extending longitudinally along a middle portion of the mandrel member to form a ribbed center portion and ribless end portions of said mandrel member, said ribs extending radially outwards to form a series of grooves around said mandrel member, a filter screen element circumscribing and supported by the ribs, an elongated outer housing member surrounding said mandrel member, first and second transverse flange means between said housing member and

the screen element defining a first and a second chamber around the ribless ends of the mandrel member and a third chamber around the ribbed center portion of said mandrel member, a first closure means at one end of said housing member closing the first chamber and adapted to seat one end of said mandrel member, port means to said first chamber, said first closure means having a perforated wall forming a passageway around one ribless end portion of the mandrel, said passageway communicating with the grooves between the ribs and being in communication with the first closed chamber through the perforation in said extended wall, a second closure means at the other end of said housing member closing the second chamber and adapted to seat the other end of said mandrel member, said second chamber communicating with the grooves between the ribs, normally closed port means to said second chamber, port means through said housing member to said third chamber, and port means through the first and second closure means in register with the axial bore through the mandrel, whereby the heat supplied to said mandrel by means of a temperature controlling fluid admitted to said bore through said port means is transmitted by conduction through said ribs to said screen element.



2,446,127
ADJUSTABLE STOOL
Richard R. Cramer, Dayton, Ohio
Application July 6, 1944, Serial No. 543,673
4 Claims. (Cl. 155—94)

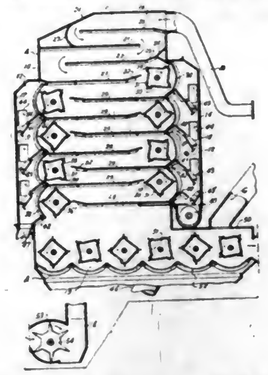
1. An article of furniture of the class described, comprising, in combination, a movable seat member, and stationary supporting means therefor, cooperating piston and cylinder elements, one of said elements being secured to said movable member and the other of said elements being secured to said supporting means, said piston element having a passage therethrough, said cylinder having fluid therein adapted to support the piston in the cylinder, a single valve member carried by said piston and adapted to close said passage and thereby prevent the flow of said fluid therethrough to the space above said piston when the latter is at rest in said cylinder, said valve member being freely movable toward and away from closed position and being automatically movable to open said passage upon upward movement of said piston in said cylinder whereby to permit fluid above said piston to flow through said passage to the space in said cylinder below said piston, and control means operable to hold said valve member in open position for movement of fluid through said passage from below the piston to the space in the cylinder above the piston for effecting lowering movement of said movable member relative to the supporting means, the control means comprising an actuating member movable in the direction of piston movement and operable to move the valve member to open position, means biasing said actuating member to non-actuating condition, a pull rod associated with the said movable member for transverse movement relative thereto, a cam member on said rod and engageable with said actuating member to effect operation of the valve member as aforesaid when the rod is pulled in one direction, and means biasing said pull rod to a position in which the cam member is out of engagement with the actuating member.



2,446,128
FORM TOOL FIXTURE
Anthony J. Daddona, Elmira, N. Y., assignor to Hardinge Brothers, Inc., Elmira, N. Y.
Application July 28, 1944, Serial No. 547,030
3 Claims. (Cl. 51—218)

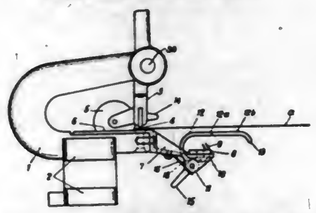
1. A fixture for supporting circular form tools on a machine having a table and a rotary cutting implement, said fixture including a body portion, means for rigidly securing said body portion to the table of the machine, means for securing a form tool to either side of said body portion, a slide having a straight edge arranged in position to be alined with the surface to be cut, guide means on both sides of said body portion with which said slide may cooperate for movement of the straight edge thereof toward and from the portion of the form tool which is to be cut by said

implement, a scale on each side of said body portion, and indicating means on said slide for cooperation with either of said scales for determining the distance of said straight edge from an axial plane of the form tool extending parallel to the cut to be made.



2,446,129
AUTOMATIC CONTROL FOR JET-PROPELLED ROTORS
William Dalton, Schenectady, N. Y.
Application November 26, 1946, Serial No. 712,303
6 Claims. (Cl. 170—135.6)

1. In an aircraft, the combination with a rotor having blades of variable pitch, of jet propulsion units on each blade for driving said rotor, means for conveying the components of a combustible mixture to each of said units, valves for regulating the flow of the respective components of said mixture to said units, airfoils pivotally mounted on said blades, and means operatively connecting said airfoils to said valves for regulating the openings of said valves.

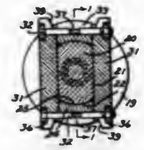


2,446,130
COMBINATION DRIER AND CLEANER
Dewey D. Day, Dallas, Tex., assignor to The Murray Company, Dallas, Tex.
Application March 19, 1945, Serial No. 583,616
14 Claims. (Cl. 19—93)

1. A drier and cleaner including, an upright casing, means for supplying a stream of heated air and cotton to the upper portion of said casing, upright flues at each side of said casing, transverse overhanging shelves in said casing between said flues, cleaning screens between the ends of the shelves and the flues, and fan-type revolving cylinders mounted in the casing in po-

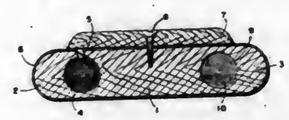
sition to carry the cotton over said screens and impel it along said shelves.

2,446,131
COMBINED CLIP AND PIN CHAIN LINK FOR FABRIC STRETCHING MACHINES
Philibert Deck, Zurich, Switzerland
Application July 29, 1946, Serial No. 686,958
In Switzerland May 4, 1945
Section 1, Public Law 690, August 8, 1946
Patent expires May 4, 1965
5 Claims. (Cl. 26—62)



1. A combined clip and pin link for fabric stretching machines, including a link body provided with a clip plate and a movable clip arm having a clamping edge rotatably supported by said body above said clip plate, a carrying arm on said link body below the working plane of said clip plate, a pin strip secured to said carrying arm, a guard arm rotatably arranged so as to cover the pin strip when stretching the fabric by means of said clip plate and clip arm, and adapted to be rotated into an inoperative position when stretching the fabric by means of the pin strip, said guard arm in its inoperative position engaging the movable clip arm and holding the latter out of engagement with the clip plate.

2,446,132
SILVER CATALYSTS
Theodore W. Evans, Oakland, Calif., assignor to Shell Development Company, San Francisco, Calif., a corporation of Delaware
No Drawing. Application April 2, 1946, Serial No. 659,135
1 Claim. (Cl. 252—223.3)

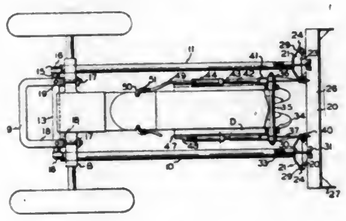


A promoted silver metal-containing catalyst consisting essentially of silver metal and from about 0.5% to about 5% by weight of sodium oxalate.

2,446,133
ROTARY SHAFT COUPLING
Charles W. Hawthorne, Conneautville, Pa., assignor to Morgan Construction Company, Worcester, Mass., a corporation of Massachusetts
Application June 26, 1944, Serial No. 542,105
5 Claims. (Cl. 64—28)

1. A rotary shaft coupling comprising two axially aligned rotatable members, a projection extending from one member toward the other member, the projection being shaped to provide two parallel plane surfaces equidistant from the axis and connected by two convex cylindrical surfaces coaxial with the members, two lugs extending from the said other member on opposite sides of the projection and having concave inner surfaces conforming with the curvature of the said cylindrical surfaces, the width of the lugs being substantially equal to that of the projection, two parallel flat bars mounted on opposite sides of the projection to engage the said plane surfaces and overlap the lugs, the inner surfaces of the bars being beveled near the ends of the bars, and tension devices connecting the ends of the bars so arranged that upon breakage of one of said devices the corresponding ends of the bars may separate while the beveled surfaces at the other ends rock on the adjacent lug, thus permitting relative rotation of the two members.

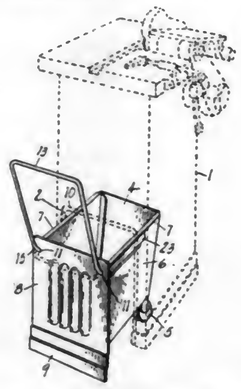
2,446,134
SANDING BLOCK
Russell A. Hill, Grosse Pointe, Mich.
Application December 13, 1947, Serial No. 791,559
2 Claims. (Cl. 51—187)



1. A sanding device comprising, a main body forming a substantially rectangular solid block including a top and bottom surface and having its ends curved from the top side of the block to the bottom side, said main body having an aperture extending transversely therethrough at a point near one end of the block and parallel with the axis of said curved ends, said body having a slot communicating with said aperture along its length and with the top side of the block, a strip of abrasive material extending around one of the curved ends, around the bottom of the block and around the opposite curved end to said slot and terminating in convolutions within said aperture, a clamping bar positioned at the top of the block with its ends in engagement with the abrasive strip, and means at the center of the clamping bar for securing the bar to the main body.

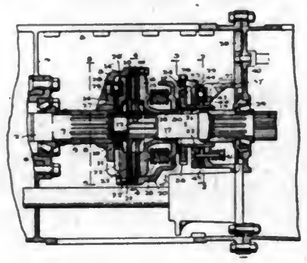
2,446,135
PROCESS FOR PREPARING METHYL SILOXANES
James Franklin Hyde, Corning, N. Y., assignor to Corning Glass Works, Corning, N. Y., a corporation of New York
No Drawing. Application April 13, 1944, Serial No. 530,949
3 Claims. (Cl. 260—46.5)

3. The method which consists in adding water containing an hydrolysis catalyst in successive increments to a mixture consisting of ethyl orthosilicate and dimethyl diethoxy silane in the molar proportions of from 1:1 to 1:3, respectively, and thereafter recovering from the hydrolysis product the copolymeric organosiloxane thereby produced.



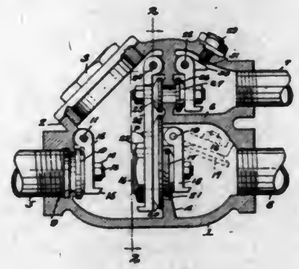
2,446,136
EARTH HANDLING MACHINE
James B. Jarmin, Dallas, Tex., assignor to Servis Equipment Company, Dallas, Tex.
Application September 4, 1945, Serial No. 614,148
3 Claims. (Cl. 37—144)

1. A bulldozer including, a pair of longitudinal push bars, means for pivoting the rear ends of the bars to a tractor, a pair of yokes, each yoke having means for rigidly securing it to the front end of one of the bars and a transverse web, said yoke also having trunnions extending outwardly and separated by the web, a dozer blade, angular brackets rigidly attached to the rear side of the blade, and U-bolts secured in the brackets and in which the yoke trunnions are pivoted.



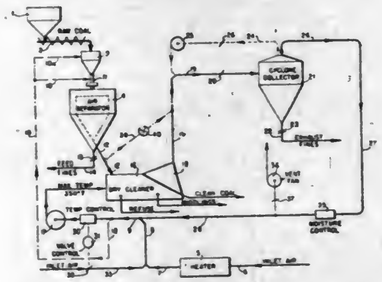
2,446,137
CHIP TRUCK FOR SAWING AND OTHER MACHINES
Edward C. Krueger, Otsego, Mich., assignor to Hammond Machinery Builders, Inc., Kalamazoo, Mich., a corporation of Michigan
Application August 12, 1947, Serial No. 768,127
7 Claims. (Cl. 280—36)

1. In a chip truck for a machine having a chambered pedestal provided with a truck receiving opening in its front wall extending to the bottom thereof, the combination of a wheeled receptacle having side walls provided with out-turned flanges at their upper edges and a front wall extending laterally beyond the side walls and above the top thereof and below the bottom of the receptacle and constituting a closure for the pedestal opening, a handle comprising handle bars connected at their outer ends by a cross piece constituting a grip, the bars being slidably arranged through openings provided therefor in the front wall to telescope at the sides of the receptacle side walls, and angled slideways for said handle bars mounted on the side walls of the receptacle with their upper edges below said side wall flanges, said slideway members being adapted to support the handle in horizontal position when it is collapsed with its grip portion extending horizontally across the front wall, the handle bars having upwardly curved portions at their rear ends permitting the



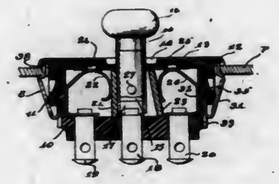
handle when extended to be swung to an upwardly inclined position for manipulation of the truck, said bars being provided with transverse retaining pins at their inner ends.

2,446,138
CAM ACTUATED CLUTCH
Homer T. Lambert, St. Joseph, Mich., assignor to Lambert Brake Corporation, St. Joseph, Mich., a corporation of Michigan
Original application October 30, 1944, Serial No. 561,128. Divided and this application October 18, 1945, Serial No. 623,061
4 Claims. (Cl. 192—93)



1. Clutch mechanism of the class described comprising a driving shaft, a driven shaft, a rotary disc connected for rotation with the driving shaft, a primary disc at one side of the rotary disc, a secondary disc at the opposite side of said rotary disc and having a lateral extension surrounding the driving shaft, spring-actuated means mounted on the lateral extension of the secondary disc and connected to the primary disc, operating means for shifting the spring-actuated means comprising an adjusting hub, an actuator disc having threaded connection with said hub, means for holding the actuator disc in adjustable relation to the hub, means for rotating the actuator disc, and means for shifting the actuator disc and hub with relation to the spring-actuated means to effect engagement and disengagement of the clutch plates.

2,446,139
VALVE
Barney J. Lyons, Nashville, Tenn.
Application April 24, 1947, Serial No. 743,608
4 Claims. (Cl. 277—7)

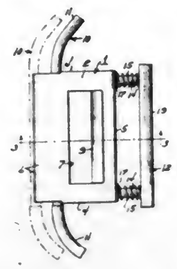


1. In a fluid pressure water control appliance the combination with a casing having interior separated intake, delivery, and discharge chambers and valve-ports for said chambers, of a pivotally suspended intake valve in the intake chamber, a pivotally suspended delivery valve in the delivery chamber, means for trapping water under back pressure from the delivery valve in the intake chamber and a pivotally suspended discharge valve opening from the intake chamber to the discharge chamber.

2,446,140
APPARATUS FOR PNEUMATICALLY SEPARATING RELATIVELY MOIST COMMINUTED MATERIAL
Jesse M. McGee, Oak Park, Ill., assignor to Roberts and Schaefer Company, Chicago, Ill., a corporation of Illinois
Application February 16, 1945, Serial No. 578,201
2 Claims. (Cl. 209—3)

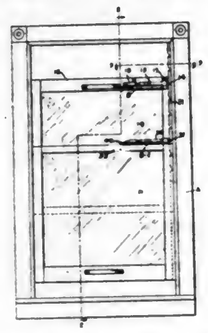
1. Apparatus for pneumatically separating raw coal containing a relatively large amount of fines and a substantial amount of surface moisture comprising a feed conduit for conveying a stream of such raw coal, means for injecting into said feed conduit heated air at a temperature of about 350° F. to abstract moisture from the raw coal moving therethrough, a connecting conduit for receiving the stream of raw coal from said feed conduit together with the heated air injected thereinto, an air separator for receiving said raw coal stream from said connecting conduit together with the air therein and for removing from such coal stream fines which are smaller than about 48 mesh, an intermediate conduit for receiving from said air separator the remaining coarser raw coal particles together with the air introduced into said air separator with the raw coal from said connecting conduit, means for withdrawing the air from said intermediate conduit together with residual fines contained in the stream of material of coarser particle size moving therethrough, and a pneumatic separator for receiving the raw coal of coarser particle size from said intermediate conduit and for separating such raw coal in accordance with the specific gravities of the particles thereof.

2,446,141
SWITCH STRUCTURE
John B. Parsons, Toledo, Ohio
Original application July 3, 1944, Serial No. 543,363, now Patent No. 2,425,391, dated August 12, 1947. Divided and this application February 14, 1945, Serial No. 577,877
5 Claims. (Cl. 200—168)



1. A switch assembly comprising a casing having a pair of telescoping members, one member fitting over the other member and having a central aperture, an operating arm extending through said aperture and having portions inside and outside the casing, the portion inside the casing having a transverse hole, the inner casing member having aligned apertures in opposite side walls thereof, a pin extending through said aligned apertures and through the hole in said operating arm thereby to provide a pivotal mounting therefor, the outer ends of said pin being substantially flush with the outer walls of the inner casing member and concealed and retained in place by the adjacent walls of the outer casing member, and means for holding said casing members together in assembled relation.

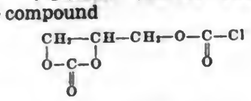
2,446,142
HANGER BRACKET FOR FAUCETS
Carl H. Root, Detroit, Mich.
Application December 12, 1946, Serial No. 715,863
5 Claims. (Cl. 248—212)



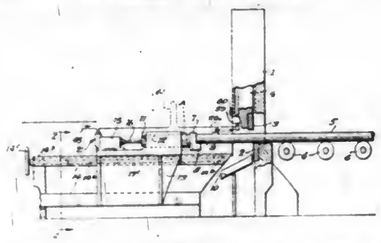
1. A hanger bracket attachable to the swinging spout of a faucet, comprising a length of wire bent intermediate its ends to provide spaced sides terminating at one end in a downwardly extending loop portion adapted to embrace the bottom and sides of the spout, and a device slidingly mounted on said sides and having means engageable with the sides of the spout at a distance from said loop portion for assisting in holding the bracket in position.

2,446,143
TOOL
Graydon G. Smith, Lebanon, Pa.
Application May 22, 1946, Serial No. 671,566
3 Claims. (Cl. 72—138)

3. In a pointing tool, a body open at its front end and having side walls and end walls, blades at front ends of the side walls projecting forwardly beyond the end walls, said side walls having finger holds, a handle having a portion spaced outwardly from the rear end of the body and having arms entering the body and slidable therein, springs about the arms urging the body outwardly, and a bar fixed to front ends of said arms and extending longitudinally through the body between said blades with end portions projecting outwardly across front ends of the end walls and curved rearwardly.



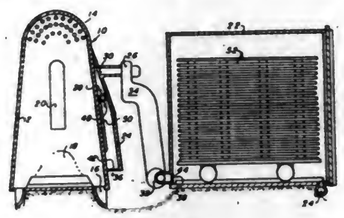
2,446,144
RATCHET VENTILATOR AND AUTOMATIC SASH LOCK
Fred D. Story, Arkadelphia, Ark.
Application March 19, 1945, Serial No. 583,577
1 Claim. (Cl. 292—175)



In a sash lock for windows having vertically slidable sash with parting strips at the sides, the parting strip at one of the sides of the window having notches therein, a lock bolt having a notch in the under surface positioned on one of the sash, a socket with a spring therein into which the inner end of the bolt projects wherein the spring urges the opposite end of the bolt into engagement with the notches of the parting strip, and a slide latch positioned under the bolt with a tongue thereof positioned in the notch in the under side of the bolt holding the bolt in engagement with the parting strip, said slide latch having a handle thereon by which it may be withdrawn to release the bolt for moving the sash.

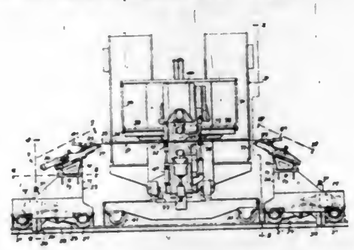
2,446,145
CARBONATE-HALOFORMATE OF GLYCEROL AND METHOD OF PRODUCING SAME
Franklin Strain, Norton Center, Ohio, assignor to Pittsburgh Plate Glass Company, Allegheny County, Pa., a corporation of Pennsylvania
No Drawing. Application November 19, 1946, Serial No. 710,937
7 Claims. (Cl. 260—338)

3. The compound



2,446,146
WORK GAUGE SUPPORT FOR SHEARS
William C. Tucker, Kenmore, N. Y., assignor to Buffalo Forge Company, Buffalo, N. Y.
Application March 23, 1945, Serial No. 584,435
12 Claims. (Cl. 164—59)

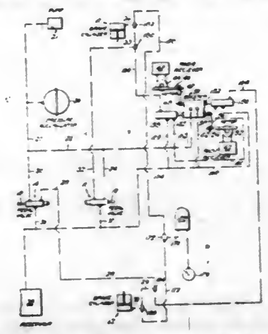
1. In a shear or cutter for bar or rod stock of the type having relatively movable shearing knives between which the bar or rod stock is fed for severing into selected lengths, that improvement for stopping the stock in proper severing position which comprises an end stop normally disposed in the path of movement of the stock in position to be abutted by the end of the stock after said stock has been fed between the knives to the selected extent, said stop having a shoulder extending approximately at a right angle to said stop a short distance along that side of the adjacent stock end opposite from the movable knife and positively held at all times against movement in the direction of movement of the movable shearing knife to prevent flexing of the adjacent stock end during the severance by the knife movement, said stop with its shoulder being shiftable only in the general direction of feed of said stock to release the severed stock end and then back to stopping position, and means for shifting said stop to release a severed end after said severing operation.



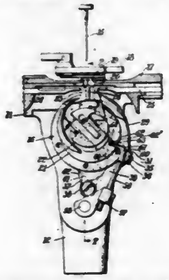
2,446,147
WOODEN LATH PROCESSING APPARATUS
Ernest E. Walund and Melvin E. Walund, Eureka, Calif.
Application April 23, 1947, Serial No. 743,410
1 Claim. (Cl. 263—40)

Lath processing apparatus comprising a waste burner having a steeply inclined metal exterior wall and screened top, an inverted chamber forming pocket welded onto the exterior surface of the wall and extending to a region adjacent the bottom of the burner wall, air intake ports for said pocket and the burner in adjacent relation at the bottom of the wall, a kiln providing a chamber having a plurality of inlet and outlet ports at respective ends thereof, duct means connecting the upper end of the pocket to the inlet ports of the kiln, an air pump mounted in the duct; a drip water supply mounted to drip water into the pocket, and a replaceable anvil mounted on the

exterior surface of the burner wall for contact by the drippage of water and to absorb heat from the wall to cause boiling off of the drippage.



2,446,148
SHEET METAL WORKING APPARATUS, ESPECIALLY FOR WELDING MACHINES
William A. Weightman, Philadelphia, Pa., assignor to The Budd Company, a corporation of Pennsylvania
Application November 9, 1943, Serial No. 509,539
8 Claims. (Cl. 29—200)

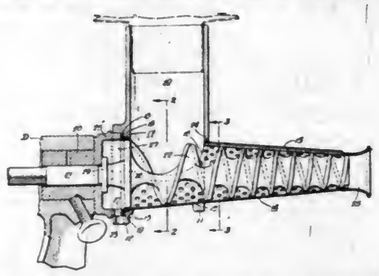


1. Sheet metal working apparatus comprising in combination, a pair of supports adapted to hold stretched between them a panel composed of a plurality of sheets, each support having a plurality of adjacent sheet-clamping frames adapted to hold sheets at their ends with their side edges projecting, and means for moving the frames transversely relative to each other whereby to bring the projecting edges of the sheets into overlapping relationship.

2,446,149
AIRCRAFT CONTROL SYSTEM
Harold E. Wells, Kenmore, N. Y., assignor to Bell Aircraft Corporation, Wheatfield, N. Y.
Application June 18, 1947, Serial No. 755,396
5 Claims. (Cl. 60—97)

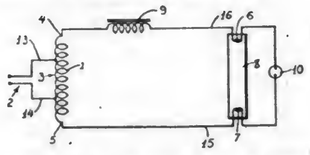
3. In an aircraft, a hydraulic actuation device, a first hydraulic pressure supply, a first conduit leading from said first supply to said actuation device, a passenger-pilot operable control device in the line of said first conduit, a second conduit leading from said first supply to said actuation device, a remote-pilot operable control device in the line of said second conduit, a second pressure supply, a third conduit leading from said second pressure supply to said actuation device, a pilot operable control element in the line of said third conduit, and shuttle valve means in the lines of said conduits, said shuttle valve means being operable automatically in response to pressure differences within said conduits to communicate the conduit which is under the highest fluid pressure with said actuation device and to close off the others of said conduits.

2,446,150
LOOP-TAKER MECHANISM FOR SEWING MACHINES
Alfred R. Wood, Bridgeport, Conn., assignor to The Singer Manufacturing Company, Elizabeth, N. J., a corporation of New Jersey
Original application August 21, 1945, Serial No. 611,724. Divided and this application June 22, 1946, Serial No. 678,618
7 Claims. (Cl. 112—228)



1. In a lock-stitch sewing machine, a reciprocatory thread-carrying needle, a rotary loop-taker, a thread-mass carrier journaled in said rotary loop-taker and having a pocket formed therein, means for restraining rotation of said thread-mass carrier with said loop-taker, and a mechanical opener for providing a thread passage past said rotation-restraining means, said mechanical opener including an opener-member having a pair of resilient fingers adapted to engage the opposite sides of said pocket.

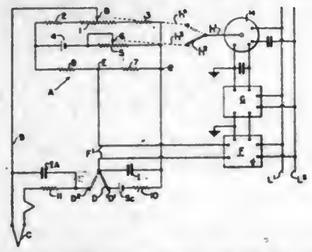
2,446,151
JUICER
Herbert A. Wormeck and Frederick P. Hess, Philadelphia, Pa., assignors to The Enterprise Manufacturing Company of Pennsylvania, Philadelphia, Pa., a corporation of Pennsylvania
Application February 25, 1946, Serial No. 649,902
5 Claims. (Cl. 100—48)



1. In a juicer, a feed hopper having an open bottom and provided with annular stirrups arranged at opposite sides of said open bottom, a strainer tube directed through and fitting within

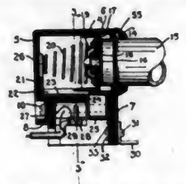
said stirrups and having a flange at one end, one of said stirrups having an external shoulder against which said flange abuts, a worm in said

tube, and a bearing for the worm engaged with said stirrup to clamp the tube flange therebetween.



2,446,152
ELECTRICAL APPARATUS FOR GASEOUS DISCHARGE DEVICES
Harold W. Alford, Danvers, Mass., assignor to Sylvania Electric Products Inc., Salem, Mass., a corporation of Massachusetts
Application May 29, 1946, Serial No. 672,987
1 Claim. (Cl. 315—276)

A circuit for an electric gaseous discharge device having an electrode disposed at each end thereof, said circuit comprising an auto-transformer, a current limiting reactance having one end thereof connected to an end of one of said electrodes and the other end connected to an end of said auto-transformer, the other end of said transformer being connected directly to an end of the other of said electrodes, said auto-transformer being tapped at two places intermediate its ends and equi-distant therefrom, a source of electrical energy connected to said auto-transformer at the two tapped positions, one side of said source of electrical energy being grounded, and a starter switch connected across the other ends of said electrodes.

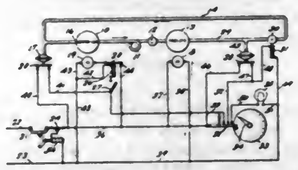


2,446,153
RECALIBRATING MOTOR CONTROL SYSTEM
Wallace E. Belcher, Jr., Philadelphia, Pa., assignor to The Brown Instrument Company, Philadelphia, Pa., a corporation of Pennsylvania
Application December 7, 1946, Serial No. 714,709
7 Claims. (Cl. 318—28)

1. Self balancing measuring apparatus, comprising a bridge circuit including a slide wire resistance, a calibrating resistance and energizing means including a current regulator, a slider contact engaging and adjustable along said slide wire resistance, a current flow responsive device having two terminals one of which is connected to one end of said calibrating resistance, a standardizing circuit branch including a standard cell and a resistance, and having one end connected to the second end of said calibrating resistance, and a measuring circuit branch including a resistance and a source of voltage to be measured and connected at one end to said slider contact, switching means operable to connect the second terminal of said flow responsive device interchangeably to the second end of said standardizing branch and to the second end of said measuring branch, mechanism controlled by, and operating in selective accordance with the current flow through said device to adjust said regulator when said standardizing branch is connected to said flow responsive device, and to adjust said slider

contact when said measuring branch is connected to said device, and a connection between the second terminal of said device and the second end of said calibrating resistance comprising means having electrical charge holding capacity whereby said mechanism is subject to a damping action during each standardizing operation and providing a flow of low conductivity for direct current whereby said slider contact is given a failure indicating adjustment when said measuring branch is connected to said flow responsive device and is in a non-conductive condition.

2,446,154
HOLDER FOR TUBULAR LAMPS
Roger W. Haven, Winchester, Mass., assignor to Sylvania Electric Products Inc., Salem, Mass., a corporation of Massachusetts
Application December 29, 1945, Serial No. 638,045
7 Claims. (Cl. 176—32)

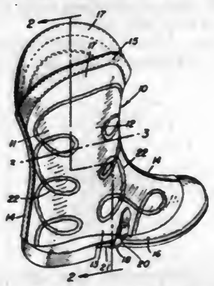


1. In combination with a tubular lamp having endwise projecting conductor pins a lamp holder for tubular lamps comprising a hollow body of insulating material having its entire front face open, a plate of insulating material covering the front of said body and secured thereto, said plate having an aperture therein through which an end of a lamp may pass, resilient contact means movable within said body substantially upon the axis of said aperture, said contact means having a protective outer member of insulating material and an inner contact plate for engagement with one of said lamp pins a current carrying conductor within said body connected to said contact plate and having means for connection to a power source and a pair of opposed clamping faces disposed respectively upon said body and plate acting to clamp said conductor therebetween and in operating position.

2,446,155
HOLDER FOR SURGICAL ACCESSORIES
John D. Karle, Roselle Park, N. J., assignor to The Singer Manufacturing Company, Elizabeth, N. J., a corporation of New Jersey
Original application July 4, 1942, Serial No. 449,824. Divided and this application July 13, 1944, Serial No. 544,786
8 Claims. (Cl. 206—16)

6. In combination with a can-like sterilizing container for a surgical stitching instrument having a pair of supporting-bars arranged in chord-like position across its open end, a pair of accessory holders each comprising a strip of metal having a hooked end adapted to be hung on one of said supporting bars in substantial parallelism with each other, a plurality of split spool-supporting studs projecting laterally from one of said accessory holders, means on said one of said holders for frictionally securing thereon a thread-guiding device and a spool-winding device, and means for frictionally securing to the other accessory holder a plurality of surgical needles.

2,446,156
AUTOMATIC FREEZER CONTROL AND REFRIGERATING SYSTEM
Frank F. Kolz, Berkeley, Calif.
Application May 13, 1946, Serial No. 669,237
7 Claims. (Cl. 62—114)

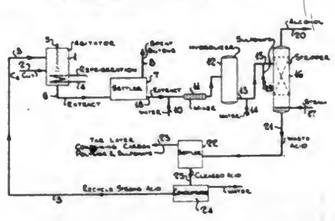


1. A refrigerating system comprising refrigerant compressing means and driving means therefor, an expansion chamber; and a circulatory path for refrigerant including a suction line, means controlled by the existent pressure in said suction line for controlling operation of said driving means, and pressure control means controlled by the existent pressure and temperature in said expansion chamber and including a normally closed valve for retaining pressure within said expansion chamber for limiting expansion of refrigerant, and means for opening said valve when the pressure and temperature in said expansion chamber has increased to a predetermined value and controlled by said pressure control means to release the pressure for increased expansion of refrigerant.

2,446,157
ELECTRODE
Erwin F. Lowry, Lynn, Arnold L. Peacock, Danvers, and William E. Leyshon, Salem, Mass., assignors to Sylvania Electric Products Inc., Salem, Mass., a corporation of Massachusetts
Application May 23, 1946, Serial No. 671,688
12 Claims. (Cl. 176—126)

1. A mount assembly for an electric gaseous discharge device comprising a stem, a pair of electrode-supporting wires sealed in and projecting from said stem, and a pair of electrodes mounted on said wires, said electrodes defining a substantially frusto-conical structure, the longitudinal peripheral edges of the electrodes being adjacent each other and spaced a short distance apart.

2,446,158
COWBOY BOOT UPPER
Julius Z. Miller and Lloyd M. Easterling, Clarksville, Tenn.
Application September 22, 1947, Serial No. 775,420
2 Claims. (Cl. 36—2)



1. A gaiter simulating a cowboy boot upper comprising a pair of coextensive self-supporting and shape-retaining side panels including lower portions adapted to extend forwardly over the instep portion of a shoe, said side panels being joined together along the opposite side edges to form a unitary substantially tubular gaiter having an ankle-embracing portion and a shoe instep covering portion, the upper end of each side panel having an edge curving upwardly towards its mid-portion which is positioned at the sides of the leg of the wearer, the opposite ends of said edge terminating at the upper ends of said joints and being located at the front and back of the wearer, said panels being adapted to extend substantially above the ankle and substantially below the knee of the wearer to approximately a midpoint therebetween, the ankle embracing portion being adapted to loosely fit the ankle and the upper part of the gaiter loosely embracing the lower leg portion of the wearer, and fastening means for securing the gaiter to a shoe by holding the edges of the lower portions of the panels upon the upper surface of the shoe instep portion, whereby said gaiter may be applied to a variety of sizes of shoes and may accommodate different sizes of wearers' legs.

2,446,159

DISTILLATION OF ALCOHOL FROM HYDROLYZED MIXTURES OF ALKYL SULFATES AND SULFURIC ACID

Henry O. Mottern, Hillside, and Francis M. Archibald, Elizabeth, N. J., assignors, by mesne assignments, to Standard Oil Development Company, a corporation of Delaware

Application November 10, 1944, Serial No. 562,880
3 Claims. (Cl. 202—57)

1. In a process for recovering alcohol from a hydrolized mixture of alkyl sulfates and sulfuric acid by distillation to remove alcohol from the hydrolyzed mixture, the improvement which comprises carrying out such distillation in the presence of a small amount of an oil soluble sulfonate recovered as a by-product from white oil manufacture.

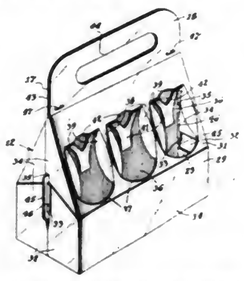
2,446,160

URINE SAMPLER ATTACHMENT

Gertrude A. Muller, Fort Wayne, Ind., assignor to The Toidey Company, Gertrude A. Muller, Inc., a corporation of Indiana

Application September 11, 1946, Serial No. 696,107
3 Claims. (Cl. 4—1)

1. A toilet attachment for obtaining samples of urine from persons while seated on the toilet, for subsequent analysis, a child's auxiliary seat superimposed upon the adult seat of the toilet, a deflector detachably secured on the front end of the auxiliary seat disposed to normally drain into the bowl of the toilet, and provided with a partition connecting the front and side walls of the deflector and a centering stud projecting rearwardly from the lower portion of said front wall, and a sampling vessel having arms provided with fingers engageable with blocks on the deflector, a saddle on the front wall engageable with said stud, and a forwardly extending ledge on the upper end of said front wall disposed beneath said partition when the vessel is in place, there being slots located between the ends of the ledge and adjacent faces of said arms for reception of the corresponding side walls of the deflector.



2,446,161

BOTTLE CARRIER

Charles S. Price, Hollis, N. Y.

Application January 19, 1946, Serial No. 642,259
7 Claims. (Cl. 229—52)

2. A bottle carrier formed from a wrapper blank of resilient sheet material, shaped and creased to provide side panels, a bottom panel intermediate the same, the ends of said bottom panel being each provided with a bottom tab, each side panel carrying upper and lower end panels, a flat partition the lower end of which normally engages the bottom panel and the sides of which are formed with slotted ears extending, when set up, beyond the outer surfaces of the end panels, the upper end panels having abutments adapted to overlie said ears and the lower end panels each

carrying a locking tongue, whereby the carrier may be set up by bending the side panels up from the bottom panel about the partition portion and creases therebetween, bending the adjacent upper end panels so that they overlie and their abutments are disposed upon the partition ears, bending the bottom tabs up from the bottom panel, bending the adjacent lower end panels in toward one another over the bottom tabs and upper end panels, and inserting the end panel locking tongues in the ear slots of the partition.

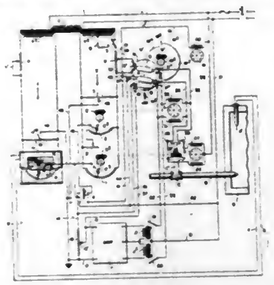
2,446,162

DEHYDRATION OF CORN

Paul W. Salo, Minneapolis, Minn., assignor to General Mills, Inc., a corporation of Delaware

No Drawing. Application February 12, 1944, Serial No. 522,175
5 Claims. (Cl. 99—204)

1. Process of dehydrating corn which comprises blanching the corn, partially dehydrating the corn, then deforming the corn kernels while at a moisture content within the approximate range of 10% to 30% so as to alter their natural cellular structure without reducing the kernels to a finely divided condition.



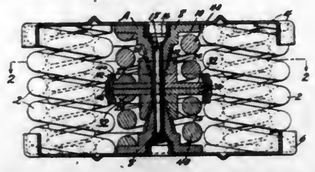
2,446,163

ELECTRIC PROPORTIONING CONTROL APPARATUS WITH RESET

William H. Wannamaker, Jr., Flourtown, Pa., assignor to The Brown Instrument Company, Philadelphia, Pa., a corporation of Pennsylvania

Application December 12, 1945, Serial No. 634,556
15 Claims. (Cl. 318—29)

1. An electric proportioning control system comprising in combination a controlled device, first, second and third resistances, a separate slider contact engaging and adjustable along each of said resistances, a fourth resistance, connecting means to connect each of said resistances to a source of alternating current, a reversible electric control motor for adjusting said device and for simultaneously adjusting the contact engaging said first resistance, a reversible electric reset motor for adjusting the contact engaging the second resistance, means adjusting the contact engaging the third resistance in accordance with variations in a control condition, means connecting an intermediate point of said fourth resistance and said contacts in series in a control circuit, mechanism including timing means for maintaining said control motor in an operative condition and said reset motor in an inoperative condition during periods alternating with periods in which it maintains said reset motor in an operative position and said control motor in an inoperative condition, voltage adjusting means included in said connecting means and actuated by said timing means and arranged



to make the voltage impressed by said source on said first and second resistances higher during the periods in which the reset motor is maintained in its operative condition than during the periods in which said control motor is maintained in its operative condition, means responsive to current flow in said control circuit during any of the last mentioned periods for energizing said control motor for operation to adjust the contact engaging said first resistance in the direction to interrupt said current flow and for correspondingly adjusting said device, and means reponsive to current flow in said control circuit for energizing said reset motor during periods in which said reset motor is maintained in its operative condition to adjust the contact engaging the second resistance in the direction to interrupt the last mentioned current flow.

2,446,164

SPRING UNIT

Victor Willoughby, Ridgewood, N. J., assignor to American Car and Foundry Company, New York, N. Y., a corporation of New Jersey

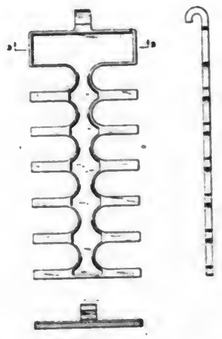
Application January 5, 1943, Serial No. 471,335
1 Claim. (Cl. 267—9)

A spring unit comprising a pair of opposed spaced apart followers, wedge surfaces formed on each of said followers, a plurality of friction shoes engaging said wedge surfaces, spring seats formed on said followers and shoes, and springs bearing on said seats to resiliently resist motion of said followers toward each other and to frictionally resist motion of said shoes away from each other, and additional springs bearing on said friction shoes to additionally resist the motion of said shoes away from each other, said additional springs comprising split rings deformed to grip the edges of the spring seats of said friction shoes.

DESIGNS

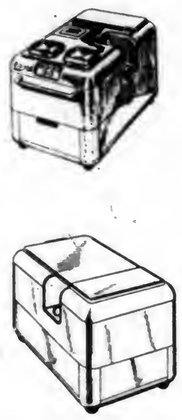
JULY 27, 1948

150,328
DESIGN FOR A COMBINED BATTERY VENT PLUG AND HYDROMETER
George C. Appel, Milwaukee, Wis., assignor to Globe-Union Inc., Milwaukee, Wis., a corporation of Delaware
Application April 22, 1946, Serial No. 128,825
Term of patent 14 years
(Cl. D52—7)



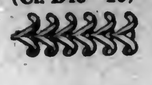
The ornamental design for a combined battery vent plug and hydrometer, as shown.

150,329
DESIGN FOR A NECKLACE OR SIMILAR ARTICLE
Claude Arpels, New York, N. Y.
Application October 25, 1947, Serial No. 142,138
Term of patent 3½ years
(Cl. D45—16)



The ornamental design for a necklace or similar article, substantially as shown and described.

150,330
DESIGN FOR A FILM DEVELOPING HANGER
Alfred H. Atkinson, Minneapolis, Minn.
Application March 6, 1947, Serial No. 137,409
Term of patent 14 years
(Cl. D61—1)



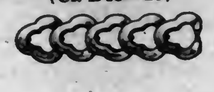
The ornamental design for a film developing hanger, as shown.

150,331
DESIGN FOR A PORTABLE ELECTRIC STOVE
Michael J. Auer and Tullio Edgar Grade, New York, N. Y.
Application September 14, 1946, Serial No. 133,326
Term of patent 3½ years
(Cl. D81—10)

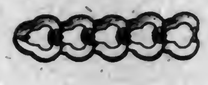
The ornamental design for a portable electric stove, as shown and described.

150,332
DESIGN FOR A LINK CHAIN FOR A BRACELET OR SIMILAR ARTICLE
Paul Bardach, Providence, R. I.
Application June 19, 1947, Serial No. 139,801
Term of patent 3½ years
(Cl. D45—16)

The ornamental design for a link chain for a bracelet or similar article, substantially as shown.



150,333
DESIGN FOR A LINK CHAIN FOR A BRACELET OR SIMILAR ARTICLE
Paul Bardach, Providence, R. I.
Application June 19, 1947, Serial No. 139,802
Term of patent 3½ years
(Cl. D45—16)



The ornamental design for a link chain for a bracelet or similar article, substantially as shown.

150,334
DESIGN FOR A LINK CHAIN FOR A BRACELET OR SIMILAR ARTICLE
Paul Bardach, Providence, R. I.
Application June 19, 1947, Serial No. 139,803
Term of patent 3½ years
(Cl. D45—16)

The ornamental design for a link chain for a bracelet or similar article, substantially as shown.

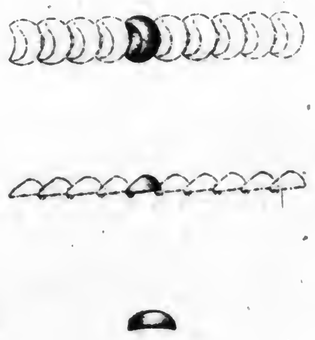
150,335
DESIGN FOR A LINK CHAIN FOR A BRACELET OR SIMILAR ARTICLE
Paul Bardach, Providence, R. I.
Application June 19, 1947, Serial No. 139,804
Term of patent 3½ years
(Cl. D45—16)

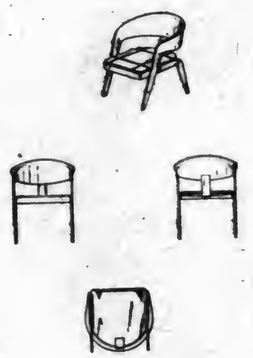
The ornamental design for a link chain for a bracelet or similar article, substantially as shown.

150,336
DESIGN FOR A LINK CHAIN FOR A BRACELET OR SIMILAR ARTICLE
Paul Bardach, Providence, R. I.
Application June 19, 1947, Serial No. 139,806
Term of patent 3½ years
(Cl. D45—16)

The ornamental design for a link chain for a bracelet or similar article, substantially as shown.

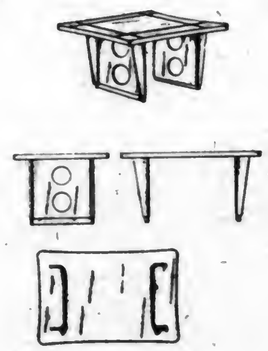
150,337
DESIGN FOR A LINK CHAIN FOR A BRACELET OR SIMILAR ARTICLE
Michael Chernow, New York, N. Y.
Application July 19, 1947, Serial No. 140,406
Term of patent 7 years
(Cl. D45—16)





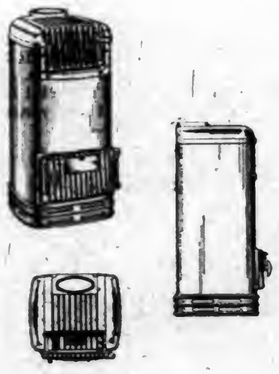
The ornamental design for a link chain for a bracelet or similar article, substantially as shown and described.

150,338
DESIGN FOR A LINK CHAIN FOR A BRACELET OR SIMILAR ARTICLE
Michael Chernow, New York, N. Y.
Application July 19, 1947, Serial No. 140,407
Term of patent 7 years
(Cl. D45—16)



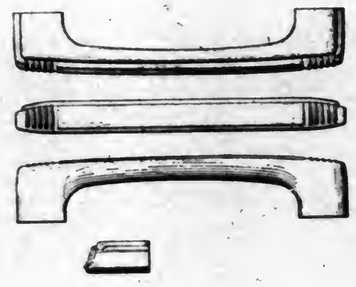
The ornamental design for a link chain for a bracelet or similar article, substantially as shown and described.

150,339
DESIGN FOR A CHAIR
Jack B. Cunningham, North Hollywood, Calif.
Application February 24, 1947, Serial No. 137,107
Term of patent 3½ years
(Cl. D15—1)



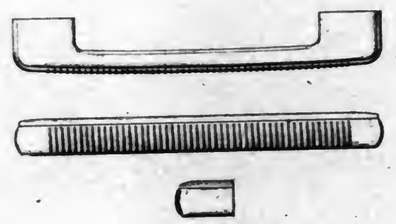
The ornamental design for a chair, as shown.

150,340
DESIGN FOR A TABLE
Jack B. Cunningham, North Hollywood, Calif.
Application February 24, 1947, Serial No. 137,108
Term of patent 3½ years
(Cl. D33—14)



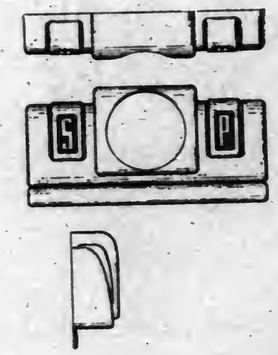
The ornamental design for a table, as shown.

150,341
DESIGN FOR A STOVE
Edwin Esson, Kansas City, Mo., assignor to Locke Stove Company, Kansas City, Mo., a corporation of Missouri
Application February 17, 1947, Serial No. 136,953
Term of patent 14 years
(Cl. D81—19)



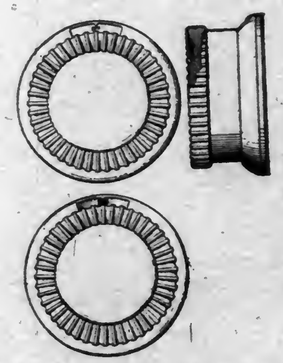
The ornamental design for a stove, as shown and described.

150,342
DESIGN FOR A HANDLE FOR OVEN DOORS AND THE LIKE
Richard I. Felver, Pittsburgh, Pa., assignor to Standard Gas Equipment Corporation, Baltimore, Md., a corporation of Maryland
Application September 26, 1946, Serial No. 133,595
Term of patent 14 years
(Cl. D81—25)



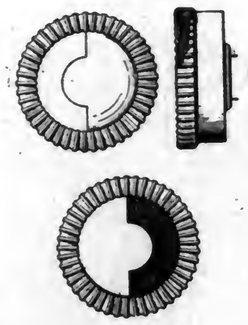
The ornamental design for a handle for oven doors and the like, as shown.

150,343
DESIGN FOR A HANDLE FOR OVEN DOORS AND THE LIKE
Richard I. Felver, Pittsburgh, Pa., assignor to Standard Gas Equipment Corporation, Baltimore, Md., a corporation of Maryland
Application September 26, 1946, Serial No. 133,596
Term of patent 14 years
(Cl. D81—25)



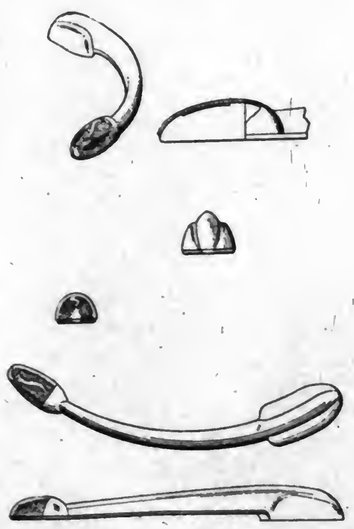
The ornamental design for a handle for oven doors and the like, as shown.

150,344
DESIGN FOR A CONDIMENT AND CLOCK UNIT FOR COOKING STOVES
Richard I. Felver, Pittsburgh, Pa., assignor to Standard Gas Equipment Corporation, Baltimore, Md., a corporation of Maryland
Application September 26, 1946, Serial No. 133,600
Term of patent 14 years
(Cl. D81—25)



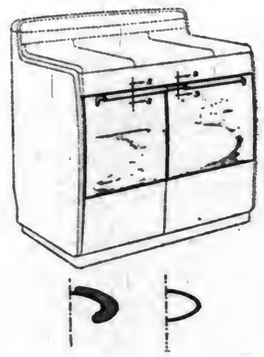
The ornamental design for a condiment and clock unit for cooking stoves, as shown.

150,345
DESIGN FOR AN OVEN CONTROL KNOB FOR GAS STOVES
Richard I. Felver, Pittsburgh, Pa., assignor to Standard Gas Equipment Corporation, Baltimore, Md., a corporation of Maryland
Application October 22, 1946, Serial No. 134,176
Term of patent 14 years
(Cl. D81—25)



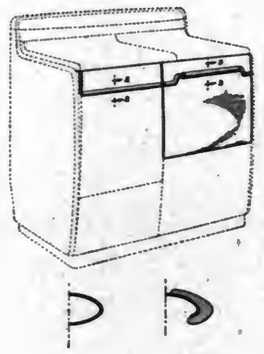
The ornamental design for an oven control knob for gas stoves, as shown.

150,346
DESIGN FOR A BURNER KNOB FOR GAS STOVES
Richard I. Felver, Pittsburgh, Pa., assignor to Standard Gas Equipment Corporation, Baltimore, Md., a corporation of Maryland
Application October 22, 1946, Serial No. 134,177
Term of patent 14 years
(Cl. D81—25)



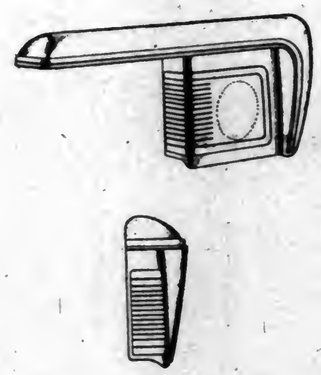
The ornamental design for a burner knob for gas stoves, as shown.

150,347
DESIGN FOR A PICKUP ARM FOR ELECTRICAL PHONOGRAPHS
Monte Ferar, Detroit, Mich., assignor to Colonial Radio Corporation, Buffalo, N. Y.
Application February 12, 1947, Serial No. 136,871
Term of patent 14 years
(Cl. D26—14)



The ornamental design for a pickup arm for electrical phonographs, as shown and described.

150,348
DESIGN FOR A GAS COOKSTOVE
Montgomery Ferar, Detroit, Mich., assignor to Florence Stove Company, Gardner, Mass., a corporation of Massachusetts
Application April 11, 1947, Serial No. 138,317
Term of patent 7 years
(Cl. D81—25)



The ornamental design for a gas cookstove, substantially as shown and described.

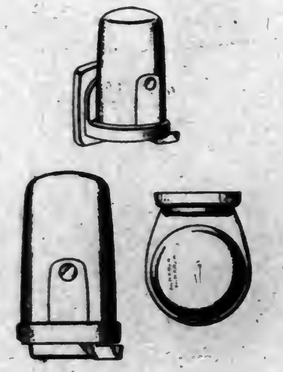
150,349
DESIGN FOR A GAS COOKSTOVE
Montgomery Ferar, Detroit, Mich., assignor to Florence Stove Company, Gardner, Mass., a corporation of Massachusetts
Application April 11, 1947, Serial No. 138,318
Term of patent 7 years
(Cl. D81—25)

The ornamental design for a gas cookstove, substantially as shown and described.

150,350
DESIGN FOR A COMBINED LAMP BRACKET AND TIMER FOR COOKSTOVES
Montgomery Ferar, Detroit, Mich., assignor to Florence Stove Company, Gardner, Mass., a corporation of Massachusetts
Application April 11, 1947, Serial No. 138,320
Term of patent 7 years
(Cl. D81—25)

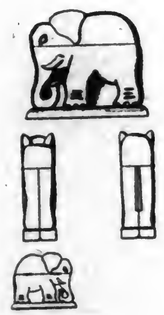
The ornamental design for a combined lamp bracket and timer for cookstoves, substantially as shown.

150,351
DESIGN FOR A PIN OR SIMILAR ARTICLE
Paul Flato, New York, N. Y., assignor, by mesne assignments, to D. Lisner & Co., Inc., New York, N. Y., a corporation of New York
Application June 25, 1947, Serial No. 139,904
Term of patent 3½ years
(Cl. D45—19)



The ornamental design for a pin or similar article, substantially as shown.

150,352
DESIGN FOR A PENDANT OR SIMILAR ARTICLE
Paul Flato, New York, N. Y., assignor, by mesne assignments, to D. Lisner & Co., Inc., New York, N. Y., a corporation of New York
Application June 25, 1947, Serial No. 139,905
Term of patent 3½ years
(Cl. D45—15)



The ornamental design for a pendant or similar article, substantially as shown.

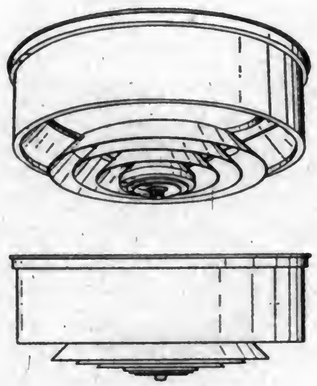
150,353
DESIGN FOR A POWDERED SOAP DISPENSER OR THE LIKE
Burdette B. Gilmore, Pelham Manor, N. Y., assignor to West Disinfecting Company, Long Island City, N. Y., a corporation of New York
Application January 29, 1947, Serial No. 136,492
Term of patent 14 years
(Cl. D4—3)

The ornamental design for a powdered soap dispenser or the like, substantially as shown.

150,354
DESIGN FOR A CIGARETTE AND CIGAR CASE
Stanley J. Glowiak, Fresno, Calif.
Application June 4, 1946, Serial No. 130,479
Term of patent 14 years
(Cl. D85—2)

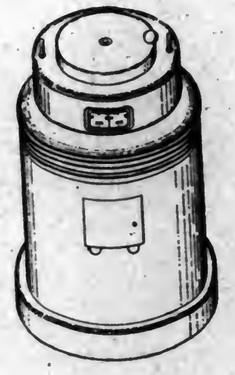
The ornamental design for a cigarette and cigar case, as shown.

150,355
DESIGN FOR A LAMP
David M. Golden, Chicago, Ill.
Application December 7, 1946, Serial No. 135,335
Term of patent 3½ years
(Cl. D48—20)

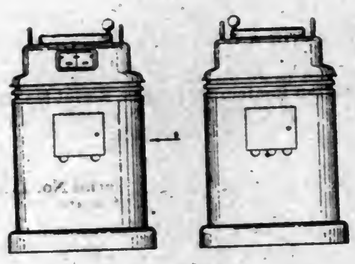


The ornamental design for a lamp, as shown.

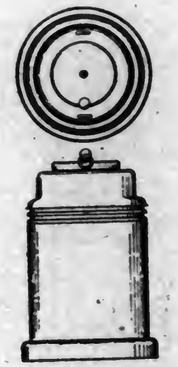
150,356
DESIGN FOR A PIN
Gordon L. Harwell, Houston, Tex., assignor to Converted Rice, Inc., Houston, Tex., a corporation of Delaware
Application July 1, 1947, Serial No. 140,034
Term of patent 14 years
(Cl. D45—19)



The ornamental design for a pin, substantially as shown.



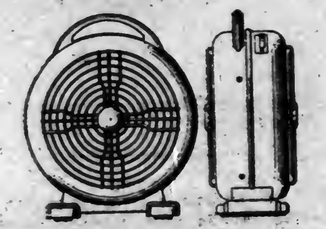
150,357
DESIGN FOR A COMBINED AIR CIRCULATOR AND DIFFUSER
George B. Herbster, Cleveland, Ohio, assignor to Elk-Manster, Inc., Cleveland, Ohio, a corporation of Ohio
Application July 11, 1946, Serial No. 131,499
Term of patent 14 years
(Cl. D62—4)



The ornamental design for a combined air circulator and diffuser, substantially as shown.

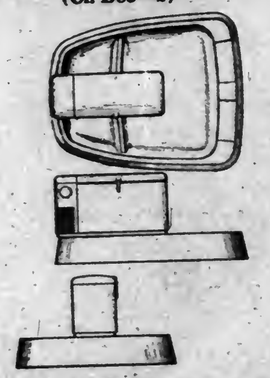
150,358
DESIGN FOR AN ELECTRIC WELDER
Edward A. Hobart and Russell T. Flora, Troy, Ohio, assignors to The Hobart Brothers Company, Troy, Ohio, a corporation of Ohio
Application February 10, 1947, Serial No. 136,802
Term of patent 3½ years
(Cl. D26—5)

The ornamental design for an electric welder, substantially as shown.

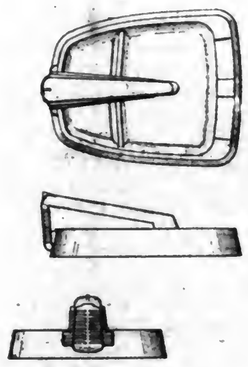


150,359
DESIGN FOR A BROOCH PIN OR SIMILAR ARTICLE
Sylvia Hobe, New York, N. Y.
Application June 13, 1947, Serial No. 139,636
Term of patent 3½ years
(Cl. D45—19)

The ornamental design for a brooch pin or similar article, substantially as shown.

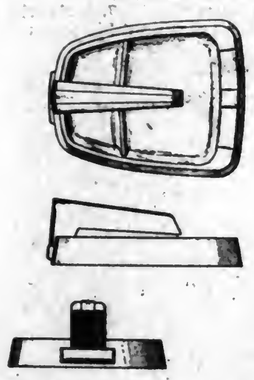


150,360
DESIGN FOR A CASING FOR HEATER FAN UNIT
Ray R. Hutcheson, Brooklyn, N. Y., assignor to E. A. Laboratories, Inc., Brooklyn, N. Y., a corporation of New York
Application December 10, 1946, Serial No. 135,380
Term of patent 14 years
(Cl. D81—10)



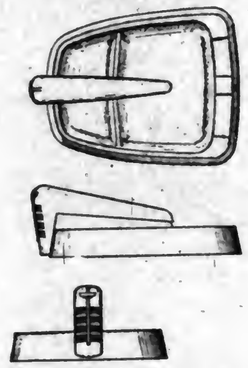
The ornamental design for a casing for heater fan unit, as shown and described.

150,361
DESIGN FOR AN ASH TRAY
George McStay Jackson, Lake Forest, Ill., assignor to Design Fabricators, Inc., Chicago, Ill., a corporation of Illinois
Application March 29, 1947, Serial No. 138,038
Term of patent 3½ years
(Cl. D85—2)



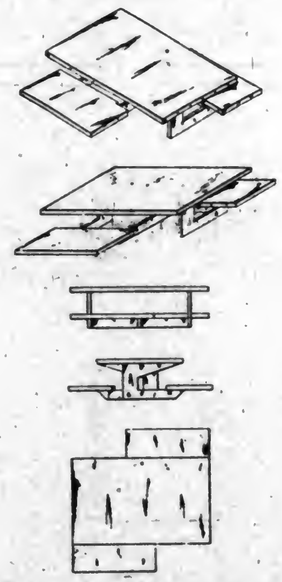
The ornamental design for an ash tray, substantially as shown.

150,362
DESIGN FOR AN ASH TRAY
George McStay Jackson, Lake Forest, Ill., assignor to Design Fabricators, Inc., Chicago, Ill., a corporation of Illinois
Application March 29, 1947, Serial No. 138,039
Term of patent 3½ years
(Cl. D85—2)



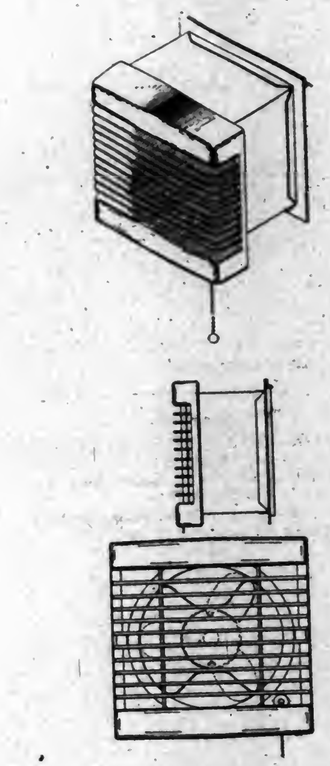
The ornamental design for an ash tray, substantially as shown.

150,363
DESIGN FOR AN ASH TRAY
George McStay Jackson, Lake Forest, Ill., assignor to Design Fabricators, Inc., Chicago, Ill., a corporation of Illinois
Application March 29, 1947, Serial No. 138,040
Term of patent 3½ years
(Cl. D85—2)



The ornamental design for an ash tray, substantially as shown.

150,364
DESIGN FOR AN ASH TRAY
George McStay Jackson, Lake Forest, Ill., assignor to Design Fabricators, Inc., Chicago, Ill., a corporation of Illinois
Application March 29, 1947, Serial No. 138,041
Term of patent 3½ years
(Cl. D85—2)

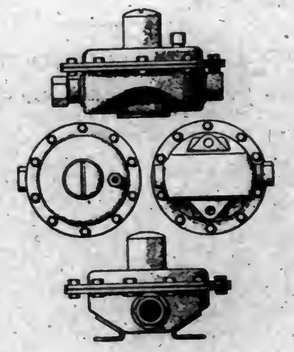


The ornamental design for an ash tray, substantially as shown.

150,365
DESIGN FOR A COFFEE TABLE OR SIMILAR ARTICLE
Dan R. Johnson, Los Angeles, Calif.
Application September 3, 1946, Serial No. 133,025
Term of patent 3½ years
(Cl. D33—14)

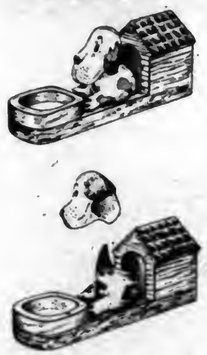
The ornamental design for a coffee table or similar article, substantially as shown.

150,366
DESIGN FOR A VENTILATING UNIT
John Brandt Koch, Detroit, Mich., assignor to American Blower Corporation, Wilmington, Del., a corporation of Delaware
Application August 7, 1946, Serial No. 132,346
Term of patent 14 years
(Cl. D62—4)



The ornamental design for a ventilating unit, substantially as shown and described.

150,367
DESIGN FOR A BRIDGE FOR EYEGLASSES
John A. Lauber, Rochester, N. Y., assignor to Continental Optical Company, Inc., Rochester, N. Y., a corporation of Indiana
Application August 28, 1947, Serial No. 141,100
Term of patent 7 years
(Cl. D57—1)

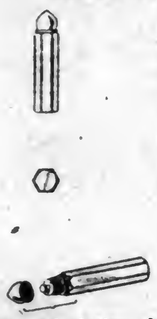


The ornamental design for a bridge for eyeglasses, as shown.

150,368
DESIGN FOR A PRESSURE REGULATOR FOR BUTANE GAS SYSTEMS
Ollie Z. Mathews, Dallas, Tex., assignor to Dallas Engineering Company, Dallas, Tex., a partnership
Application June 17, 1946, Serial No. 130,780
Term of patent 14 years
(Cl. D78—1)

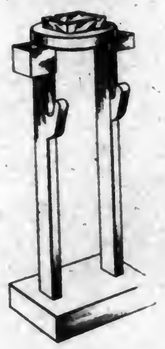
The ornamental design for a pressure regulator for butane gas systems, as shown.

150,369
DESIGN FOR AN ASH TRAY
Peter Narey, North Little Rock, Ark.
Application April 9, 1947, Serial No. 138,259
Term of patent 7 years
(Cl. D85—2)



The ornamental design for an ash tray, as shown.

150,370
DESIGN FOR A RING SHANK
Henry Peterson, Brooklyn, N. Y.
Application June 17, 1947, Serial No. 139,769
Term of patent 14 years
(Cl. D45—10)



The ornamental design for a ring shank, substantially as shown.

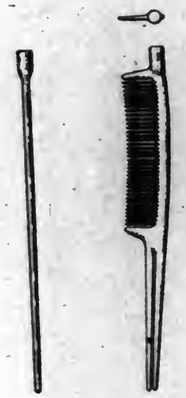
150,371
DESIGN FOR A PERFUME DISPENSER
John L. Priess, Chicago, Ill.
Application November 29, 1946, Serial No. 135,178
Term of patent 14 years
(Cl. D86—10)

The ornamental design for a perfume dispenser, substantially as shown.

150,372
DESIGN FOR A COMBINED TOILET PAPER HOLDER AND TRAY
Raymond Smith Sanders, Center, Tex.
Application October 29, 1946, Serial No. 134,371
Term of patent 14 years
(Cl. D85—2)

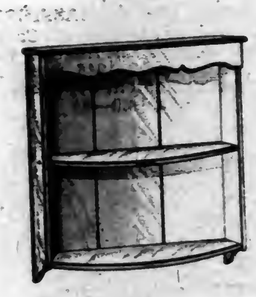
The ornamental design for a combined toilet paper holder and tray, as shown.

150,373
DESIGN FOR A SHOWER CURTAIN RING
Herbert D. Schmidt, Little Falls, N. J., assignor to R. D. Werner Co., Inc., New York, N. Y., a corporation of New York
Application January 15, 1946, Serial No. 125,575
Term of patent 3½ years
(Cl. D21—1)



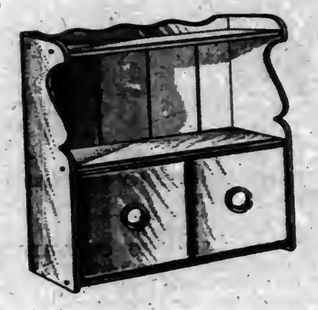
The ornamental design for a shower curtain ring, substantially as shown.

150,374
DESIGN FOR A SHOWER CURTAIN RING
Herbert D. Schmidt, Little Falls, N. J., assignor to R. D. Werner Co., Inc., New York, N. Y., a corporation of New York
Application January 15, 1946, Serial No. 125,576
Term of patent 3½ years
(Cl. D21—1)



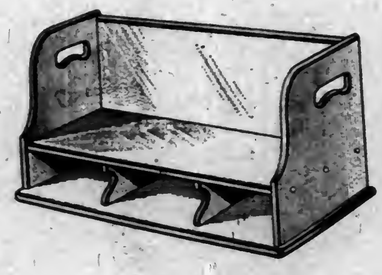
The ornamental design for a shower curtain ring, substantially as shown.

150,375
DESIGN FOR A COMB
Jacob Simon, Irvington, and Philip Klein, Maplewood, N. J.
Application January 25, 1946, Serial No. 125,965
Term of patent 3½ years
(Cl. D86—8)



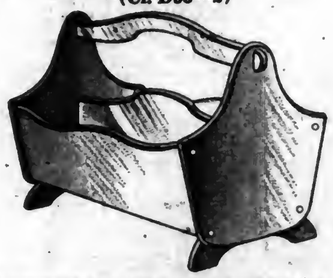
The ornamental design for a comb, as shown.

150,376
DESIGN FOR A CURIO SHELF
Edmond J. Spence, New York, N. Y., assignor to Selrite, Inc., New York, N. Y., a corporation of New York
Application October 25, 1946, Serial No. 134,226
Term of patent 3½ years
(Cl. D33—3)



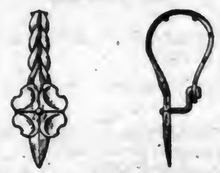
The ornamental design for a curio shelf, substantially as shown.

150,377
DESIGN FOR A WALL CABINET
Edmond J. Spence, New York, N. Y., assignor to Selrite, Inc., New York, N. Y., a corporation of New York
Application October 25, 1946, Serial No. 134,229
Term of patent 3½ years
(Cl. D33—19)



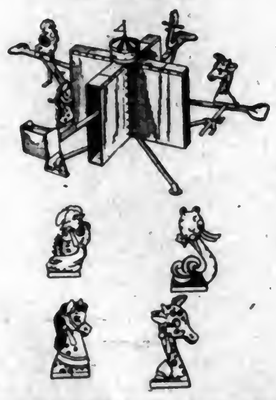
The ornamental design for a wall cabinet, substantially as shown.

150,378
DESIGN FOR A BOOK SHELF
Edmond J. Spence, New York, N. Y., assignor to Selrite, Inc., New York, N. Y., a corporation of New York
Application October 25, 1946, Serial No. 134,230
Term of patent 3½ years
(Cl. D33—2)



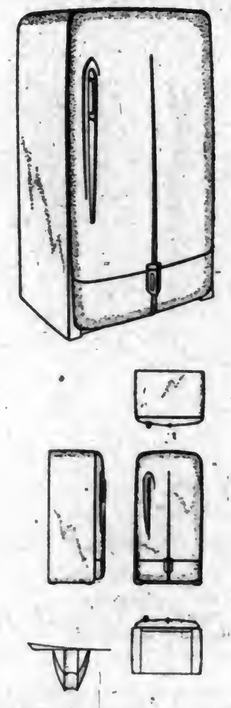
The ornamental design for a book shelf, substantially as shown.

150,379
DESIGN FOR A MAGAZINE BASKET
Edmond J. Spence, New York, N. Y., assignor to Seirite, Inc., New York, N. Y., a corporation of New York
Application October 25, 1946, Serial No. 134,231
Term of patent 3½ years
(Cl. D33—2)



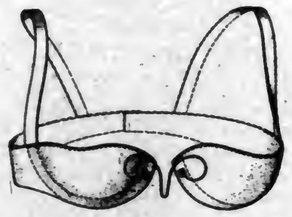
The ornamental design for a magazine basket, substantially as shown.

150,380
DESIGN FOR A SHOWER CURTAIN RING
Charles E. Stephenson, New York, N. Y., and Herbert D. Schmidt, Little Falls, N. J., assignors to R. D. Werner Co., Inc., New York, N. Y., a corporation of New York
Application January 15, 1946, Serial No. 125,578
Term of patent 3½ years
(Cl. D21—1)



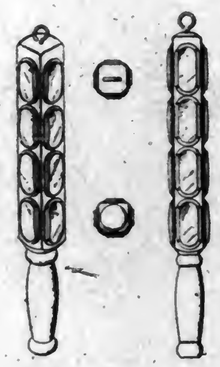
The ornamental design for a shower curtain ring, substantially as shown.

150,381
DESIGN FOR A MERRY-GO-ROUND
Randolph Stone, Chicago, Ill.
Application March 20, 1947, Serial No. 137,766
Term of patent 14 years
(Cl. D34—15)



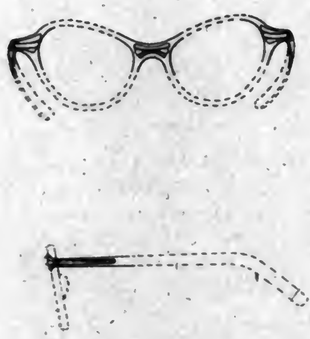
The ornamental design for a merry-go-round, substantially as shown and described.

150,382
DESIGN FOR A REFRIGERATOR CABINET
Carl W. Sundberg and Montgomery Ferar, Detroit, Mich., assignors to Seeger-Sunbeam Corporation, St. Paul, Minn., a corporation of Minnesota
Application February 1, 1946, Serial No. 126,168
Term of patent 3½ years
(Cl. D67—3)



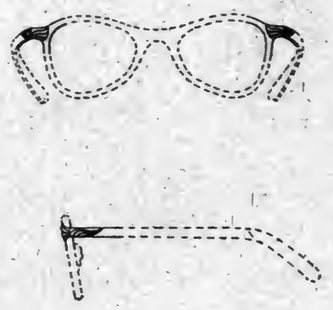
The ornamental design for a refrigerator cabinet, as shown.

150,383
DESIGN FOR A BRASSIÈRE
Karl Van Leuven, Jr., Hollywood, Calif., assignor to Ina Yoakum, Los Angeles, Calif.
Application December 23, 1946, Serial No. 135,715
Term of patent 3½ years
(Cl. D20—4)



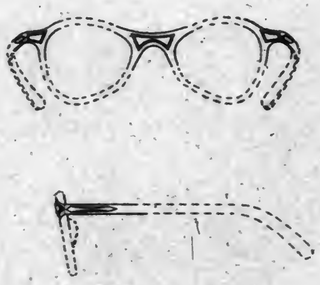
The ornamental design for a brassière, substantially as shown and described.

150,384
DESIGN FOR A SIGNAL DEVICE
Peter von Frantzius, Chicago, Ill.
Application August 2, 1947, Serial No. 140,674
Term of patent 14 years
(Cl. D72—1)



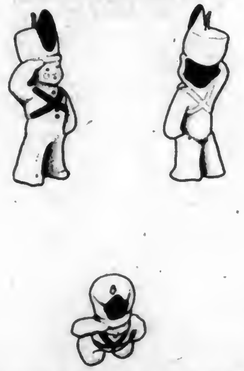
The ornamental design for a signal device, substantially as shown.

150,385
DESIGN FOR A SPECTACLE FRAME OR THE LIKE
Raymond L. Wells, Attleboro, Mass., assignor to American Optical Company, Southbridge, Mass., a voluntary association of Massachusetts
Application December 30, 1947, Serial No. 143,441
Term of patent 14 years
(Cl. D57—1)



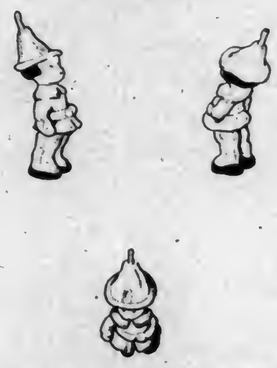
The ornamental design for a spectacle frame or the like, substantially as shown and described.

150,386
DESIGN FOR A SPECTACLE FRAME OR THE LIKE
Raymond L. Wells, Attleboro, Mass., assignor to American Optical Company, Southbridge, Mass., a voluntary association of Massachusetts
Application December 30, 1947, Serial No. 143,442
Term of patent 14 years
(Cl. D57—1)



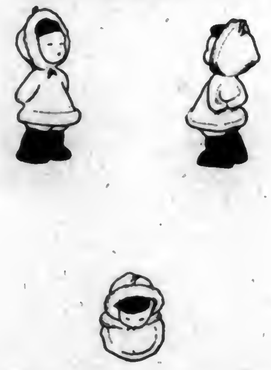
The ornamental design for a spectacle frame or the like, substantially as shown and described.

150,387
DESIGN FOR A SPECTACLE FRAME OR THE LIKE
Raymond L. Wells, Attleboro, Mass., assignor to American Optical Company, Southbridge, Mass., a voluntary association of Massachusetts
Application December 30, 1947, Serial No. 143,443
Term of patent 14 years
(Cl. D57—1)



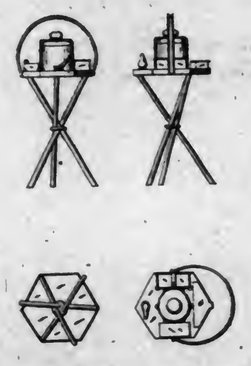
The ornamental design for a spectacle frame or the like, substantially as shown and described.

150,388
DESIGN FOR A CANDLE
Paul A. Williams, Ebenezer, N. Y., assignor to The W. & F. Manufacturing Co., Inc., Buffalo, N. Y.
Application February 21, 1947, Serial No. 137,080
Term of patent 7 years
(Cl. D73—1)



The ornamental design for a candle, substantially as shown.

150,389
DESIGN FOR A CANDLE
Paul A. Williams, Ebenezer, N. Y., assignor to The W. & F. Manufacturing Co., Inc., Buffalo, N. Y.
Application February 21, 1947, Serial No. 137,081
Term of patent 7 years
(Cl. D73—1)



The ornamental design for a candle, substantially as shown.

150,390
DESIGN FOR A CANDLE
Paul A. Williams, Ebenezer, N. Y., assignor to The W. & F. Manufacturing Co., Inc., Buffalo, N. Y.
Application February 21, 1947, Serial No. 137,082
Term of patent 7 years
(Cl. D73—1)

The ornamental design for a candle, substantially as shown.

150,391
DESIGN FOR A PIPE SMOKER'S STAND
William C. Zelle, St. Louis, Mo.
Application April 2, 1947, Serial No. 138,116
Term of patent 14 years
(Cl. D85—2)

The ornamental design for a pipe smoker's stand, substantially as shown.

CLASSIFIED LIST OF TRADE-MARKS REGISTERED

CLASS 1

Charcoal, coal, coke, etc., Lump, granulated, and pulverized. Flower City Charcoal Company. 323,557, Apr. 23, 1935. Republished Aug. 3.
Leather. Richard Young Company. 248,067, renewed Oct. 16, 1948. O. G. Aug. 3.
Seed, Grass. E. W. Conklin & Son. 46,090, Sept. 5, 1905. Republished Aug. 3.
Seed, Timothy. E. W. Conklin & Son. 46,741, Oct. 3, 1905. Republished Aug. 3.
Seeds, bulbs, and plants, etc. Geo. Tait & Sons, Inc. 215,156, July 13, 1926. Republished Aug. 3.
Wool shorn from sheep, furs, and bone for manufacturing purposes. Consolidated Rendering Company. 245,468, renewed Aug. 14, 1948. O. G. Aug. 3.

CLASS 2

Bags of paper, Garment. Lewy Chemical Company. 231,977–8, renewed Aug. 30, 1947. O. G. Aug. 3.
Boxes and shipping cases of fibrous material. Federal Container Company. 243,509, renewed June 26, 1948. O. G. Aug. 3.
Boxes, Insulated picnic. Brown Transfer & Storage Co. 439,959, Aug. 3; Serial No. 497,644, published May 11, 1948.
Boxes or cartons, Pasteboard. Hoague-Sprague Corporation. 245,862, renewed Aug. 21, 1948. O. G. Aug. 3.
Cans, Metal. Crown Can Company. 366,873, May 2, 1939. Republished Aug. 3.
Compacts. E. Westall. 439,980, Aug. 3; Serial No. 512,943, published May 11, 1948.
Tray. Chocolate Products Company. 501,327, Aug. 3; Serial No. 528,610, published May 11, 1948.

CLASS 3

Luggage. J. Neumann. 338,488, Sept. 8, 1936. Republished Aug. 3.

CLASS 4

Abrasive wheels, points, blocks, cones, and buffs. J. C. Craven. 501,288, Aug. 3; Serial No. 510,379, published May 4, 1948.
Ceramic abrasive materials, and mineral materials and compositions. Orefraction Incorporated. 440,025, Aug. 3; Serial No. 525,016, published Apr. 27, 1948.
Chemical compounds. Valentine Company. 501,388, Aug. 3; Serial No. 530,266, published May 4, 1948.
Chemical compounds, Soluble. Cowles Detergent Company. 501,365, Aug. 3; Serial No. 532,124, published May 4, 1948.
Cleaner, cleanser, and detergent, Sudsing. Procter & Gamble Company. 501,418, Aug. 3; Serial No. 539,898, published Apr. 27, 1948.
Cleaner for floors, walls, woodwork, and dishes, Liquid. Essential Chemicals Co. 439,982, Aug. 3; Serial No. 518,396, published Apr. 27, 1948.
Cleaner for glass and vitreous surfaces, Liquid. Drackett Chemical Company. 300,651, Jan. 31, 1933. Republished Aug. 3.
Cleaner for metals, Chemical. A. M. Freeman. 501,401, Aug. 3; Serial No. 535,518, published May 4, 1948.
Cleaner, General household. H. Theobald, Sr. 421,166, May 21, 1946. Republished Aug. 3.
Cleaning compound. Anderson-Stolz Pharmaceuticals, Inc. 501,384, Aug. 3; Serial No. 533,693, published May 4, 1948.
Cleaning solvents. Standard Oil Company of California. 440,014, Aug. 3; Serial No. 520,980, published Nov. 18, 1947.
Cleanser, General household. Theobald Industries. 427,122–3, Jan. 28, 1947. Republished Aug. 3.
Cleansing preparation. Cowles Detergent Company. 501,358, Aug. 3; Serial No. 531,892, published Apr. 27, 1948.
Coated abrasive products. Armour and Company. 501,328, Aug. 3; Serial No. 528,677, published May 4, 1948.
Enzymatic product. Wallerstein Company, Inc. 345,665, May 4, 1937. Republished Aug. 3.
Liquid detergent. Huntington Laboratories, Inc. 440,012, Aug. 3; Serial No. 520,703, published May 4, 1948.
Materials and solutions which act as the solvent in removing ink, grease, etc. American Multigraph Co. 293,735, May 3, 1932. Republished Aug. 3.
Naphthas. Phillips Petroleum Company. 439,981, Aug. 3; Serial No. 513,202, published May 4, 1948.
Oil base liquid detergent. Water-soluble. E. F. Drew & Co., Inc. 440,001, Aug. 3; Serial No. 518,942, published May 4, 1948.
Polish, Silver. Western Processed Food Co. 439,967, Aug. 3; Serial No. 506,564, published Apr. 27, 1948.
Preparation for cleaning printing plates. Multigraph Company. 314,756, July 10, 1934. Republished Aug. 3.
Preparation for removing spots and stains, and liquid cleaner. Soil-Off Manufacturing Co. 501,345, Aug. 3; Serial No. 530,776, published May 4, 1948.
Salt compounds. F. K. Foy. 436,969, Aug. 3; Serial No. 507,631, published Apr. 27, 1948.
Shaving cream and laundry and household soap in flake or granulated form. H. J. Theobald. 388,315–17, June 17, 1941. Republished Aug. 3.
Soap and cleaning compounds. Great Stuff Products, Inc. 501,352, Aug. 3; Serial No. 531,029, published May 4, 1948.
Soap and powdered hand soap, Paste hand. Mione Manufacturing Co., Inc. 399,637, Jan. 19, 1943. Republished Aug. 3.
Soap and soap flakes, Hard water. Dry Goods Alliance, Inc. 501,393, Aug. 3; Serial No. 534,609, published May 4, 1948.
Soap, Bar. Procter & Gamble Company. 439,963, Aug. 3; Serial No. 501,006, published May 18, 1947.
Soap in cake form, Shampoo. Schmidt Soap Products, Inc. 439,989, Aug. 3; Serial No. 516,150, published Apr. 27, 1948.
Soap, Laundry. Chas. W. Young & Co. 57,258, Nov. 6, 1906. Republished Aug. 3.
Soap, Laundry and powdered. Chas. W. Young & Co. 57,259, Nov. 6, 1906. Republished Aug. 3.
Soap, Laundry and powdered. Chas. W. Young & Co. 57,309, Nov. 13, 1906. Republished Aug. 3.
Soap, waterless paste soap, powder soap, etc., Liquid. C. L. McCoy. 439,983, Aug. 3; Serial No. 513,668, published May 4, 1948.
Soaps. H. J. Theobald. 341,276, Dec. 1, 1936. Republished Aug. 3.
Soaps, and cleanser, etc., Liquid paste and powder. B. A. Railton. 197,308, Apr. 14, 1925. Republished Aug. 3.
Soaps, etc., Laundry, textile and other industrial. H. J. Theobald. 373,613, Dec. 12, 1939. Republished Aug. 3.
Soaps, Toilet and shaving. John Hudson Moore, Inc. 501,290, Aug. 3; Serial No. 512,073, published May 4, 1948.
Spot remover used by laundries and dry cleaners. Patek and Co. 439,966, Aug. 3; Serial No. 505,914, published Apr. 27, 1948.
Spotting compound, Dry. Patek and Co. 501,285, Aug. 3; Serial No. 505,915, published Apr. 27, 1948.
Tubes and cones, Abrasive-cloth. Hammel, Riglander & Co., Inc. 501,364, Aug. 3; Serial No. 532,022, published Apr. 27, 1948.
Washing powder. H. C. Hodson. 439,996, Aug. 3; Serial No. 517,336, published Apr. 27, 1948.
Water soluble powdered or granular detergent compound containing water softening properties. Central Ohio Supply Co. 439,997, Aug. 3; Serial No. 517,972, published Apr. 27, 1948.

CLASS 5

Adhesive tape, Pressure-sensitive. Minnesota Mining & Manufacturing Company. 439,985, Aug. 3; Serial No. 515,324, published May 4, 1948.
Cement, Waterproof wall covering. Paulsboro Manufacturing Company. 439,993, Aug. 3; Serial No. 517,152, published May 11, 1948.
Glue, Casein. Paisley Products Incorporated. 439,995, Aug. 3; Serial No. 517,199, published May 4, 1948.
Stays, Gummed paper-box. Nashua Gummed and Coated Paper Company. 123,471, Nov. 12, 1918. Republished Aug. 3.
Tape and gummed cloth tape, Gummed paper. Wortendyke Mfg. Co. 231,222, Aug. 16, 1927. Republished Aug. 3.

CLASS 6

Aggressins, alkalizers, analgesics, etc. Fort Dodge Laboratories, Inc. 501,389, Aug. 3; Serial No. 533,965, published May 11, 1948.
Alcoholic solvent. Commercial Solvents Corporation. 501,382, Aug. 3; Serial No. 533,482, published May 11, 1948.
Algin product. Kelco Company. 501,329, Aug. 3; Serial No. 528,728, published May 4, 1948.
Alpha tocopherol acetate, aminophylline, anterior pituitary, etc. E. S. Miller Laboratories, Inc. 501,319, Aug. 3; Serial No. 527,528, published May 4, 1948.
Antiacids, antipyretics, aphrodisiacs, etc. Horton & Converse. 266,410, Jan. 14, 1930. Republished Aug. 3.
Anti-freeze preservative. Pure Oil Company. 501,316, Aug. 3; Serial No. 527,290, published May 4, 1948.
Aqueous suspension of microcrystalline sulfathiazole. Horton & Converse. 424,740, Oct. 22, 1946. Republished Aug. 3.
Baking powder and bluing. B. A. Railton Co. 202,369, Aug. 18, 1925. Republished Aug. 3.
Bluing, Liquid. Luther Ford & Company. 199,108, June 2, 1925. Republished Aug. 3.
Boiler compound. National Colloid Co. 364,443, Jan. 31, 1939. Republished Aug. 3.
Capsules, Non-narcotic. Pacsules Laboratories, Inc. 440,005, Aug. 3; Serial No. 519,489, published May 4, 1948.
Carboxymethyl cellulose and salts thereof. Dow Chemical Company. 439,968, Aug. 3; Serial No. 506,992, published May 4, 1948.
Chemical compound, Dry. Service Industries. 501,412, Aug. 3; Serial No. 537,248, published May 4, 1948.
Chemical for the control of acid pickle baths for metals, Liquid. American Chemical Paint Company. 240,800, renewed Apr. 10, 1948. O. G. Aug. 3.
Chemical preparation. Ray-Burn Chemicals. 501,354, Aug. 3; Serial No. 531,243, published May 4, 1948.
Chemical preparation. Sandoz Chemical Works, Inc. 501,420, Aug. 3; Serial No. 541,028, published May 4, 1948.
Chemical preparations. Societe de Produits Chimiques des Terres Rares. 440,024, Aug. 3; Serial No. 524,490, published May 4, 1948.
Chemically prepared food for cockroaches and water bugs. D. Russell. 501,386, Aug. 3; Serial No. 533,785, published May 4, 1948.
Chemicals, Heavy. Consolidated Rendering Company. 248,320, renewed Oct. 16, 1948. O. G. Aug. 3.
Chemotherapeutic agent. Commercial Solvents Corporation. 501,394, Aug. 3; Serial No. 534,751, published May 4, 1948.
Conjugated estrogen. Wyeth Incorporated. 501,387, Aug. 3; Serial No. 533,963, published Apr. 27, 1948.
Cosmetic and beauty preparations. J. Cochran. 501,408, Aug. 3; Serial No. 536,585, published Apr. 27, 1948.
Cosmetics and beauty preparation. J. Cochran. 501,407, Aug. 3; Serial No. 536,583, published Apr. 27, 1948.
Cough syrup. Burroughs Wellcome & Co. (U. S. A.) Inc. 501,378, Aug. 3; Serial No. 533,000, published May 4, 1948.
Curling agent for wool fibers. Monsanto Chemical Company. 501,292, Aug. 3; Serial No. 513,673, published May 4, 1948.
Deodorant. Plough Chemical Company. 244,814, renewed July 31, 1948. O. G. Aug. 3.
Deodorant, Personal. Halitosine Company. 501,299, Aug. 3; Serial No. 523,315, published Apr. 27, 1948.
Deodorants and preparations for preventing excessive perspiration, also depilatory. Odorono Company, Inc. 363,156, Dec. 13, 1938. Republished Aug. 3.
Deodorizer, insect repellant, and insect sprays. Odora Company, Inc. 501,412, Aug. 3; Serial No. 537,074, published May 4, 1948.
Detoxifying agent for oral prophylaxis. Wm. S. Merrell Company. 244,397, renewed July 17, 1948. O. G. Aug. 3.
Dextrose used for pharmaceutical and industrial purposes. Corn Products Refining Company. 439,957, Aug. 3; Serial No. 497,371, published Apr. 13, 1948.

Digestive tablets, Laxative. G. Replow. 241,388, renewed Apr. 24, 1948. O. G. Aug. 3.
Disinfectant. Crown Zellerbach Corporation. 501,385, Aug. 3; Serial No. 533,705, published May 4, 1948.
Electrolytic solutions. Electron Lithoplate Corporation. 440,006–7, Aug. 3; Serial Nos. 520,096–7, published May 4, 1948.
Elixir thiamin chloride. Wyeth Incorporated. 501,388, Aug. 3; Serial No. 533,964, published Apr. 27, 1948.
Emulsions of cod-liver oil and cod-liver oil. A/S Vitanova Ltd. 242,131, renewed May 15, 1948. O. G. Aug. 3.
Essence of perfumes, etc. A. L. Van Ameringen. 229,950, July 12, 1927. Republished Aug. 3.
Essences of perfumes, synthetic perfumes, etc. A. L. Van Ameringen. 252,231, Jan. 29, 1929. Republished Aug. 3.
Exterminator, Rodent. W. G. Reardon Laboratories, Inc. 501,379, Aug. 3; Serial No. 533,052, published May 4, 1948.
Exterminator, Rodent. W. G. Reardon Laboratories, Inc. 501,380, Aug. 3; Serial No. 533,054, published May 4, 1948.
Facial oil. Lanolin Corporation of America. 501,410, Aug. 3; Serial No. 536,909, published May 4, 1948.
Foot lotion. A. E. Williams. 501,370, Aug. 3; Serial No. 532,532, published May 4, 1948.
Germicide and disinfectant. Baird & McGuire, Inc. 501,375, Aug. 3; Serial No. 532,677, published May 11, 1948.
Hair dressing. J. M. Chamblin. 501,294, Aug. 3; Serial No. 515,862, published May 11, 1948.
Hair tonic. F. Ad. Richter & Co. 248,199, renewed Oct. 16, 1948. O. G. Aug. 3.
Hematinic and tonic. Armour and Company. 501,383, Aug. 3; Serial No. 533,526, published May 4, 1948.
Hygienic preparations. Holland-Rantos Company, Inc. 213,756, June 1, 1926. Republished Aug. 3.
Hypnotic, Analgeso. E. R. Squibb & Sons. 249,178, renewed Nov. 6, 1948. O. G. Aug. 3.
Hypnotic in tablet form. Ames Company, Inc. 501,353, Aug. 3; Serial No. 531,076, published May 4, 1948.
Insecticide for spraying plants. Hovley & Dalby. 439,961, Aug. 3; Serial No. 499,556, published May 4, 1948.
Insecticides. Willke Chemical Company. 409,076, Sept. 12, 1944. Republished Aug. 3.
Insecticides, fungicides, seed disinfectants, and weed killing compounds. E. I. du Pont de Nemours and Comp'any. 439,990, Aug. 3; Serial No. 516,678, published May 11, 1948.
Insecticides, insect repellants and insect sprays. Odora Company, Inc. 501,411, Aug. 3; Serial No. 537,071, published May 4, 1948.
Internal medicine for the treatment of stomach disorders. M. M. Lillis. 439,987, Aug. 3; Serial No. 515,501, published May 4, 1948.
Laxative. S. C. Wells & Company. 396,169, June 30, 1942. Republished Aug. 3.
Laxative, Candy. A. Newhouse. 440,009, Aug. 3; Serial No. 520,410, published Apr. 27, 1948.
Laxative capsules. J. M. Chamblin. 501,381, Aug. 3; Serial No. 533,443, published May 4, 1948.
Laxative, Mild vegetable. Foster-Dack Company. 501,395, Aug. 3; Serial No. 534,888, published Apr. 27, 1948.
Laxative, Product for use as a. Wm. S. Merrell Company. 244,012, renewed July 3, 1948. O. G. Aug. 3.
Liquid preparation for the treatment of colic and for external application to the human body, etc. S. C. Wells & Company. 422,368, July 16, 1946. Republished Aug. 3.
Liquid preparation for the treatment of colic, etc. S. C. Wells & Company. 423,297–8, Aug. 27, 1946. Republished Aug. 3.
Lotion, Hair, scalp, and skin. Combeasy Co. Inc. 244,226, renewed July 17, 1948. O. G. Aug. 3.
Lower molecular weight monoalkylene glycols and mixtures of individual alkeylene gylcols. Wyandotte Chemicals Corporation. 501,297, Aug. 3; Serial No. 523,122, published May 4, 1948.
Medical gases. Liquid Carbonic Corporation. 501,339, Aug. 3; Serial No. 530,324, published May 4, 1948.
Medicinal preparation. Brayten Pharmaceutical Company. 501,300, Aug. 3; Serial No. 523,634, published Apr. 27, 1948.
Medicinal preparation. C. F. Tibbets. 501,405, Aug. 3; Serial No. 535,771, published May 4, 1948.
Medicinal preparations. Reed & Carnrick. 229,734, July 5, 1927. Republished Aug. 3.
Medicinal preparations. Reed & Carnrick. 259,547, July 30, 1929. Republished Aug. 3.
Medicinal preparations. Reed & Carnrick. 286,597, Sept. 1, 1931. Republished Aug. 3.
Medicinal products. Reed & Carnrick. 265,044, Dec. 10, 1929. Republished Aug. 3.
Medicine for pthisis, neurasthenia, constipation, etc. Reed & Carnrick. 148,939, Nov. 29, 1921. Republished Aug. 3.
Metabolized food. J. Carnrick. 29,884, Apr. 20, 1897. Republished Aug. 3.
Multivitamin preparations. Horton & Converse. 427,448, Feb. 11, 1947. Republished Aug. 3.
Nail polish, liquid nail polish remover, liquid cuticle remover, etc. Lorr Laboratories. 501,356, Aug. 3; Serial No. 531,812, published May 4, 1948.
Oil for the protection of animals from flies, mosquitoes, gnats, etc. Central Petroleum Company. 501,416, Aug. 3; Serial No. 537,983, published Apr. 27, 1948.
Oil of jasmine, Synthetic. A. L. Van Ameringen. 224,018, Feb. 15, 1927. Republished Aug. 3.
Oils, Essential. Morana Incorporated. 211,461, Apr. 13, 1926. Republished Aug. 3.
Oils, Natural and synthetic essential. A. L. Van Ameringen. 230,168, July 12, 1927. Republished Aug. 3.
Oils, Natural and synthetic essential. Van Ameringen-Haebler, Inc. 266,177, Jan. 14, 1930. Republished Aug. 3.
Ointment for human use. C. E. Fulford, Limited. 69,876, re-renewed July 14, 1948. O. G. Aug. 3.
Ointment, Rectal. Foster-Dack Company. 501,396, Aug. 3; Serial No. 534,889, published Apr. 27, 1948.
Ointments. Jordan & Johnson. 440,016, Aug. 3; Serial No. 521,577, published May 4, 1948.
Organic chemicals generally. Monsanto Chemical Company. 315,300, July 24, 1934. Republished Aug. 3.
Parasiticides. California Spray-Chemical Corporation. 439,975, Aug. 3; Serial No. 511,062, published July 15, 1947.
Parasiticides. California Spray-Chemical Corporation. 440,011, Aug. 3; Serial No. 520,684, published Sept. 9, 1947.
Parathron in wettable powder, dust aerosol, emulsion or solution form. American Cyanamid Company. 501,399, Aug. 3; Serial No. 535,364, published May 11, 1948.
Pastes and powders for beautifying and preserving the teeth, skin, and hair, and perfumery. E. Daltroff Parfumerie Caron. 244,528, renewed July 24, 1948. O. G. Aug. 3.
Pastes and powders for beautifying and preserving the teeth, skin, and hair, and perfumery. E. Daltroff Parfumerie Caron. 244,536, renewed July 24, 1948. O. G. Aug. 3.
Pastes and powders for beautifying and preserving the teeth, skin, and hair, and perfumery. E. Daltroff Parfumerie Caron. 244,537, renewed July 24, 1948. O. G. Aug. 3.
Pastes and powders for beautifying and preserving the teeth, skin, and hair, and perfumery. E. Daltroff Parfumerie Caron. 244,538, renewed July 24, 1948. O. G. Aug. 3.
Perfumery and face tints. E. Wertheimer & Cie. 69,142, re-renewed May 19, 1948. O. G. Aug. 3.
Perfumes. P. R. Jones. 501,415, Aug. 3; Serial No. 537,708, published May 4, 1948.
Perfumes, colognes, deodorants, etc. Teen Timer Laboratories Co., Inc. 431,824, Aug. 12, 1947. Republished Aug. 3.
Perfumes, rouge, face powders, etc. S. Tardy. 501,305, Aug. 3; Serial No. 526,630, published May 4, 1948.
Perfumes, toilet waters, eau de cologne, etc. Roger & Gallet. 501,326, Aug. 3; Serial No. 528,512, published May 11, 1948.
Pituitary preparation. E. S. Miller Laboratories, Inc. 501,319, Aug. 3; Serial No. 527,693, published May 4, 1948.
Plant spraying and powdering operations, Insecticidal and fungicidal. John Lucas & Company, Incorporated. 501,287, Aug. 3; Serial No. 508,850, published May 4, 1948.
Plasters, Corn and bunion. Johnson & Johnson. 242,581, renewed May 29, 1948. O. G. Aug. 3.
Pomade, rose oil, brilliantine and pressing oil. J. R. Wooden. 439,971, Aug. 3; Serial No. 508,401, published Apr. 27, 1948.
Preparation consisting of a combination of fine ground metals and chemical powders. W. Rosenkranse. 440,019, Aug. 3; Serial No. 522,751, published Apr. 27, 1948.
Preparation for killing weevil. G. S. Robins and Co. 244,231, renewed July 17, 1948. O. G. Aug. 3.
Preparation for the relief of coughs due to colds. S. C. Wells & Company. 395,652, June 2, 1942. Republished Aug. 3.
Preparation for the treatment of rheumatism, lumbago, neuralgia, etc. Omega Chemical Company. 248,951, renewed Nov. 6, 1948. O. G. Aug. 3.
Preparation in tablet, powder, and liquid form. Reed & Carnrick. 217,084–5, Sept. 14, 1926. Republished Aug. 3.
Preparation used in the treatment of indigestion and dyspepsia. Reed & Carnrick. 420,259, Apr. 2, 1946. Republished Aug. 3.
Preparations for the treatment of diseases peculiar to women. S. B. Leonardi & Co., Inc. 248,977, renewed Nov. 6, 1948. O. G. Aug. 3.
Preparations for the treatment of the hair and scalp. Herpicide Company. 247,702, renewed Oct. 2, 1948. O. G. Aug. 3.
Preparations used in the treatment of spasmodic cough, hiccough, whooping cough, etc. Horton & Converse. 425,140, Nov. 5, 1946. Republished Aug. 3.
Protein hydrolysate with vitamin C and B complex. Nion Corporation. 501,422, Aug. 3; Serial No. 504,992.
Remedies. S. C. Wells & Company. 398,830, Nov. 24, 1942. Republished Aug. 3.
Remedy for croup. E. W. Vacher. 74,331, July 6, 1909. Republished Aug. 3.

Resinous impregnating agents. United Merchants & Manufacturers, Inc. 501,374, Aug. 3; Serial No. 532,662, published Apr. 27, 1948.
Rouge, powder, lipstick, etc. Volupte, Inc. 501,344, Aug. 3; Serial No. 530,687, published May 4, 1948.
Rubber accelerators. R. T. Vanderbilt Company, Inc. 501,351, Aug. 3; Serial No. 530,875, published Feb. 10, 1948.
Salts of iridium, Solution of. P. H. Potter & Sons, Inc. 248,259, renewed Oct. 16, 1948. O. G. Aug. 3.
Salve for fresh cuts, boils, and wounds. Albert G. Grobiewski & Co. 244,547, renewed July 24, 1948. O. G. Aug. 3.
Salve for relieving colds and bronchial irritations. O. P. Heffner, Sister M. J. Clare. 501,293, Aug. 3; Serial No. 515,818, published May 4, 1948.
Soothing and healing preparation. S. C. Wells & Company. 286,251, Aug. 25, 1931. Republished Aug. 3.
Starches, Laundry. Presque Isle Starch Co. 357,841, June 14, 1938. Republished Aug. 3.
Sterile aqueous solution of 1-histidine monohydrochloride. Horton & Converse. 423,343, Aug. 27, 1946. Republished Aug. 3.
Sulphur. Stauffer Chemical Company. 501,366, Aug. 3; Serial No. 532,368, published May 4, 1948.
Tartaric and citric acids, denatured alcohol, etc. B. A. Railton Co. 204,204, Oct. 13, 1925. Republished Aug. 3.
Toilet preparations. Sydney Ross Co. 248,869, renewed Oct. 30, 1948. O. G. Aug. 3.
Toilet waters, Perfumed. Pinaud Incorporated. 248,948, renewed Nov. 6, 1948. O. G. Aug. 3.
Tonic, Cordial. J. Carnrick. 26,592, May 28, 1895. Republished Aug. 3. J. Carnrick. 298,068, Oct. 11, 1932. Republished Aug. 3.
Tonic, General. Reed & Carnrick.
Toxic vapor producing material. Darworth Incorporated. 440,029, Aug. 3; Serial No. 525,303, published Apr. 27, 1947.
Vaginal astringent douche powder, used for its antiseptic astringent, and deodorant values. First Texas Chemical Mfg. Co. 440,028, Aug. 3; Serial No. 523,953, published Apr. 27, 1948.
Vaginal jelly. Julius Schmid, Inc. 401,369, May 11, 1943. Republished Aug. 3.
Venom. Venomin Company. 383,188, Nov. 26, 1940. Republished Aug. 3.
Vitamins. H. W. Kinney and Sons, Inc. 501,333, Aug. 3; Serial No. 529,772, published May 4, 1948.
Yeast. National Institute of Nutrition. 389,055, July 22, 1941. Republished Aug. 3.
Yeast tablets. National Institute of Nutrition. 343,165, Feb. 9, 1937. Republished Aug. 3.

CLASS 7

Clothesline. Samson Cordage Works. 370,791, Sept. 5, 1939. Republished Aug. 3.
Cordage. Hooven & Allison Company. 153,203, Mar. 14, 1922. Republished Aug. 3.
Cordage. Hooven & Allison Company. 170,000, July 10, 1923. Republished Aug. 3.
Rope or cable, Wire. R. G. Le Tourneau, Inc. 391,884, Nov. 25, 1941. Republished Aug. 3.
Twines. Fawcett, Hughes, Inc. 244,404, renewed July 17, 1948. O. G. Aug. 3.

CLASS 11

Carbon paper. Ditto, Incorporated. 501,359, Aug. 3; Serial No. 531,997, published Apr. 27, 1948.
Carbon paper. Ditto, Incorporated. 501,360, Aug. 3; Serial No. 531,999, published Apr. 27, 1948.
Carbon paper. Ditto, Incorporated. 501,361, Aug. 3; Serial No. 532,000, published Apr. 27, 1948.
Carbon paper. Ditto, Incorporated. 501,362, Aug. 3; Serial No. 532,002, published Apr. 27, 1948.
Carbon paper. Ditto, Incorporated. 501,363, Aug. 3; Serial No. 532,003, published Apr. 27, 1948.
Carbon paper. Kee Lox Manufacturing Company. 501,315, Aug. 3; Serial No. 526,971, published Apr. 27, 1948.
Carbon paper. Royal Typewriter Company, Inc. 400,659, Mar. 23, 1943. Republished Aug. 3.
Drawing-inks. Technical Supply Company. 70,511, renewed Sept. 8, 1948. O. G. Aug. 3.
Ink, Drawing. Keuffel & Esser Company. 440,031, Aug. 3; Serial No. 525,862, published Apr. 27, 1948.
Ink, Drawing. Keuffel & Esser Company. 440,032, Aug. 3; Serial No. 525,868, published Apr. 27, 1948.
Ink, ink filler, and India inks. Liquid indelible drawing. Keuffel & Esser Company. 440,033, Aug. 3; Serial No. 525,877, published May 4, 1948.
Ink, Writing. Luther Ford & Company. 222,921, Jan. 11, 1927. Republished Aug. 3.
Inking ribbon and carbon paper. Royal Typewriter Company, Inc. 399,085, Dec. 15, 1942. Republished Aug. 3.
Inking ribbons and carbon paper. Royal Typewriter Company, Inc. 214,474, June 22, 1926. Republished Aug. 3.
Inking ribbons and carbon paper. Royal Typewriter Company, Inc. 392,421–2, Dec. 23, 1941. Republished Aug. 3.
Inking ribbons and carbon paper. Royal Typewriter Company, Inc. 392,540–1, Dec. 30, 1941. Republished Aug. 3.
Inking ribbons and carbon paper. Royal Typewriter Company, Inc. 392,671, Jan. 6, 1942. Republished Aug. 3.
Inking ribbons and carbon paper. Royal Typewriter Company, Inc. 400,189, Feb. 16, 1943. Republished Aug. 3.
Inks and lithographic inks, Printer's. Inco Company. 501,317, Aug. 3; Serial No. 527,499, published Apr. 27, 1948.

CLASS 12

Board and sheathing, Fiber composition. Insulite Company. 337,864, Aug. 25, 1936. Republished Aug. 3.
Cement, Portland. Whitehall Portland Cement Co. 54,538, June 26, 1906. Republished Aug. 3.
Jackets, casings, and pipe coverings, etc., Thermal insulating. Cleveland Heater Company. 261,826, Sept. 24, 1929. Republished Aug. 3.
Lumber, finished lumber and millwork, etc., Primed and treated. White Pine Sash Company. 311,268, Mar. 20, 1934. Republished Aug. 3.
Weather strips, Metal and felt. General Weather Strip Company. 245,349, renewed Aug. 14, 1948. O. G. Aug. 3.

CLASS 13

Aluminum ware. Aluminum Goods Manufacturing Co. 248,681, renewed Oct. 30, 1948. O. G. Aug. 3.
Cycles, motor-cycles, automobiles, etc. Birmingham Small Arms Co., Limited. 69,725, re-renewed June 30, 1948. O. G. Aug. 3.
Fence, Wire. Keystone Fence Company. 62,025, Apr. 16, 1907. Republished Aug. 3.
Fence, Wire. Keystone Fence Company. 62,313, Apr. 30, 1907. Republished Aug. 3.
Fencing, metal screen, and wire mats, Iron and wire. Atlas Fence Company. 397,683, Sept. 15, 1942. Republished Aug. 3.
Fixtures, Metal plumbing. Standard Sanitary Manufacturing Company. 241,555, renewed May 1, 1948. O. G. Aug. 3.
Hinges, door and casement, pivots, etc. Oscar C. Rixson Company. 247,587, renewed Oct. 2, 1948. O. G. Aug. 3.
Hollow ware, Table. Friedman Silver Co., Inc. 289,297, Nov. 24, 1931. Republished Aug. 3.
Hollow ware, Table, of base metal. Friedman Silver Co., Inc. 288,376, Mar. 11, 1930. Republished Aug. 3.
Pipe, Cast iron. American Cast Iron Pipe Company. 362,909, Dec. 6, 1938. Republished Aug. 3.
Pipe fittings, Metal. Cleveland Heater Company. 215,507. July 20, 1926. Republished Aug. 3.
Utensils, Cooking. Sta-Brite Products Corporation. 264,706, Dec. 3, 1929. Corrected. O. G. Aug. 3.
Valves, needle valves, gas cocks, etc., Blow-off. Cleveland Heater Company. 271,377, June 3, 1930. Republished Aug. 3.

CLASS 14

Alloy steel and corrosion-resisting alloy steel. American Rolling Mill Company. 501,321, Aug 3; Serial No. 527,739, published Apr. 20, 1948.
Carbon and alloy steel castings, Rough, unfinished. Calumet Steel Castings Corporation. 501,283, Aug. 3; Serial No. 478,609, published May 4, 1948.
Compound metal or alloy in ingots. Capper Pass & Son Limited. 225,368, renewed Mar. 15, 1947. O. G. Aug. 3.
Copper and its alloys. Olin Industries, Inc. 501,322, Aug. 3; Serial No. 527,867, published Jan. 20, 1948.
Cutting rods, Consumable metal. Arcos Corporation. 501,296, Aug. 3; Serial No. 518,647, published Apr. 27, 1948.
Die castings of nonferrous metals, Unfinished. Diecasters, Inc. 501,289, Aug. 3; Serial No. 511,073, published May 4, 1948.
Electrolytic apparatus. U. J. Brown. 440,015, Aug. 3; Serial No. 521,055, published Apr. 27, 1948.
Ferrous and nonferrous metal sheets, Perforated reinforced. Rigid-Tex Corporation. 501,369, Aug. 3; Serial No. 532,500, published Apr. 27, 1948.
Ferrous metal with a flexible non-metallic coating. Addressograph-Multigraph Corporation. 404,747, Dec. 21, 1943. Republished Aug. 3.
Ferrous metal with a non-ferrous coating. Addressograph Company. 313,828, June 12, 1934. Republished Aug. 3.
Iron castings, Malleable and grey. St. Louis Malleable Casting Company. 501,355, Aug. 3; Serial No. 531,735, published Apr. 27, 1948.
Metal strips. Addressograph Company. 315,744, Aug. 7, 1934. Republished Aug. 3.
Metallic fittings and alloys. Patrol Valve Company. 439,964, Aug. 3; Serial No. 503,321, published May 4, 1948.
Non-ferrous sheet metal. Addressograph Company. 316,706, Sept. 4, 1934. Republished Aug. 3.
Oven liners. H. R. Northup. 440,018, Aug. 3; Serial No. 522,010, published Apr. 27, 1948.
Pig iron, high silicon cast iron pigs, and fragments thereof. Jackson Iron & Steel Company. 501,291, Aug. 3; Serial No. 512,507, published May 11, 1948.
Plated metal. Crown Cork & Steel Company, Inc. 379,625, July 16, 1940. Republished Aug. 3.
Steel castings. Calumet Electric Casteel Co. 273,748, Aug. 12, 1930. Republished Aug. 3.
Steel strips. National-Standard Company. 501,284, Aug. 3; Serial No. 481,550, published May 4, 1948.
Tool steel, High-carbon, high-chromium, oil-quenching. Ackerlind Steel Co., Inc. 501,334, Aug. 3; Serial No. 529,845, published Apr. 27, 1948.

CLASS 15

Candles. Standard Oil Company. 440,010, Aug. 3; Serial No. 520,536, published Mar. 23, 1948.
Corn-oil. Corn Products Refining Company. 69,331, re-renewed June 9, 1948. O. G. Aug. 3.
Fuel oil. Commerce Petroleum Company. 439,951, Aug. 3; Serial No. 484,194, published Apr. 6, 1948.
Gasoline and tractor fuels, lubricating greases, lubricating oils. C. P. Hoefer. 440,026, Aug. 3; Serial No. 525,082, published Apr. 20, 1948.
Gasoline, kerosene, and other liquid fuels. Independent Oil and Gas Co. 213,586, June 1, 1926. New certificate. O. G. Aug. 3.
Greases, gear greases, etc., Axle. Independent Oil and Gas Co. 213,587, June 1, 1926. New certificate. O. G. Aug. 3.
Oil and lubricating greases, Motor lubricating. Oakes & Company. 440,030, Aug. 3; Serial No. 525,385, published Mar. 9, 1948.
Oils and lubricating greases, Heavy duty and Diesel engine. Hancock Oil Co. of Calif. 439,973, Aug. 3; Serial No. 508,997, published Apr. 20, 1948.
Oils, Lubricating. Standard Oil Company. 440,027, Aug. 3; Serial No. 525,134, published Apr. 20, 1948.
Oils, Lubricating. Standard Oil Company. 440,028, Aug. 3; Serial No. 525,135, published Apr. 20, 1948.
Oils, petrolatums for lubrication, gasoline, kerosene, etc., Motor. Pennsylvania Refining Company. 241,471, renewed May 1, 1948. O. G. Aug. 3.

CLASS 16

Coating, Plastic linoleum sealer. O. A. Richter. 440,037, Aug. 3; Serial No. 522,649.
Coating, Transparent protective surface. Hettom Industries. 439,986, Aug. 3; Serial No. 515,425, published Apr. 13, 1948.
Enamel, Shellac. Wm. Zinsser & Co. Inc. 239,060, renewed Feb. 21, 1948. O. G. Aug. 3.
Flattening agents. Interchemical Corporation. 439,992, Aug. 3; Serial No. 516,900, published Apr. 13, 1948.
Lacquers. S. C. Johnson & Son. 247,965, renewed Oct. 9, 1948. O. G. Aug. 3.
Liquid preparation for cleaning paint brushes. Andersen Specialty Mfg. Corp. 501,330, Aug. 3; Serial No. 528,853, published Apr. 13, 1948.
Paint. National Gypsum Company. 501,332, Aug. 3; Serial No. 529,678, published Apr. 13, 1948.
Paint, aluminum enamel, metal and masonry paint, Aluminum house. Sewall Paint & Varnish Company. 439,955, Aug. 3; Serial No. 496,867, published Apr. 13, 1948.
Paint and paint thinners, Mixed. James B. Sipe and Company. 501,357, Aug. 3; Serial No. 531,856, published Apr. 13, 1948.
Paint, Antirust and acid-resisting. Ferrubron Metal Paint Company. 501,298, Aug. 3; Serial No. 523,308, published May 4, 1948.
Paint, Gloss white. John McQuade & Company, Inc. 241,234, renewed Apr. 17, 1948. O. G. Aug. 3.
Paint oil. Bisbee Linseed Company. 501,371, Aug. 3; Serial No. 532,549, published Apr. 13, 1948.
Paint, Prepared or ready-mixed liquid. J. F. Kurfees Paint Company. 501,402, Aug. 3; Serial No. 535,548, published Apr. 13, 1948.
Paint, Ready mixed. Goheen Corporation of New Jersey. 242,410, renewed May 22, 1948. O. G. Aug. 3.
Paints. Detroit White Lead Works. 167,535, May 1, 1923. Republished Aug. 3.
Paints. I. B. Neidith. 439,979, Aug. 3; Serial No. 512,921, published Apr. 13, 1948.
Paints, lacquer, varnish, etc., Ready-mixed. W. P. Fuller & Co. 240,106–8, renewed Mar. 20, 1948. O. G. Aug. 3.
Paints, Liquid. Detroit White Lead Works. 140,584, Mar. 22, 1921. Republished Aug. 3.
Paints, Prepared or ready-mixed liquid. J. F. Kurfees Paint Company. 501,403, Aug. 3; Serial No. 535,550, published Apr. 13, 1948.
Paints, Ready mixed. P. Balaber. 439,984, Aug. 3; Serial No. 515,289, published Apr. 13, 1948.
Paints, Ready-mixed. Colonial Refining & Chemical Company. 439,960, Aug. 3; Serial No. 497,847, published Apr. 13, 1948.
Polish for varnished, painted, enameled, lacquered surfaces. Wilson-Imperial Company. 238,451, renewed Feb. 7, 1948. O. G. Aug. 3.
Polishes, Oil. Dajan Chemical Company. 501,376, Aug. 3; Serial No. 532,693, published Apr. 13, 1948.
Solutions of synthetic organic thermoplastic resins. Resinous Products & Chemical Company. 439,970, Aug. 3; Serial No. 507,850, published Apr. 13, 1948.
Varnish. Patek Brothers, Inc. 501,377, Aug. 3; Serial No. 532,871, published Apr. 13, 1948.
Varnishes, Plastic. Rodael Products Co. 439,978, Aug. 3; Serial No. 512,611, published Apr. 13, 1948.

CLASS 17

Cigarettes. Brown & Williamson Tobacco Corporation. 248,054, re-renewed Oct. 16, 1948. O. G. Aug. 3.

CLASS 19

Airplanes and structural parts thereof. Douglas Aircraft Company, Inc. 501,400, Aug. 3; Serial No. 535,402, published Apr. 13, 1948.
Airplanes and structural parts thereof. Consolidated Vultee Aircraft Corporation. 501,426, Aug. 3; Serial No. 535,940.
Bicycles and structural parts thereof. Huffman Manufacturing Company, The. 439,999, Aug. 3; Serial No. 518,141, published Apr. 13, 1948.
Bicycles, bicycle handle bar grips and automobile seat covers. Oakes & Company. 440,003, Aug. 3; Serial No. 519,085, published Apr. 13, 1948.
Coolers for automobiles, Car. Atlas Supply Company. 501,404, Aug. 3; Serial No. 535,673, published May 4, 1948.
Cycles, motor-cycles, automobiles, etc. Birmingham Small Arms Co., Limited, The. 69,725, re-renewed June 30, 1948. O. G. Aug. 3.
Destroyer escorts, tugs, landing craft, and yachts. Defoe Shipbuilding Co. 440,034, Aug. 3; Serial No. 476,901.
Gears, Steering. Gemmer Manufacturing Company. 501,417, Aug. 3; Serial No. 538,528, published Apr. 13, 1948.
Go-carts and perambulators, Collapsible. W. H. Buchhagen. 440,002, Aug. 3; Serial No. 519,000, published Apr. 27, 1948.
Handcarts. Craft Specialty Manufacturing Company. 439,962, Aug. 3; Serial No. 500,286, published May 13, 1947.
Motorcycles, Folding midget. Corgi Motorcycle Company, Ltd., of America. 501,414, Aug. 3; Serial No. 537,566, published Apr. 13, 1948.
Motor cycles, sidecars, and their parts. Phelon & Moore Limited. 439,976, Aug. 3; Serial No. 511,105, published Apr. 13, 1948.
Power boosters. Air-O-Matic Power Steer Co. 440,008, Aug. 3; Serial No. 520,316, published Apr. 13, 1948.
Vehicles, motor chassis, and trucks, etc., Motor. Leyland Motors Limited. 241,064, renewed Apr. 17, 1948. O. G. Aug. 3.
Wheels for automobiles, Steering. American Hard Rubber Company. 440,000, Aug. 3; Serial No. 518,866, published Apr. 27, 1948.

CLASS 20

Rugs, Felt-base floor. Goldenberg's. 227,063, Apr. 26, 1927. Republished Aug. 3.

CLASS 21

Batteries, Dry-cell. French Battery & Carbon Co. 149,925, Dec. 27, 1921. Republished Aug. 3.
Batteries, Storage. Commander Battery Manufacturing Co. 402,472, July 27, 1943. Republished Aug. 3.
Christmass tree lighting outfits; electric decorative devices, etc. Noma Electric Corporation. 234,653, Nov. 1, 1927. Republished Aug. 3.
Controllers, Electric. Clark Controller Company, The. 246,481, renewed Sept. 11, 1948. O. G. Aug. 3.
Electric lanterns, powered by electric batteries. Solar Product Corporation. 440,038, Aug. 3; Serial No. 524,087.
Electric switch-fluid level controls, Automatically actuated. F. H. Schaub. 381,936, Oct. 15, 1940. Republished Aug. 3.
Electrical condenser assemblies and parts thereof. Erie Resistor Corporation. 432,083, Aug. 19, 1947. Republished Aug. 3.
Electrically-driven portable electric blowers, suction cleaners, and sprayers. Breuer Electric Mfg. Company. 246,727, renewed Sept. 11, 1948. O. G. Aug. 3.
Metal-coated paper. Brittains Limited. 241,769, renewed May 8, 1948. O. G. Aug. 3.
Sound amplifying and transmitting systems and parts thereof, Inter-communicating. Webster Electric Company. 352,426, Nov. 30, 1937. Republished Aug. 3.
Sound amplifying and transmitting systems, etc., Inter-communicating. Webster Electric Company. 343,737, Mar. 2, 1937. Republished Aug. 3.

CLASS 22

Baseballs, bats, masks, mitts, etc. A. J. Reach Company. 247,545, renewed Oct. 2, 1948. O. G. Aug. 3.
Coin-controlled amusement apparatus. Exhibit Supply Company. 324,480, May 21, 1935. Republished Aug. 3.
Coin-controlled amusement apparatus. Exhibit Supply Company. 354,843, Feb. 22, 1938. Republished Aug. 3.
Dolls and dolls' clothes. D. Ippolito. 439,953–4, Aug. 3; Serial Nos. 496,837–8, published May 21, 1946.
Toy rattles and fabric covered stuffed toys. P. E. Allen. 426,077, Dec. 17, 1946. Republished Aug. 3.

Miller, Kenneth K., Kalamazoo, Mich. Atomiser. 150,436, Aug. 3.
Miller, Paul, Muncie, Ind. Combined hammer and pounding toy. 150,437, Aug. 3.

Murray, Victor E., assignor of three-fifths to W. O. Mashburn, Jr., and one-fifth to R. A. Black, Cincinnati, Ohio. Egg opener and divider or similar article. 150,438, Aug. 3.
National Silver Company, assignee: *See*—
Weeber, Marion.
Neilsen, Peter C., Chicago, Ill. Electric razor. 150,439, Aug. 3.
Nicro Steel Products, Inc., assignee: *See*—
Wohl, Harry.
Padilla, Aurora C., assignee: *See*—
Baca, Cristobal.
Palmer, Oscar C., Phoenix, Ariz. Evaporative cooler casing. 150,440, Aug. 3.
Parker, Samuel C.: *See*—
Hardeman, William E., and Parker.
Passio, Frank, Philadelphia, Pa. Pop toy. 150,441, Aug. 3.
Patterson, Edmund M., New York, N. Y. Textile fabric. 150,442, Aug. 3.
Peat, David B.: *See*—
Lovejoy, Kenneth F., and Peat.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Earring or similar article. 150,443, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Earring or similar article. 150,444, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Earring or similar article. 150,445, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Brooch or similar article. 150,446, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Brooch or similar article. 150,447, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Earring or similar article. 150,448, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Bracelet or similar article. 150,449, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Brooch or similar article. 150,450, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Brooch or similar article. 150,451, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Brooch or similar article. 150,452, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Brooch or similar article. 150,453, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Brooch or similar article. 150,454, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Brooch or similar article. 150,455, Aug. 3.
Philippe, Alfred, Scarsdale, assignor to Trifari, Krussman & Fishel, Inc., New York, N. Y. Necklace or similar article. 150,456, Aug. 3.
Pike, Stewart W., Audubon, N. J., assignor to Radio Corporation of America. Microphone unit or the like and pedestal therefor. 150,457, Aug. 3.
Pike, Stewart W., Audubon, N. J., assignor to Radio Corporation of America. Microphone unit or the like and pedestal therefor. 150,458, Aug. 3.
Pitzer, Starr L., assignor to Continental L-P Products Company, Dallas, Tex., a partnership consisting of S. L. Pitzer and K. Eldon. Dispensing head for a butane system. 150,459, Aug. 3.
Price, Edmund T., assignor to Solar Aircraft Company, San Diego, Calif. Port leg flange. 150,460, Aug. 3.
Pullman-Standard Car Manufacturing Company, assignee: *See*—
Haman, Ralph W., and Kay.
Radio Corporation of America, assignee: *See*—
Pike, Stewart W.
Roberts, George B.: *See*—
Bowden, Ralph T., and Roberts.
Roth, Alice, assignor to The Troy Sunshade Company, Troy, Ohio. Chaise longue. 150,461, Aug. 3.
Russell, Alfred R., Detroit, Mich., assignor to Safticycle, Inc., La Crosse, Wis. Motorcycle. 150,462, Aug. 3.
Safticycle, Inc., assignee: *See*—
Russell, Alfred R.
Sakier, George, Frenchtown, N. J., assignor to Animal Trap Company of America, Lititz, Pa. Animal trap. 150,463, Aug. 3.
Salierno, Vincent, Belleville, N. J. Spectacle frame. 150,464, Aug. 3.
Samuel Stamping & Enameling Company, assignee: *See*—
Seymour, William H.
Schmidt, Howard F., San Diego, Calif. Toy autogiro. 150,465, Aug. 3.
Schuler, Fred G., assignor to Youngstown Manufacturing Inc., Youngstown, Ohio. Price tag molding and trim. 150,466, Aug. 3.
Sebel, Harry, London, England. Wheeled toy snail. 150,467, Aug. 3.
Sebel, Harry, London, England. Wheeled toy horse and chariot. 150,468, Aug. 3.
Seidel, Benjamin, assignor of one-third to B. F. Fried, and one-third to A. P. Baumoel, Cleveland, Ohio. Razor rack. 150,469, Aug. 3.
Seymour, William H., Detroit, Mich., assignor to Samuel Stamping & Enameling Company, North Chattanooga, Tenn. Electric heater. 150,470, Aug. 3.
Smith, Thomas R., assignor to The Maytag Company, Newton, Iowa. Washing machine or similar article. 150,471, Aug. 3.
Snavely, Harold L.: *See*—
Zimmer, Raymond R., and Snavely.
Solar Aircraft Company, assignee: *See*—
Price, Edmund T.
Sprouse, Verner E., Columbus, Ind. Window ventilator. 150,472, Aug. 3.
Stalle, Hilma D., Lawndale, Calif. Legging. 150,473, Aug. 3.
Stangl, George, New York, N. Y. Combined sunglasses and scarf. 150,474, Aug. 3.
Steger Products Mfg. Corp., assignee: *See*—
Trabucco, Vincent R.
Swenson, Ray J., Anoka, Minn. Milk cart. 150,475, Aug. 3.
Trabucco, Vincent R., assignor to Steger Products Mfg. Corp., Steger, Ill. Stroller or similar article. 150,476, Aug. 3.
Trifari, Krussman & Fishel, Inc., assignee: *See*—
Philippe, Alfred.
Troy Sunshade Company, The, assignee: *See*—
Roth, Alice.
Tumminello, Angelo, Chicago, Ill. Picture frame. 150,477, Aug. 3.
Verson Allsteel Press Company, assignee: *See*—
Berg, Louis B.
W. & F. Manufacturing Co., Inc., The, assignee: *See*—
Donahue, Ann.
Wapnick, Herman, Brooklyn, N. Y. Baby rattle or the like. 150,478, Aug. 3.
Weeber, Marion, assignor to National Silver Company, New York, N. Y. Fork or similar article of flatware. 150,479, Aug. 3.
Weeber, Marion, assignor to National Silver Company, New York, N. Y. Spoon or similar article of flatware. 150,480, Aug. 3.
Weeber, Marion, assignor to National Silver Company, New York, N. Y. Spoon or similar article of flatware. 150,481, Aug. 3.
Wohl, Harry, Chicago, assignor to Nicro Steel Products, Inc., Cook County, Ill. Vacuum coffee maker. 150,482, Aug. 3.
Young, Arthur M., and M. H. Gleason, Buffalo, assignors to Bell Aircraft Corporation, Wheatfield, N. Y. Helicopter. 150,483, Aug. 3.
Youngstown Manufacturing Inc., assignee: *See*—
Schuler, Fred G.
Zimmer, Raymond R., Chicago, and H. L. Snavely, Oak Lawn, Ill., said Zimmer assignor to said Snavely. Toy stationary engine. 150,484, Aug. 3.

LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 3D DAY OF AUGUST, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Acrotorque Company, The, assignee: *See*—
Orshansky, Elias, Jr.
Aetna-Standard Engineering Company, The, assignee: *See*—
Strock, Donald V.
Aklin, George H., assignor to Eastman Kodak Company, Rochester, N. Y. Camera lens. 2,446,402, Aug. 3.
Allen, Adda M., Arlington, Va., assignor to Disposable Bottle Corporation, Washington, D. C. Nursing unit with retractable container therefor. 2,446,451, Aug. 3.
Allison, William D.: *See*—
Wickersham, Marshall E.
American Can Company, assignee: *See*—
Socke, John E.
American Safety Razor Corporation, assignee: *See*—
Tait, Wilfred E., and Stellpflug.
American Viscose Corporation, assignee: *See*—
Nelson, Seddon C.
American Vitos Company, Inc., assignee: *See*—
Vitoux, Marcel.
Anderson, Lloyd L.: *See*—
Mark, Vennice E., and Anderson.
Andrews, Anatol N., Los Angeles, Calif., assignor to North American Aviation, Inc. Rivet sorting machine. 2,446,320, Aug. 3.
Arenson, Simon W., Baltimore, Md., assignor to Doughnut Corporation of America, New York, N. Y. Inhibiting the growth of mold. 2,446,505, Aug. 3.
Armour and Company, assignee: *See*—
Harrington, Bertie S.
Auto Diesel Piston Ring Company, assignee: *See*—
Heinrich, August H.
Automatic Electric Laboratories, Inc., assignee: *See*—
Willis, Bernard D., deceased.
Babcock & Wilcox Company, The, assignee: *See*—
Fletcher, James, and Norton.
Bailey, Edward T. W.: *See*—
Kerry, Frank O., and Bailey.
Bailey Meter Company, assignee: *See*—
Woolley, Rew E.
Barrett, Charles D., and C. R. Whitehead, Altoona, Pa. Snubbed bolster car truck. 2,446,506, Aug. 3.
Barth, Robert H., Ridgewood, N. J., assignor to Heyden Chemical Corporation, New York, N. Y. Ester-acetals of polypentaerythritols. 2,446,257, Aug. 3.
Bartholomew, Warren F., Michigan City, Ind., assignor to Joy Manufacturing Company. Vehicle support. 2,446,321, Aug. 3.
Basescu, Arthur, Brooklyn, N. Y. Mold form. 2,446,404, Aug. 3.
Bassereau, Georges, assignor to Societe D'Etude Pour l'Industrie Du Magneslum, Paris, France. Process and apparatus for the vacuum production of magnesium. 2,446,403, Aug. 3.
Bausch & Lomb Optical Company, assignee: *See*—
Enter, Harold J.
Beckman, Emil J., Rockford, Ill. Striker plate for locks. 2,446,206, Aug. 3.
Begun, Semi J., Cleveland Heights, assignor to The Brush Development Company, Cleveland, Ohio. Method and apparatus for correcting phase shift distortion in sound recording systems. 2,446,479, Aug. 3.
Behlmer, Henry B.: *See*—
Nelson, Holland D., and Behlmer.
Bell Aircraft Corporation, assignee: *See*—
Woods, Robert J.
Bels, Basil A., Great Neck, N. Y., assignor, by mesne assignments, to Hazeltine Research, Inc., Chicago, Ill. Tunable ultra high frequency resonator system. 2,446,405, Aug. 3.
Bendix Aviation Corporation, assignee: *See*—
Buxton, James E.
Nardone, Romeo M.
Benson, John H., assignor to Mullins Manufacturing Corporation, Salem, Ohio. Top access refrigerator cabinet. 2,446,322, Aug. 3.
Benson, Merle K., Benton Harbor, Mich., assignor to T-M-K Corporation, Davenport, Iowa. Hand sled. 2,446,452, Aug. 3.
Bergmann, Ernst, assignor, by mesne assignments, to Polymerisable Products Limited, London, England. Preparing acetone-chloroform. 2,446,453, Aug. 3.
Bergmann, Ernst, and M. Sulzbacher, assignors to Polymerisable Products, Limited, London, England. Production of secondary and tertiary halogenated alcohols. 2,446,454, Aug. 3.
Beyerle, Robert C., Granger, Ind. Coupling. 2,446,406, Aug. 3.
Bishop, William T., assignor to Hercules Powder Company, Wilmington, Del. Froth flotation of ores employing a water-soluble salt of a cymene sulfonic acid. 2,446,207, Aug. 3.
Borg-Erickson Corporation, assignee: *See*—
Juhasz, James G.
Boston Woven Hose and Rubber Company, assignee: *See*—
Silvia, Cyril L., and Smith.
Bowers, Maurice E., Somerville, N. J. Hen marking nest. 2,446,208, Aug. 3.
Bowman, Ervin D. L., Fairview Village, Ohio. Lamp construction. 2,446,455, Aug. 3.
Branson, Otis L., Beaumont, Tex., assignor to Socony-Vacuum Oil Company, Incorporated, New York, N. Y. Salt deposition. 2,446,456, Aug. 3.
Brassert, H. A., & Company, assignee: *See*—
Ramseyer, Charles F., and Cosman.
Braun, Alfred and F. W., Detroit, Mich. Beam. 2,446,457, Aug. 3.
Braun, Frederick W.: *See*—
Braun, Alfred and F. W.
Brenner, Harry, Hackensack, N. J., assignor to Streamline Plastics Company, New York, N. Y. Condiment holder. 2,446,407, Aug. 3.
Bricker, Gary R., U. S. Army, Omaha, Nebr. Animal trap. 2,446,168, Aug. 3.
Brown, Jennie, Red Bay, Ala. Blouse. 2,446,209, Aug. 3.
Brush Development Company, The, assignee: *See*—
Begun, Semi J.
Buchanan, William K., Edinburgh, Scotland, and W. Simpson, Manchester, England, assignors, by mesne assignments, to General Electric Company. Preparation of anhydrous ether. 2,446,408, Aug. 3.
Burt, Robert C., Pasadena, assignor to Lockheed Aircraft Corporation, Burbank, Calif. Compass. 2,446,258, Aug. 3.
Buxton, James E., Elmira, assignor to Bendix Aviation Corporation, Elmira Heights, N. Y. Engine starter. 2,446,458, Aug. 3.
Bybee, Byrom G.: *See*—
Bybee, Howard G. and B. G.
Bybee, Howard G. and B. G., Ontario, Oreg. Weeder attachment for cultivators and the like. 2,446,259, Aug. 3.
Carlson, Charles W., Tiffin, Ohio. Producing glassware. 2,446,359, Aug. 3.
Catalina, Inc., assignee: *See*—
Guilhues, Leo B.
Cauley, Stephen P., Garden City, N. Y., assignor to Socony-Vacuum Oil Company, Incorporated. Method of removing mercaptans from a liquid mixture of hydrocarbons containing low-boiling and high-boiling mercaptans. 2,446,507, Aug. 3.
Cawein, Madison, Fort Wayne, Ind., assignor, by mesne assignments, to Farnsworth Research Corporation. Differentiating discharge tube. 2,446,260, Aug. 3.
Celanese Corporation of America, assignee: *See*—
Shuman, Royal L.
Chadsey, Fred P., Fillmore, Calif. Airplane deicing and engine silencing construction. 2,446,210, Aug. 3.
Chilton, Allan, assignee, et al.: *See*—
Chilton, Roland.
Chilton, Roland, assigner to A. Chilton and W. E. Valk, doing business as joint adventures, Ridgewood, N. J. Torque responsive transmission means. 2,446,409, Aug. 3.
Christensen, Norman V., Chicago, G. Sauer, Berwyn, and C. C. Smith, assignors to Union Special Machine Company, Chicago, Ill. Sewing machine. 2,446,261, Aug. 3.
Clark, Bradley L., Rockville, Md. Line drawing attachment for typewriters. 2,446,360, Aug. 3.
Clark, Floyd W., San Fernando, assignor to Lockhead Aircraft Corporation, Burbank, Calif. Wire grip for electrical fittings. 2,446,262, Aug. 3.
Clark, James, Jr., Electric Company, assignee: *See*—
Daum, Edwin W.
Clark, Louis D., Rock Creek, Ohio. Ring roll. 2,446,211, Aug. 3.
Clark, Marion A., Tulare, Calif. Pipe wrench having a fixed jaw and a co-operating reciprocating rotary jaw. 2,446,212, Aug. 3.
Clark, Ralph C., Ventura, and R. E. Clark, Willowbrook, Calif. Making bowling pins. 2,446,213, Aug. 3.
Clark, Ray E.: *See*—
Clark, Ralph C. and R. E.
Clibbon, Herbert B., Detroit, Mich. Moisture vapor indicator for packaged goods. 2,446,361, Aug. 3.
Cochary, Thomas A., Brockton, Mass. Open-back shoe with stiffening means. 2,446,169, Aug. 3.

Coffin, Bruce A., assignee: *See*—
Dillaby, Edwin F.
Colonial Broach Company, assignee: *See*—
Welte, Benedict.
Comfy Manufacturing Company, The, assignee: *See*—
Waranch, Theodore.
Conley, Burns, United States Army, Wevaco, W. Va. Vacuum tube electronic switch. 2,446,170, Aug. 3.
Consolidated Engineering Corporation, assignee: *See*—
Pemberton, J. C.
Coolerator Company, The, assignee: *See*—
Esbjornson, Per H.
Cosman, Cornelius M.: *See*—
Ramseyer, Charles F., and Cosman.
Court, Frank T., assignor to Deere & Company, Moline, Ill. Change gear transmission. 2,446,263, Aug. 3.
Couse, Kibbey W., Newark, N. J. Combination pry-and-boom structure. 2,446,410, Aug. 3.
Cox, John W., assignor, by mesne assignments, to Sheilmar Products Corporation, Chicago, Ill. Molded pulp carton. 2,446,264, Aug. 3.
Cramer, Leonard F., Wayne, assignor to Allen B. Du Mont Laboratories, Inc., Passaic, N. J. Cabinet for television receivers. 2,446,214, Aug. 3.
Crewe, Samuel, assignee: *See*—
Weber, William J.
Crompton & Knowles Loom Works, assignee: *See*—
Turner, Richard G.
Crowell, Milton E., Oak Park, Ill., assignor to H. & A. Selmer, Inc., Elkhart, Ind. Drum pedal. 2,446,508, Aug. 3.
Croxall, Willard J., Bryn Athyn, and H. T. Neher, Bristol, assignors to Röhm & Haas Company, Philadelphia, Pa. Preparation of acetals. 2,446,171, Aug. 3.
Crumrine, Chester W., Irondequoit, N. Y., assignor to Kryptar Corporation. Photographic shutter. 2,446,265, Aug. 3.
Cummings, Thomas L., Port Angeles, Wash. Jet propelled helicopter rotor. 2,446,266, Aug. 3.
Curtis, Helene, Industries, Inc., assignee: *See*—
Grant, Samuel.
Curtis, Wilbur R., Fresno, Calif. Bed cover holder. 2,446,362, Aug. 3.
Dahn, George, Richmond, Va. Violin bridge. 2,446,267, Aug. 3.
Darworth, Inc., assignee: *See*—
Hullinger, Carl D.
Dath, George E., Mokena, assignor to W. H. Miner, Inc., Chicago, Ill. Railway draft gear friction shock absorbing mechanism. 2,446,215, Aug. 3.
Daum, Edwin W., assignor to James Clark Jr., Electric Company, Louisville, Ky. Combination positive clutch and torque responsive friction coupling. 2,446,363, Aug. 3.
Davis, Russell E., and T. E. Weber, St. Louis, Mo., assignors, to Hussmann Refrigerator Co. Lock-joint panel construction. 2,446,323, Aug. 3.
Dawson, Philip J., Beckenham, Kent, assignor to The Minister of Aircraft Production, London, England. Fuse for projectiles. 2,446,268, Aug. 3.
Dearborn, Henry C., Norman, Okla. Air-conditioning unit. 2,446,411, Aug. 3.
Deere & Company, assignee: *See*—
Court, Frank T.
Demarest, Daniel D., Little Neck, N. Y. Filtering device. 2,446,364, Aug. 3.
Dickey, Joseph B., assignor to Eastman Kodak Company, Rochester, N. Y. 2-acylamino-1,3-butadienes. 2,446,172, Aug. 3.
Di Ghilini, Alexander E., administrator, et al.: *See*—
Di Ghilini, Ulrich L.
Di Ghilini, Elston, administrator, et al.: *See*—
Di Ghilini, Ulrich L.
Di Ghilini, Ulrich L., deceased, Beverly Hills, Calif.; A. E. and E. di Ghilini, administrators. Recording and reproducing apparatus. 2,446,324, Aug. 3.
Digmon, Ed M., Birmingham, Ala. Device for night fishing. 2,446,459, Aug. 3.
Dillaby, Edwin F., Beverly, assignor to B. A. Coffin, Peabody, Mass. Top cap for electron tubes. 2,446,460, Aug. 3.
Disposable Bottle Corporation, assignee: *See*—
Allen, Adda M.
Diver, James D., Detroit, Mich. Holder for tubular lamps. 2,446,461, Aug. 3.
Dodd, Arthur E., Edgewood, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electrical control apparatus. 2,446,216, Aug. 3.
Dodge, Adiel Y., Rockford, Ill. Transmission. 2,446,462, Aug. 3.
Doughnut Corporation of America, assignee: *See*—
Arenson, Simon W.
Drieschman, Donald F., San Carlos, assignor to Eitel-McCullough, Inc., San Bruno, Calif. Electrode mounting structure for electron tubes. 2,446,269, Aug. 3.
Druffel, Herman H., Chicago, Ill. Burglar alarm. 2,446,217, Aug. 3.
Du Mont, Allen B., Laboratories, Inc., assignee: *See*—
Cramer, Leonard F.
Dunlap, Orville H., Vashon, Wash. Universal bumper clamp. 2,446,218, Aug. 3.
Du Pont, E. I., de Nemours & Company, assignee: *See*—
Kraus, Philip B.
Mochel, Walter E.
Norton, James A.
Trepagnier, Joseph H.
Eades, John H., Baltimore, assignor to The Glenn L. Martin Company, Middle River, Md. Handling heat-treated rivets. 2,446,166, Aug. 3.
Eastman Kodak Company, assignee: *See*—
Aklin, George H.
Dickey, Joseph B.
Eaton, Belden H., Allison Park, Pa. Cooling system leak detector. 2,446,219, Aug. 3.
Eaton Manufacturing Company, assignee: *See*—
Russell, Robert C.
Ebco Manufacturing Company, The, assignee: *See*—
Love, Lee C., Slauter, and Orthoefer.
Ehrig, Victor C., Marshall, Tex. Stuffing box mounting for pumps. 2,446,463, Aug. 3.
Ekblom, Uno, Brooklyn, N. Y. Automatic electric pilot. 2,446,173, Aug. 3.
Eitel-McCullough, Inc., assignee: *See*—
Drieschman, Donald F.
Eitel, William W.
Eitel, William W., and McCullough.
Gordon, Ronald.
Eitel, William W., Woodside, assignor to Eitel-McCullough, Inc., San Bruno, Calif. Electron tube grid structure. 2,446,271, Aug. 3.
Eitel, William W., Woodside, and J. A. McCullough, Millbrae, assignors to Eitel-McCullough, Inc., San Bruno, Calif. Electron tube. 2,446,270, Aug. 3.
Electro-Mechanical Instrument Company, The, assignee: *See*—
Pfeffer, William E.
Emmanuel, Joseph, New York, N. Y. Steam tie shaper. 2,446,412, Aug. 3.
Enter, Harold J., Webster, assignor to Bausch & Lomb Optical Company, Rochester, N. Y. Eyepiece with non-abrasive cap member. 2,446,365, Aug. 3.
Eppe, Thomas B., Boston, Mass. Display box. 2,446,366, Aug. 3.
Erdahl, Nicholas M., assignor to Trackson Company, Milwaukee, Wis. Combined crane and material-moving device. 2,446,220, Aug. 3.
Esbjornson, Per H., Wright, assignor to The Coolerator Company, Duluth, Minn. Apparatus for bending hard grainless fiber sheets. 2,446,413, Aug. 3.
Evans, Theodore W., Oakland, and D. S. Melstrom, Berkeley, assignors to Shell Development Company, San Francisco, Calif. Beta, gamma-alkenyl ethers of glycerol, and esters thereof. 2,446,464, Aug. 3.
Falls Spring & Wire Company, assignee, et al.: *See*—
Van Hove, Desire H.
Fansteel Metallurgical Corporation, assignee: *See*—
Fry, Stanley S.
Mueller, George F.
Farnsworth Research Corporation, assignee: *See*—
Cawein, Madison.
Farrell, Robert A., and C. L. Wagner, Menasha, assignors to Marathon Corporation, Rothschild, Wis. Applying heat-sealable labels. 2,446,414, Aug. 3.
Farris, Michael O., Eagle Rock, and J. M. O'Connor, and R. B. Gottschalk, assignors to Lockheed Aircraft Corporation, Burbank, Calif. Fire extinguisher fluid. 2,446,272, Aug. 3.
Ferguson, Robert P., Cranford, N. J., assignor to Standard Oil Development Company. Producing aluminum halides by the reaction of alumina, carbon, and free halogen. 2,446,221, Aug. 3.
Filtrol Corporation, assignee: *See*—
Gary, Wright W.
Fischer, Albert C., Chicago, Ill. Plant cover. 2,446,509, Aug. 3.
Fletcher, James, Akron, Ohio, and C. L. Norton, Jr., New York, N. Y., assignors to The Babcock & Wilcox Company, Jersey City, N. J. Metallic structure within high-temperature furnaces. 2,446,222, Aug. 3.
Florence Stove Company, assignee: *See*—
Reeves, Herbert M.
Fluor Corporation, Ltd., The, assignee: *See*—
Yates, Cecil F., and Nolte.
Flurscheim, Cedric H., Bowden, and W. G. C. Vance, Sale, England, assignors, by mesne assignments, to General Electric Company. Retractable undercarriage for aircraft. 2,446,415, Aug. 3.
Flynt, Frank V., Los Angeles, Calif. Insert. 2,446,174, Aug. 3.
Forney, Harold R., Surprise, Nebr. Extensible and retractable draft hitch. 2,446,223, Aug. 3.
Frisby, Frank D., and M. W. Marien, assignors to Ramsey Accessories Manufacturing Corporation, St. Louis, Mo. Hydraulic control oil ring. 2,446,224, Aug. 3.
Fry, Stanley S., assignor to Fansteel Metallurgical Corporation, North Chicago, Ill. Selenium rectifier. 2,446,465, Aug. 3.
Fry, Stanley S., assignor to Fansteel Metallurgical Corporation, North Chicago, Ill. Blocking layer rectifier. 2,446,466, Aug. 3.
Fry, Stanley S., assignor to Fansteel Metallurgical Corporation, North Chicago, Ill. Dry plate rectifier. 2,446,467, Aug. 3.

Fry, Stanley S., assignor to Fansteel Metallurgical Corporation, North Chicago, Ill. Selenium rectifiers. 2,446,468, Aug. 3.
Galbrecht, Frank L.: *See*—
Sabel, Edward R.
Gary, Wright W., assignor to Filtrol Corporation, Los Angeles, Calif. Purification of sludge acid and activation of clays. 2,446,273, Aug. 3.
Gates Rubber Company, assignee: *See*—
Mitchell, Lee W.
Steinke, Theodore W.
Geier, Conrad W., Robbins, assignor to R. E. L. Holt, Jr., Greensboro, N. C. Doffing and donning apparatus. 2,446,416, Aug. 3.
General Electric Company, assignee: *See*—
Buchanan, William K., and Simpson.
Flurscheim, Cedric H., and Vance.
McArthur, Elmer D.
Nelson, John D., and Steenstrup.
Rousit, Charles L.
Wargin, Edward F., and Harkness.
General Foods Corporation, assignee: *See*—

Jones, William C., London, and L. S. Richards, Solihull, near Birmingham, assignors to Scaffolding (Great Britain) Limited, Saunderton, England. Metal tubular scaffolding. 2,446,372, Aug. 3.

Joy Manufacturing Company, assignee: *See*—
Bartholomew, Warren F.

Juhasz, James G., assignor to Borg-Erickson Corporation, Chicago, Ill. Dial holding means for weighing scales. 2,446,332, Aug. 3.

Kamborian, Jacob S., West Newton, Mass. Force lasted shoes and making same. 2,446,286, Aug. 3.

Kauffman, Walter L., II, assignor to Lovell Manufacturing Company, Erie, Pa. Wringer and the like. 2,446,477, Aug. 3.

Kelley, Elmer W., Denver, Colo. Vernier for mechanically measuring angles. 2,446,287, Aug. 3.

Kennelly, Jeremiah D., Oak Park, Ill. Oscillating warning light. 2,446,333, Aug. 3.

Kerry, Frank G., Montreal, Quebec, and E. T. W. Bailey, Hamilton, Ontario, Canada, said Kerry assignor to L'Air Liquide Societe Anonyme pour l'Etude et l'Exploitation des Procedes Georges Claude, Paris, France. Open-hearth steelmaking. 2,446,511, Aug. 3.

Klichenmann, Walter, assignor to Sulzer Freres, Societe Anonyme, Winterthur, Switzerland. Coupling device for opposed pistons in free-piston engines. 2,446,423, Aug. 3.

Klein, William B., Chicago, Ill. Slurry feeding apparatus. 2,446,373, Aug. 3.

Kline, Elizabeth L., Memphis, Tenn. Hair dressing device. 2,446,424, Aug. 3.

Knol, Kornelis S., and J. M. van Hofweegen, Eindhoven, Netherlands, assignors, by mesne assignments, to Hartford National Bank and Trust Company, Hartford, Conn., as trustee. Very high frequency electric discharge tube. 2,446,374, Aug. 3.

Koehler, Gustave J., Oakwood, Ohio. Fluid valve. 2,446,334, Aug. 3.

Koenig, Emil L., Brooklyn, assignor to General Railway Signal Company, Rochester, N. Y. Plug board arrangement. 2,446,232, Aug. 3.

Kraus, Philip B., Chadds Ford, Pa., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Condensing vaporized metal halides. 2,446,181, Aug. 3.

Kremers, Roland E., Summit, N. J., assignor to General Foods Corporation, New York, N. Y. Imitation maple flavor. 2,446,478, Aug. 3.

Kruger, Michael H., Malden, assignor to A. L. Smith Iron Company, Chelsea, Mass. Fluorescent lighting fixture. 2,446,425, Aug. 3.

Kryptar Corporation, assignee: *See*—
Crumrine, Chester W.

La France, Donald S.: *See*—
Hearne, George W., and La France.

L'Air Liquide Societe Anonyme Pour l'Etude et l'Exploitation des Procedes Georges Claude, assignee: *See*—
Kerry, Frank G., and Bailey.

Lamborn, Bayard T., Matawan, N. J., assignor to Hercules Powder Company, Wilmington, Del. Preparation of alkali metal salts and alkali earth metal salts of halogenated lower fatty acids. 2,446,233, Aug. 3.

Lannom, Harvey H., assignor to Lannom Products Corporation, Nashville, Tenn. Correct money changer. 2,446,182, Aug. 3.

Lannom Products Corporation, assignee: *See*—
Lannom, Harvey H.

Larson, George A., Rockford, Ill. Sanding device. 2,446,183, Aug. 3.

Layng, Edwin T., assignor to Hydrocarbon Research, Inc., New York, N. Y. Synthesis of hydrocarbons with sulfur containing catalyst. 2,446,426, Aug. 3.

Lee, Leighton, II, assignor, by mesne assignments, to Niles-Bement-Pond Company, West Hartford, Conn. Control apparatus for internal-combustion engines. 2,446,335, Aug. 3.

Leonard, Lloyd H., Long Island City, N. Y. Aircraft landing gear. 2,446,480, Aug. 3.

Letterman, Louis, Winthrop, Mass. Reducing flange. 2,446,451, Aug. 3.

Liberty, Joseph B., Royal Oak, Mich. Air-locked window. 2,446,375, Aug. 3.

Lieber, Edward H., Chicago, Ill. Boot drier. 2,446,234, Aug. 3.

Linder, Antoni, Chicago, Ill. Fishing signaling device. 2,446,427, Aug. 3.

Lindley, Lester L., San Francisco, Calif. Rain visor. 2,446,288, Aug. 3.

Line Material Company, assignee: *See*—
Nelson, Rolland D., and Behlmer.

Littlejohn, Robert J., Greenville, S. C. Horizontally swinging bracket supported auxiliary chair. 2,446,376, Aug. 3.

Lockheed Aircraft Corporation, assignee: *See*—
Burt, Robert C.
Clark, Floyd W.
Farris, Michael O., O'Connor, and Gottschalk.

Love, Lee C., and C. H. Slauter, Columbus, and R. H. Orthoefer, Jr., Worthington, assignors to The Ebco Manufacturing Company, Columbus, Ohio. Precooler system for refrigerated drinking fountains. 2,446,289, Aug. 3.

Lovegrove, Henry J., Enfield, England, assignor to Sangamo Electric Company, Springfield, Ill. Telemetering. 2,446,290, Aug. 3.

Lovell Manufacturing Company, assignee: *See*—
Kauffman, Walter L., II.

Lynch Package Machinery Corporation, assignee: *See*—
Sandberg, Oscar.

MacCloskey, Ruth H., Corvallis, Oreg. Garment. 2,446,482, Aug. 3.

Marathon Corporation, assignee: *See*—
Farrell, Robert A., and Wagner.

Marien, Melvin W.: *See*—
Frisby, Frank D., and Marien.

Mark, Vennice E., and L. L. Anderson, Grand Rapids, assignors to Winters & Crampton Corporation, Grandville, Mich. Magnetic refrigerator door closure and seal. 2,446,336, Aug. 3.

Markham, Selwyn L., assignor to T. Yett, Houston, Tex. Gun perforator. 2,446,235, Aug. 3.

Marshall, Henry H., Garden City, N. Y., assignor, by mesne assignments, to Pabst Brewing Company, Chicago, Ill. Apparatus for inspecting moving transparent objects. 2,446,377, Aug. 3.

Martin, Frank G., Huntington, W. Va. Headrest. 2,446,483, Aug. 3.

Martin, Glenn L., The, assignee: *See*—
Eades, John H.

Mason, Willard J., Greenwich, Conn. Belt loading machine. 2,446,184, Aug. 3.

Masucci, Peter F., and L. Zola, Brooklyn, N. Y. Sliding seat supporting means. 2,446,185, Aug. 3.

Mathewson, E. B., Co., assignee: *See*—
Wittmann, Robert A.

Maxwell, William H., Elberton, Ga. Automatic saliva key for trombones. 2,446,378, Aug. 3.

McAfee, Clarence E., Hobart, Ind. Repairing and repaired cracked metal walls. 2,446,291, Aug. 3.

McArthur, Elmer D., Schenectady, N. Y., assignor to General Electric Company. Electron tube structure. 2,446,379, Aug. 3.

McClenahan, Francis M., Monmouth, Ill. Converting normal ammonium fluoride to ammonium bifluoride. 2,446,484, Aug. 3.

McConnell, Edmond S., Scarborough, N. Y., W. K. Priestley, West Barrington, and V. F. Volk, Bristol, R. I., assignors to United States Rubber Company, New York, N. Y. Insulated electrical conductor. 2,446,292, Aug. 3.

McDougall, George F., Portland, Oreg. Turn signal control for vehicles. 2,446,337, Aug. 3.

McGraw Electric Company, assignee: *See*—
Ireland, Murray.

McKeefrey, Elvira C., Associates, assignee: *See*—
Schoebel, Henry.

McMichael, Floyd J., Orlando, Fla. End ice bunker car having an adjustable ice rack. 2,446,485, Aug. 3.

Meier, Allen S., Xenia, Ohio, assignor to United States of America as represented by the Secretary of War. Fan antenna with tail. 2,446,186, Aug. 3.

Meister, Leo T., Hillside, N. J. Lined igniter-charge tube. 2,446,187, Aug. 3.

Melstrom, Donald S.: *See*—
Evans, Theodore W., and Melstrom.

Melton, Clarence C., assignor to Transcontinental & Western Air, Inc., Kansas City, Mo. Tank cleaning apparatus. 2,446,338, Aug. 3.

Merck & Co., Inc., assignee: *See*—
Pfister, Karl, III, and Tishler.

Merrill, Frederic D., Jr., Orange, N. J., assignor to Radio Corporation of America. Apparatus for producing indications of movement of an element. 2,446,428, Aug. 3.

Meyers, George L., Willoughby, and J. C. Shutt, Wickliffe, assignors to The Ohio Rubber Company, Willoughby, Ohio. Fluid seal. 2,446,380, Aug. 3.

Middleton, Hixon K., San Jose, Calif. Nursery toilet seat. 2,446,381, Aug. 3.

Miller Company, The, assignee: *See*—
Naysmith, Shirley R.

Miller, John M., Jr., Torrington, Conn. Bridge type modulator circuit. 2,446,188, Aug. 3.

Miller, Levi B., Lancaster Township, Lancaster County, Pa. Hand cultivating and weeding tool. 2,446,512, Aug. 3.

Miner, W. H., Inc., assignee: *See*—
Dath, George E.

Minister of Aircraft Production, The, assignee: *See*—
Dawson, Philip J.

Minneapolis-Honeywell Regulator Company, assignee: *See*—
Gille, Willis H.

Minyard, Ira T., Odessa, Tex. By-pass for rotary mud screens. 2,446,293, Aug. 3.

Mitchell, Lee W., assignor to Gates Rubber Company, Denver, Colo. High-speed belt. 2,446,294, Aug. 3.

Mochel, Walter E., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. 2-Fluoro-1,3-diene polymers. 2,446,382, Aug. 3.

Hillier, James.
Merrill, Frederic D., Jr.
Richmond, Martin R.
Schrader, Ross E.
Schroeder, Alfred C.
Swedlund, Lloyd E.

Radio Patents Corporation, assignee: *See*—
Rath, Karl.

Ramsey Accessories Manufacturing Corporation, assignee: *See*—
Frisby, Frank D., and Marien.

Ramseyer, Charles F., Old Greenwich, Conn., and C. M. Cosman, assignors to H. A. Brassert & Company, New York, N. Y. Preheating furnace blast. 2,446,188, Aug. 3.

Rank, Richard L., St. Louis, Mo. Clasp. 2,446,280, Aug. 3.

Rath, Karl, assignor to Radio Patents Corporation, New York, N. Y. Potentiometric amplifier. 2,446,290, Aug. 3.

Raytheon Manufacturing Company, assignee: *See*—
Stutsman, Paul W.

Reasor, Harold E., Melrose, Mass., assignor to United Shoe Machinery Corporation, Flemington, N. J. Machine for securing together marginal portions of shoes. 2,446,343, Aug. 3.

Rechain, Eugène, Neuilly-sur-Seine, assignor to Société Nationale de Constructions Aeronautiques Du Nord, Paris, France. Appliance for the access into streamline-shaped vehicles. 2,446,434, Aug.

Reece Corporation, The, assignee: *See*—
Putnam, John P.

Reeves, Herbert M., Kankakee, Ill., assignor to Florence Stove Company, Gardner, Mass. Combined closure and receptacle for gas ranges. 2,446,391, Aug. 3.

Rey, Secundino, Ramos Mejia, Argentina. Luminous telegraphing system. 2,446,392, Aug. 3.

Reynolds, Noel S., St. Louis, Mo. Seal construction. 2,446,243, Aug. 3.

Rice, Richard E., Waltham, assignor to I. B. Corporation, Cambridge, Mass. Producing half-tone relief imbibition matrices. 2,446,193, Aug. 3.

Rice, William Marsh, Institute for the Advancement of Literature, Science and Art, The, assignee: *See*—
Wier, Thomas P., Jr.
Wier, Thomas P., Jr., and Hurley.

Richmond, Martin R., Brooklyn, N. Y., assignor to Radio Corporation of America. Pulse-echo system. 2,446,244, Aug. 3.

Ritter, Jacob, assignor to M. Ritter, New York, N. Y. Offset axes multiple frames of handbags. 2,446,435, Aug. 3.

Ritter, Minnie, assignee: *See*—
Ritter, Jacob.

Röhm & Haas Company, assignee: *See*—
Croxall, Willard J., and Neher.

Roman, Charles, Miami, Fla. Composite wood product. 2,446,304, Aug. 3.

Rouault, Charles L., Schenectady, N. Y., assignor to General Electric Company. Beam antenna system. 2,446,436, Aug. 3.

Rubel, Charles F., assignor to Union Special Machine Company, Chicago, Ill. Sewing machine. 2,446,245, Aug. 3.

Russell, Robert C., Cleveland Heights, Ohio, assignor to Eaton Manufacturing Company, Detroit, Mich. Screw-threaded mechanical movement. 2,446,393, Aug. 3.

Sabel, Edward R., and F. I. Galbrecht, assignors to The Haloid Company, Rochester, N. Y. Photocopy machine. 2,446,246, Aug. 3.

Safeway Specialty Corporation, assignee: *See*—
Ziskind, Samuel.

Samiran, David, Osborn, Ohio. Pump construction. 2,446,194, Aug. 3.

Sandberg, Oscar, Defiance, assignor to Lynch Package Machinery Corporation, Toledo, Ohio. Strip feeder for wrapping machines. 2,446,305, Aug. 3.

Sangamo Electric Company, assignee: *See*—
Lovegrove, Henry J.

Sauer, George: *See*—
Christensen, Norman V., Sauer, and Smith.

Sauer, George, Berwyn, assignor to Union Special Machine Company, Chicago, Ill. Sewing machine. 2,446,306, Aug. 3.

Scaffolding (Great Britain) Limited, assignee: *See*—
Jones, William C., and Richards.

Schaafsma, Albert, Amsterdam, Netherlands, assignor to Shell Development Company, San Francisco, Calif. Regenerating spent internal-combustion engine lubricating oils. 2,446,489, Aug. 3.

Schaefer, Frederic, assignee: *See*—
Otterson, Oscar.

Schaerer, August A.: *See*—
Stewart, Hall, and Schaerer.

Scheineman, Fred W., assignor to Standard Oil Company, Chicago, Ill. Exothermic catalytic reactions. 2,446,247, Aug. 3.

Scherer, Wayne R., Trooper, assignor to Taylor Fibre Company, Norristown, Pa. Producing connector bars. 2,446,490, Aug. 3.

Schoebel, Henry, West Hempstead, Long Island, assignor to Elvira C. McKeefrey Associates, New York, N. Y. Brassière. 2,446,437, Aug. 3.

Schrader, Ross E., Princeton, N. J., assignor to Radio Corporation of America. Phosphor screen. 2,446,248, Aug. 3.

Schreiner, Norval P., Springfield, Mo. Convertible table. 2,446,491, Aug. 3.

Schroeder, Alfred C., Feasterville, Pa., assignor to Radio Corporation of America. Pickup tube for color televisions. 2,446,249, Aug. 3.

Scott, John C., Beckley, assignor to The New River Company, Mount Hope, W. Va. Underfeed domestic stoker. 2,446,492, Aug. 3.

Selfridge, Frank W.: *See*—
Williams, Ira, and Selfridge.

Selmer, H. & A., Inc., assignee: *See*—
Crowell, Milton B.

Shaw, Burton E., Lawrence, Mass., assignor to Penn Electric Switch Co., Goshen, Ind. Warp switch. 2,446,307, Aug. 3.

Shell Development Company, assignee: *See*—
Evans, Theodore W., and Melstrom.
Hearne, George W., and La France.
Schaafsma, Albert.
Stewart, Hall, and Schaerer.
Wagers, John K., and Shokal.

Shellmar Products Corporation, assignee: *See*—
Cox, John W.

Shive, Scott L., Detroit, Mich., assignor to the United States of America as represented by the Secretary of War. Tester for electrical shieldings. 2,446,195, Aug. 3.

Shokal, Edward C., assignee: *See*—
Wagers, John K., and Shokal.

Shuman, Royal L., Newark, N. J., assignor to Celanese Corporation of America. Stabilization and purification of alkyl phenols derived from petroleum. 2,446,250, Aug. 3.

Shutt, John C.: *See*—
Meyers, George L., and Shutt.

Silvia, Cyril L., Rockland, and A. Smith, Peabody, assignors to Boston Woven Hose and Rubber Company, Cambridge, Mass. Jar ring. 2,446,493, Aug. 3.

Simpson, William: *See*—
Buchanan, William K., and Simpson.

Sitney, Massey, Berkeley, Calif. Double seal valve. 2,446,196, Aug. 3.

Slaunter, C. Henry: *See*—
Love, Lee C., Slaunter, and Orthoefer.

Sloan, Francis P., Wilton, Conn. Gun-aling. 2,446,197, Aug. 3.

Smith, A. L., Iron Company, assignee: *See* —
Kruger, Michael H.

Smith, Austin: *See*—
Silvia, Cyril L., and Smith.

Smith, Clarence C.: *See*—
Christensen, Norman V., Sauer, and Smith.

Smith, Joseph D., Toronto, Ontario, Canada. Snow fence machine. 2,446,494, Aug. 3.

Smith, Louis B., Chicago, Ill. Package. 2,446,308, Aug. 3.

Smith, William G., Portland, Oreg. Storage elevator system for automobiles. 2,446,344, Aug. 3.

Smithers, Clifford B., Chillicothe, assignor of twenty-five per cent to E. Staub, Peoria, Ill. Rail anchoring means. 2,446,495, Aug. 3.

Snow, Howard, and R. H. Hocutt, Charlotte, N. C., assignors to Southern Friction Materials Company. Preparing fibrous molding compositions. 2,446,345, Aug. 3.

Societe D'Etude Pour l'Industrie Du Magnesium, assignee: *See*—
Bassereau, Georges.

Societe Nationale de Constructions Aeronautiques Du Nord, assignee: *See*—
Rechain, Eugène.

Socke, John E., Pelham Manor, assignor to American Can Company, New York, N. Y. Cutting blanks. 2,446,198, Aug. 3.

Socony-Vacuum Oil Company, Incorporated, assignee: *See*—
Branson, Otis L.
Cauley, Stephen P.

Southern Friction Materials Company, assignee: *See*—
Snow, Howard, and Hocutt.

Sperry Corporation, The, assignee: *See*—
Haskins, Robert, Jr.

Standard Oil Company, assignee: *See*—
Johnson, Carl E.
Scheineman, Fred W.

Standard Oil Development Company, assignee: *See*—
Ferguson, Robert P.

Starr, John A., Riverdale, N. Y. Gas generator. 2,446,309, Aug. 3.

Staub, Ernest, assignee: *See*—
Smithers, Clifford B.

Steenstrup, Paul V.: *See*—
Nelson, John D., and Steenstrup.

Steinke, Theodore W., assignor to Gates Rubber Company, Denver, Colo. V-type belt. 2,446,310, Aug. 3.

Stellpflug, August W.: *See*—
Tait, Wilfred E., and Stellpflug.

Stewart, Hall, Oakland, and A. A. Schaerer, El Cerrito, assignors to Shell Development Company, San Francisco, Calif. Separation of hydrocarbon mixtures. 2,446,514, Aug. 3.

Stoller, Irvin A., Latty, Ohio. Honeycomb frame support and spacer. 2,446,346, Aug. 3.

Streamline Plastics Company, assignee: *See*—
Brenner, Harry.

Stricklin, Travie W., Gordon Heights, Del., assignor to the United States of America as represented by the United States Atomic Energy Commission. Joint fillers. 2,446,251, Aug. 3.

Strock, Donald V., assignor to The Aetna-Standard Engineering Company, Youngstown, Ohio. Drawbench. 2,446,438, Aug. 3.

Stromelly, Joseph A., New York, N. Y. Earring clamp. 2,446,252, Aug. 3.

Strumor, Mathew A., Brooklyn, N. Y. Bouncing whistling toy. 2,446,439, Aug. 3.

Stutsman, Paul W., Needham, assignor to Raytheon Manufacturing Company, Newton, Mass. Starting circuit for gaseous discharge devices. 2,446,199, Aug. 3.

Sulzbacher, Max: *See*—
Bergmann, Ernst, and Sulzbacher.

Sulzer Freres Societe Anonyme, assignee: *See*—
Kliebenmann, Walter.

Sunseri, Marguerite H., Pittsburgh, Pa. Child's garment. 2,446,394, Aug. 3.

Super-Seal Container Corporation, assignee: *See*—
Glocker, Gustave.

Swedlund, Lloyd E., Lancaster, Pa., assignor to Radio Corporation of America. Color television tube. 2,446,440, Aug. 3.

T-M-K Corporation, assignee: *See*—
Benson, Merle K.

Tait, Wilfred E., Westport, and A. W. Stellpflug, Weston, Conn., assignors to American Safety Razor Corporation, Brooklyn, N. Y. Coacting shutter and lens combination for camera film holders. 2,446,200, Aug. 3.

Tantz, Herbert E., Denver, assignor to Hechethorn Mfg. & Supply Co., Littleton, Colo. Making gas cocks. 2,446,496, Aug. 3.

Taylor, Alanson O., Lansdowne, Pa. Cargo airplane. 2,446,441, Aug. 3.

Taylor Fibre Company, assignee: *See*—
Scherer, Wayne R.

Taylor, John R., Westmount, Quebec, Canada. Absorption of ammonia in soda ash production. 2,446,442, Aug. 3.

Thomas, Alden P., assignor to The Timken Roller Bearing Company, Canton, Ohio. Fuel injection apparatus. 2,446,497, Aug. 3.

Tibbetts Laboratories, Inc., assignee: *See*—
Tibbetts, Raymond W.

Tibbetts, Raymond W., assignor to Tibbetts Laboratories, Inc., Camden, Maine. Method and apparatus for shaping crystal bodies. 2,446,443, Aug. 3.

Timken Roller Bearing Company, The, assignee: *See*—
Thomas, Alden P.

Tishler, Max: *See*—
Pfister, Karl, III, and Tishler.

Trackson Company, assignee: *See*—
Erdhal, Nicholas M.

Transcontinental & Western Air, Inc., assignee: *See*—
Melton, Clarence C.

Traxler, Eugene R., Stow, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Power-transmission belt. 2,446,311, Aug. 3.

Trepagnier, Joseph H., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Preparing p-quinone dioxime. 2,446,165, Aug. 3.

Tresidder, Herbert E., Royal Oak, Mich. Line holder. 2,446,253, Aug. 3.

Turner, Charles G., Atlanta, Ga., assignor to Turner Manufacturing Company, Incorporated. Apparatus for working, conveying, and cutting dough. 2,446,201, Aug. 3.

Turner Manufacturing Company, Incorporated, assignee: *See*—
Turner, Charles G.

Turner, Richard G., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Pull-off and clamp for thread cutters. 2,446,444, Aug. 3.

Underwood, George T., Chehalis, Wash. Liquid air boiler. 2,446,498, Aug. 3.

Union Special Machine Company, assignee: *See*—
Christensen, Norman V., Sauer, and Smith.
Rubel, Charles F.
Peterson, Albert C., and Hayes.
Rubel, Charles F.
Sauer, George.

Union Switch & Signal Company, The, assignee: *See*—
Dodd, Arthur E.

United Shoe Machinery Corporation, assignee: *See*—
Holmgren, Eric A.
Reason, Harold E.

United States Atomic Energy Commission, United States of America as represented by the, assignee: *See*—
Newell, Floyd B.
Strickiln, Travie W.

United States Rubber Company, assignee: *See*—
Harding, Watson G.
McConnell, Edmond S., Priestley, and Volk.
Prill, Erhard J.

Universal Oil Products Company, assignee: *See*—
Hulsberg, Herbert A.

Usina, Francis B., Covington, La. Garment hanger. 2,446,312, Aug. 3.

Valk, William E., assignee, et al.: *See*—
Chilton, Roland.

Van Alsburg, Jerold H., assignors to Hart & Cooley Manufacturing Company, Holland, Mich. Window stool air outlet. 2,446,356, Aug. 3.

Van Amstel, Johannes J. A. P., Eindhoven, Netherlands, assignor to Hartford National Bank & Trust Co., Hartford, Conn., as trustee. Blocking-layer cell. 2,446,254, Aug. 3.

Vance, William G. C.: *See*—
Flurschelm, Cedric H., and Vance.

Van Denberg, Donald E., Rockford, Ill. Coffee filter. 2,446,499, Aug. 3.

Van Dusen, Frederick J., Jackson Heights, N. Y. Shock resisting retainer. 2,446,445, Aug. 3.

Vang, Alfred, Newark, N. J. Induction heat-treatment. 2,446,202, Aug. 3.

Van Hofweegen, Johannes M.: *See*—
Knol, Kornelis S., and van Hofweegen.

Van Hove, Desire H., Northville, assignor to Falls Spring & Wire Company, Detroit, Mich., and Great Lakes Spring Corporation, Chicago, Ill. Upholstery spring structure. 2,446,500, Aug. 3.

Vedensky, Dmitri, Berkeley, Calif. Production of electrolytic manganese. 2,446,213, Aug. 3.

Vigorith, Anthony, Cincinnati, Ohio. Turn shoe and manufacture. 2,446,357, Aug. 3.

Vitoux, Marcel, Paris, France, assignor to American Vitos Company, Inc., New York, N. Y. Pneumatically operated mending device. 2,446,203, Aug. 3.

Vitoux, Marcel, Paris, France, assignor to American Vitos Company, Inc., New York, N. Y. Pneumatically operated mending device. 2,446,204, Aug. 3.

Vocisano, Domenico, Montreal, Quebec, Canada. Form clamping support. 2,446,258, Aug. 3.

Vold, Lester, assignee, et al.: *See*—
Pfeffer, William M.

Volk, Victor F.: *See*—
McConnell, Edmond S., Priestley, and Volk.

Wagers, John K., Berkeley, and E. C. Shokal, Oakland, assignors to Shell Development Company, San Francisco, Calif. Preparation of soluble polymers of unsaturated esters of polycarboxylic acids. 2,446,314, Aug. 3.

Wagner, Charley L.: *See*—
Farrell, Robert A., and Wagner.

Walkowiak, Edward L., Saginaw, Mich. Trailer ball bolt guard. 2,446,347, Aug. 3.

Wallace, Columbus C., Fort Henry, Tenn. Vehicle spring supporter. 2,446,395, Aug. 3.

War, United States of America as represented by the Secretary of, assignee: *See*—
Meier, Allen S.
Shive, Scott L.

Waranch, Theodore, assignor to The Comfy Manufacturing Company, Baltimore, Md. Cushion cover. 2,446,396, Aug. 3.

Wargin, Edward F., San Anselmo, Calif., and J. R. Harkness, Schenectady, N. Y., assignors to General Electric Company. Breakerless magneto. 2,446,446, Aug. 3.

Wartell, Fred, Bronx, N. Y. Spinning top. 2,446,447, Aug. 3.

Weber, Theodore E.: *See*—
Davis, Russell E., and Weber.

Weber, William J., Lyndhurst, assignor to S. Crewe, Cleveland, Ohio. Dispensing device for viscous materials. 2,446,501, Aug. 3.

Webster, Philip S., North Muskegon, Mich. Piston. 2,446,348, Aug. 3.

Wehrli, Jean, Weinfelden, Switzerland. Steam fixing coloring material in textile goods. 2,446,502, Aug. 3.

Weingart, Richard I. N., Glen Head, N. Y. Forming bearing structures. 2,446,515, Aug. 3.

Welte, Benedict, Lake Orion Township, Oakland County, assignor to Colonial Broach Company, Detroit, Mich. Hydraulic circuit for effecting sequential operation of a plurality of positive displacement hydraulic motors of different sizes. 2,446,397, Aug. 3.

Wenner, Wilhelm, Montclair, assignor to Hoffmann-La Roche Inc., Nutley, N. J. Making 5-monoalkyl-barbituric acids. 2,446,503, Aug. 3.

Wenner, Wilhelm, Montclair, assignor to Hoffmann-La Roche Inc., Nutley, N. J. Carboxylated monosubstituted barbituric acid. 2,446,504, Aug. 3.

Western Equipment Company, assignee: *See*—
Morrison, Clifford.

Whitehead, Charles R.: *See*—
Barrett, Charles D., and Whitehead.

Whitman, Hyman L., East Bridgewater, Mass., assignor to The B. F. Goodrich Company, New York, N. Y. Article of footwear and corrective sole therefor. 2,446,448, Aug. 3.

Whitman, Hyman L., East Bridgewater, Mass., assignor to The B. F. Goodrich Company, New York, N. Y. Arch support member. 2,446,449, Aug. 3.

Wickersham, Marshall E., and W. D. Allison, Detroit, Mich. Multiaxle vehicle. 2,446,205, Aug. 3.

Wier, Thomas P., Jr., Berkeley, Calif., and F. H. Hurley, Portland, Oreg., assignors to The William Marsh Rice Institute for Advancement of Literature, Science and Art. Electrodeposition of aluminum. 2,446,349, Aug. 3.

Wier, Thomas P., Jr., Berkeley, Calif., assignor to The William Marsh Rice Institute for the Advancement of Literature, Science and Art. Electrodeposition of aluminum. 2,446,350, Aug. 3.

Williams, Ira, and F. W. Selfridge, assignors to J. M. Huber Corporation, Borger, Tex. Manufacture of carbon black. 2,446,351, Aug. 3.

Williams, John P., Nashville, Tenn. Holding means for ice-cream cans and cartons. 2,446,315, Aug. 3.

Willis, Bernard D., deceased, Oak Park, by Wm. Walter Owen, executor, Elgin, Ill., assignor to Automatic Electric Laboratories, Inc. Gun sighting and training apparatus. 2,446,316, Aug. 3.

Wilshusen, Wilmer L., Garden City, Kans. Plug for electric circuit. 2,446,317, Aug. 3.

Wilson, Charley S., Pindall, Ark. Handy comb. 2,446,398, Aug. 3.

Winter, Arthur G., Pleasant Ridge, Mich., assignor to G. M. and E. Holley. Automatic choke. 2,446,352, Aug. 3.

Winters & Crampton Corporation, assignee: *See*—
Mark, Vennice E., and Anderson.

Wittmann, Robert A., assignor to E. B. Mathewson Co., Chicago, Ill. Temperature responsive control device. 2,446,353, Aug. 3.
Wolfe, Benjamin M., Monterey Park, Calif. Fishing reel. 2,446,354, Aug. 3.
Woods, Robert J., Grand Island, assignor to Bell Aircraft Corporation, Buffalo, N. Y. Aircraft engine support. 2,446,399, Aug. 3.
Woolley, Rew E., Cleveland Heights, Ohio, assignor to Bailey Meter Company. Chart supporting and feeding means for recording instruments. 2,446,400, Aug. 3.
Wright, Fred J., Upper Arlington, Ohio, assignor, by mesne assignments, to The Jeffrey Manufacturing Company. Detent mechanism for pressure regulators. 2,446,355, Aug. 3.
Wurlitzer, Rudolph Company, The, assignee: *See*—
Hokanson, Otto A.
Yarbor, James M., assignee: *See*—
Nickell, John B.
Yates, Cecil F., North Hollywood, and C. B. Nolte, Altadena, assignors to The Thor Corporation, Ltd., Los Angeles, Calif. Liquid seal pulsation dampener. 2,446,358, Aug. 3.
Yett, Tommy, assignee: *See*—
Markham, Selwyn L.
Young, Charles F., Philadelphia, Pa. Aircraft cable guide pulley. 2,446,318, Aug. 3.
Young, John C., Pittsburgh, Pa. Downspout strainer. 2,446,256, Aug. 3.
Ziegler, Edward F., Reading, Mass. System for controlling lighting circuits. 2,446,450, Aug. 3.
Ziskind, Samuel, assignor to Safeway Specialty Corporation, New York, N. Y. Window cleaner. 2,446,401, Aug. 3.
Zisman, William A.: *See*—
Hain, George M., and Zisman.
Zola, Leonard: *See*—
Masucci, Peter F., and Zola.

LIST OF REISSUE INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 3D DAY OF AUGUST, 1948

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice).

Gynecologic instruments. E. H. Edwards. Re. 23,022, Aug. 3.
Photoelectric cell circuit. A. Wolf and G. Herzog. Re. 23,023, Aug. 3.

LIST OF DESIGN INVENTIONS

Airplane. K. F. Lovejoy and D. B. Peat. 150,434, Aug. 3.
Atomizer. K. K. Miller. 150,436, Aug. 3.
Bicycle sidecar. H. H. Lockman. 150,433, Aug. 3.
Bottle, Perfume. L. de Lescinskis. 150,406, Aug. 3.
Bracelet or similar article. A. Philippe. 150,449, Aug. 3.
Brooch or similar article. C. Arpels. 150,393, Aug. 3.
Brooch or similar article. A. Katz. 150,418–29, Aug. 3.
Brooch or similar article. A. Philippe. 150,446–7, Aug. 3.
Brooch or similar article. A. Philippe. 150,450–5, Aug. 3.
Candle. A. Donahue. 150,407, Aug. 3.
Car, Coaster. T. B. Brickson. 150,401, Aug. 3.
Cart, Milk. R. J. Swenson. 150,475, Aug. 3.
Chaise longue. A. Roth. 150,461, Aug. 3.
Coffee maker, Vacuum H. Wohl. 150,482, Aug. 3.
Cooler casing, Evaporative. O. C. Palmer. 150,440, Aug. 3.
Dispensing head for a butane system. S. L. Pitzer. 150,459, Aug. 3.
Earring or similar article. A. Katz. 150,430, Aug. 3.
Earring or similar article. A. Philippe. 150,443–5, Aug. 3.
Earring or similar article. A. Philippe. 150,448, Aug. 3.
Egg opener and divider or similar article. V. E. Murray. 150,438, Aug. 3.
Egg tray or the like. H. C. Gulley. 150,414, Aug. 3.
Fabric, Textile. E. M. Patterson. 150,442, Aug. 3.
Fish lure. J. S. Kuslich. 150,431, Aug. 3.
Fishing rod. J. Carlson. 150,402, Aug. 3.
Fork or similar article of flatware. M. Weeber. 150,479, Aug. 3.
Frame, Picture. A. Tumminello. 150,477, Aug. 3.
Frame, Spectacle. V. Sallerno. 150,464, Aug. 3.
Gate. C. Baca. 150,394, Aug. 3.
Hammer and pounding toy, Combined. P. Miller. 150,437, Aug. 3.
Heater, Electric. W. H. Seymour. 150,470, Aug. 3.
Helicopter. A. M. Young and M. H. Gleason. 150,483, Aug. 3.
Holder, Roll tissue. R. E. James. 150,417, Aug. 3.
Jacket. J. Freedman. 150,409, Aug. 3.
Juicer, Fruit. D. Bergen and D. Cohl. 150,398, Aug. 3.
Lace or the like. A. Gottlieb. 150,413, Aug. 3.
Lamp and desk unit, Combined. J. L. Coen. 150,404, Aug. 3.
Legging. H. D. Stalie. 150,473, Aug. 3.
Lighting fixture. L. J. Coneglio. 150,405, Aug. 3.
Link chain for bracelet or similar article. M. Chernow. 150,403, Aug. 3.
Microfilm viewer. H. L. Gordon. 150,412, Aug. 3.
Microphone unit or the like and pedestal therefor. S. W. Pike. 150,457–8, Aug. 3.
Motorcycle. A. R. Russell. 150,462, Aug. 3.
Mowing machine, Power. L. B. Goodall. 150,411, Aug. 3.
Necklace or similar article. A. Philippe. 150,456, Aug. 3.
Play yard equipment. R. T. Bowden and G. B. Roberts. 150,400, Aug. 3.
Plug, Connector. A. Giammatteo. 150,410, Aug. 3.
Port leg flange. E. T. Price. 150,460, Aug. 3.
Price tag molding and trim. F. G. Schuler. 150,466, Aug. 3.
Rack, Razor. B. Seidel. 150,469, Aug. 3.
Railway vehicle. R. W. Haman and S. W. Kay. 150,415, Aug. 3.
Rattle or the like, Baby. H. Wapnick. 150,478, Aug. 3.
Razor, Electric. P. C. Nellsen. 150,439, Aug. 3.
Roller, Tandem road. O. L. Berby. 150,396, Aug. 3.
